UX WALKTHROUGH VIDEO

Seven lessons on decisions, flows and trade-offs.

1. Start with the decision
2. Design the way back
3. Context beside the decision
4. Make every state readable
5. Plan the test first
6. Say what's being reviewed
7. Carry intent into the build

https://lnkd.in/p/gMNK7Cik

CONTENTS

Each project opens with my redesign of the full experience: sitemap, flow and wireframes. The original work follows.

Short version · the full deck includes every flow and all wireframe screens.

01 Game Genius p. 4

02 NZM p. 7

03 TNT p. 10

04 MechWarrior 5 p. 13

05 Multiplayer p. 16

06 Cyber Tumble p. 19

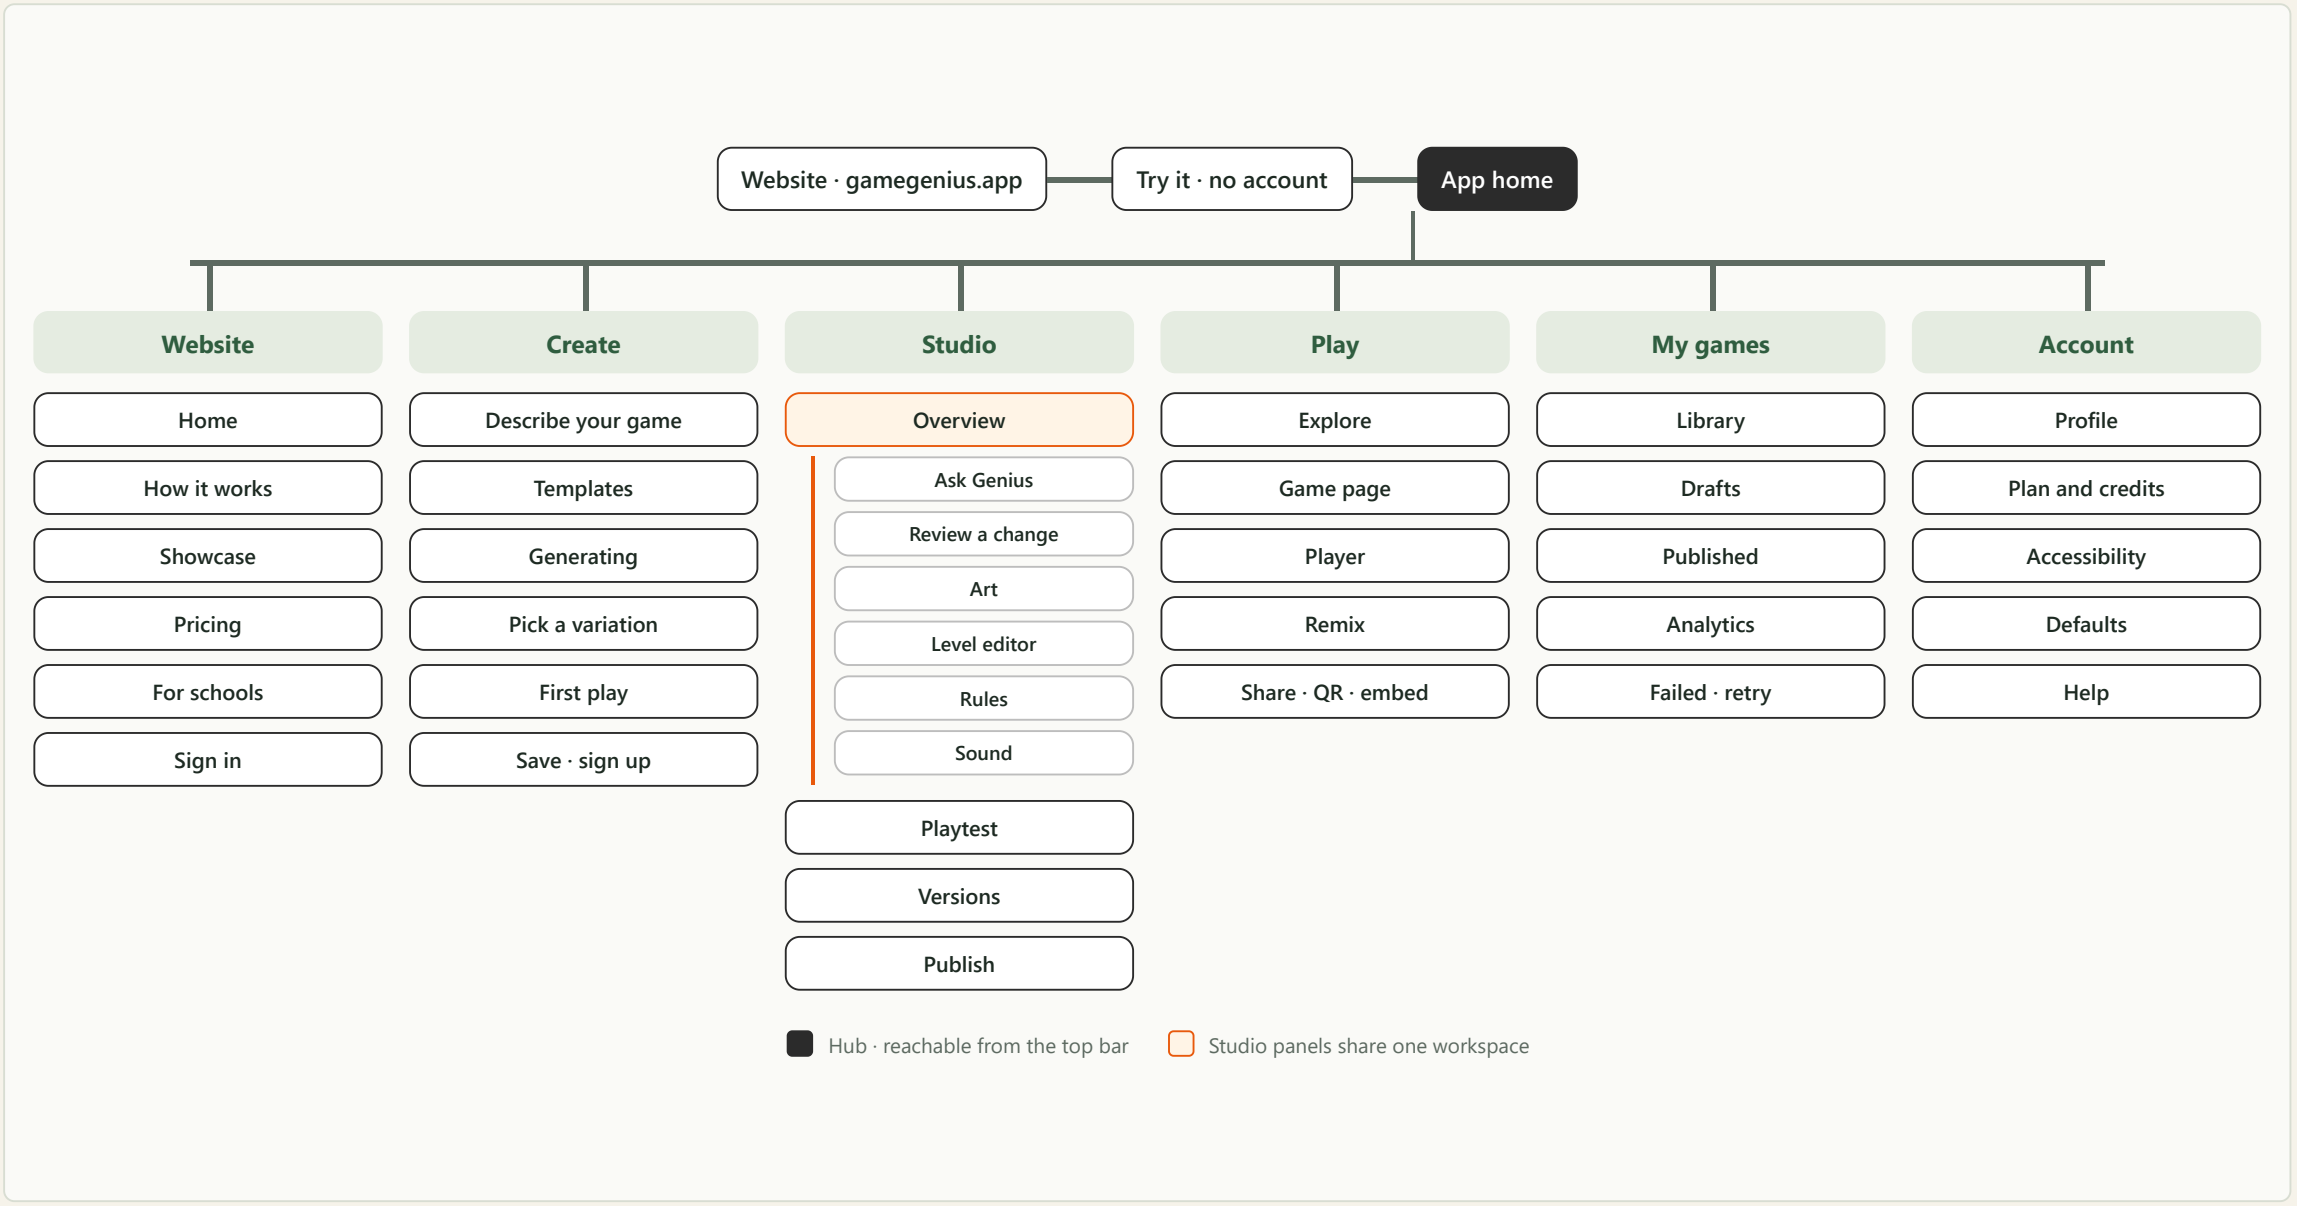

07 Project Ares p. 22

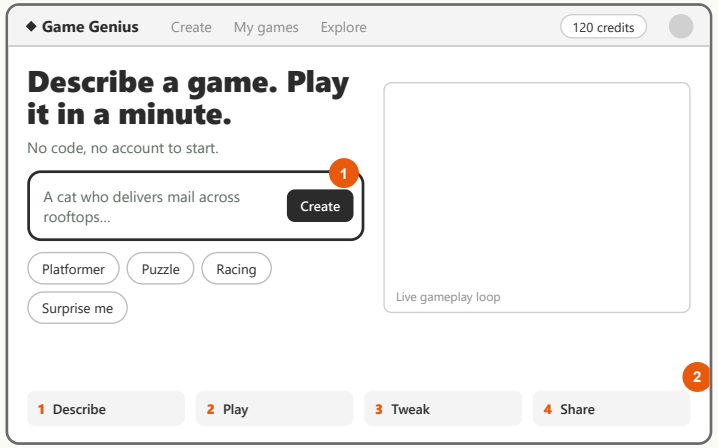

08 Kryss p. 25

09 Stardust Canvas p. 28

10 Bingo Story p. 31

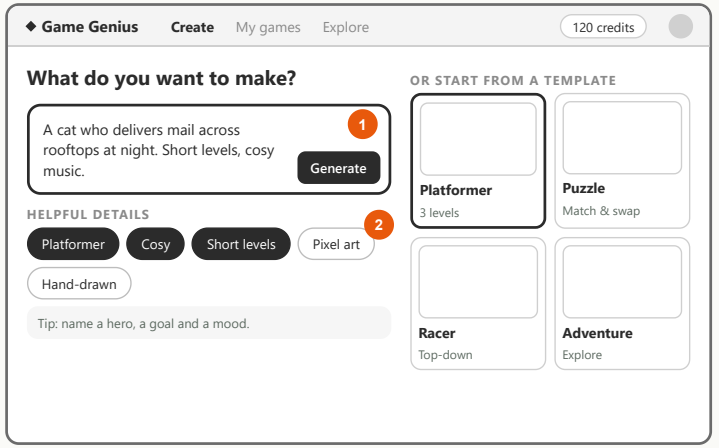

11 Live-game teardowns p. 33

1 Landing page

1. The prompt box is the hero; trying needs no sign-up.
2. Four steps explain the whole product.

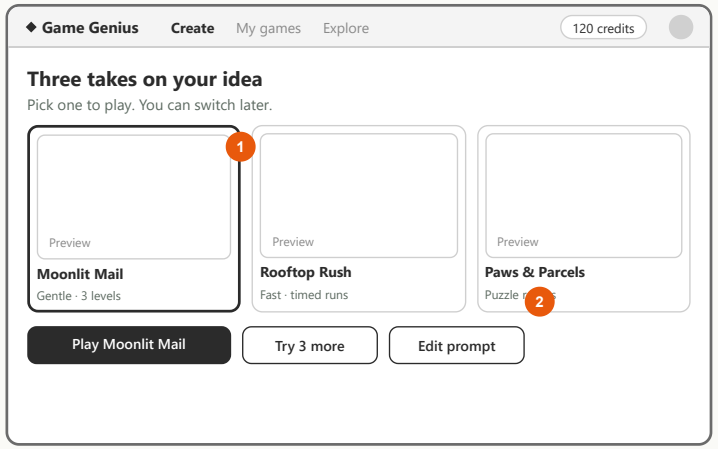

2 Describe your game

1. Free text first, with chips that teach good prompts.
2. Templates for people who prefer to pick.

3 Generating

1. Real stages, not a spinner.
2. Cancel is always available.
3. Assets appear as they are made.

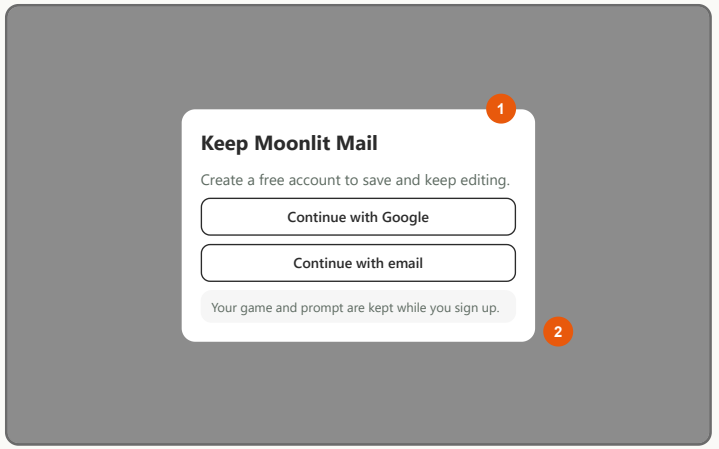

4 Pick a variation

1. Choice without a blank page.
2. More variations or a prompt edit, never a dead end.

5 Play the first version

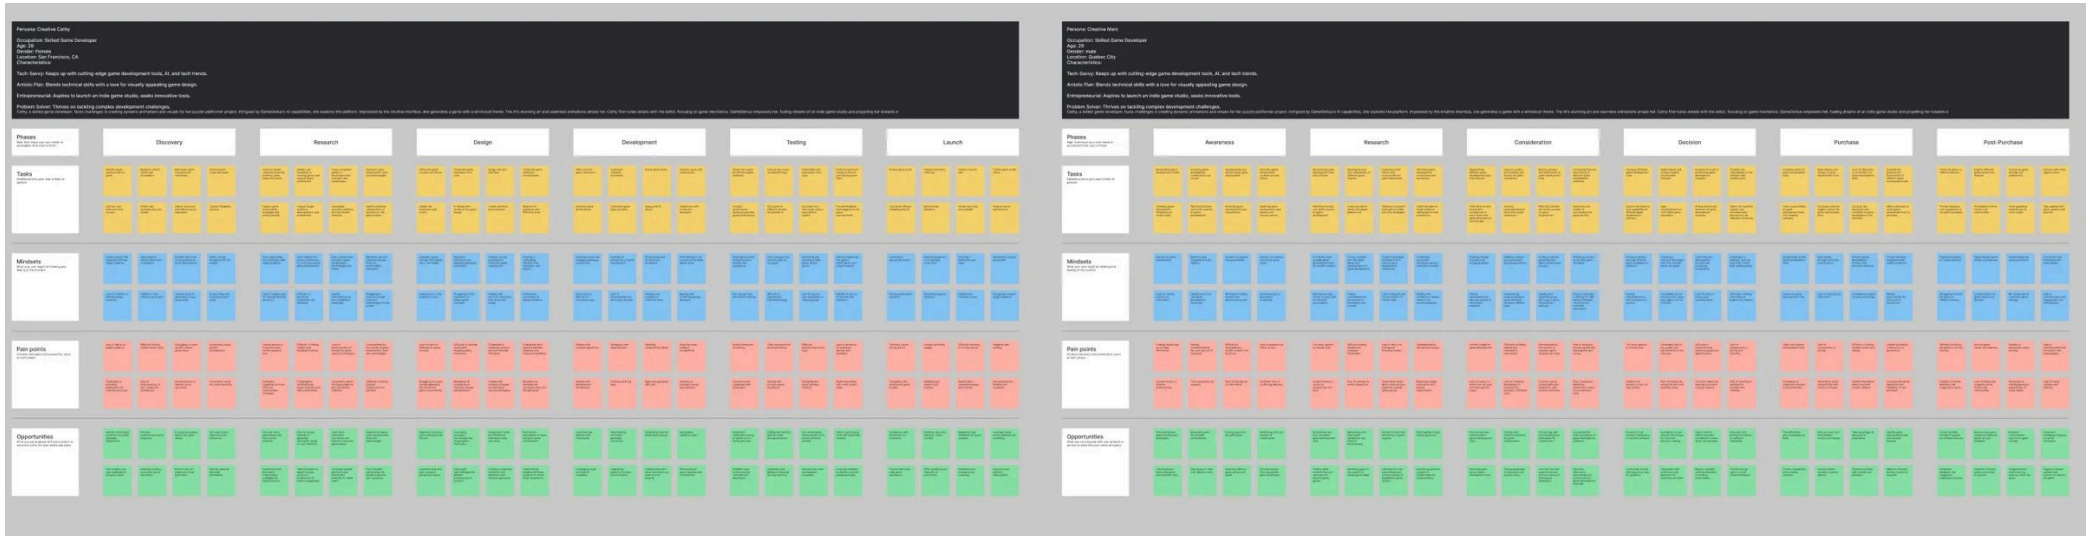

1. Controls are shown on screen, then fade.
2. Two clear next steps after playing.

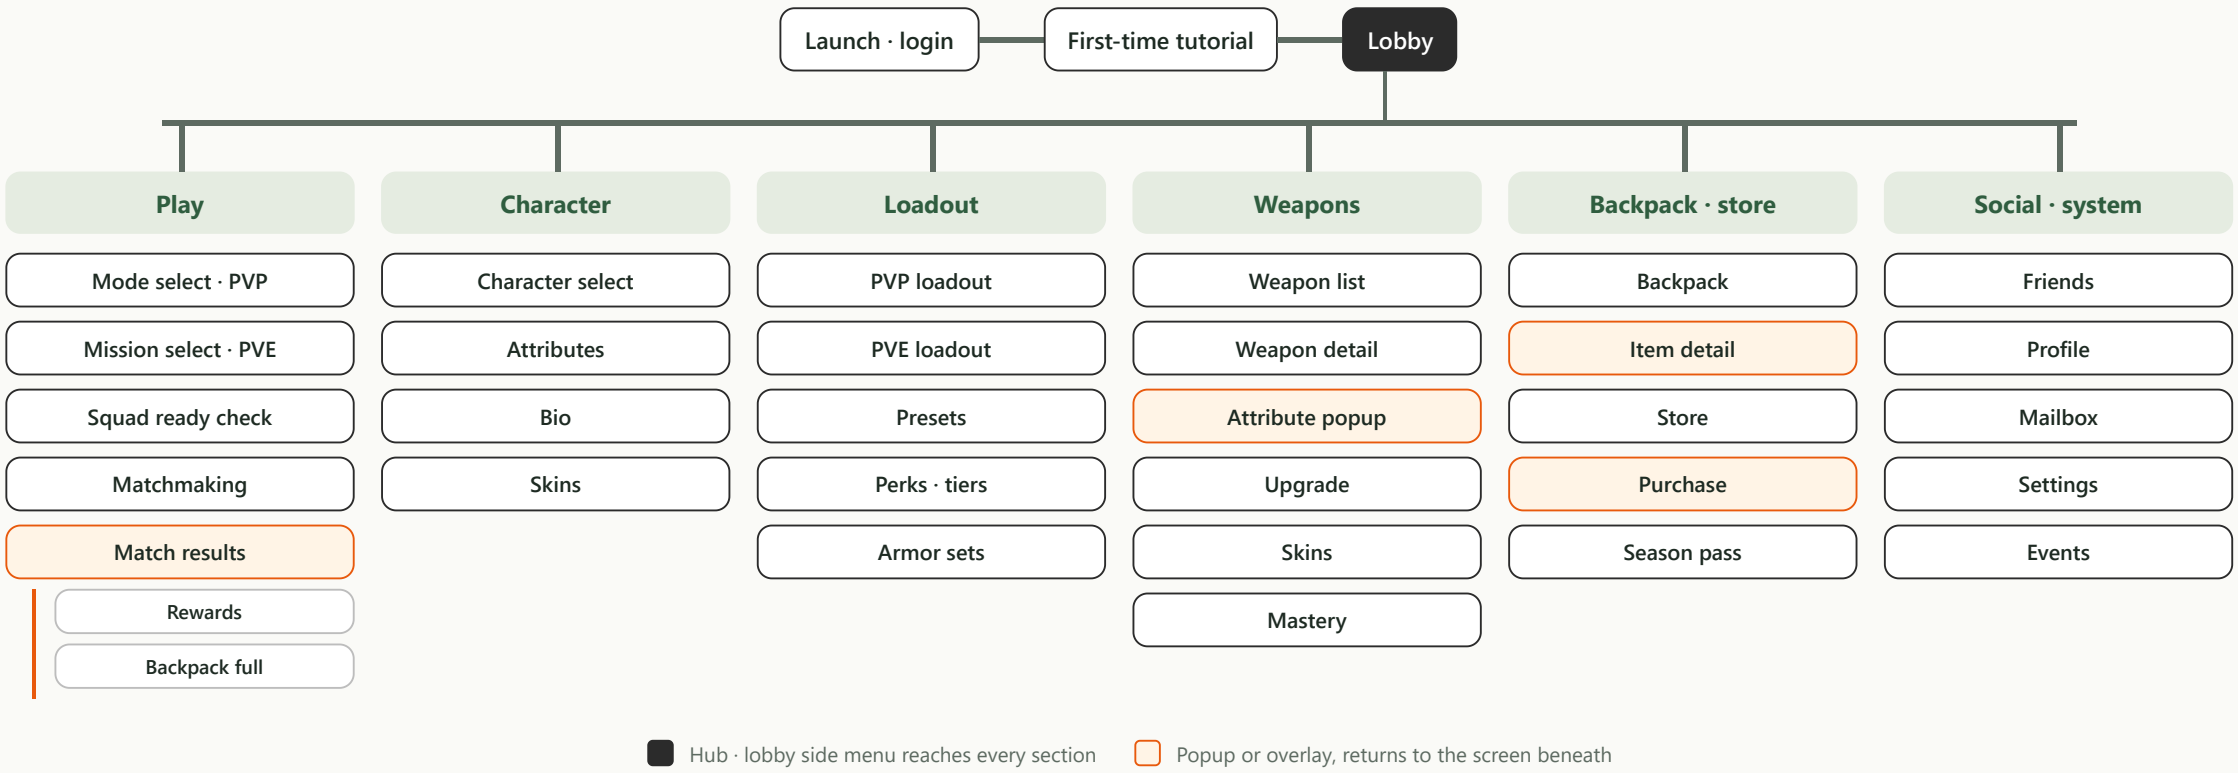

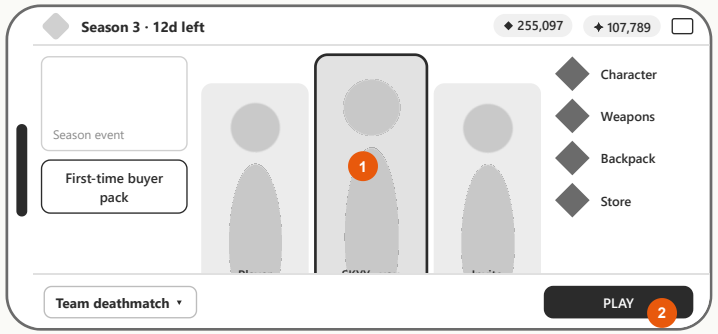

6 Save your game

1. Sign-up arrives when there is something to lose.
2. Nothing is lost during sign-up.

Persona: Creative Cathy
Occupation: Skilled Game Developer
Age: 28

1 Lobby

1. Your character is the centre; squad slots beside it.
2. Mode and Play sit together, bottom right, under the thumb.

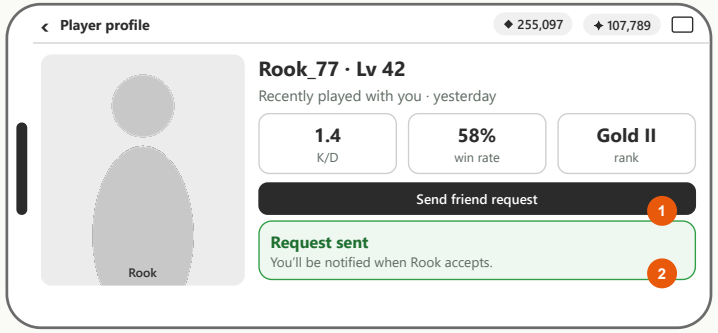

2 Mode select

1. PVP and PVE are separate tabs with their own rules.
2. Says which loadout the mode will use.

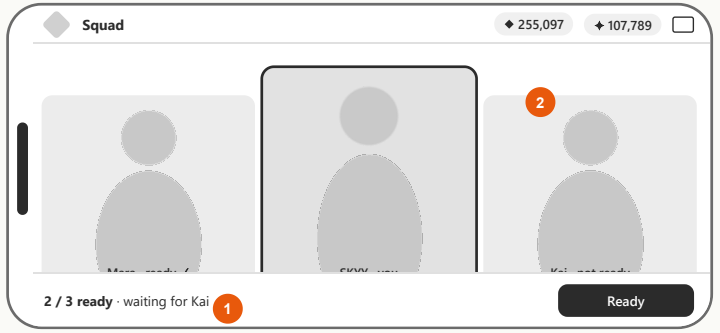

3 Friends

1. Status says who can join right now.
2. Actions appear for the selected friend only.

4 Player profile

1. A few stats help decide who to add.
2. The button becomes a sent state, not a dead end.

5 Squad ready check

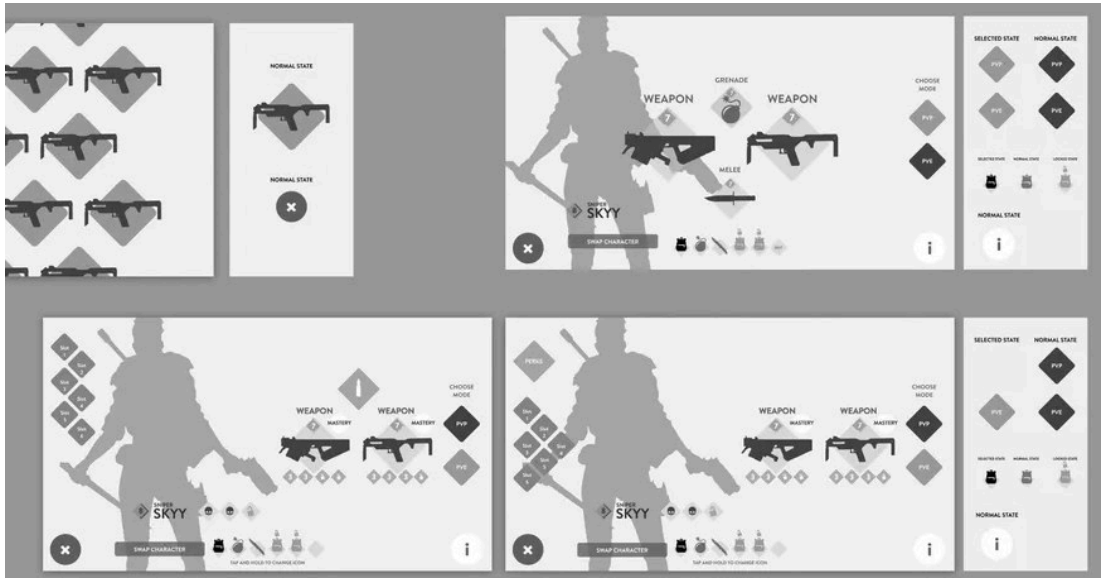

1. Readiness is a count in words.
2. Each slot says who it is and their state.

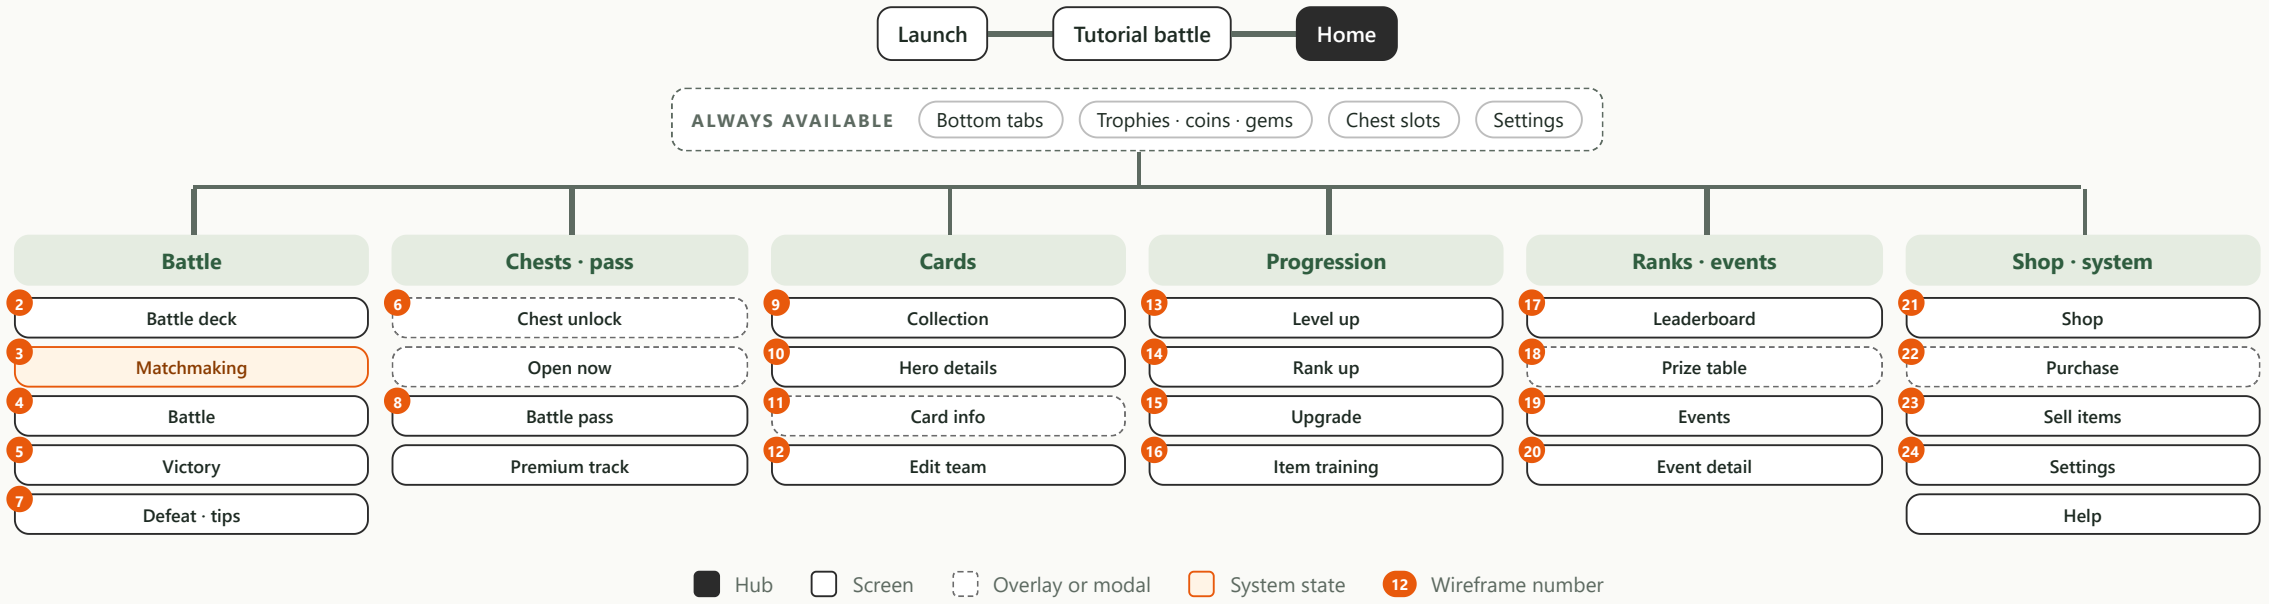

6 Matchmaking

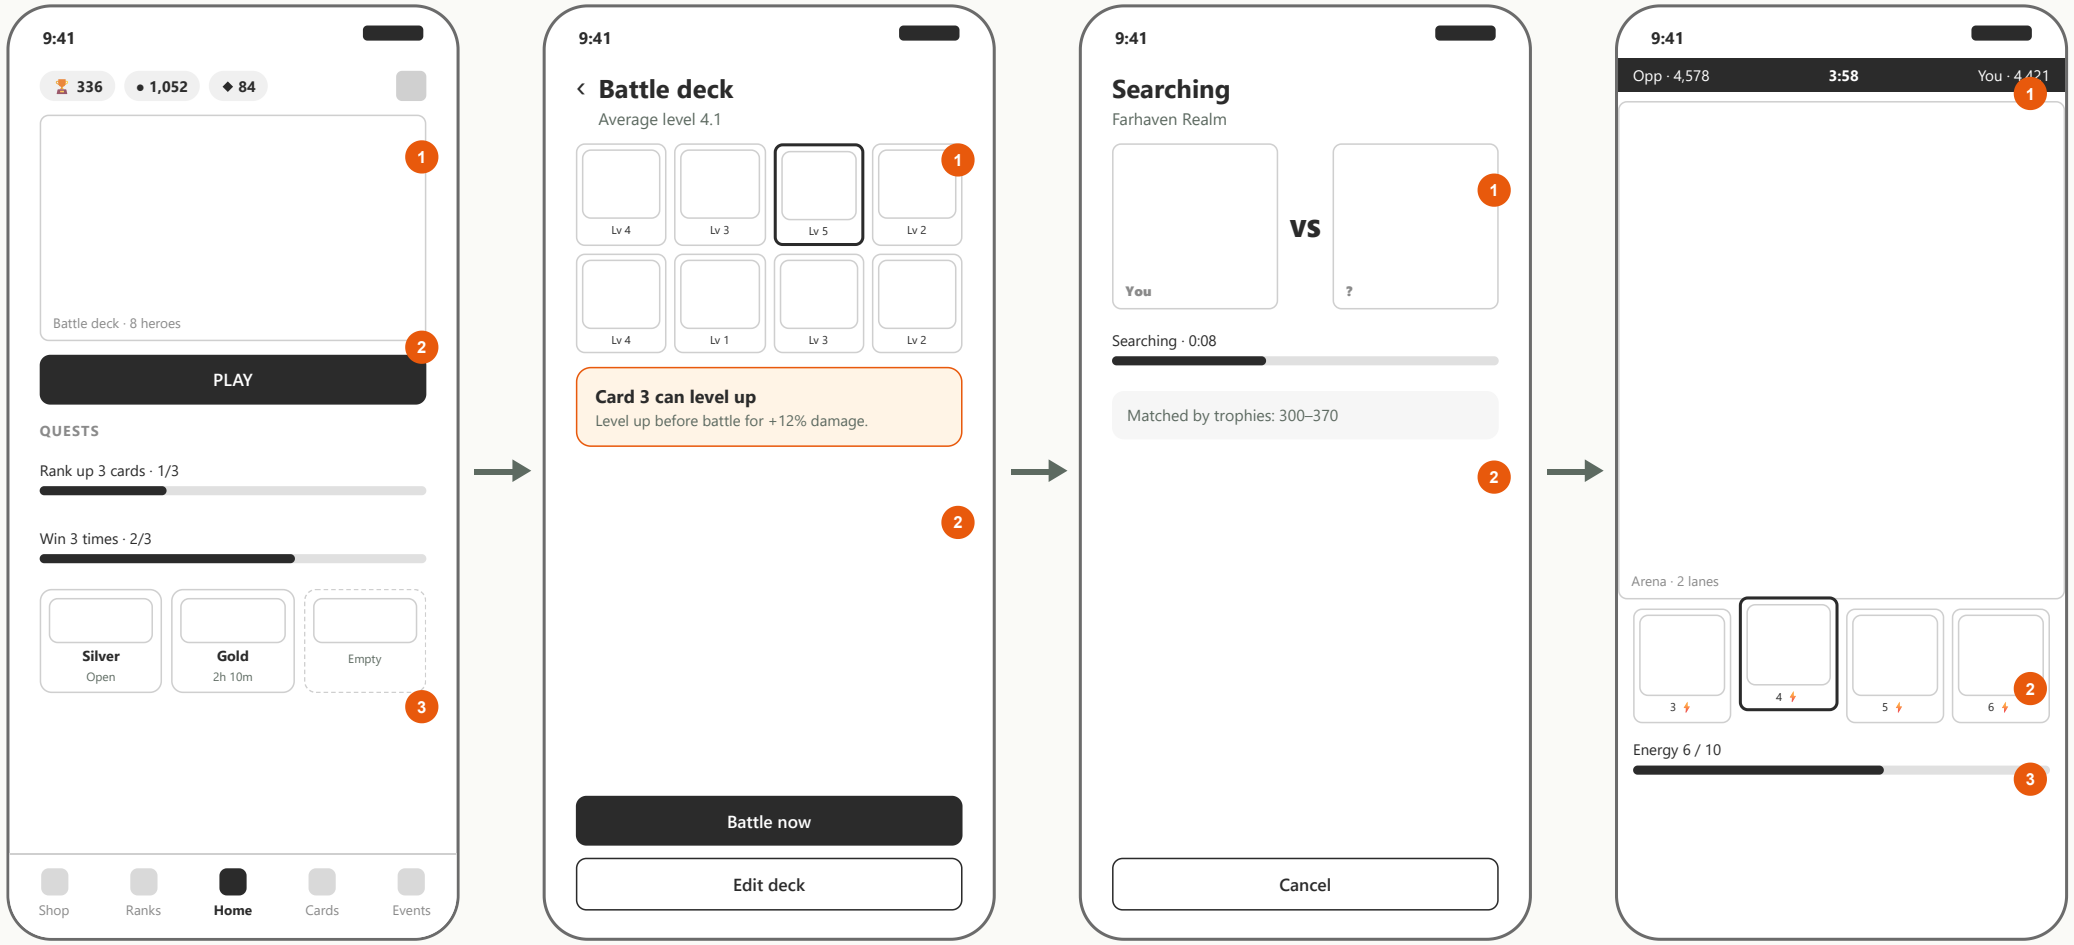

1. Elapsed and estimated time.
2. Cancel returns the squad together.

1 Home

1. Play is the one big action on Home.
2. Quests show progress, not just a list.
3. Chest slots show ready, timing and empty.

2 Check the deck

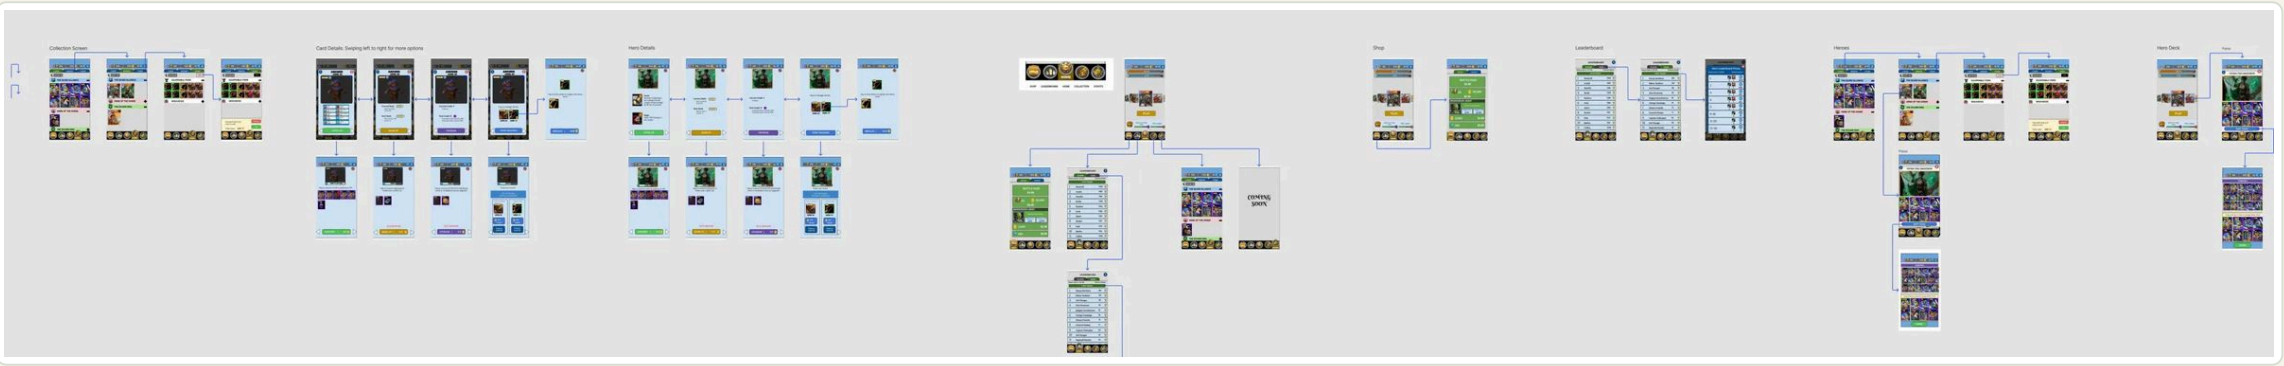

1. The deck is reviewed before every match.
2. Suggests an upgrade, never forces it.

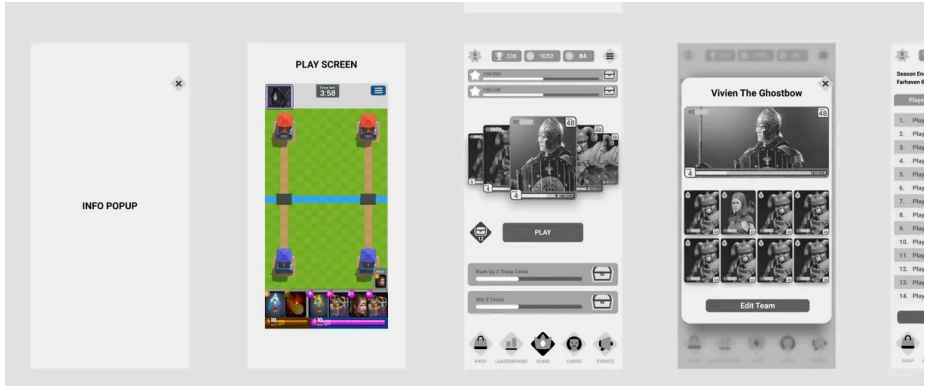

3 Finding an opponent

1. Both sides mirrored; the opponent appears when found.
2. Explains how the opponent is chosen.

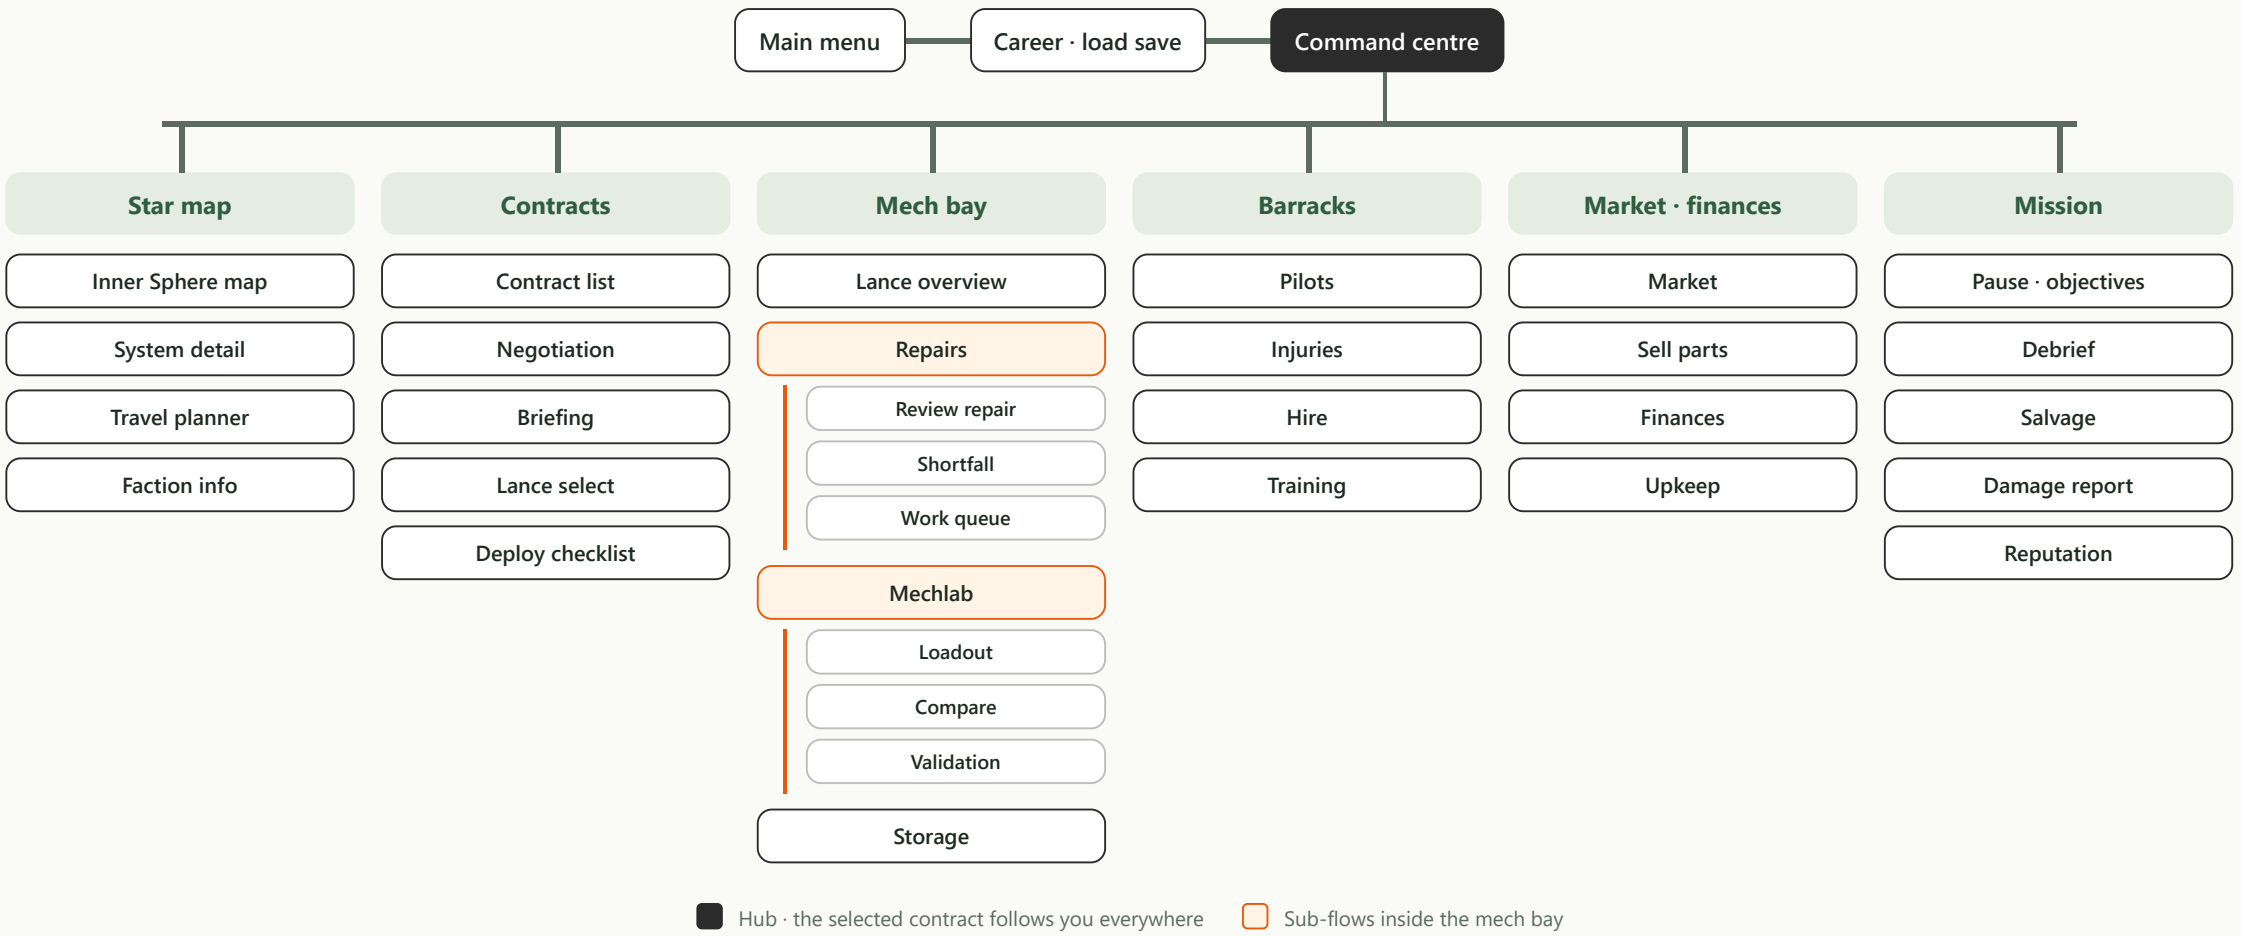

4 Battle

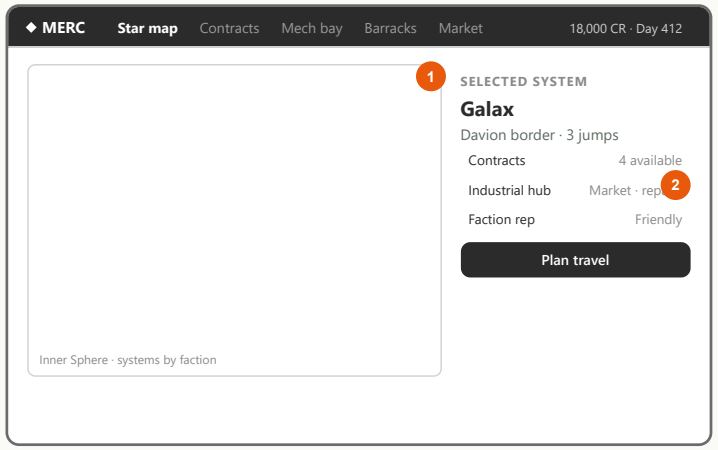

1. Timer and both scores always visible.
2. Selected card lifts; cost on every card.
3. Energy bar shows what you can afford.

Sub-flows inside the mech bay

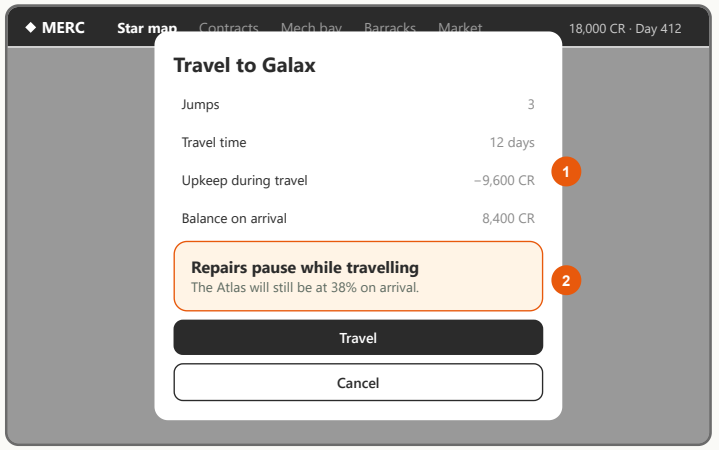

1 Star map

1. The map stays visible while a system is inspected.
2. What a system offers is listed before you travel.

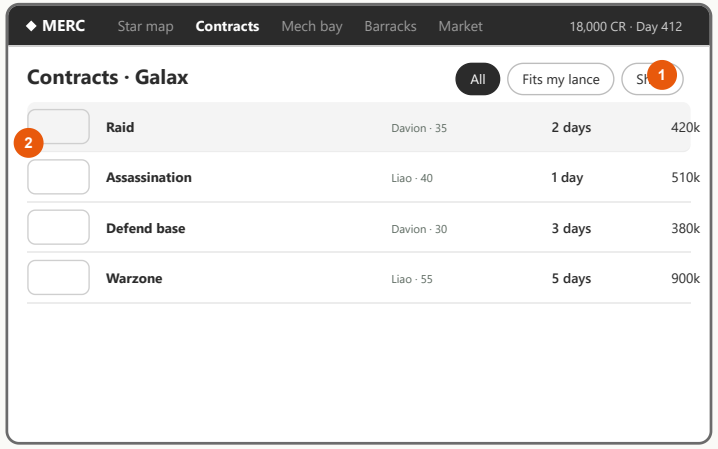

2 System detail

1. Contracts preview before committing to travel.
2. Travel time sits beside each contract.

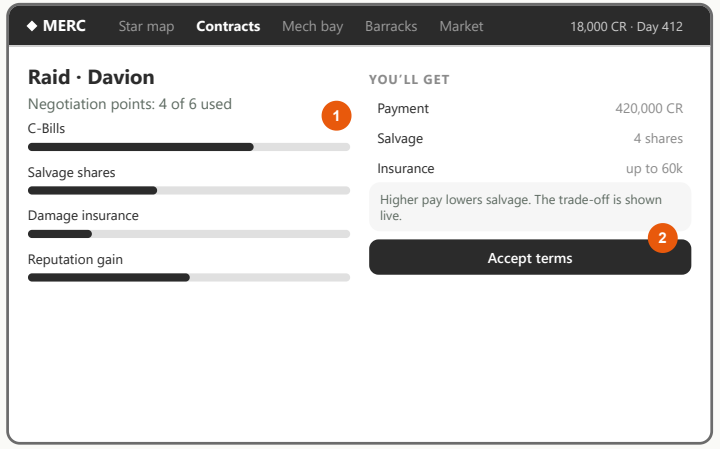

3 Confirm travel

1. Time and money cost shown before the jump.
2. Warns about side effects, like paused repairs.

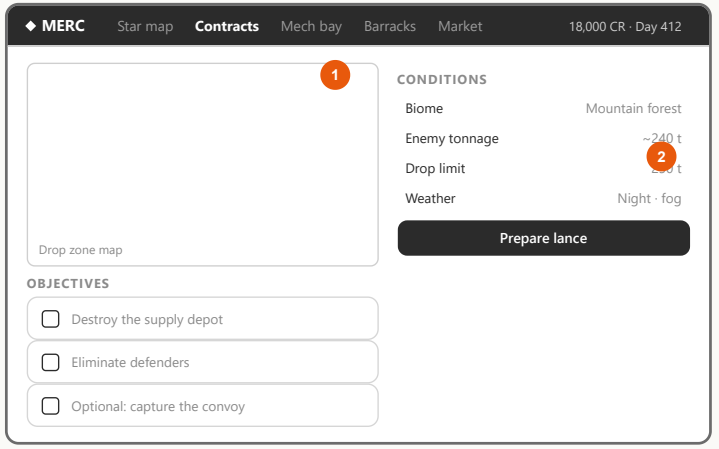

4 Contract list

1. Filter by what your current lance can handle.
2. Difficulty, time and pay in one row.

5 Negotiate the contract

1. Every slider is a visible trade-off.
2. The result updates as you negotiate.

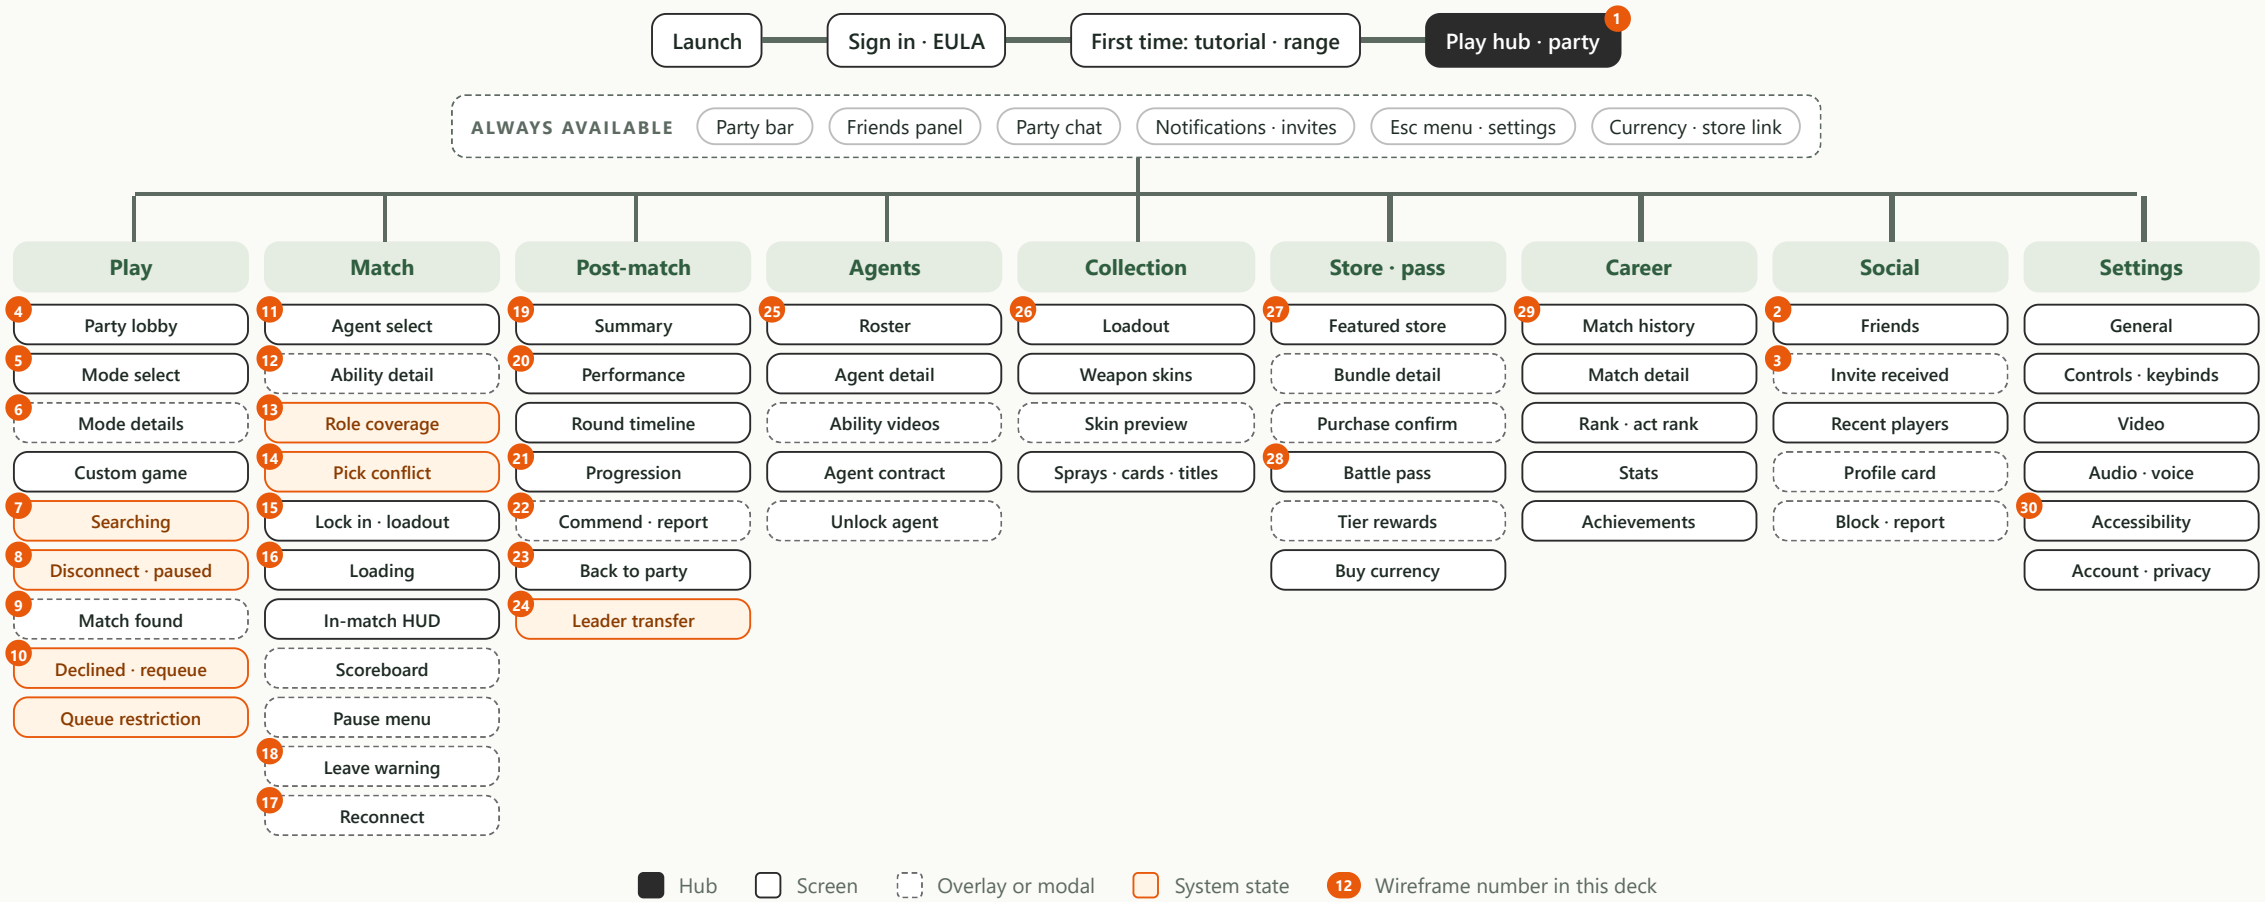

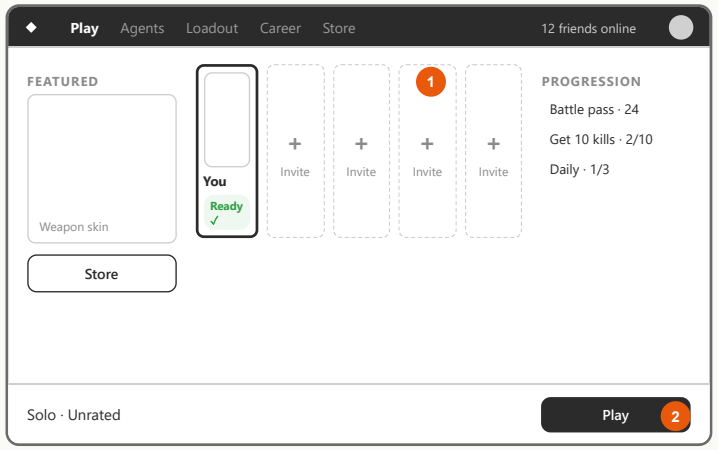

6 Mission briefing

1. Objectives and conditions on one screen.
2. Drop limit is visible before choosing mechs.

1 Play hub

1. The party sits at the centre of the screen.
2. One primary action: Play.

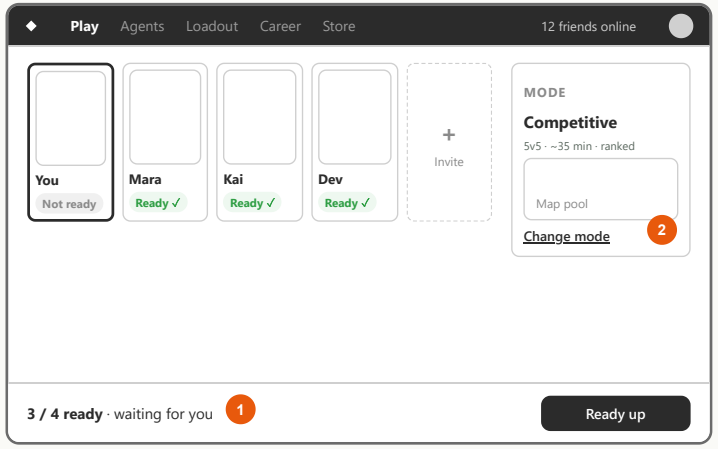

2 Invite friends

1. Status says who can join now.
2. Recent teammates are one tap away.

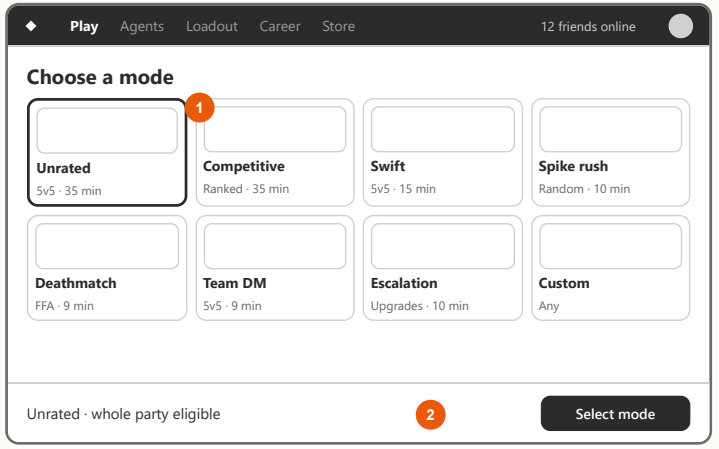

3 Invite received

1. Shows the party and mode before joining.
2. Later keeps the invite in the friends list.

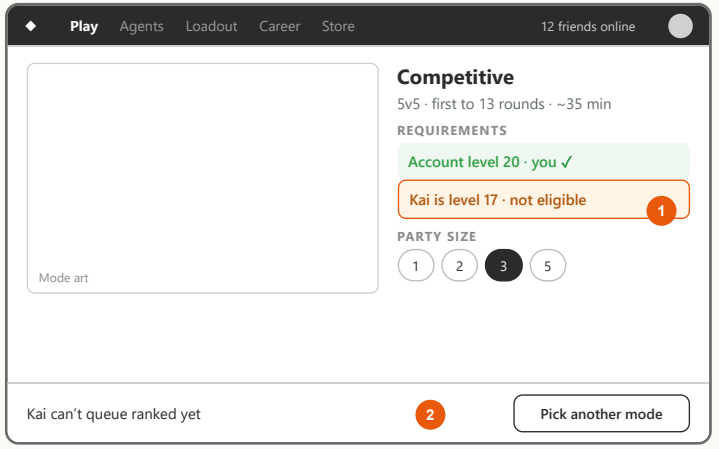

4 Party lobby

1. Readiness is a count in words.
2. Changing the mode resets everyone's ready state.

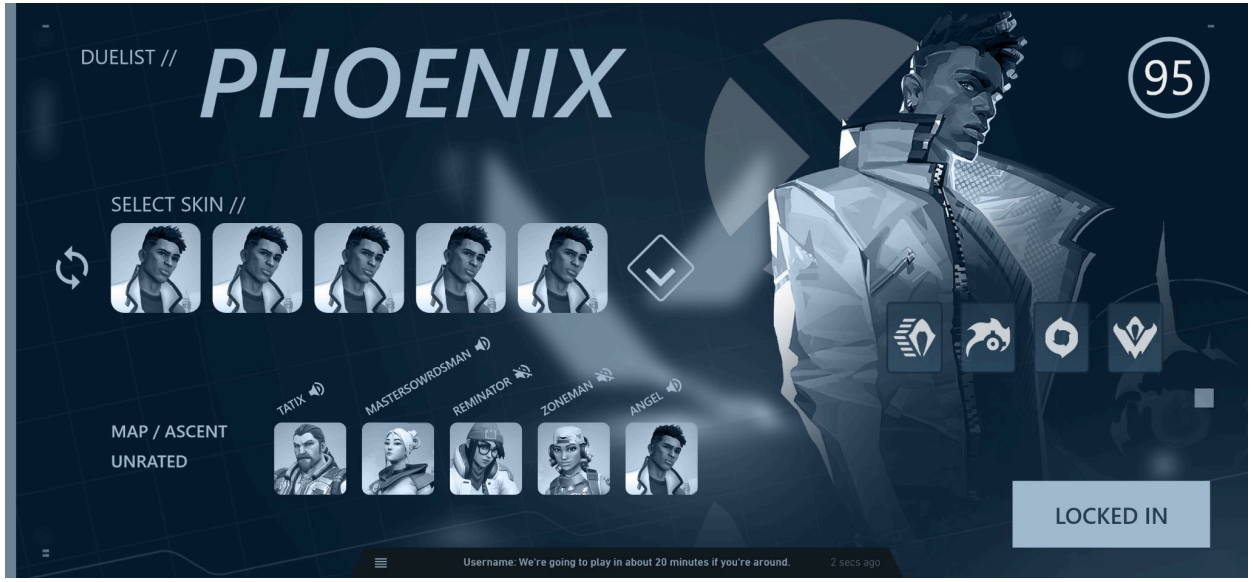

5 Mode select

1. Every mode uses the same card, so they compare.
2. Eligibility is checked for the whole party.

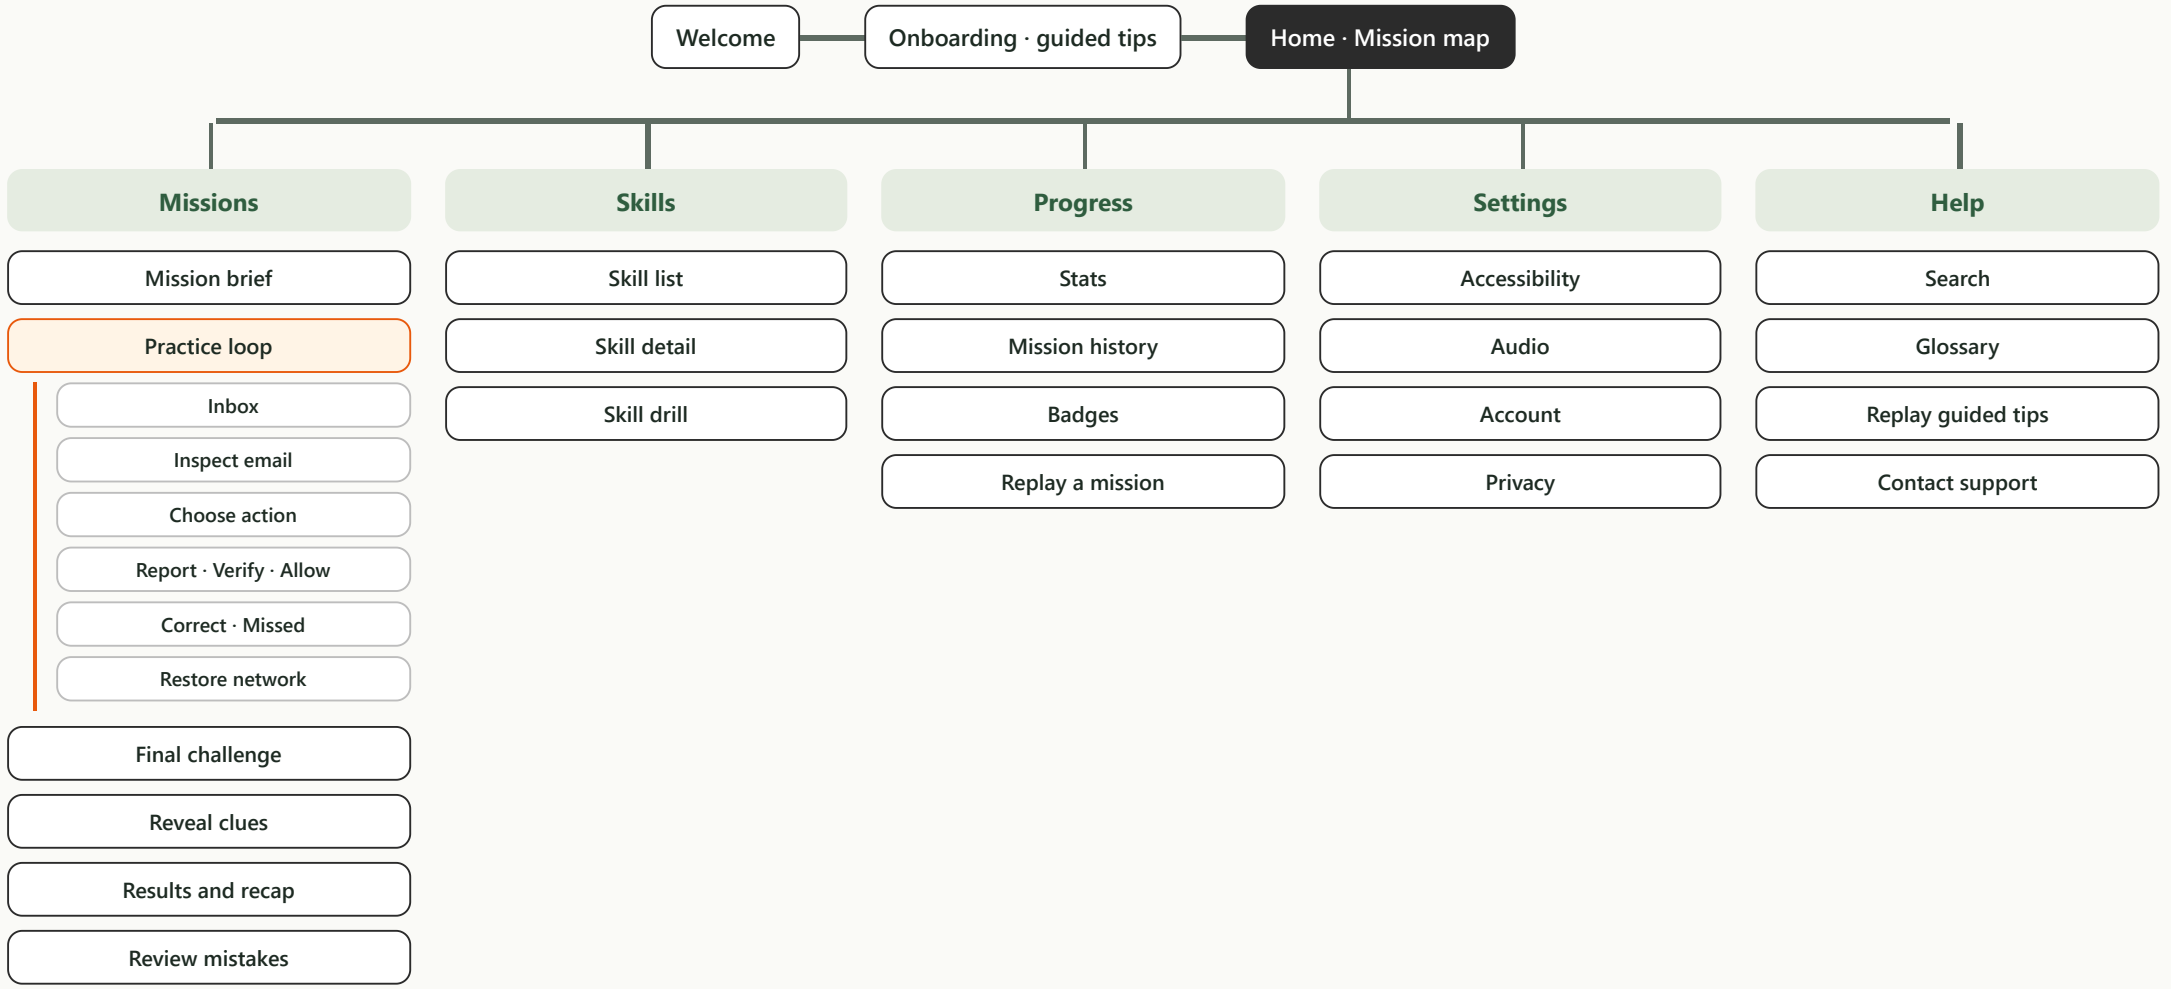

6 Mode details

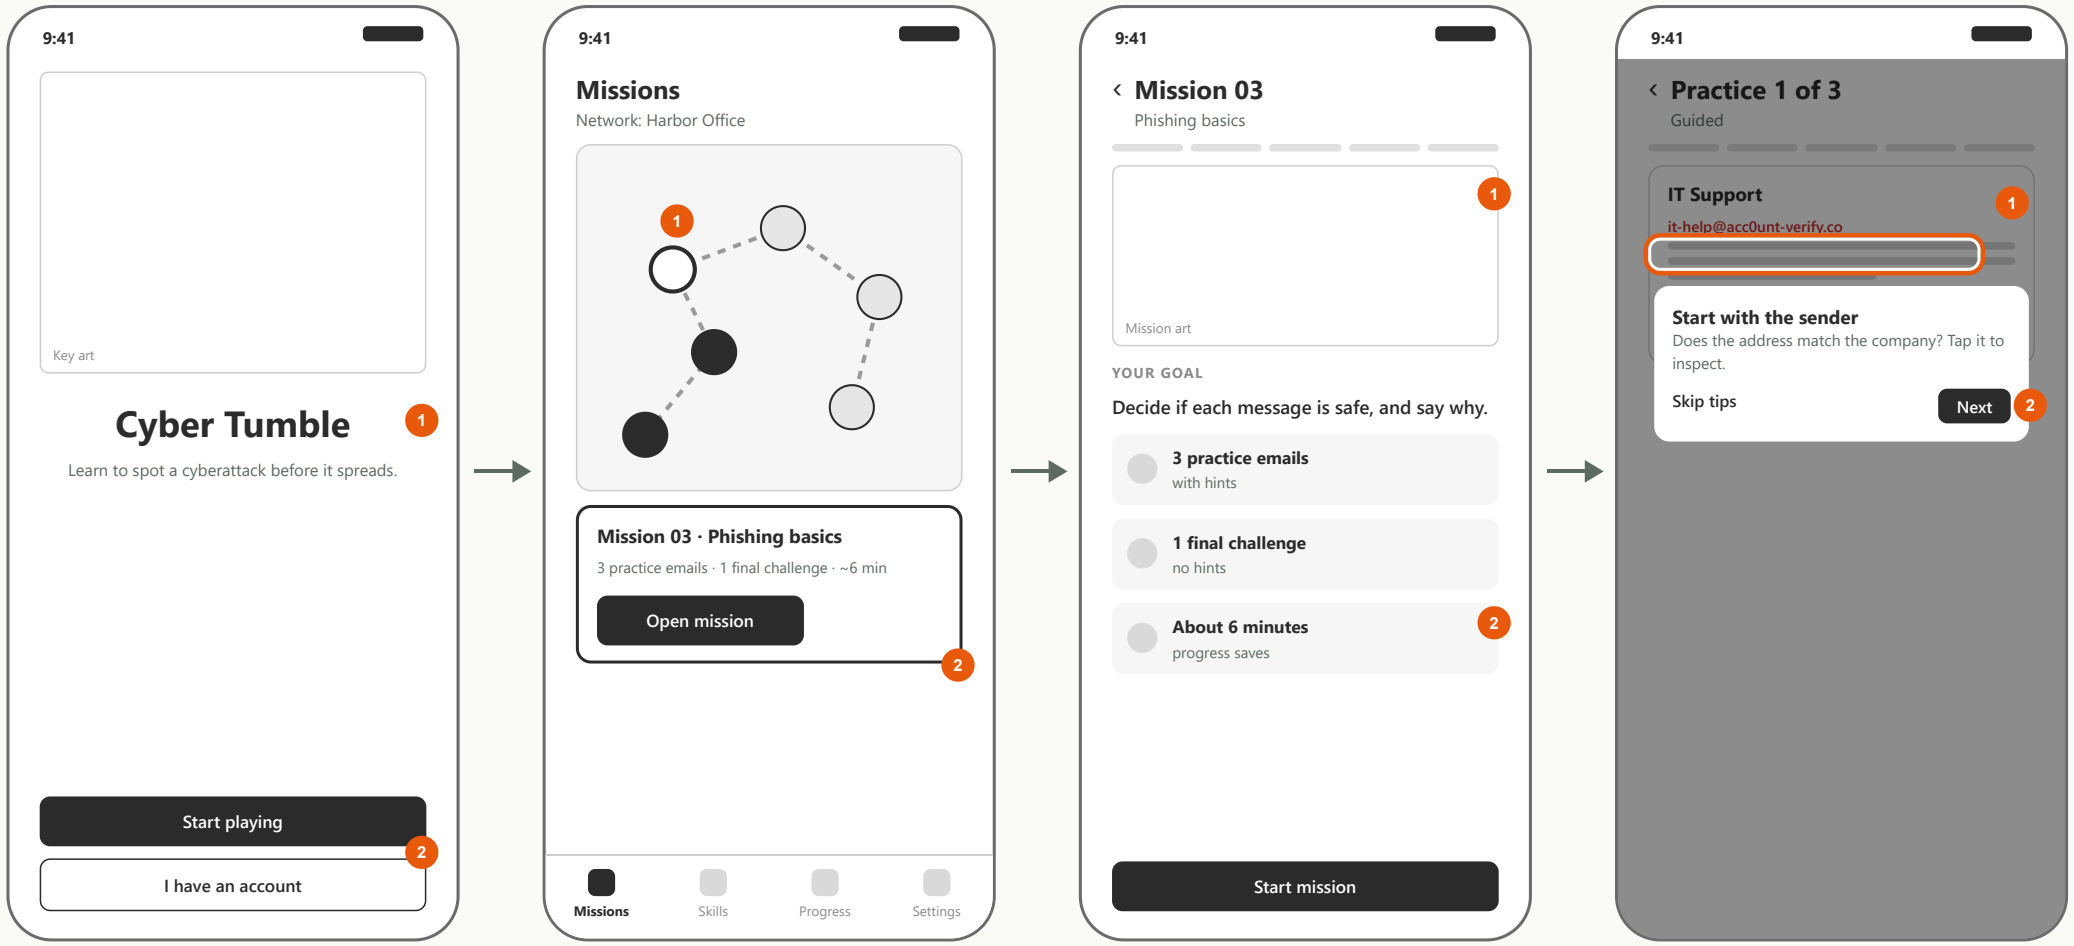

1. Names who is blocked and why.
2. Offers a way forward, not just a disabled button.

1 First visit

1. Three steps explain the whole product.
2. One primary action; scenery is optional.

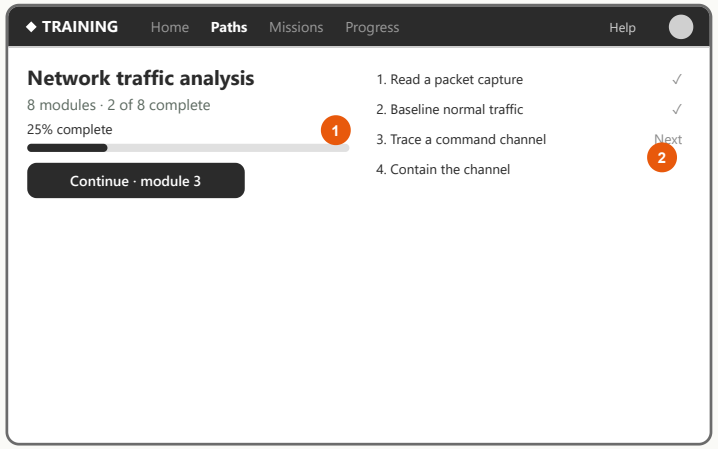

2 Choose training

1. Two choices, each with time and scope.
2. Both lead to a browse, not a commitment.

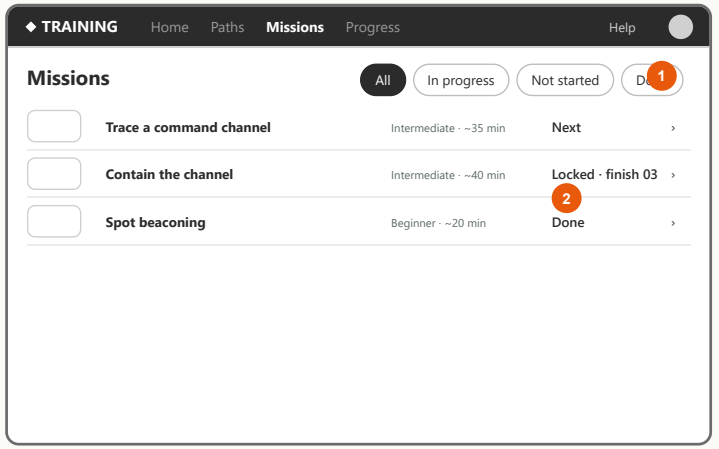

3 Certification program

1. The whole sequence is visible before enrolling.
2. Removes the fear of commitment.

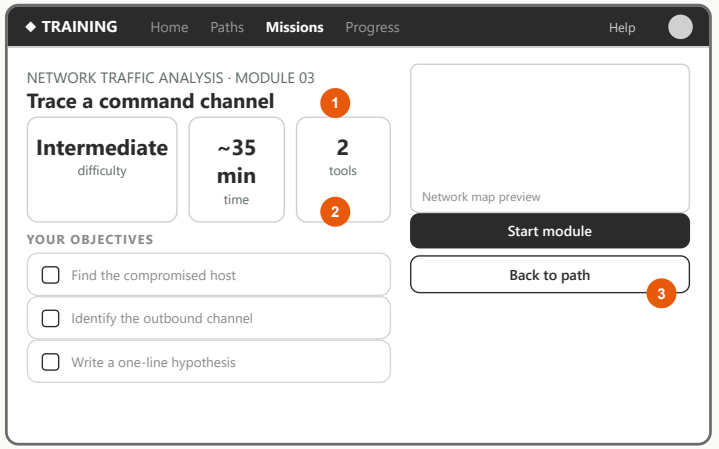

4 Learning path

1. Continue is the main action for returning learners.
2. Done, next and later at a glance.

5 Module list

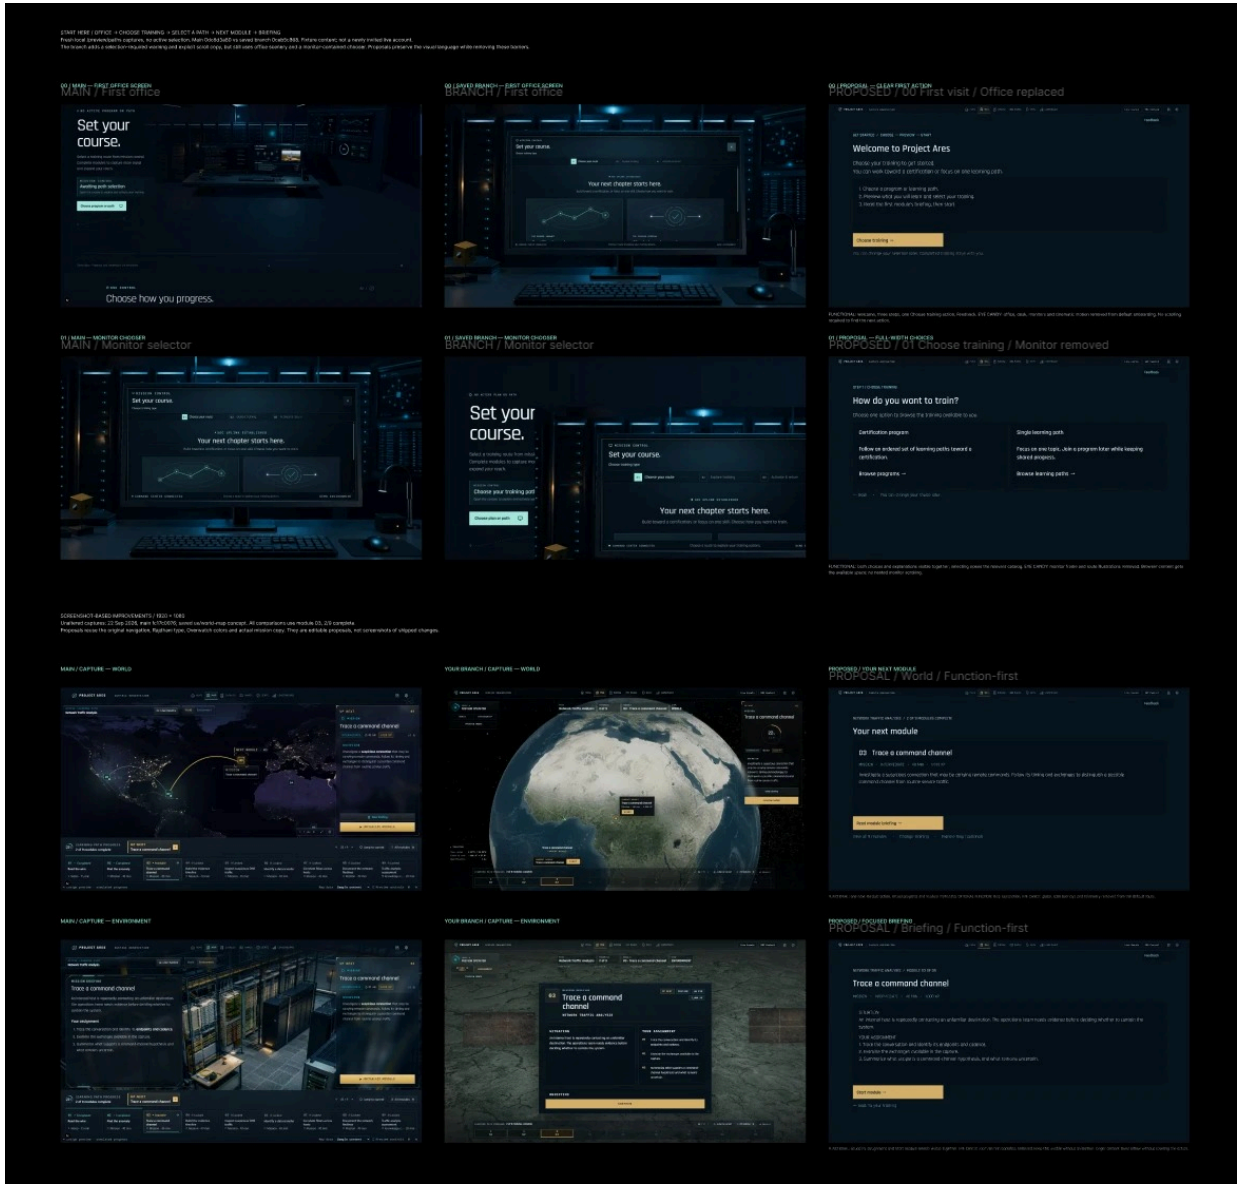

1. Filters by status.
2. Locked modules say what unlocks them.

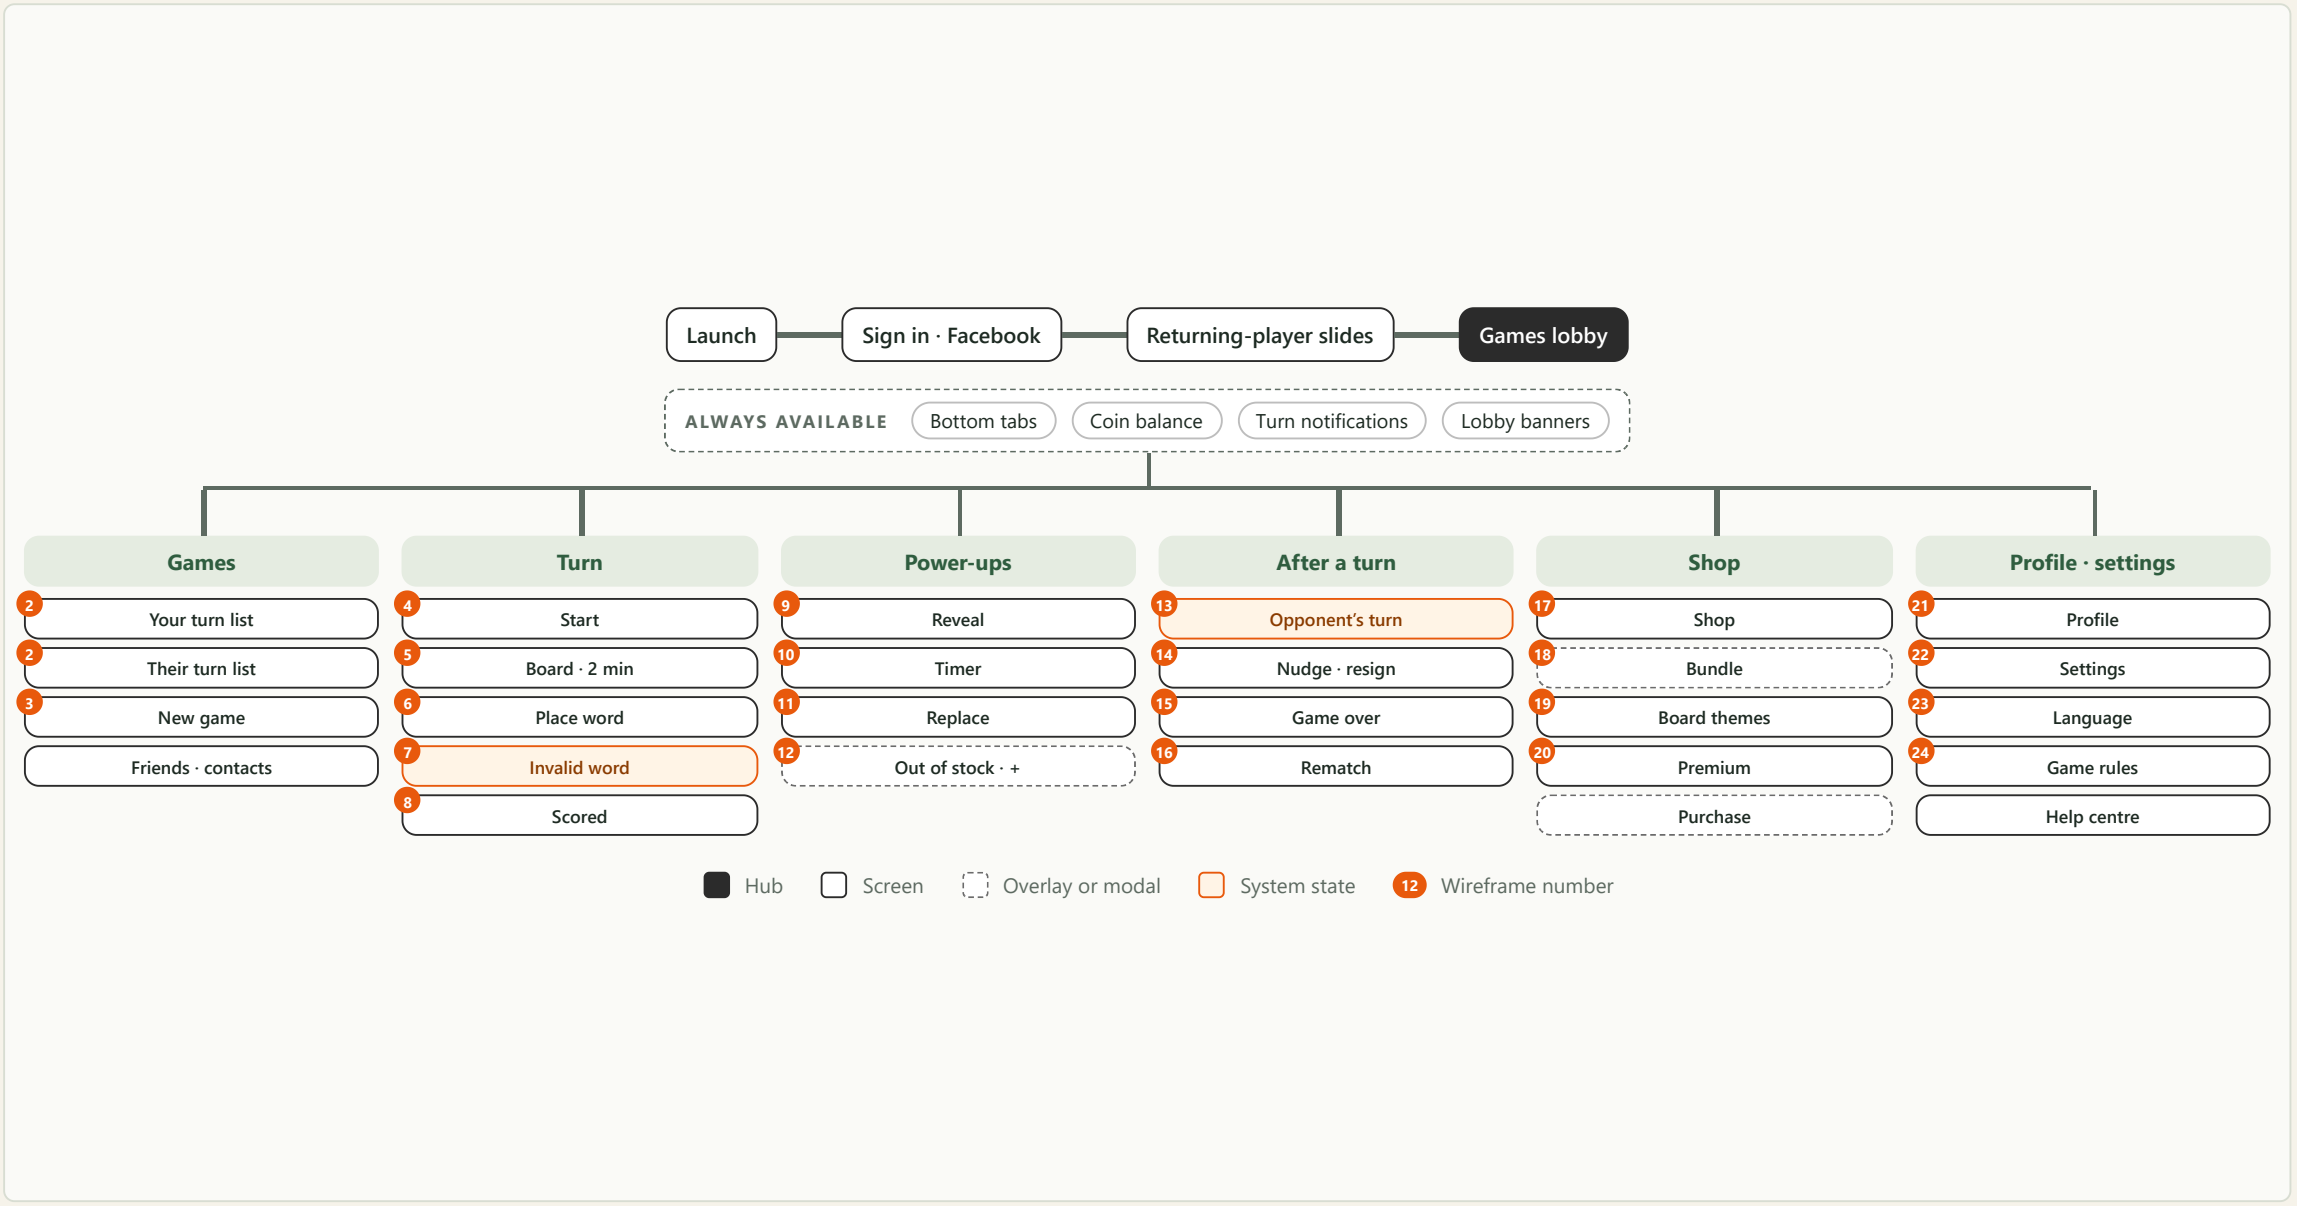

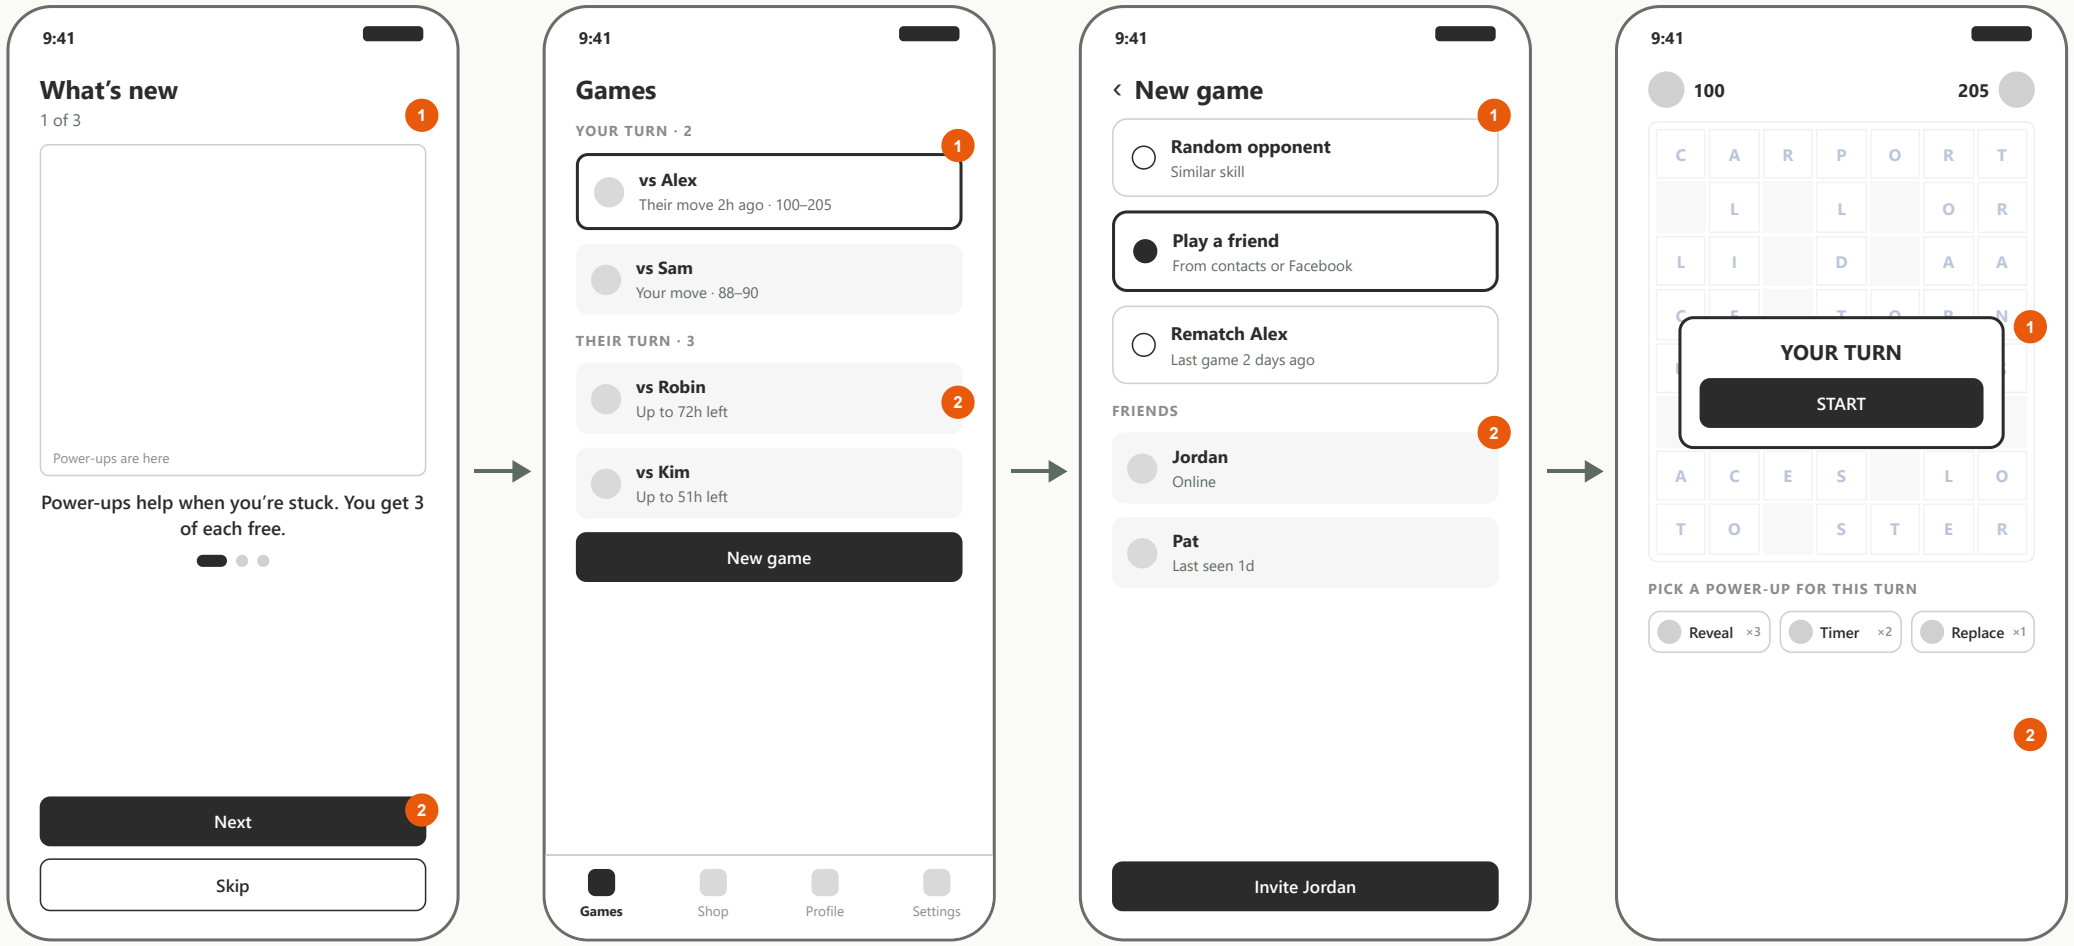

6 Briefing

1. Difficulty, time and tools before starting.
2. Objectives are known in advance.
3. Start is the only primary action.

2. Skip is always available.

2 Games lobby

1. Your-turn games come first.
2. Waiting games show time left.

3 New game

1. Three ways to start, one per line.
2. Rematch is suggested from history.

4 Your turn

1. Start brings back a moment to decide.
2. Power-ups can be chosen before the timer runs.

Powerup 1 - REVEAL

Step 1

Step 2

Step 3

Step 4

Particle effects and animations happen for each state.
CTA PILL Appears and dissapears it doesn't need to be on screen the entire time.

Powerup 2 - TIMER

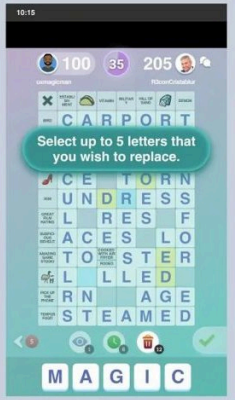

Timer is an animation state happening within unity. When the user taps on the timer it automatically triggers the animation with the 30 seconds appearing on the timer. We are looking at ways to make this fun and exciting using animations. In this case we wont have a visual blocker hiding the content.

Powerup 3 - REPLACE

1. Replace Letter Pieces

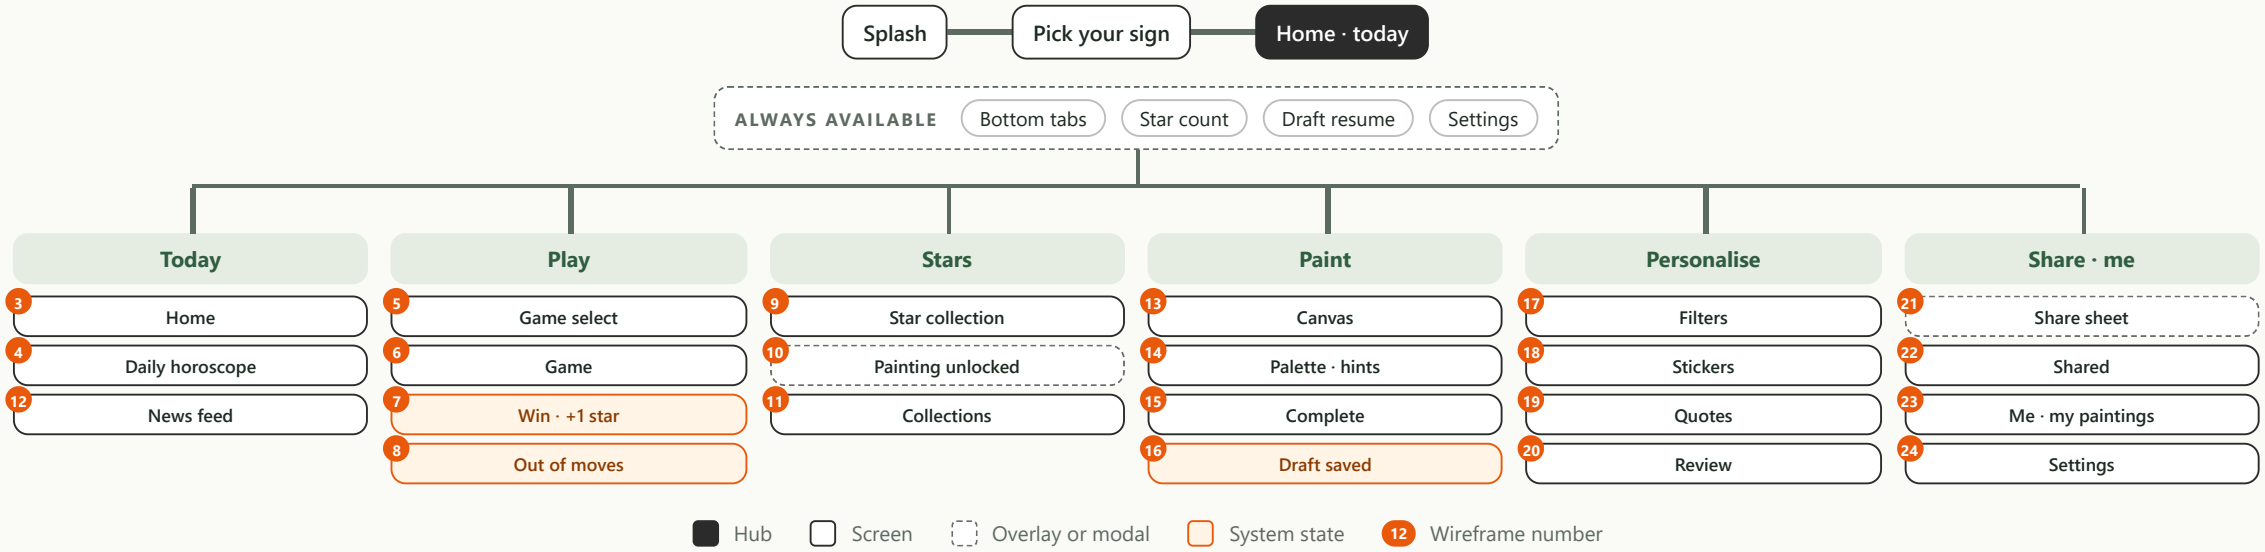

2. Replace Letter Pieces

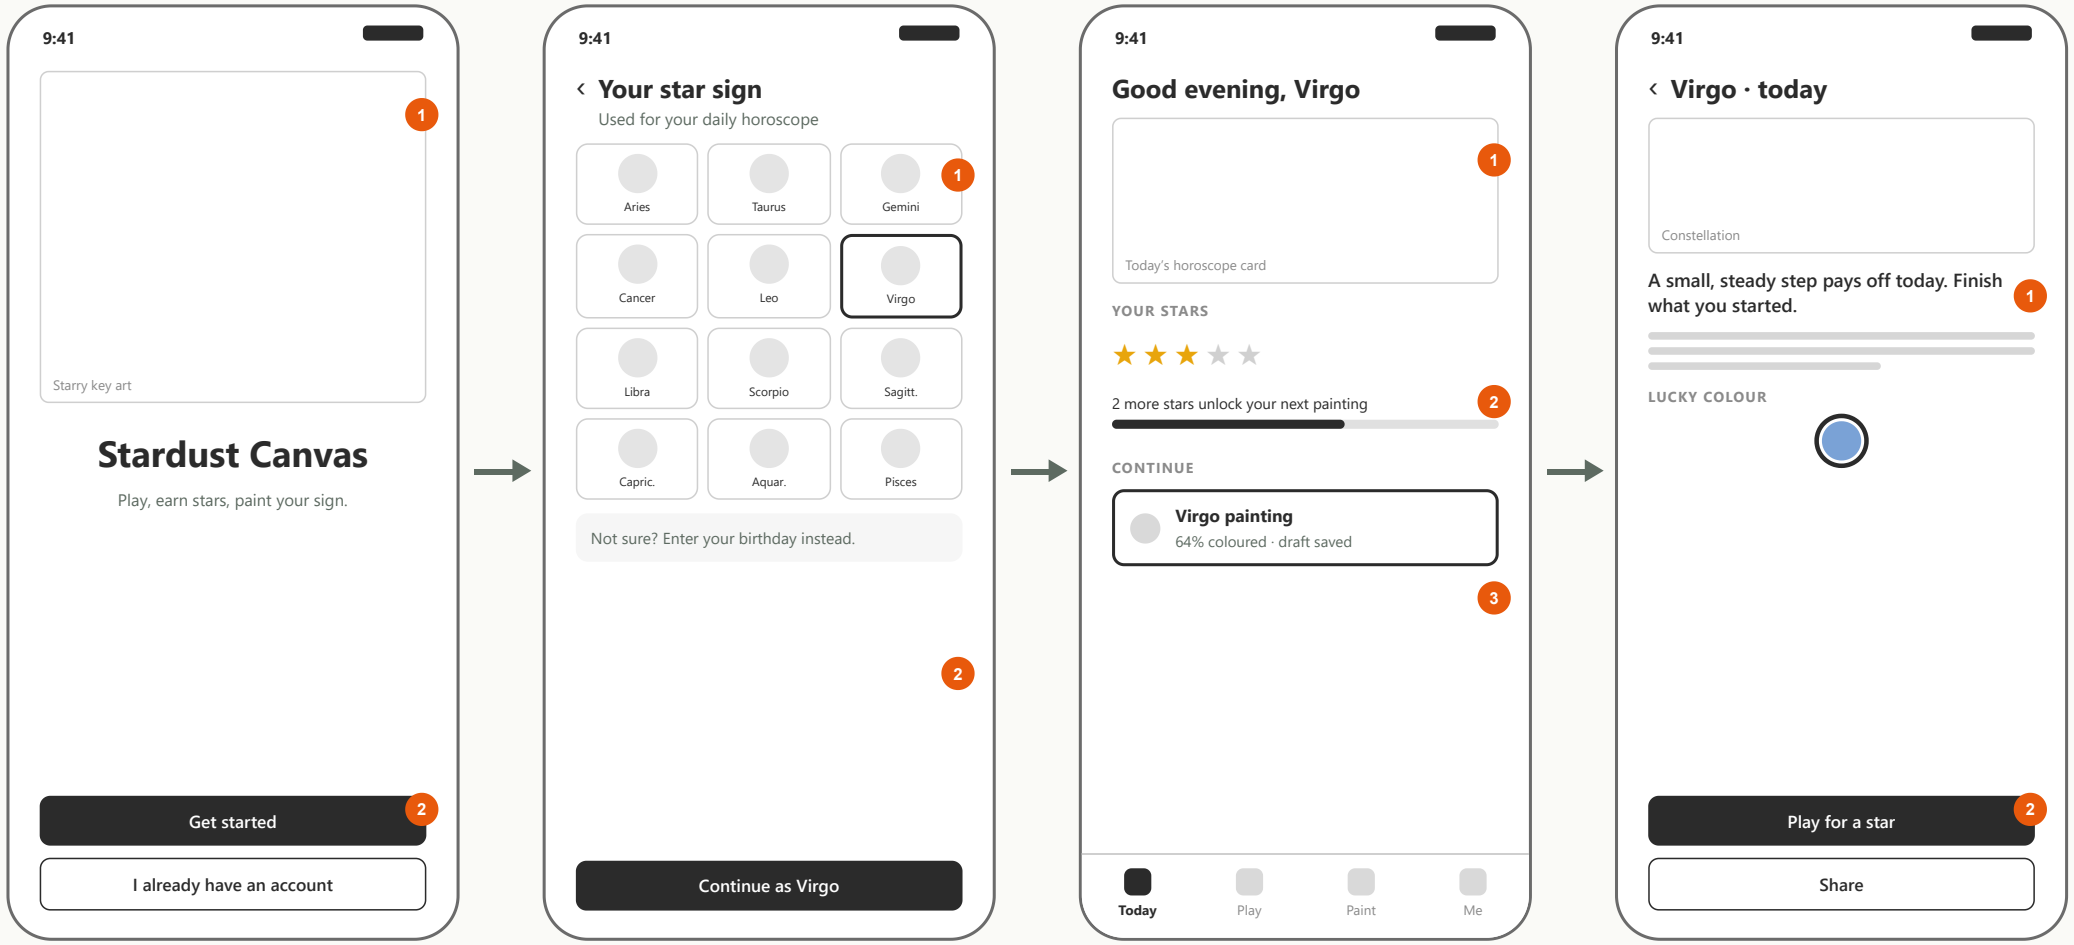

3. Confirmed and letters replaced

Animation and visual pass is being done in unity as we test what works and what doesn't work.
