UX WALKTHROUGH VIDEO

Seven lessons on decisions, flows and trade-offs.

1. Start with the decision
2. Design the way back
3. Context beside the decision
4. Make every state readable
5. Plan the test first
6. Say what's being reviewed
7. Carry intent into the build

https://lnkd.in/p/gMNK7Cik

CONTENTS

Each project opens with my redesign of the full experience: sitemap, flow and wireframes. The original work follows.

01 Game Genius p. 4

02 NZM p. 14

03 TNT p. 24

04 MechWarrior 5 p. 35

05 Multiplayer p. 45

06 Cyber Tumble p. 60

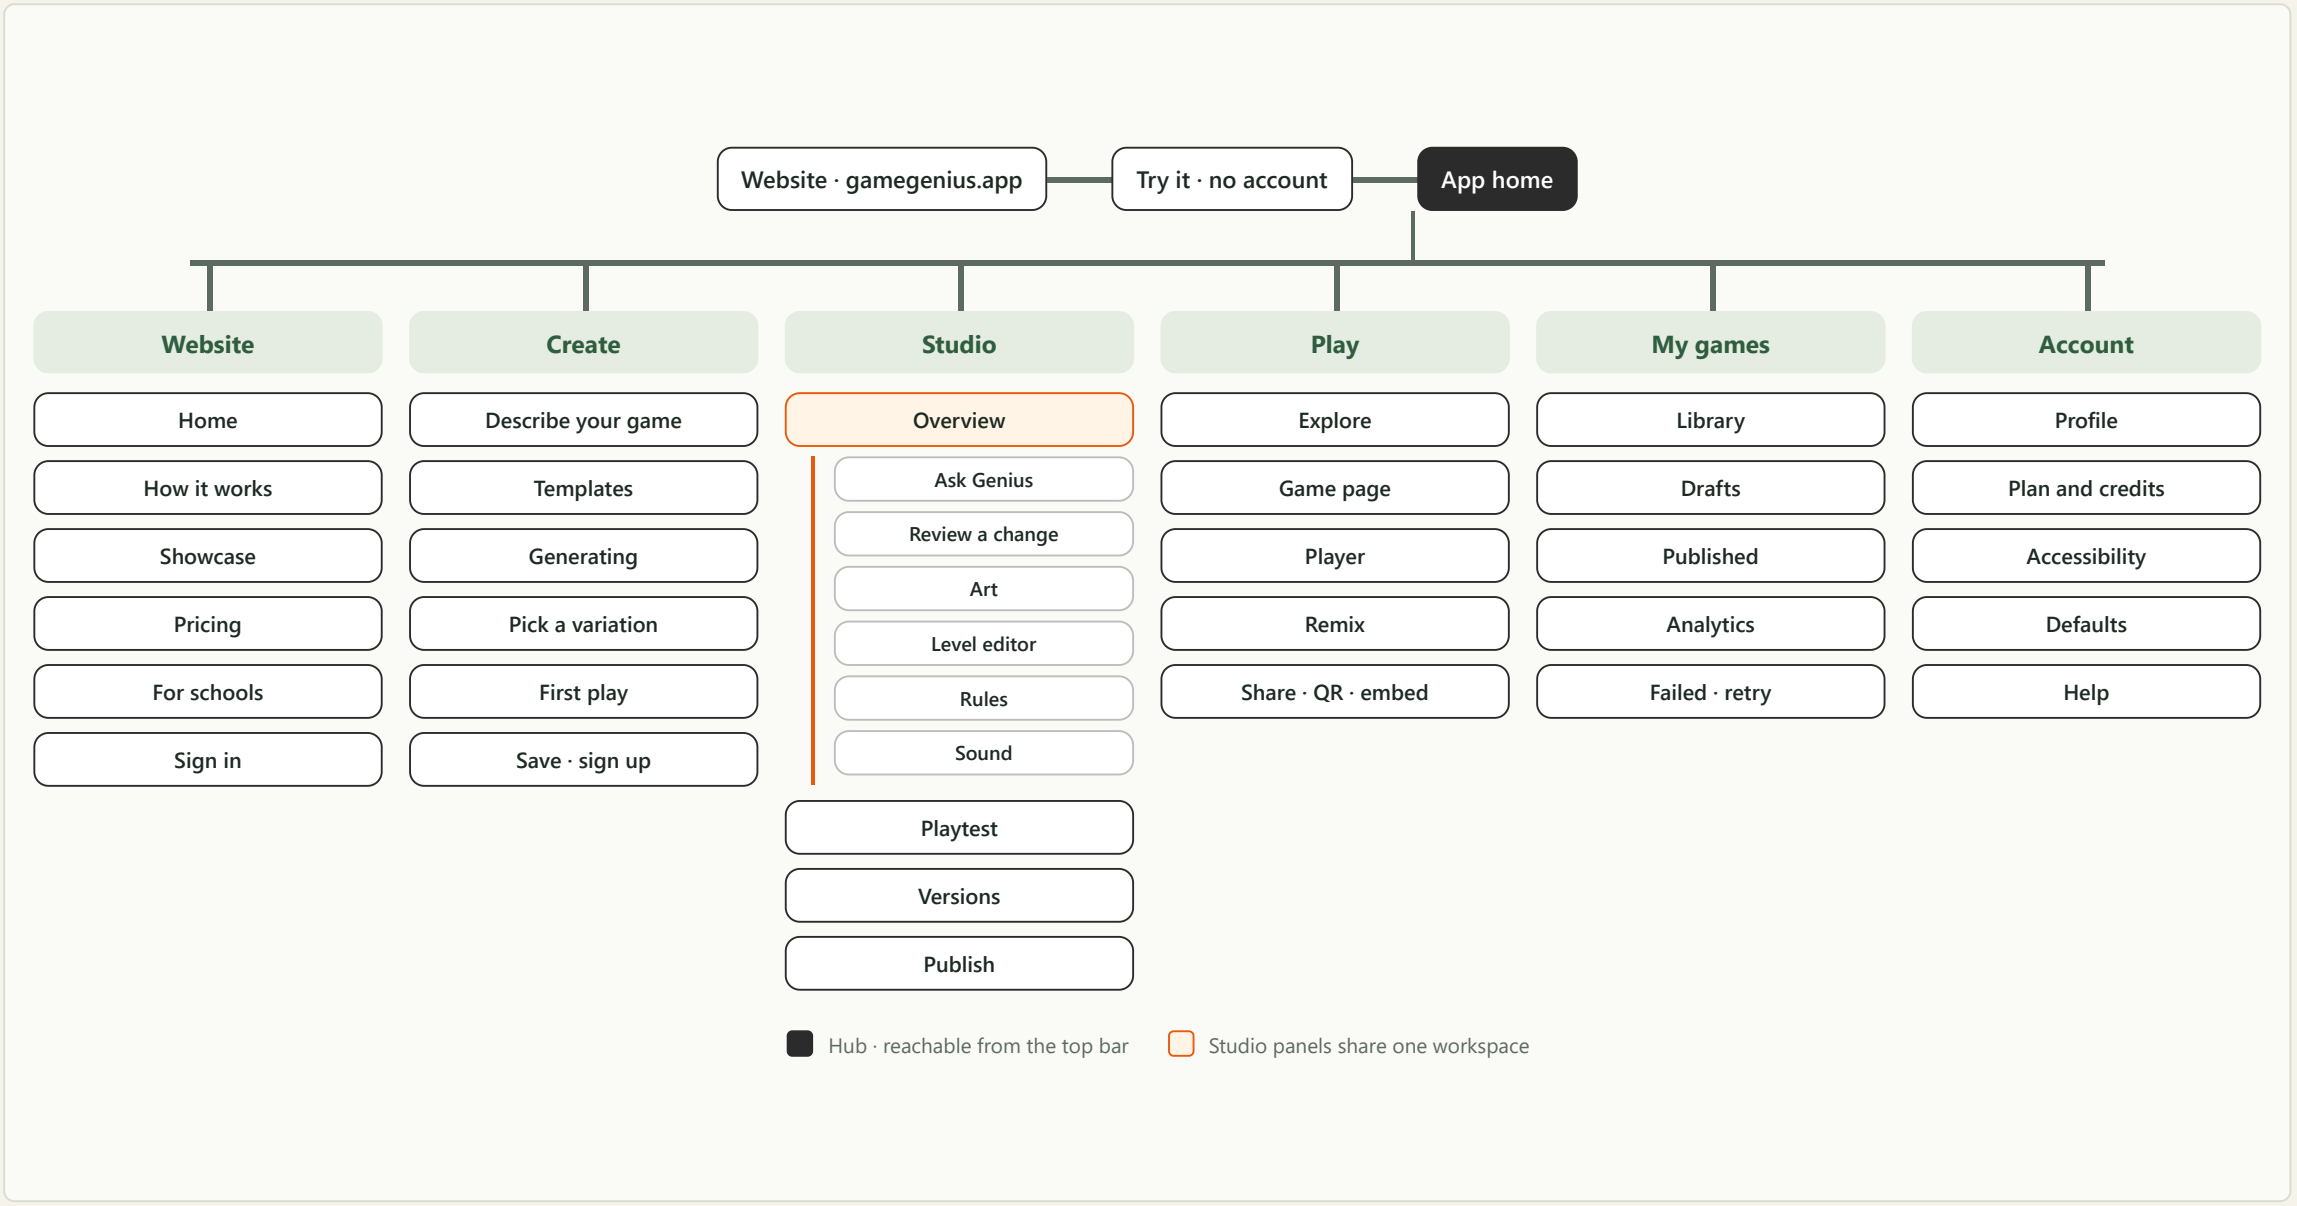

07 Project Ares p. 69

08 Kryss p. 78

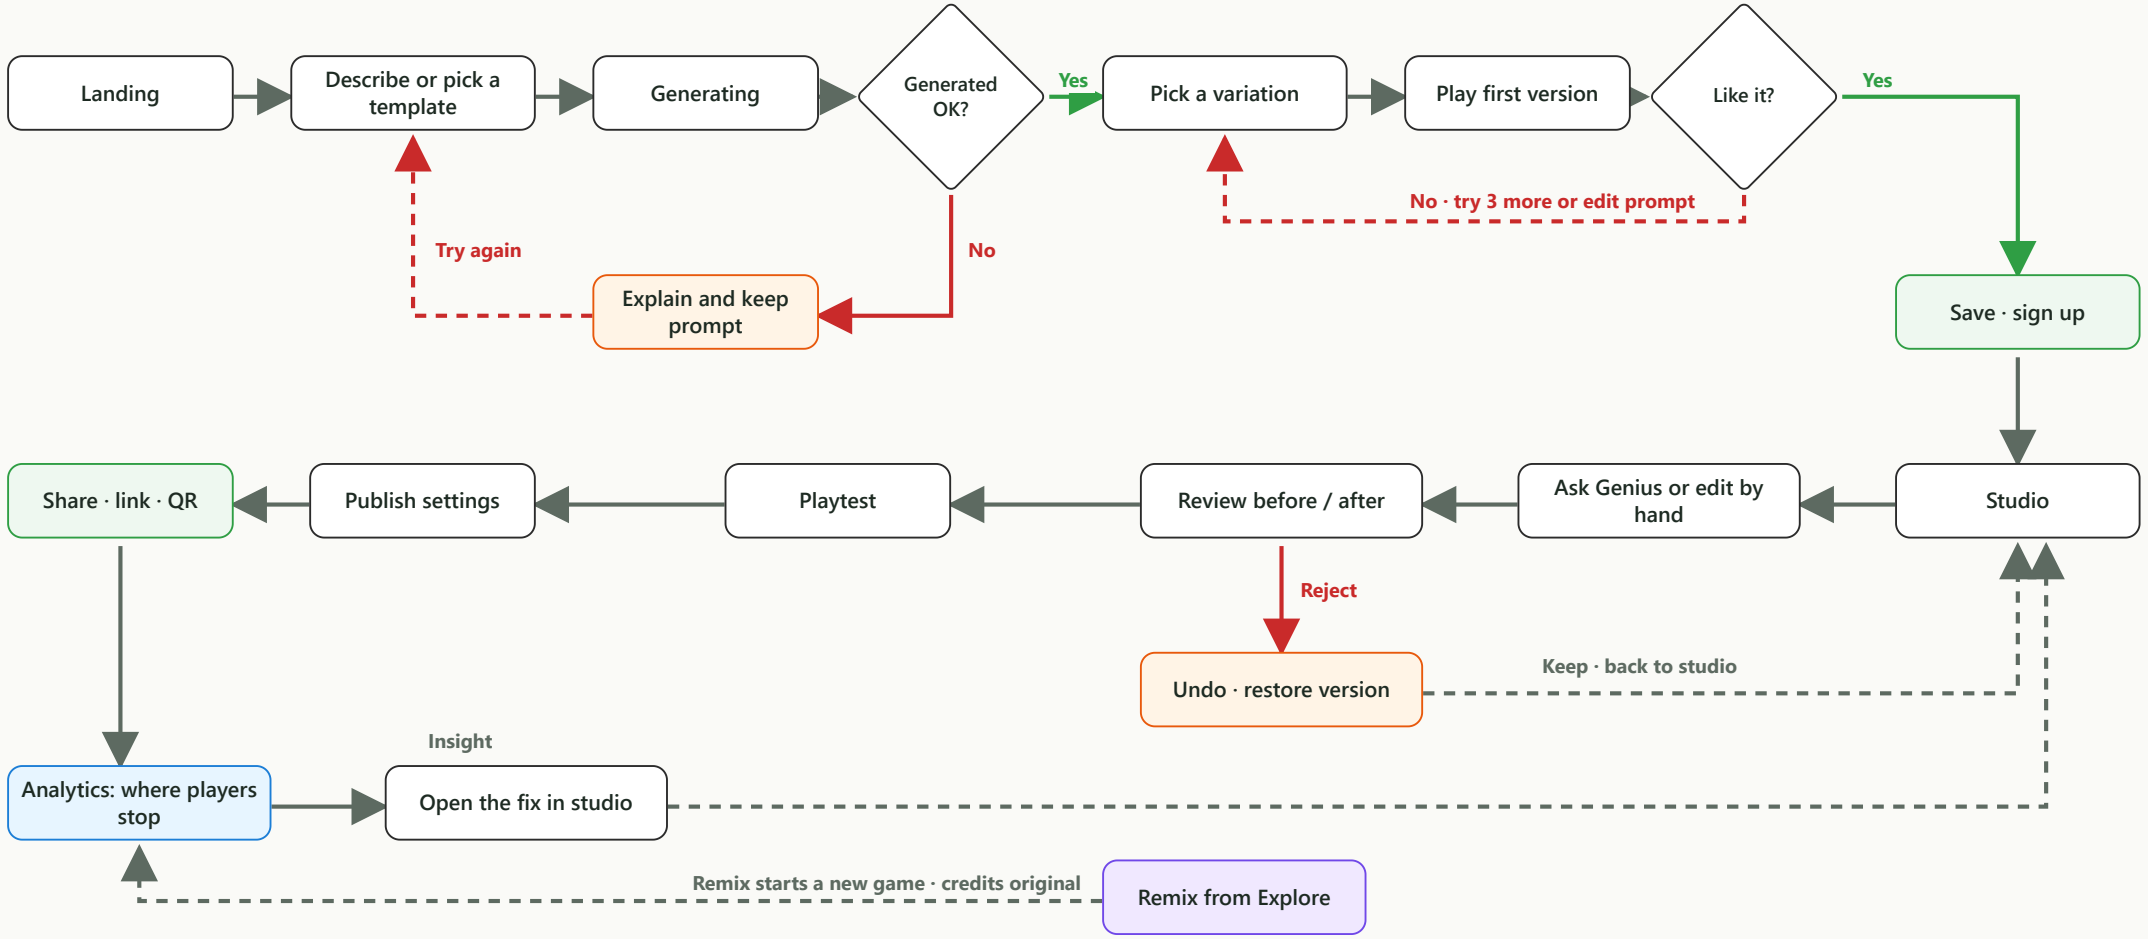

09 Stardust Canvas p. 90

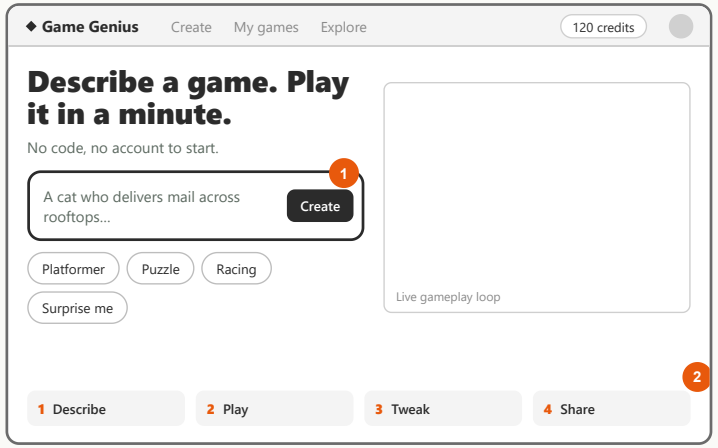

10 Bingo Story p. 100

11 Live-game teardowns p. 106

GAME GENIUS · CREATOR FLOW

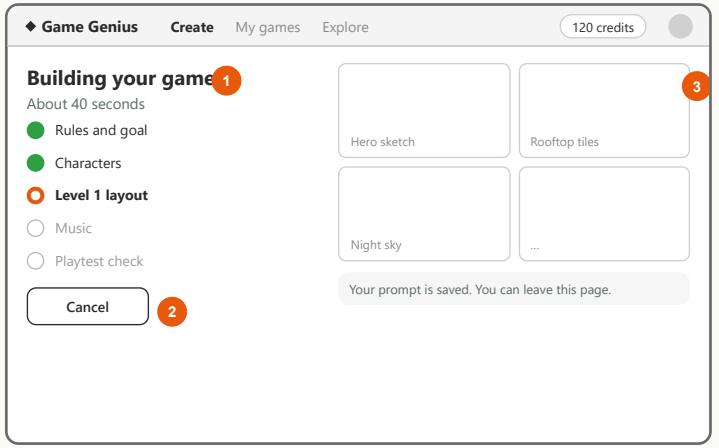

1 Landing page

1. The prompt box is the hero; trying needs no sign-up.
2. Four steps explain the whole product.

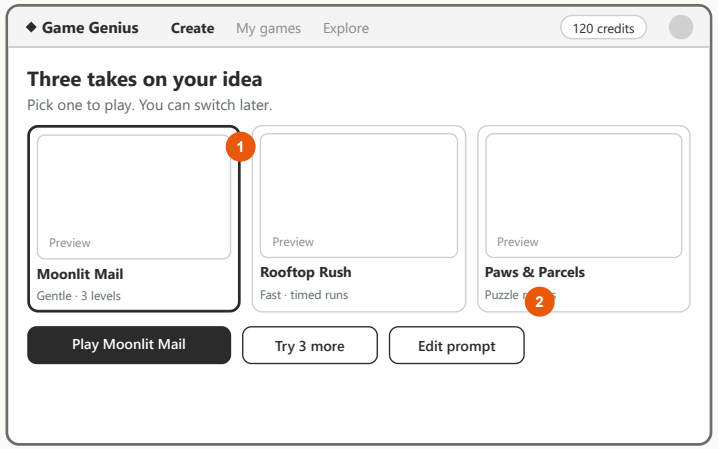

2 Describe your game

1. Free text first, with chips that teach good prompts.
2. Templates for people who prefer to pick.

3 Generating

1. Real stages, not a spinner.
2. Cancel is always available.
3. Assets appear as they are made.

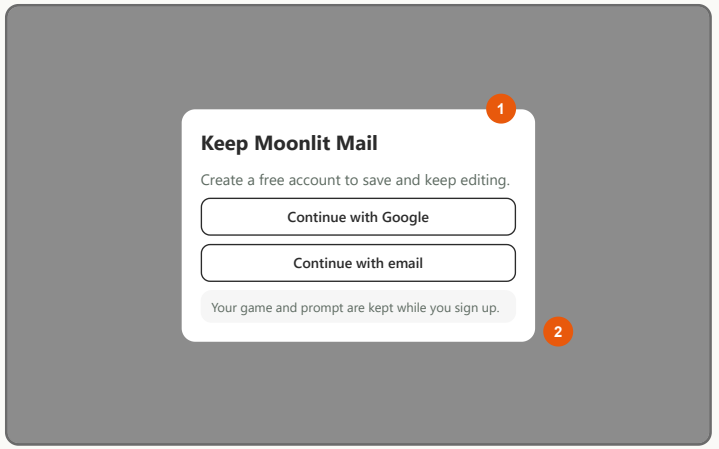

4 Pick a variation

1. Choice without a blank page.
2. More variations or a prompt edit, never a dead end.

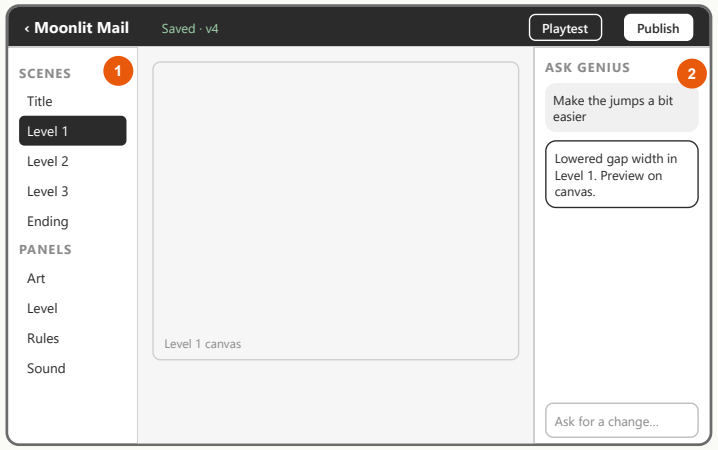

5 Play the first version

1. Controls are shown on screen, then fade.
2. Two clear next steps after playing.

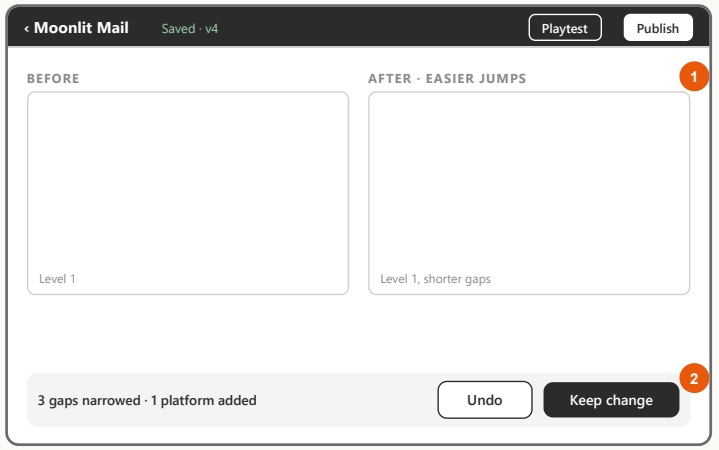

6 Save your game

1. Sign-up arrives when there is something to lose.
2. Nothing is lost during sign-up.

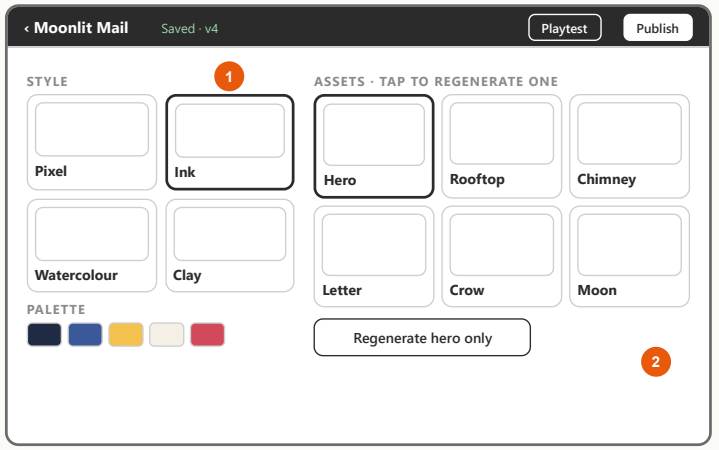

7 Studio overview

1. Every part of the game is one click away.
2. Ask in words or edit by hand, side by side.

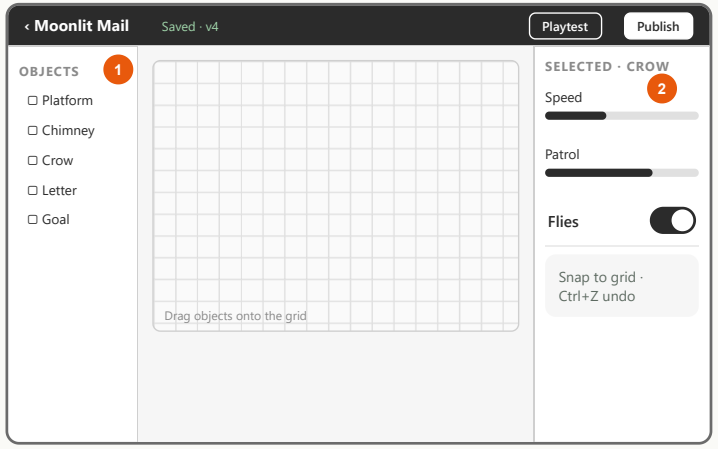

8 Review a change

1. AI changes are shown before and after.
2. Every change can be kept or undone.

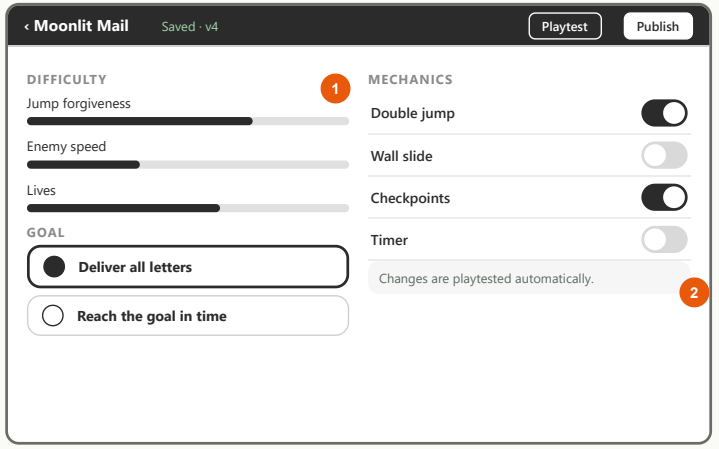

9 Art style

1. Style changes apply to the whole game at once.
2. Single assets can be redone without touching the rest.

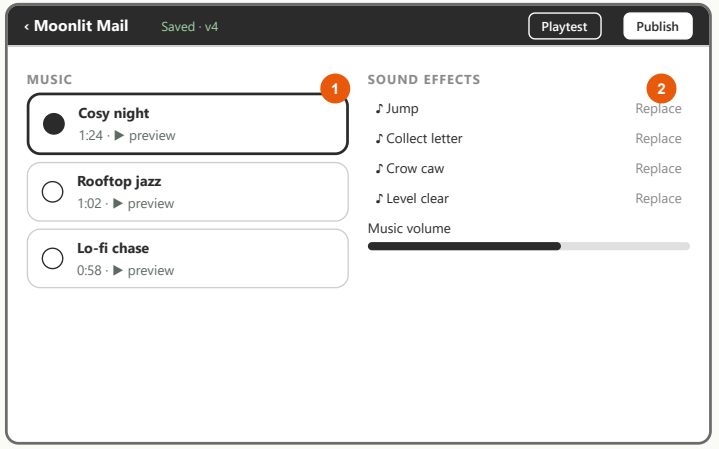

10 Level editor

1. Direct editing for people who want control.
2. Properties of the selected object, nothing else.

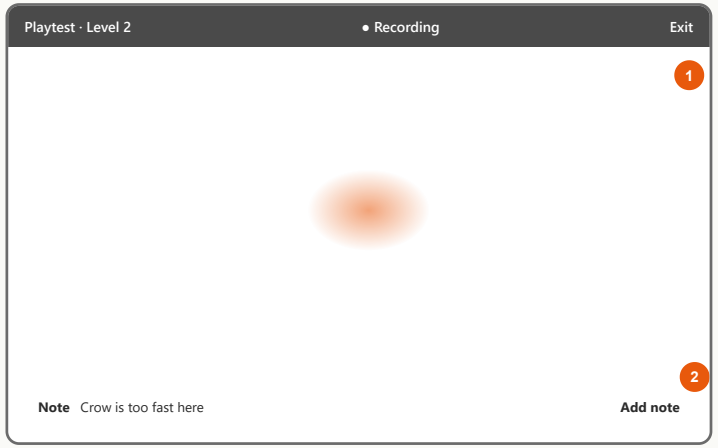

11 Rules and difficulty

1. Plain-language controls, no numbers to learn.
2. An automatic playtest catches broken levels.

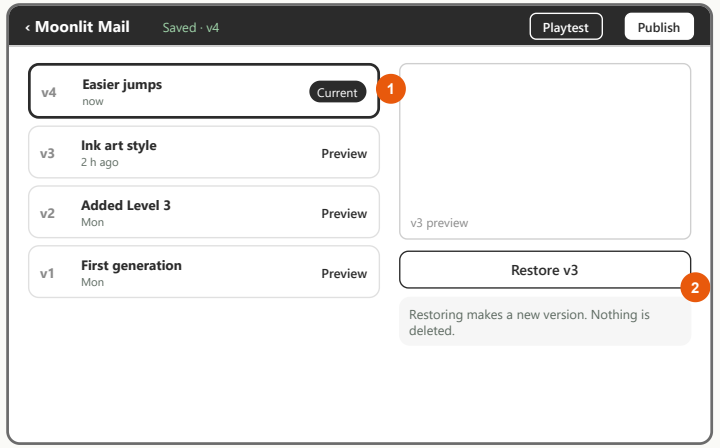

12 Music and sound

1. Every track can be previewed before choosing.
2. Sounds can be swapped one at a time.

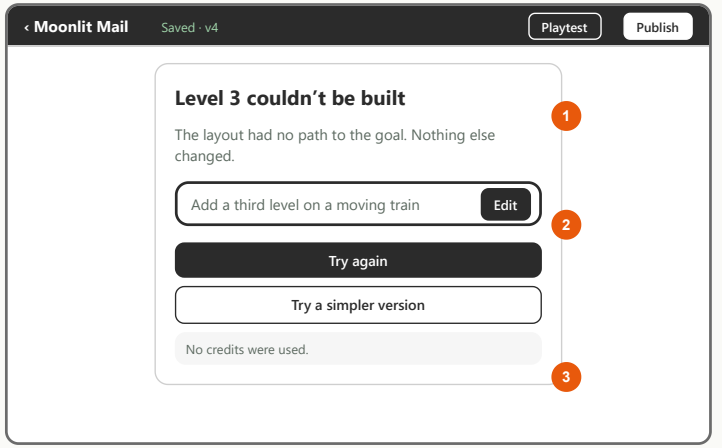

13 Playtest with notes

1. Playtests are recorded for the creator.
2. Notes are pinned to the exact moment.

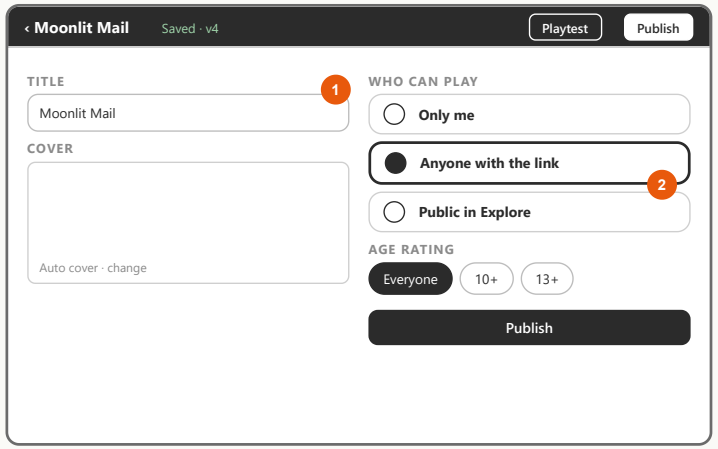

14 Version history

1. Every change is a version with a name.
2. Restoring never deletes later work.

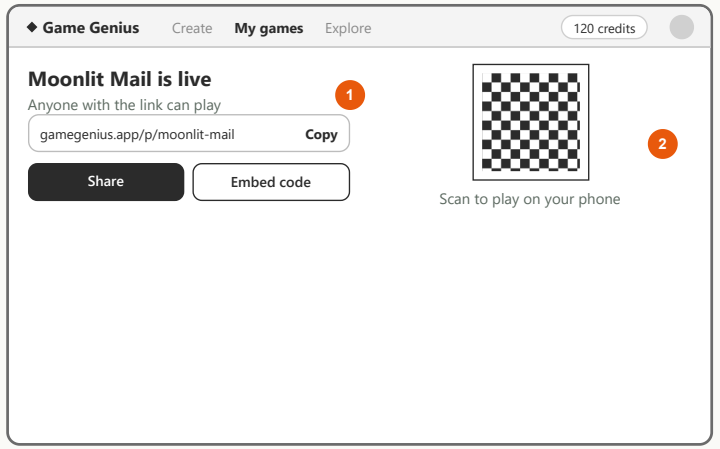

15 Generation failed

1. Says what failed and what is unaffected.
2. The prompt is kept and editable.
3. Failed attempts cost nothing.

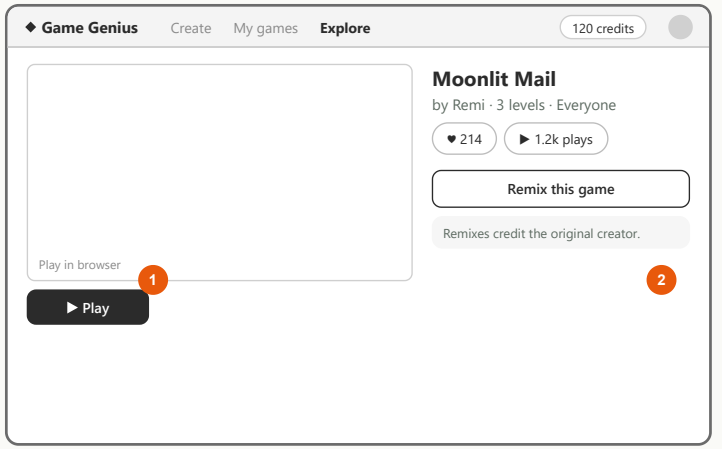

16 Publish settings

1. A cover is generated, and can be changed.
2. Visibility is explicit; public is never the default.

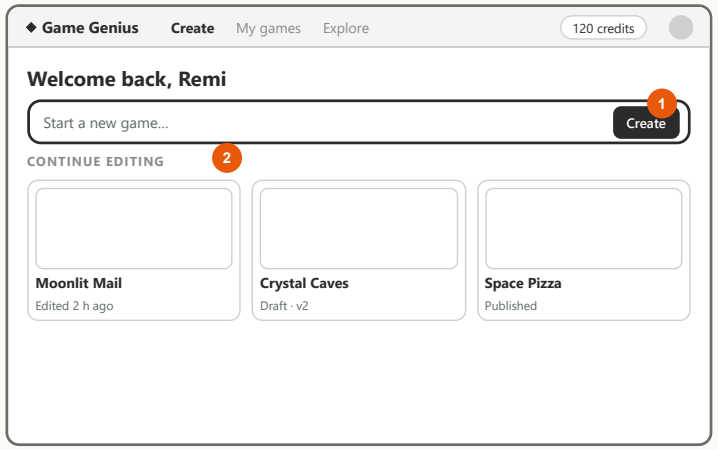

17 Share

1. Confirms who can see it.
2. A QR code moves play to a phone instantly.

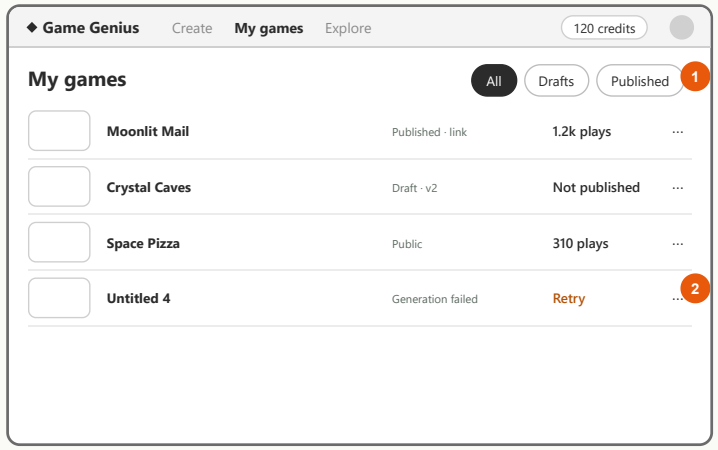

18 Published game page

1. Play starts from the page, no install.
2. Remix is a first-class action with credit.

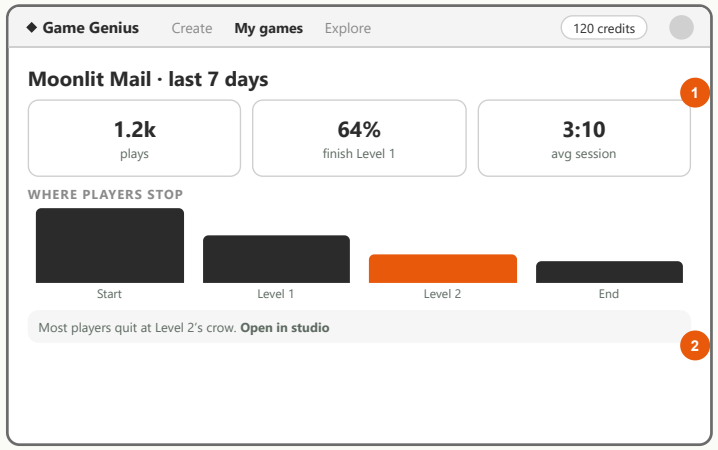

19 Home dashboard

1. A new game is always one prompt away.
2. Recent work comes before anything else.

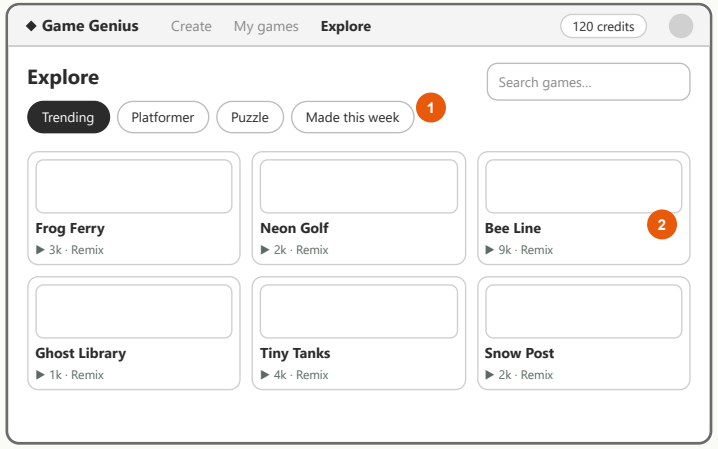

20 My games

1. Status is visible on every game.
2. Failed generations stay findable and retryable.

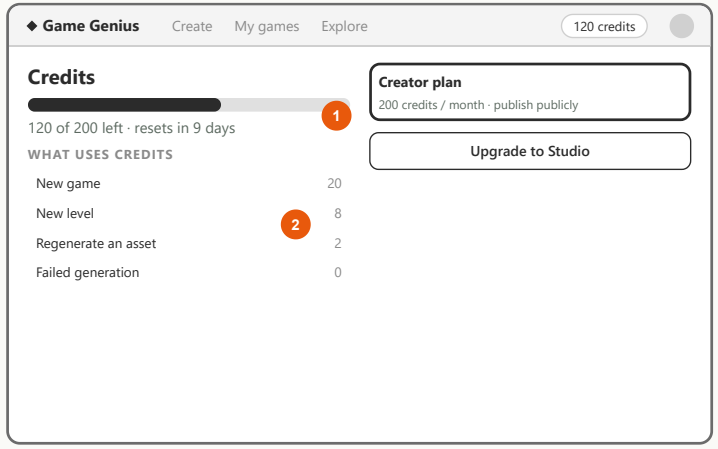

21 Game analytics

1. Three numbers, then the drop-off.
2. Insights link straight to the fix.

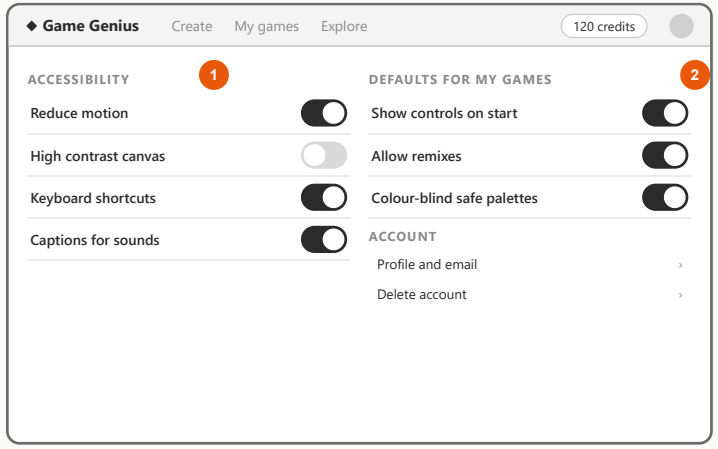

22 Explore and remix

1. Browse by genre or what is new.
2. Every game can be remixed.

23 Plan and credits

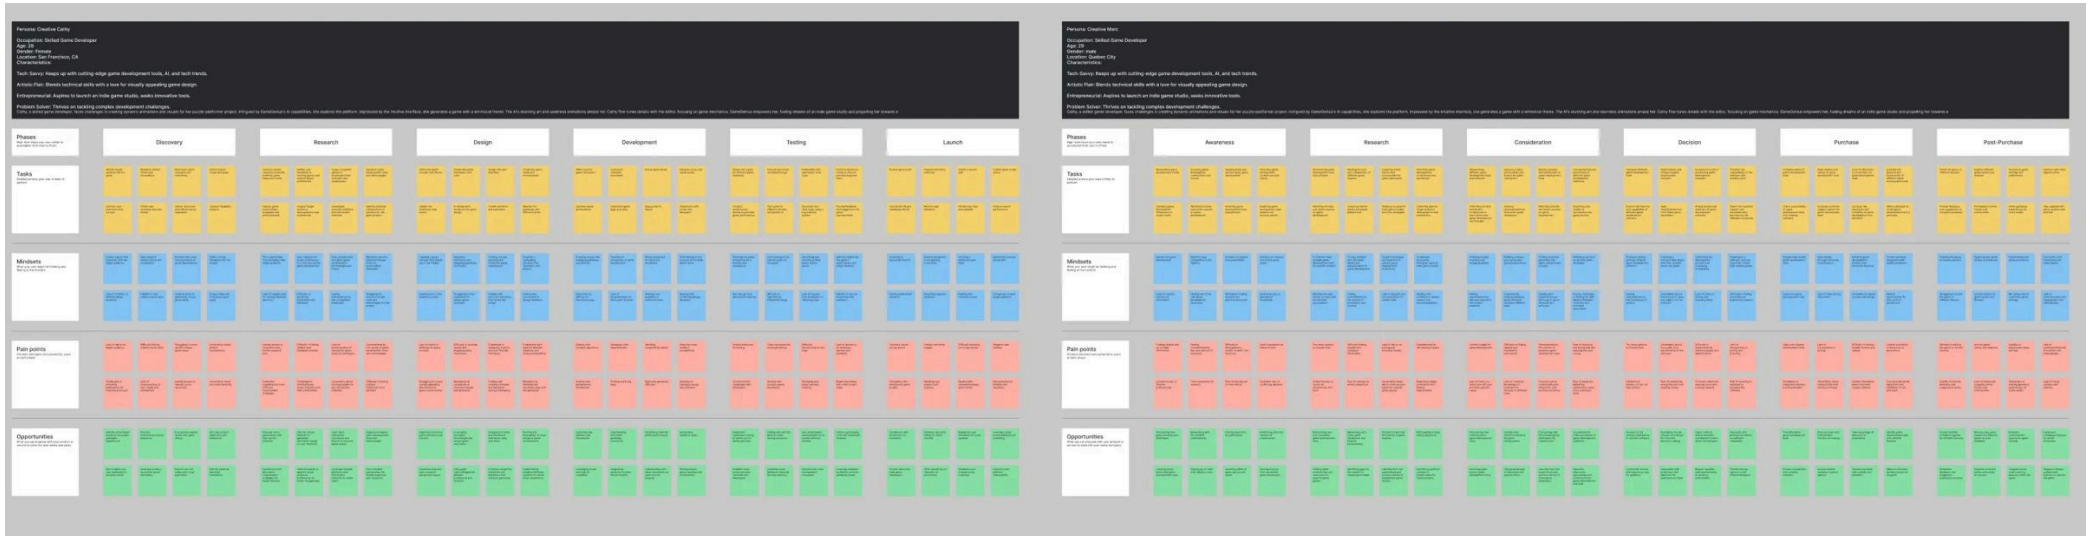

1. Usage and reset date at a glance.
2. Costs are listed before you spend.

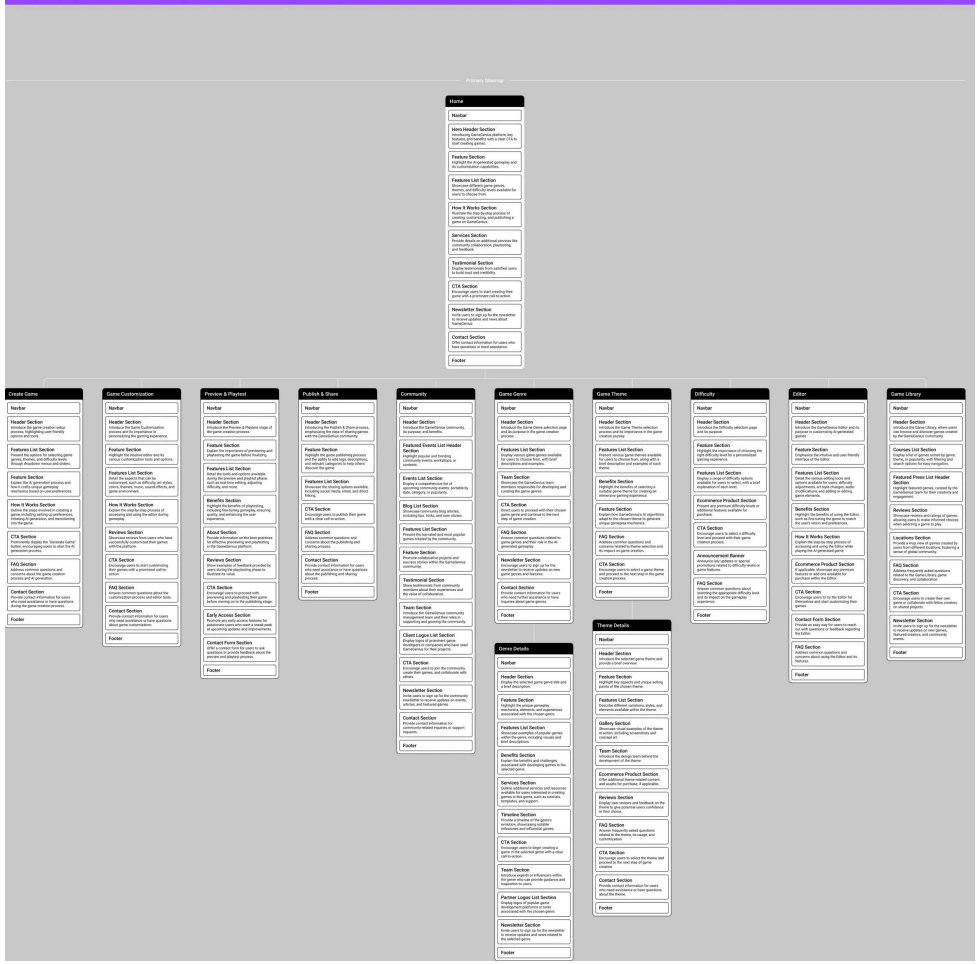

24 Settings and accessibility

1. Editor accessibility comes first.
2. Defaults make every published game more accessible.

NZM · LOBBY-TO-REWARDS FLOW

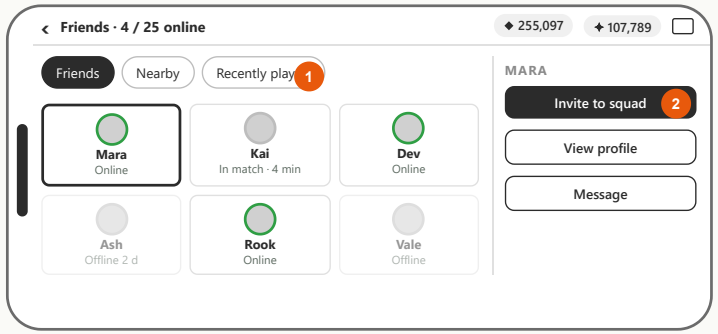

1 Lobby

1. Your character is the centre; squad slots beside it.
2. Mode and Play sit together, bottom right, under the thumb.

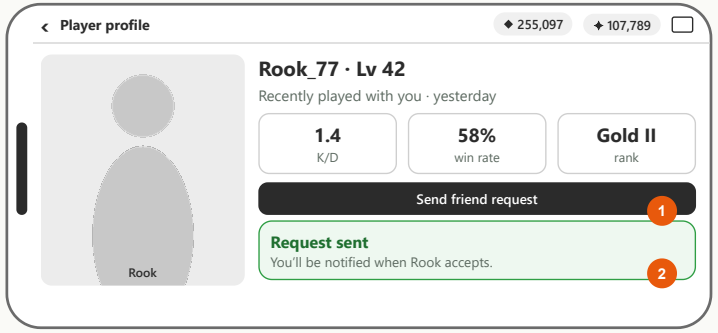

2 Mode select

1. PVP and PVE are separate tabs with their own rules.
2. Says which loadout the mode will use.

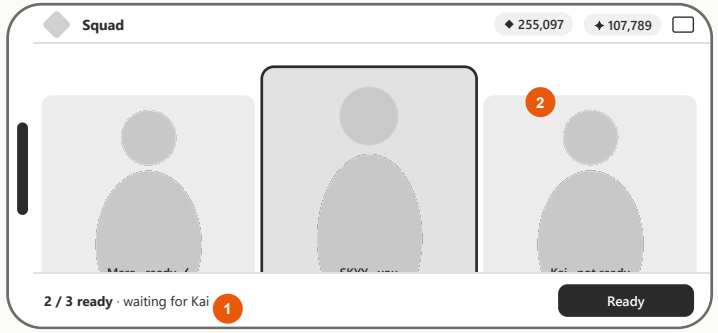

3 Friends

1. Status says who can join right now.
2. Actions appear for the selected friend only.

4 Player profile

1. A few stats help decide who to add.
2. The button becomes a sent state, not a dead end.

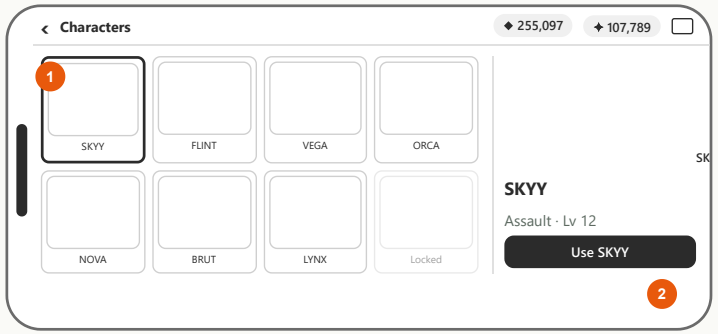

5 Squad ready check

1. Readiness is a count in words.
2. Each slot says who it is and their state.

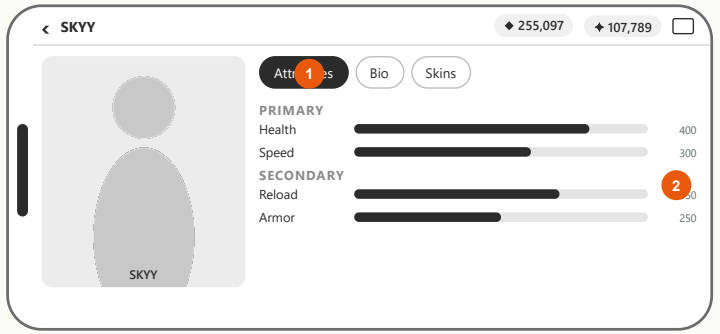

6 Matchmaking

1. Elapsed and estimated time.
2. Cancel returns the squad together.

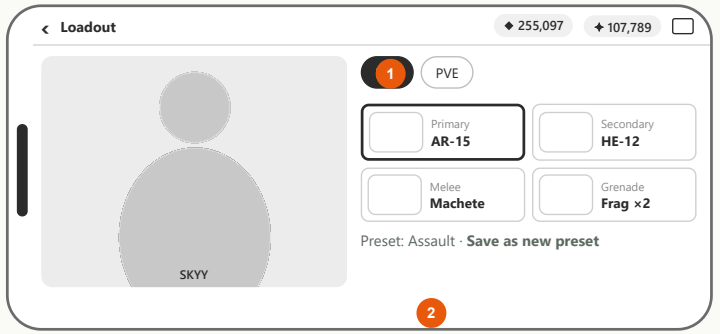

7 Character select

1. Locked characters say how to unlock.
2. Selecting previews; Use confirms.

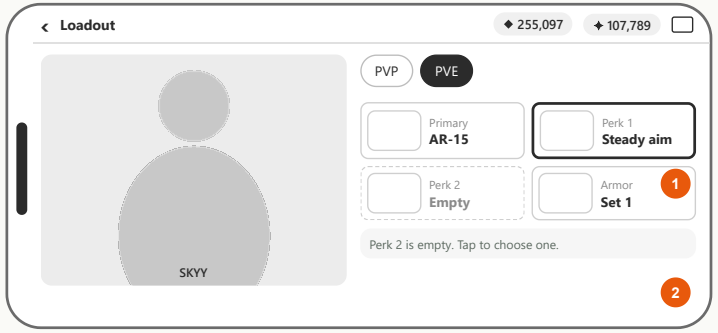

8 Character detail

1. Tabs separate stats, story and cosmetics.
2. Primary and secondary attributes are grouped.

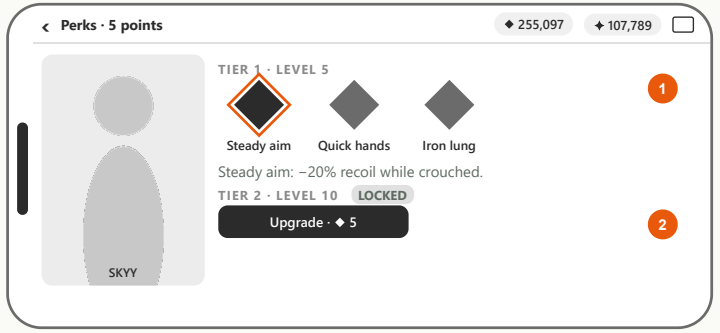

9 Loadout · PVP

1. PVP and PVE loadouts are kept separately.
2. Presets let players switch builds fast.

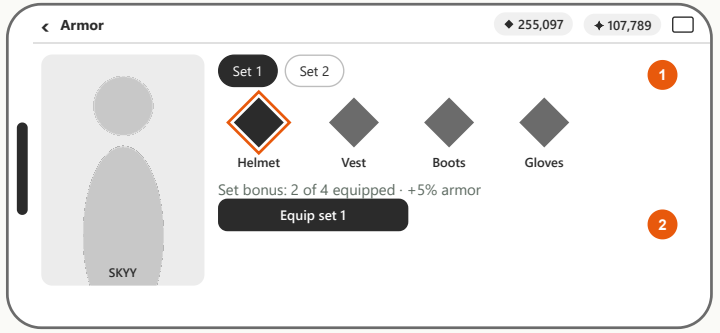

10 Loadout · PVE

1. PVE adds perk and armor slots.
2. Empty slots are called out, not just blank.

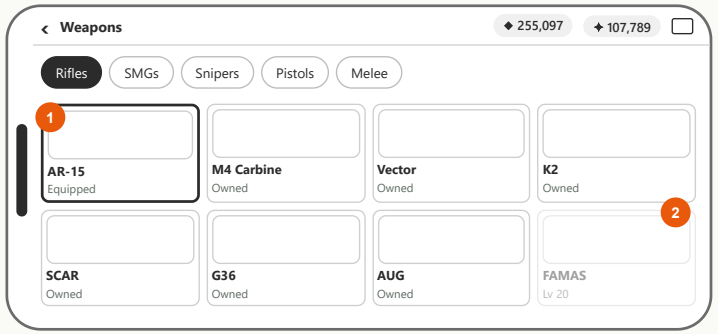

11 Perks

1. Each tier says when it unlocks.
2. The cost is on the button.

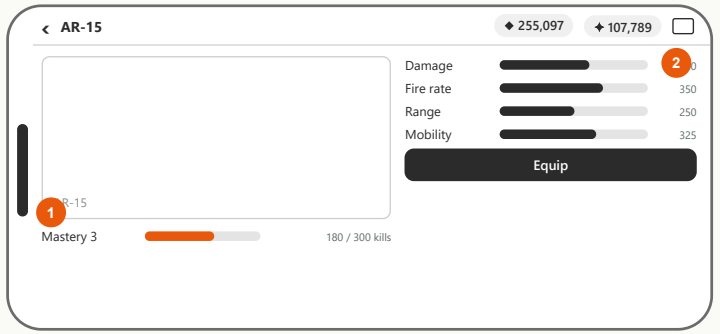

12 Armor set

1. Two sets can be saved and swapped.
2. Set bonus progress is visible.

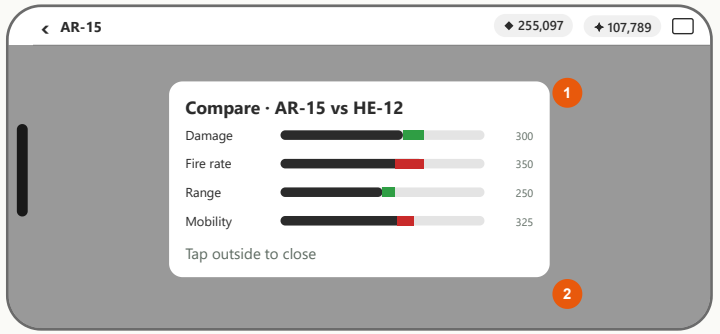

13 Weapon list

1. Equipped, owned and locked states are labelled.
2. Locked weapons say the level needed.

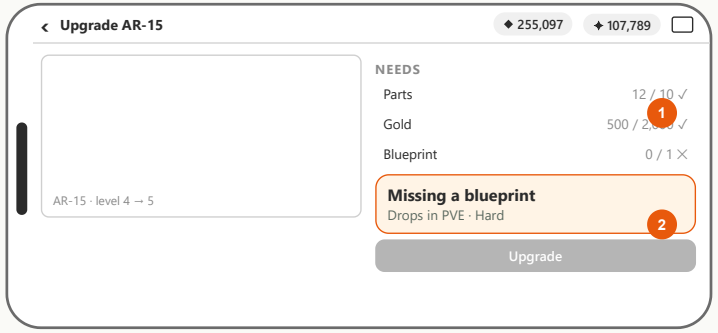

14 Weapon detail

1. Mastery progress lives with the weapon.
2. Stats use the same bars everywhere.

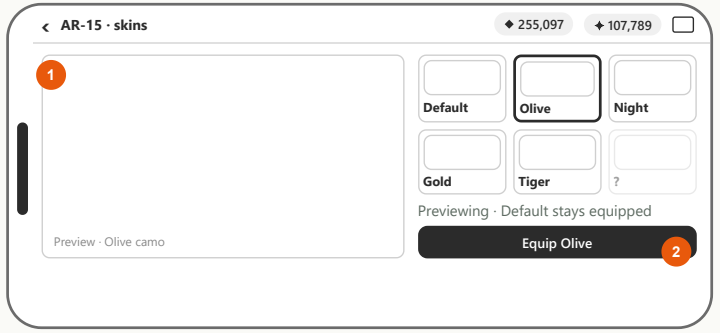

15 Attribute popup

1. Gains and losses are shown on the same bar.
2. Tapping outside closes, as noted in the spec.

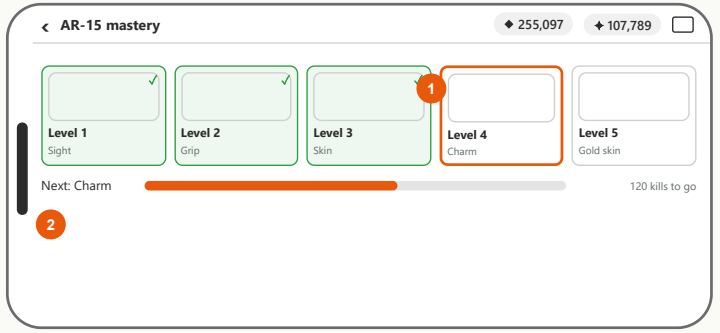

16 Weapon upgrade

1. Each requirement shows have / need.
2. Missing items say where to get them.

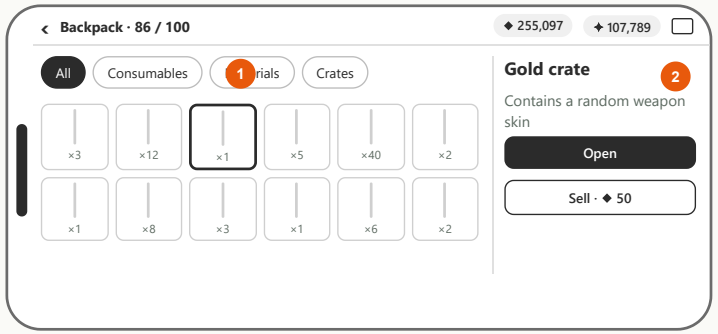

17 Weapon skins

1. Large preview before committing.
2. Preview never replaces what is equipped.

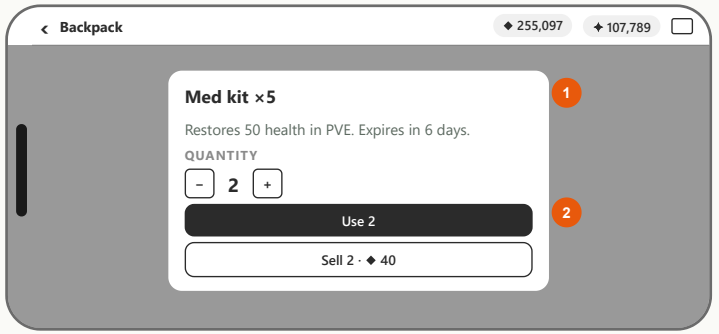

18 Mastery rewards

1. A track shows past, next and future rewards.
2. The next reward says exactly what it takes.

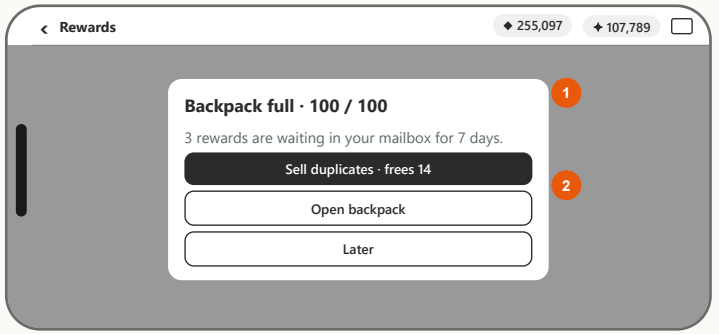

19 Backpack

1. Capacity is always visible.
2. Actions for the selected item sit beside the grid.

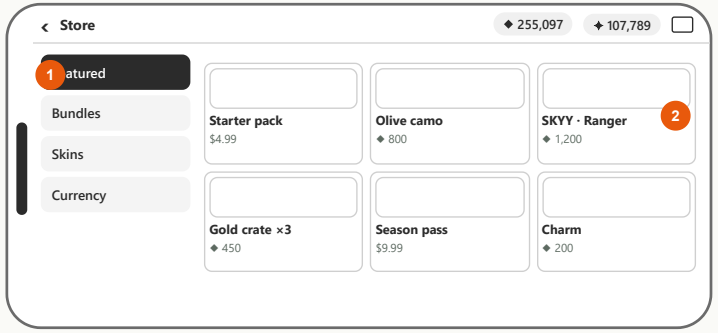

20 Item detail

1. Expiry is stated before it matters.
2. Quantity is chosen before using or selling.

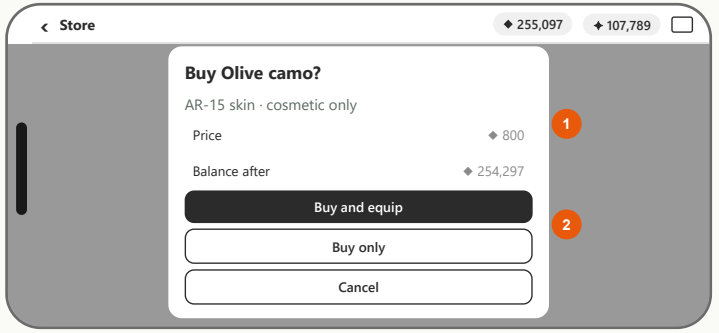

21 Backpack full

1. Rewards are never lost to a full backpack.
2. One tap frees space with a clear result.

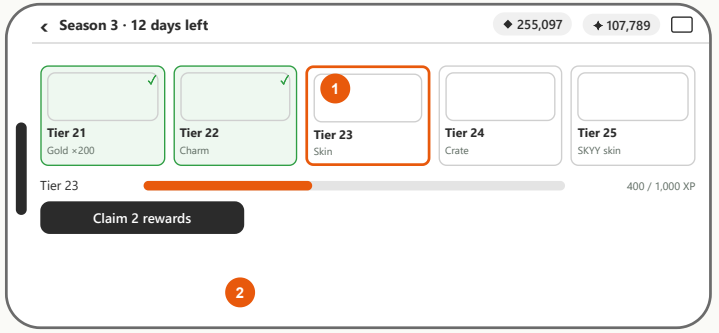

22 Store

1. Categories on the left, like the lobby menu.
2. Real-money and in-game prices look different.

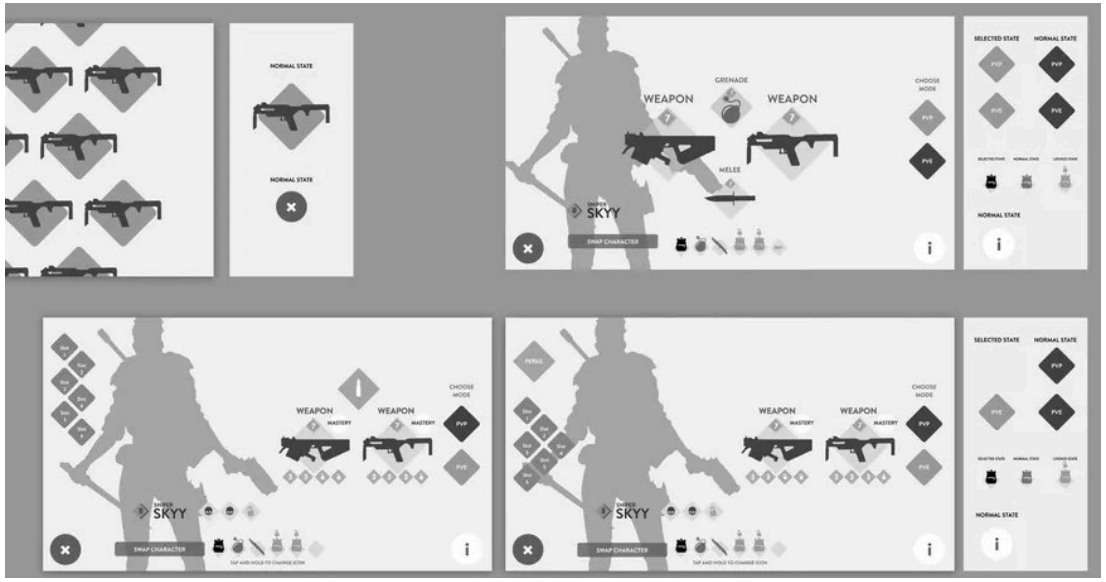

23 Purchase confirm

1. States that it is cosmetic only.
2. Choose whether to equip right away.

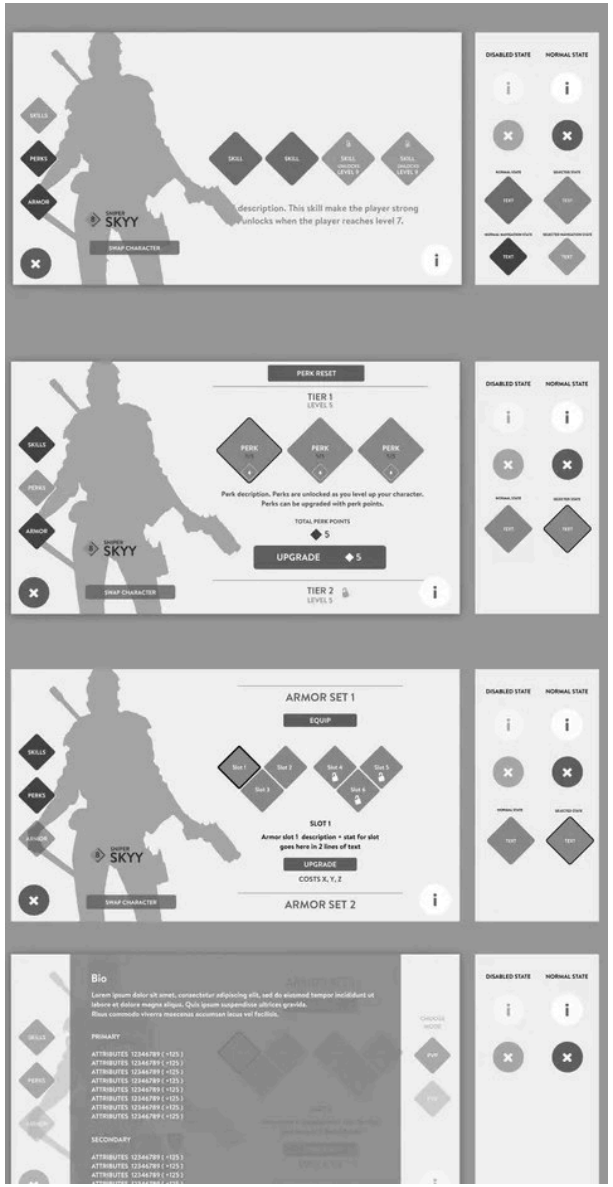

24 Season pass

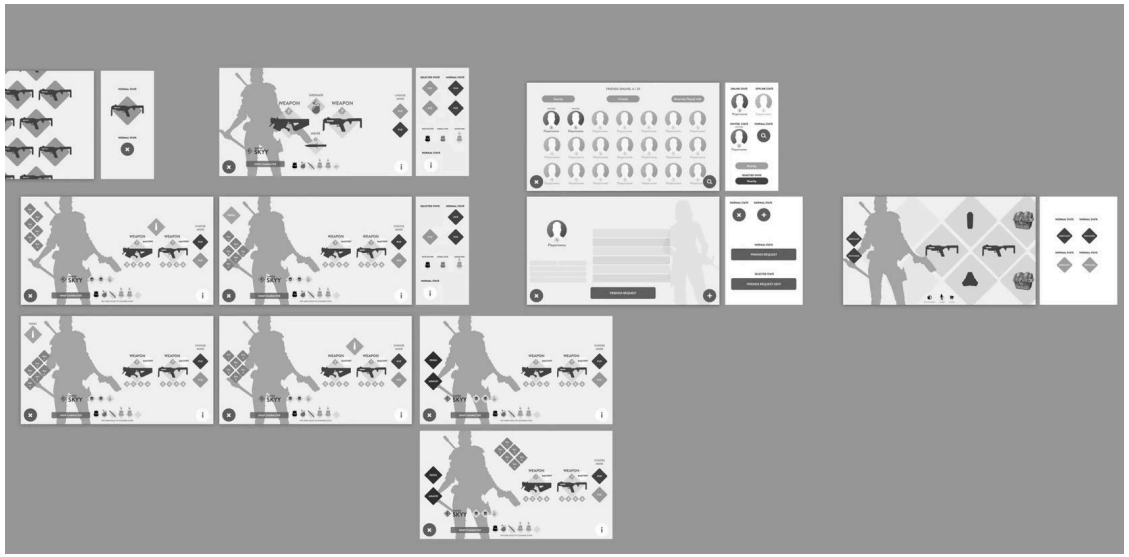

1. Time left and the next tier in one view.
2. Unclaimed rewards get one claim action.

TNT · BATTLE-TO-UPGRADE FLOW

1 Home

1. Play is the one big action on Home.
2. Quests show progress, not just a list.
3. Chest slots show ready, timing and empty.

2 Check the deck

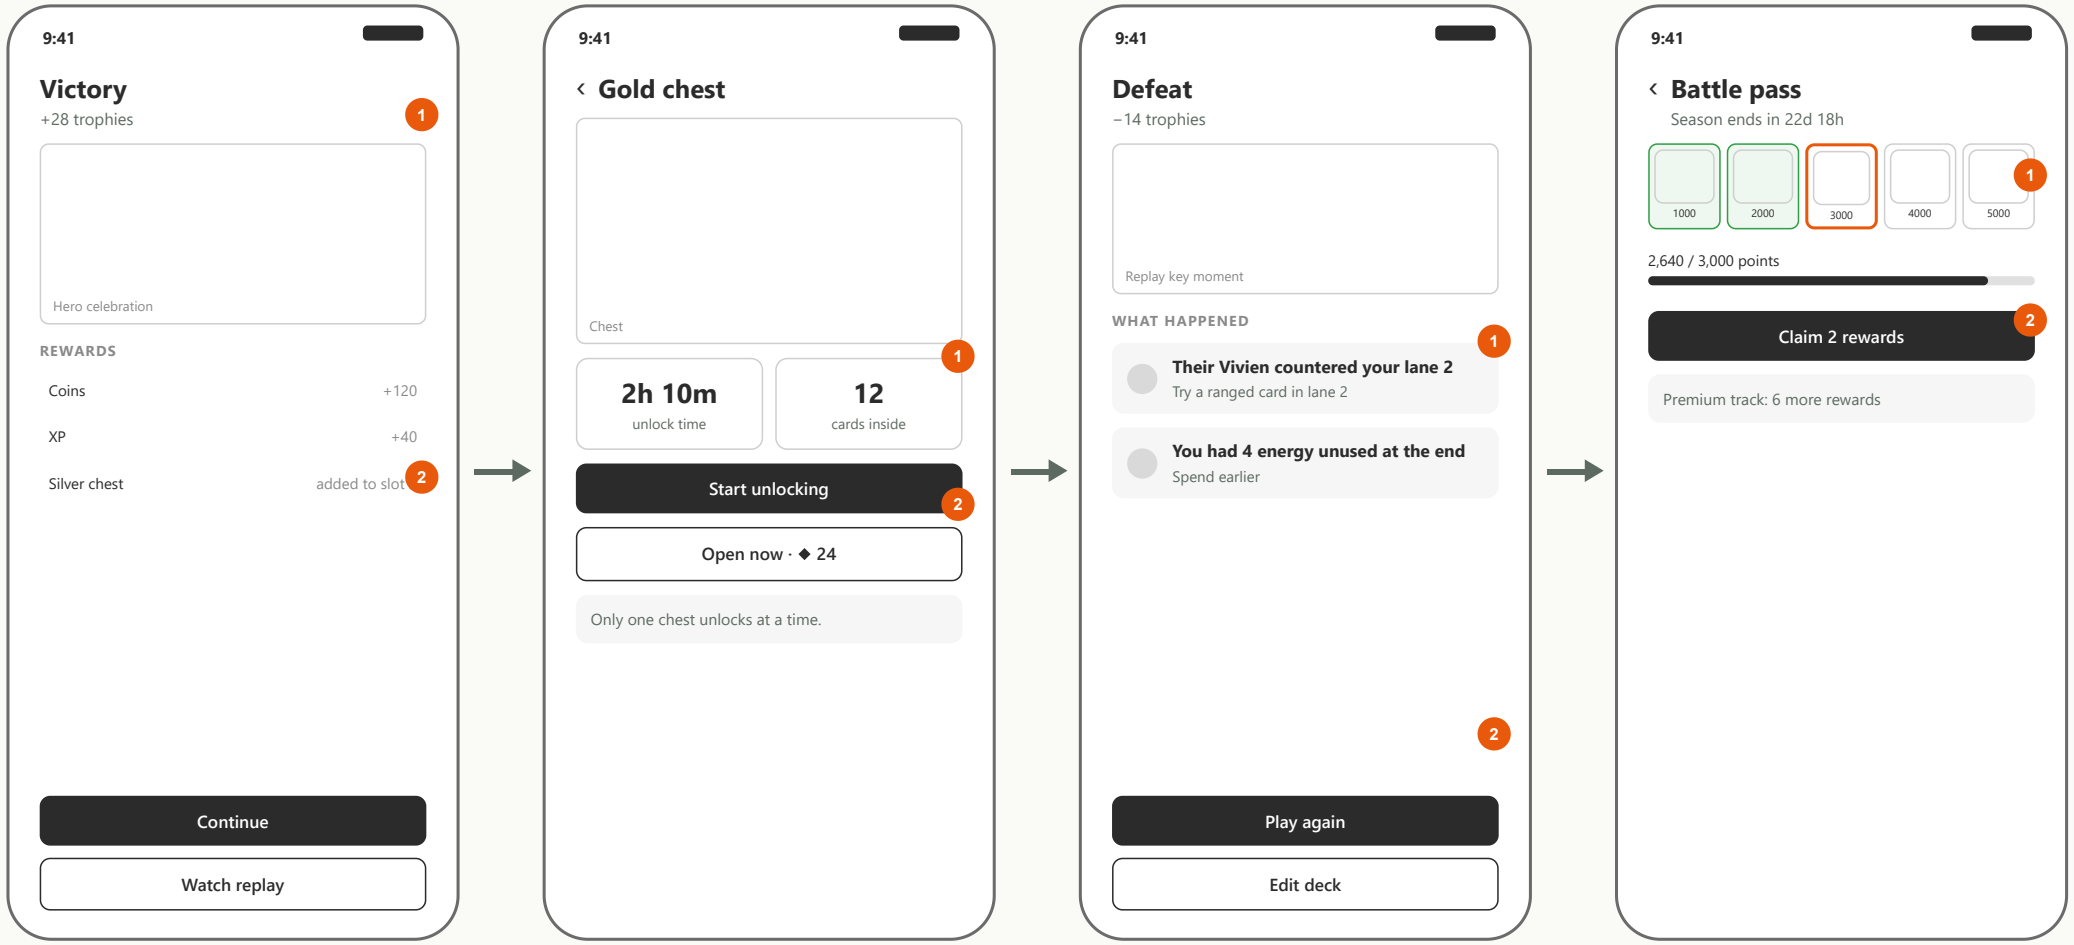

1. The deck is reviewed before every match.
2. Suggests an upgrade, never forces it.

3 Finding an opponent

1. Both sides mirrored; the opponent appears when found.
2. Explains how the opponent is chosen.

4 Battle

1. Timer and both scores always visible.
2. Selected card lifts; cost on every card.
3. Energy bar shows what you can afford.

5 Victory

1. Trophy change stated first.
2. Says where the chest went.

6 Chest unlock

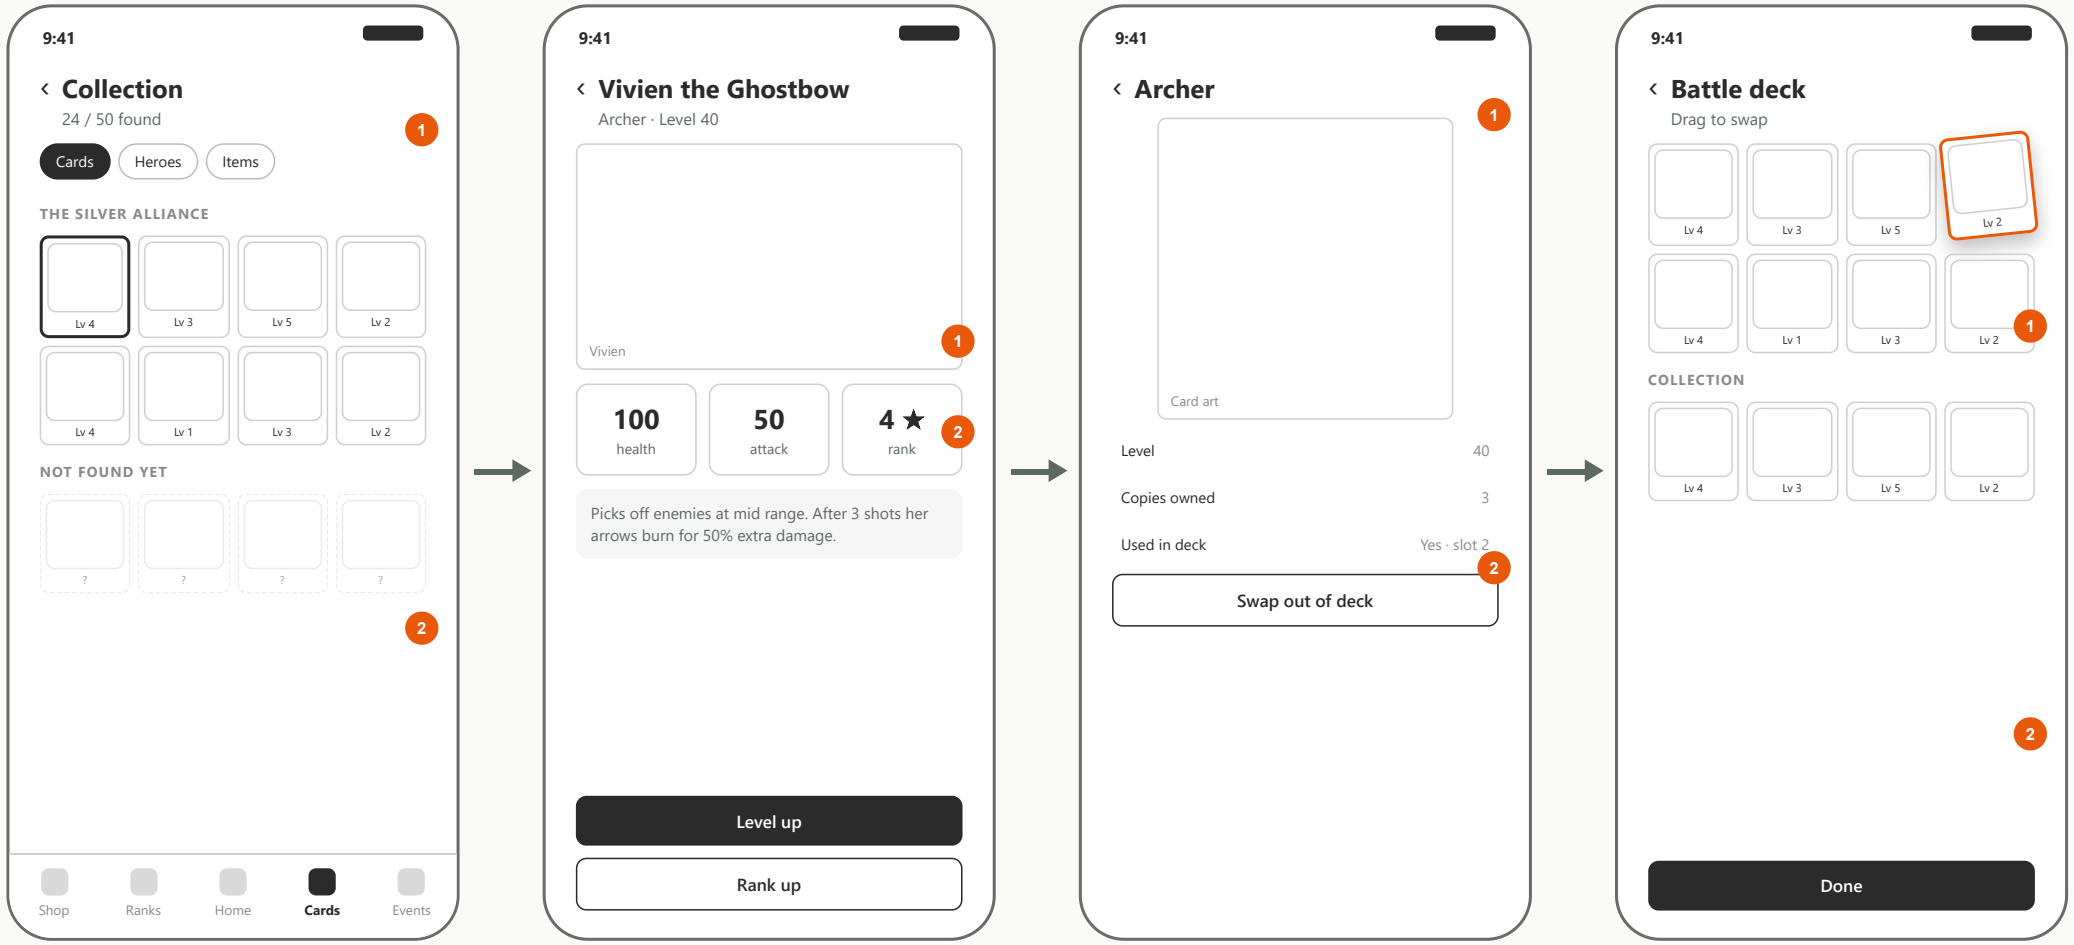

1. Time and contents before committing.
2. The paid shortcut is secondary.

7 Defeat

1. Two specific, fixable reasons.
2. Edit deck is right there.

8 Battle pass

1. Past, next and future rewards in one strip.
2. Claim is one action, not one per reward.

9 Collection

1. Progress toward the full set.
2. Undiscovered cards keep their place.

10 Hero details

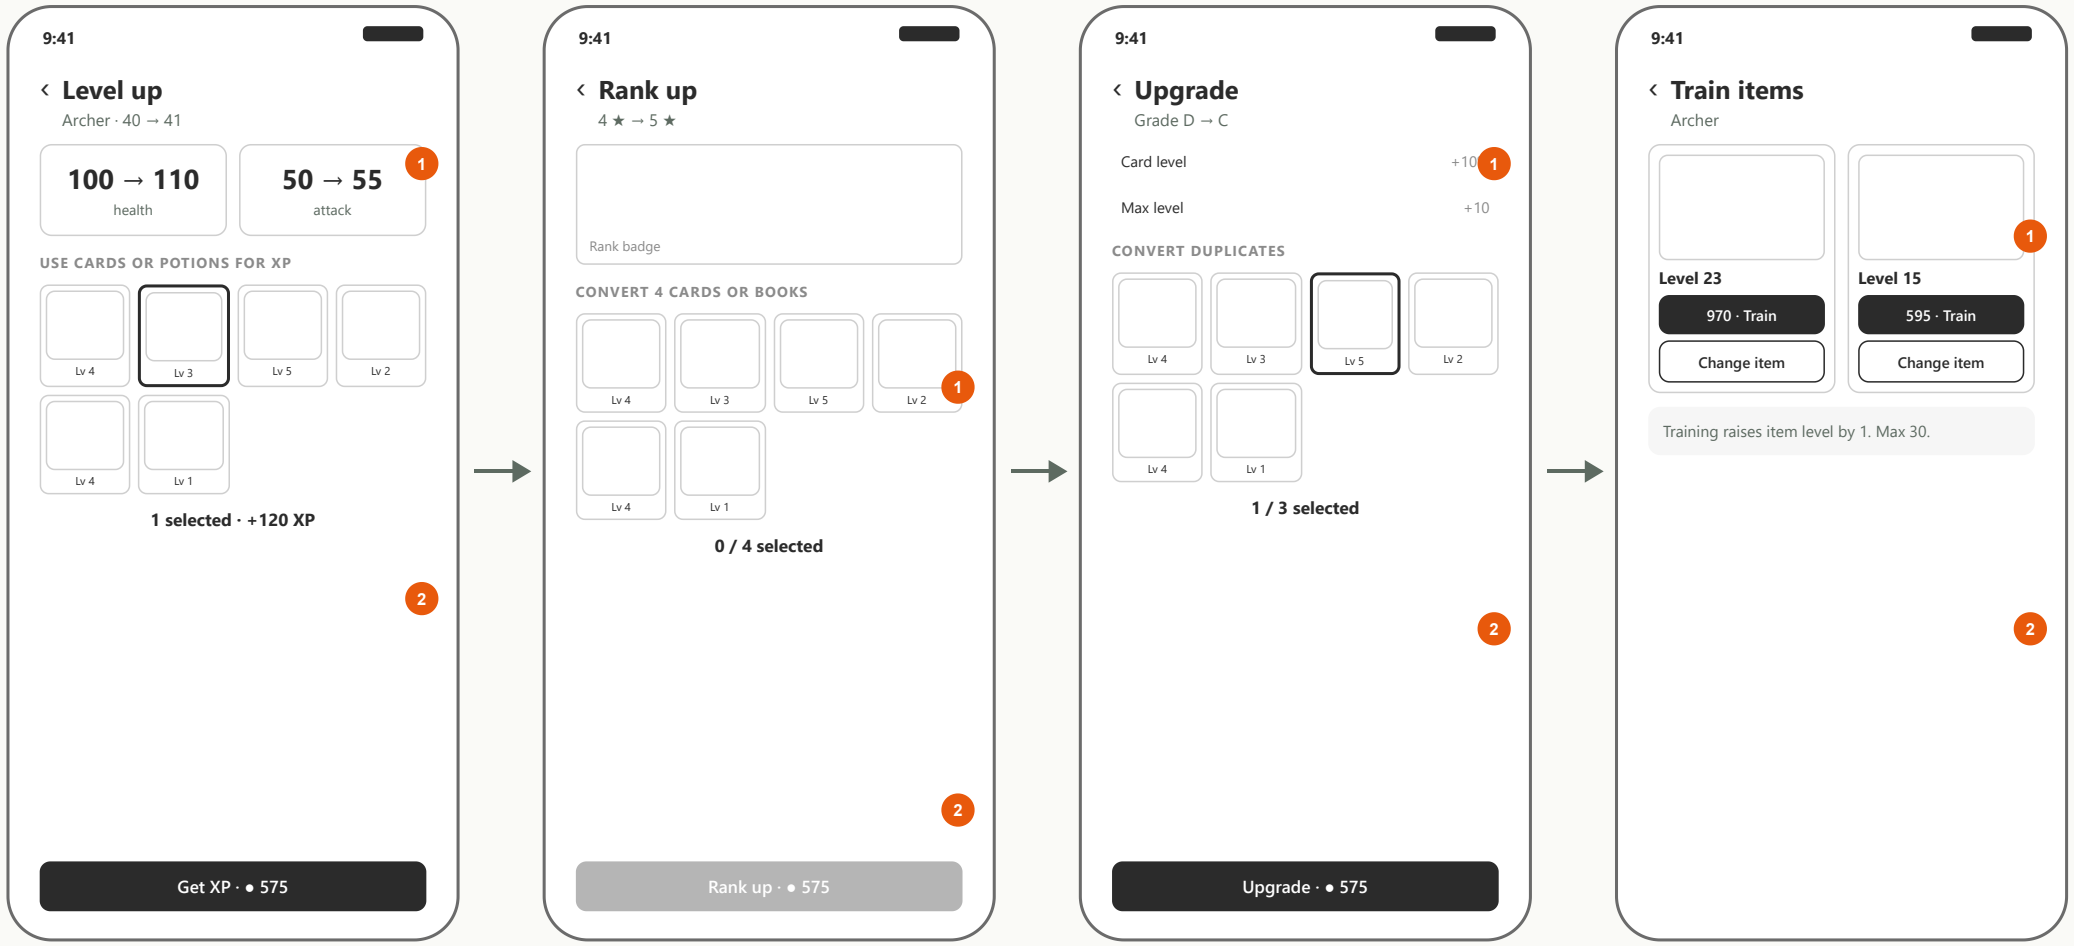

1. Plain-language ability text.
2. Next actions match the card flows.

11 Card info

1. Big card art first, details after.
2. Shows if and where it is used.

12 Edit team

1. Drag between deck and collection.
2. Done saves; leaving asks first.

13 Level up

1. Before and after stats, side by side.
2. The count is the feedback.

14 Rank up

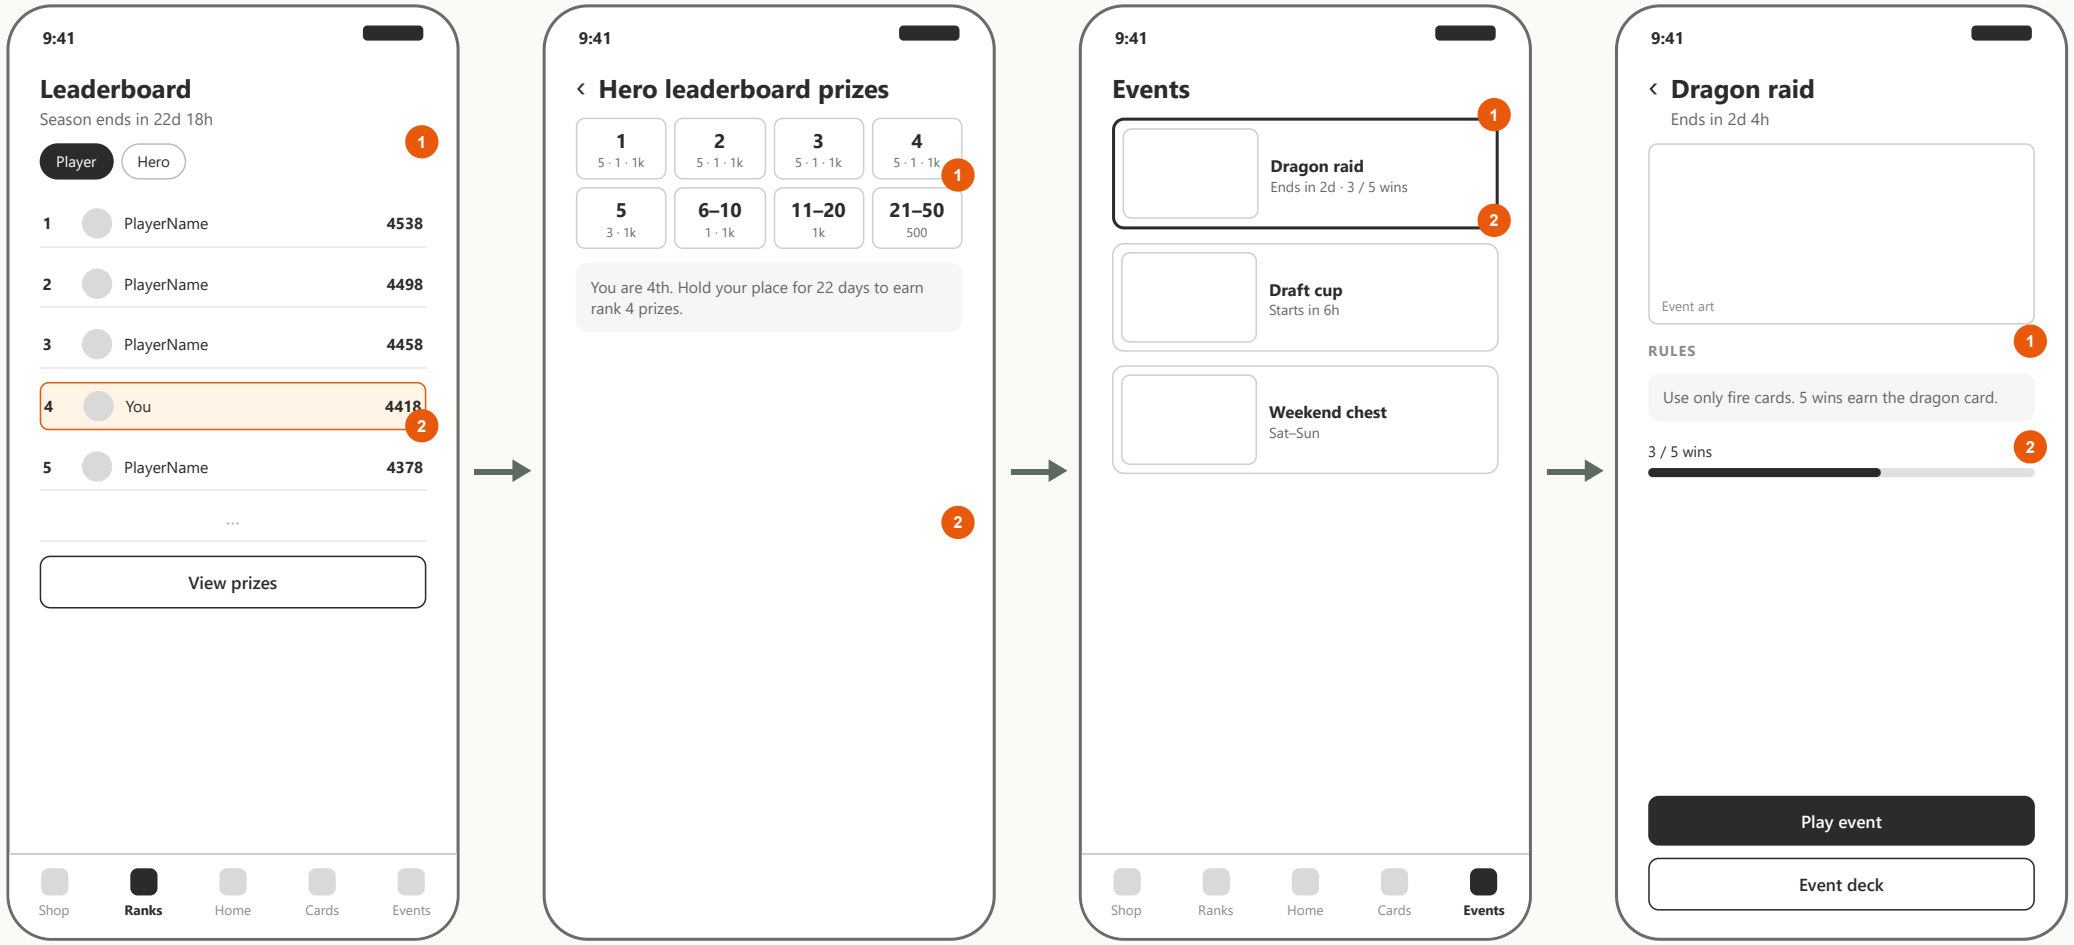

1. The exact number needed.
2. Disabled until the count is met.

15 Upgrade

1. What the upgrade changes, in percent.
2. Only duplicates can be used, so they are shown.

16 Item training

1. Each equipped item trains independently.
2. Limits are stated up front.

17 Leaderboard

1. Player and hero boards share one layout.
2. Your row is highlighted, even off the top.

18 Prize table

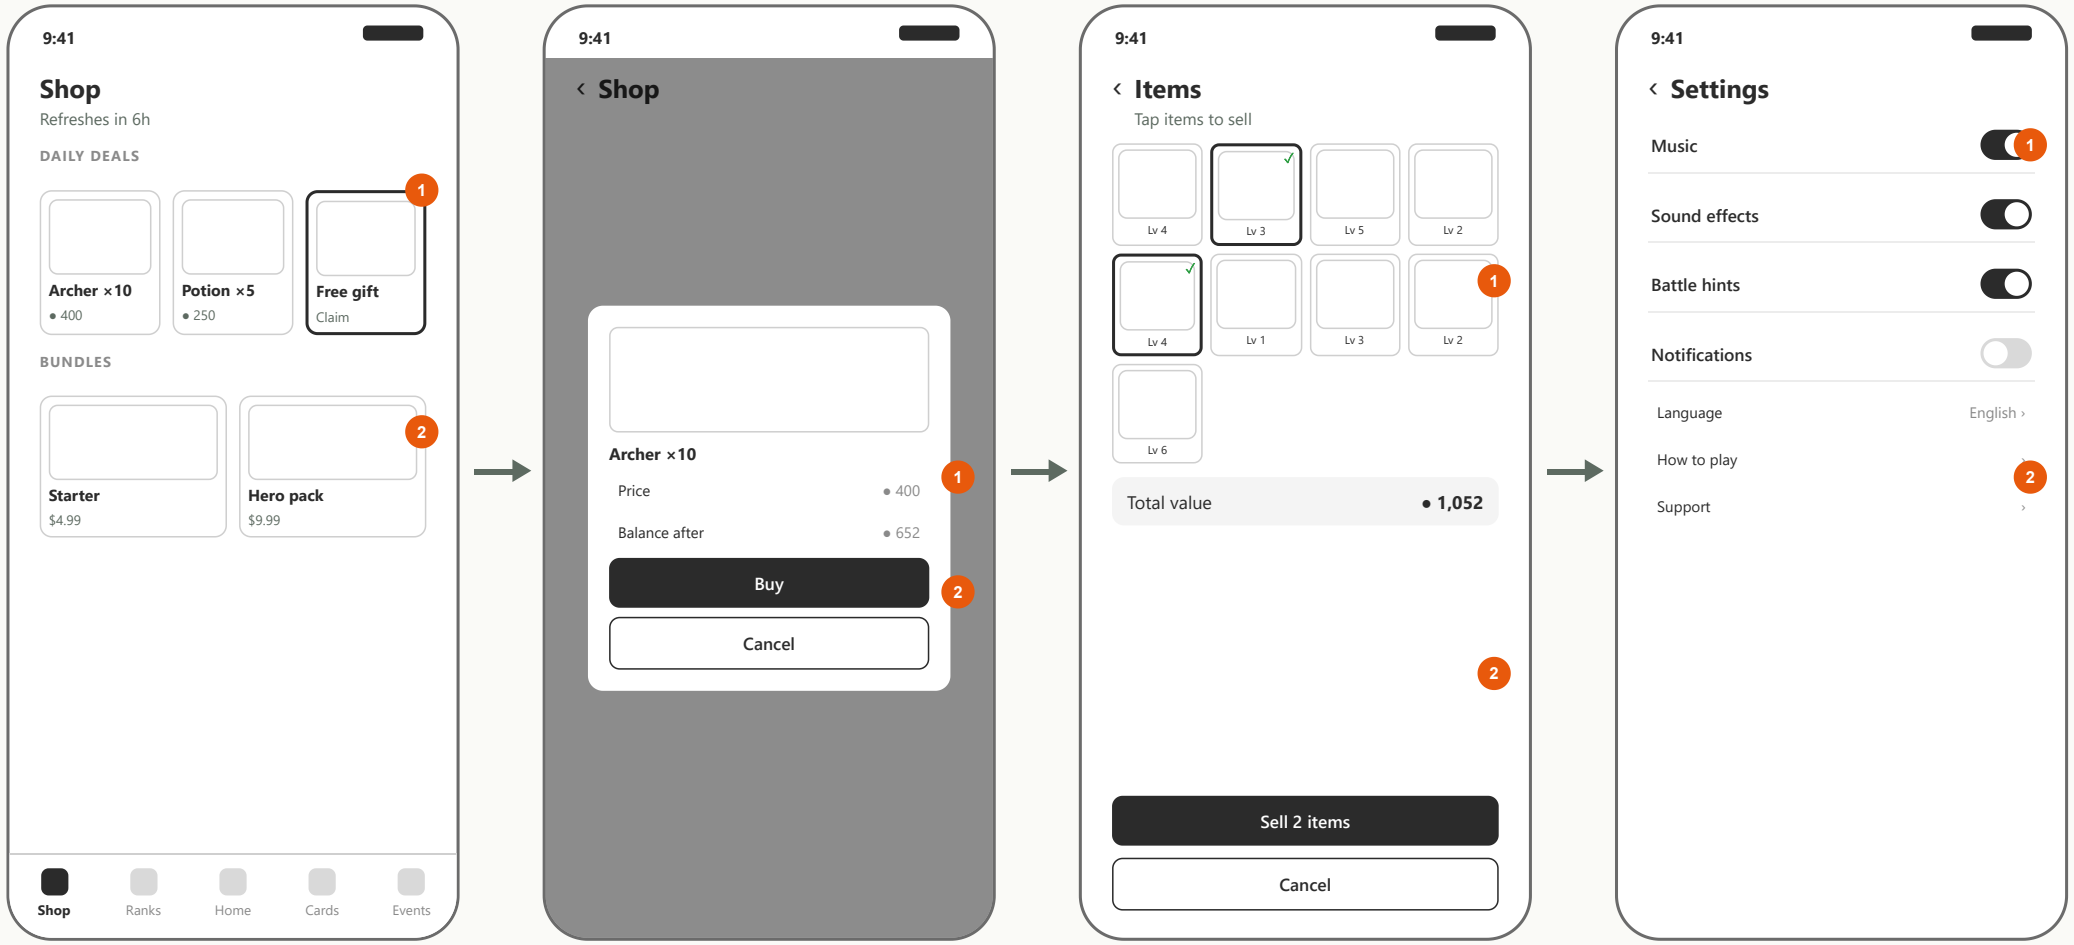

1. Every rank band in one grid.
2. Ties the table to your own position.

19 Events

1. Active events first, with progress.
2. Upcoming events say when.

20 Event detail

1. Rules in one sentence.
2. Progress toward the reward.

21 Shop

1. The refresh time sets expectations.
2. Real-money and coin prices look different.

22 Purchase confirm

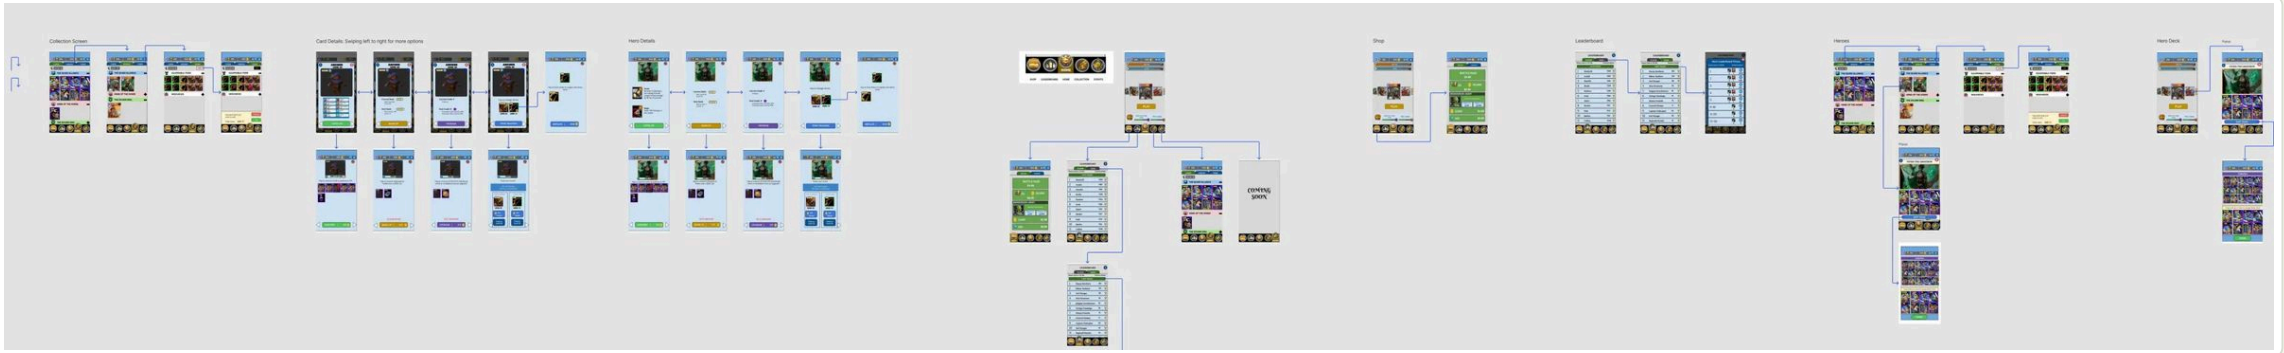

1. Balance after purchase before tapping.
2. Cancel is equal width.

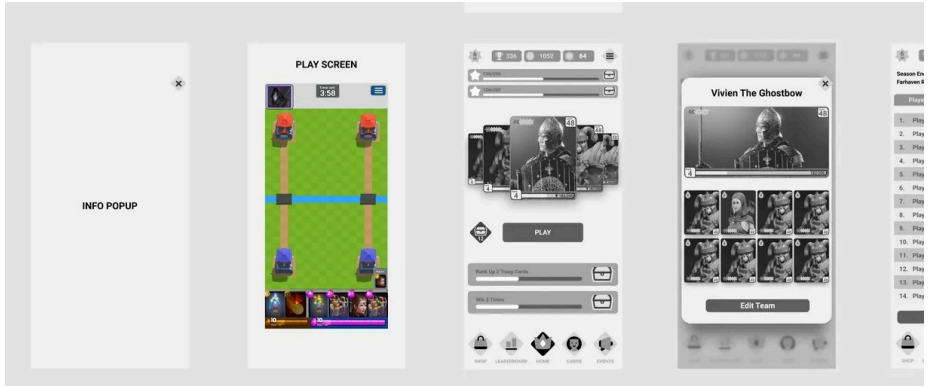

23 Sell items

1. Picked items are marked in the grid.
2. Total value updates live.

24 Settings and info

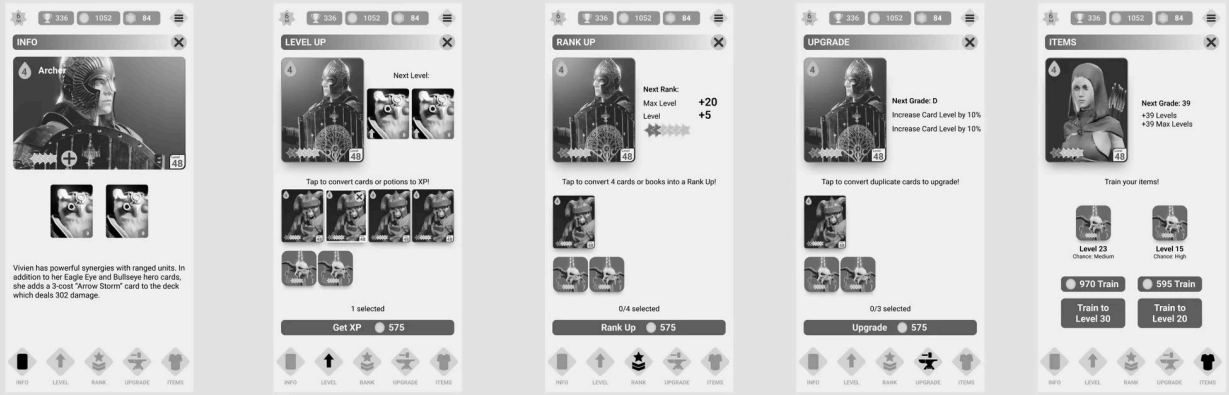

1. Toggles apply instantly.
2. Help is reachable from settings.

HERO INFO SCREEN | HERO LEVEL UP | HERO RANK UP | HERO UPGRADE | HERO ITEM TRAINING

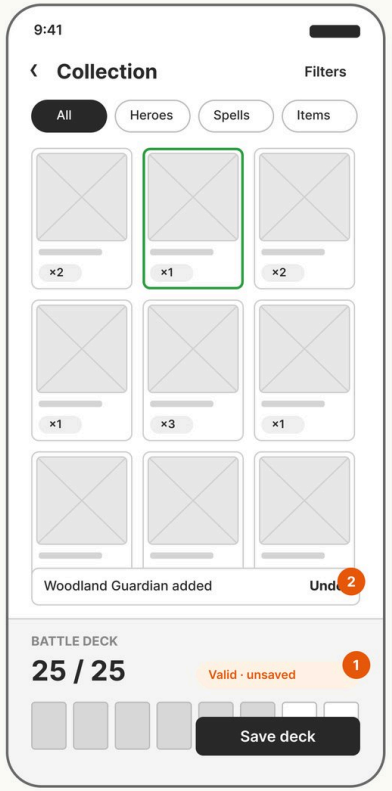

1 Browse with the deck in view

1. The count and what is missing are always visible.
2. Copies owned show on every card.

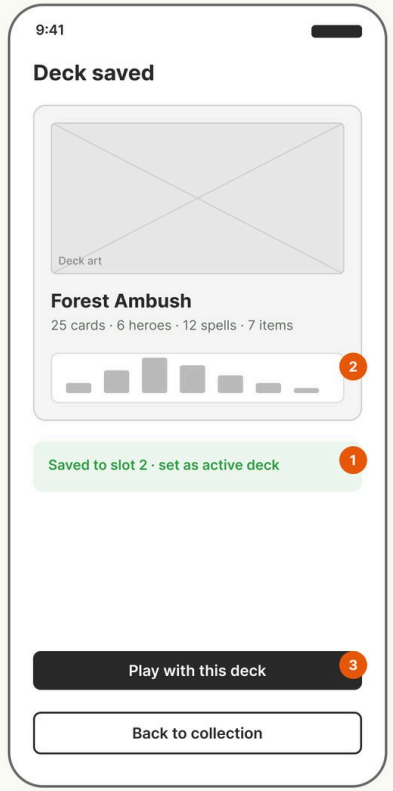

2 Hit a rule, keep the deck

1. The blocked card is marked where it was tapped.
2. The message says the rule and that nothing was lost.
3. The deck count does not change.

3 Valid is not saved

1. Valid and saved are two different states.
2. The last change can be undone in one tap.

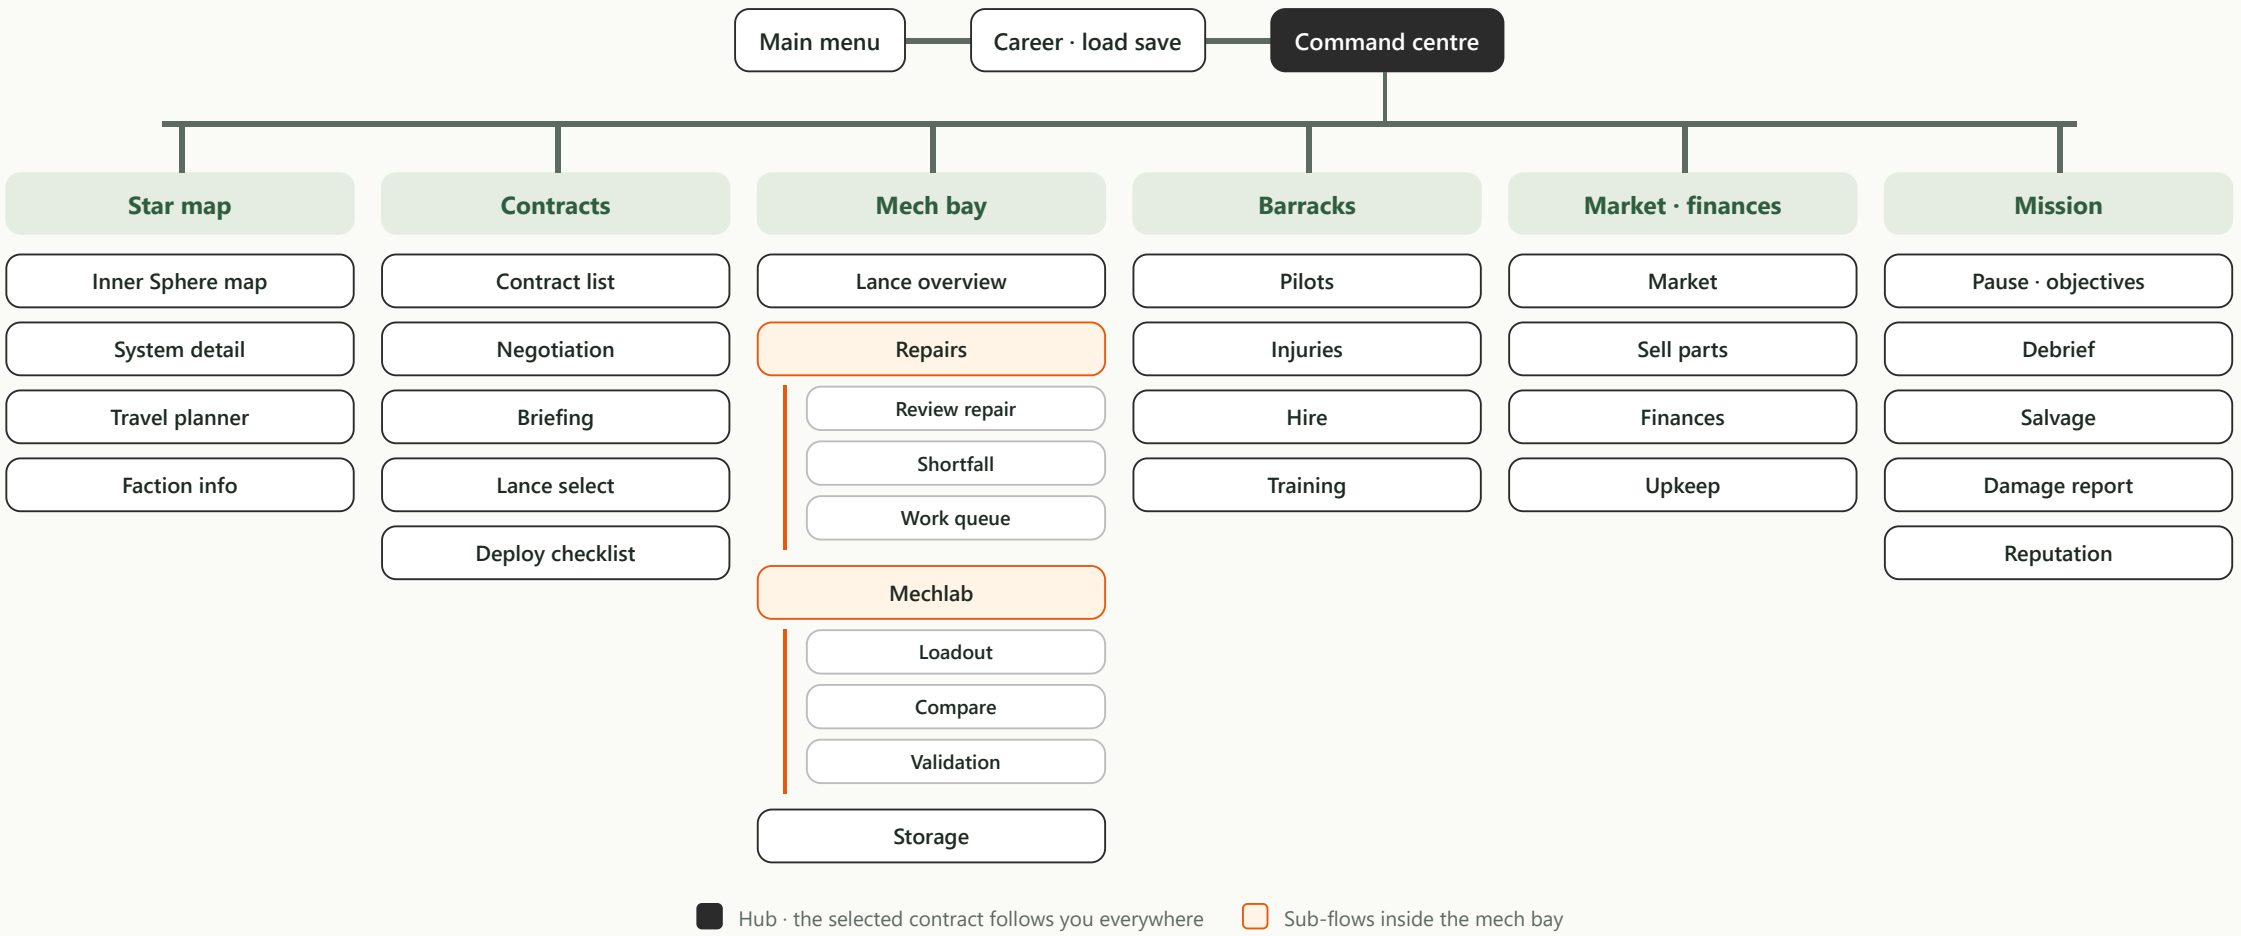

4 Saved, with a next step

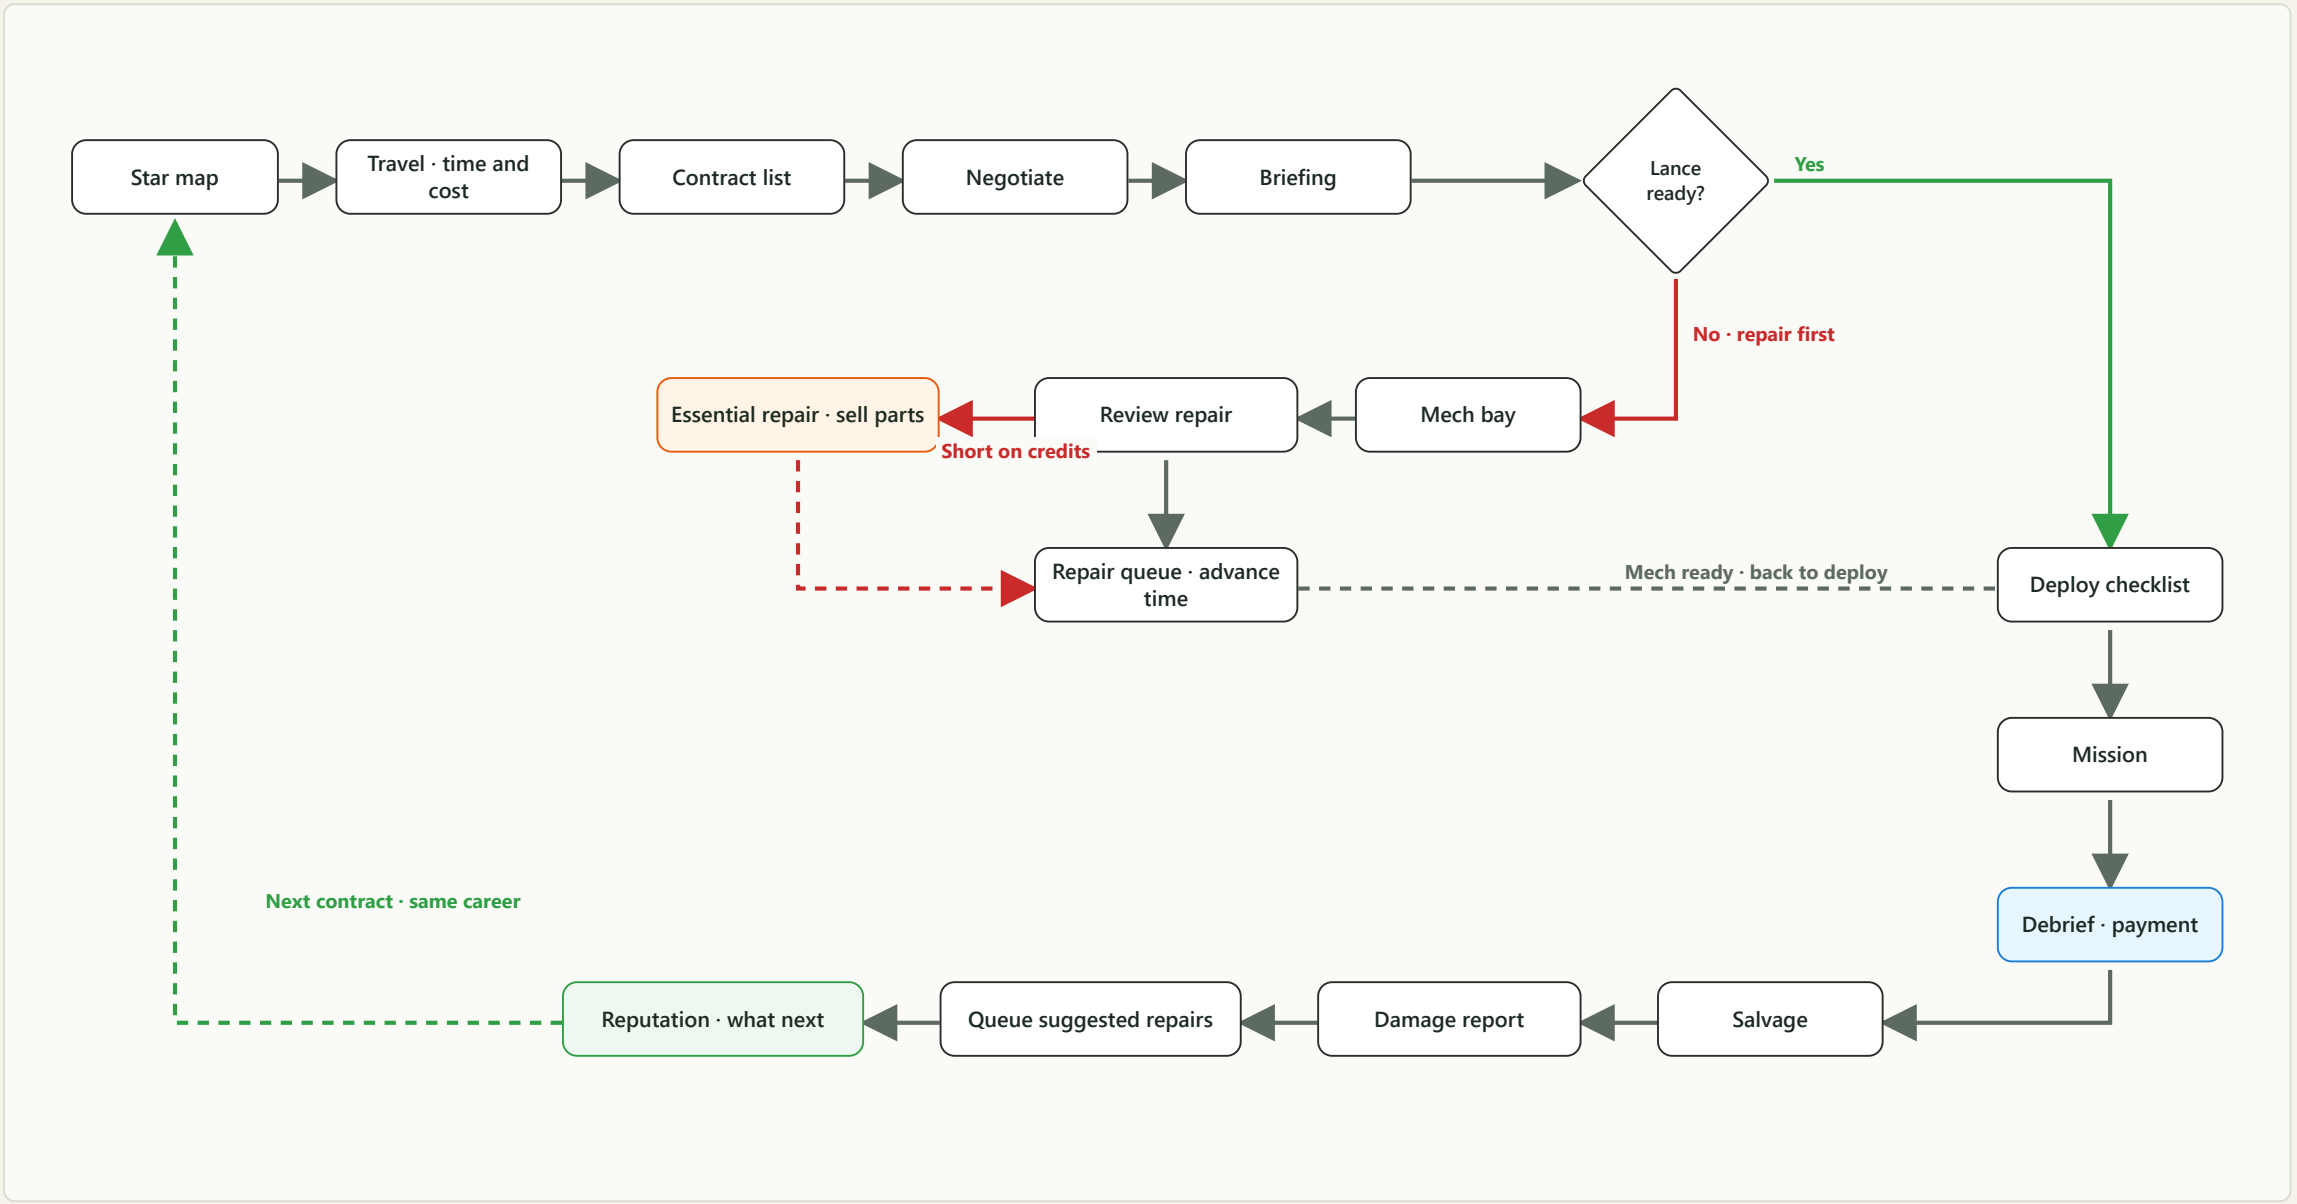

1. Confirms where it was saved.
2. A summary shows the deck's shape.
3. The next step is to play.

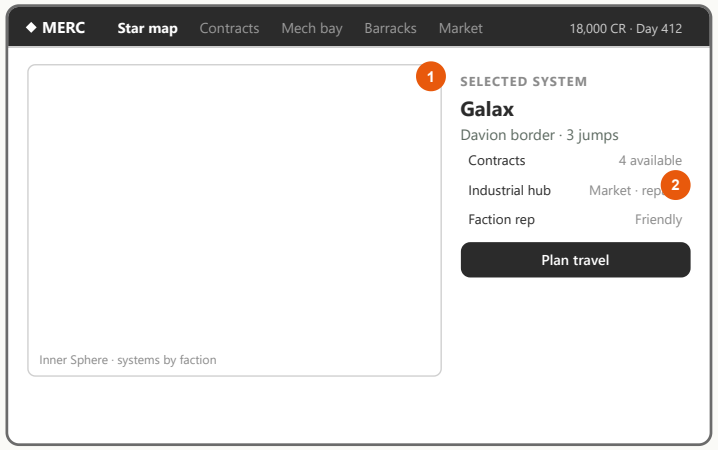

EXAMPLE RULES

- 25 cards per deck
- Max 2 copies of a card
- At least 4 heroes
- States: incomplete → valid, unsaved → saved

MECHWARRIOR 5 · CONTRACT-TO-PAYDAY FLOW

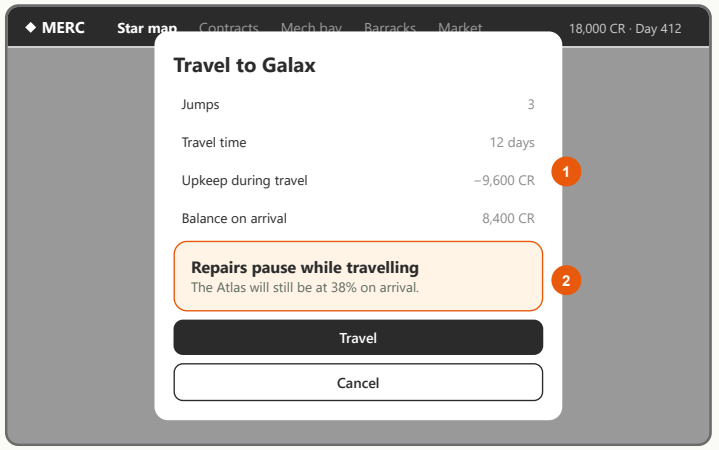

1 Star map

1. The map stays visible while a system is inspected.
2. What a system offers is listed before you travel.

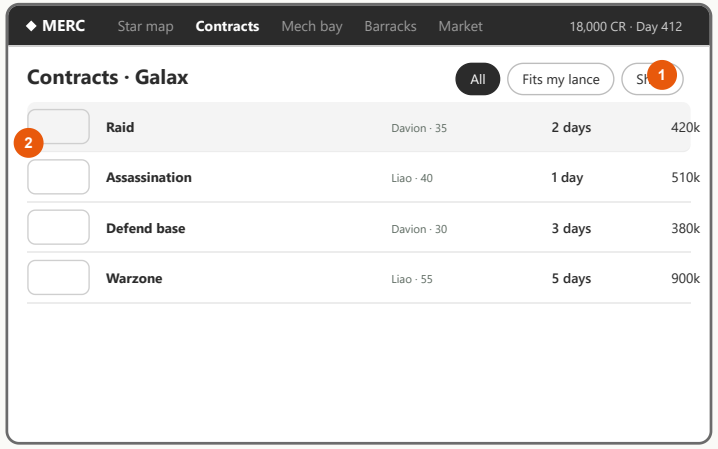

2 System detail

1. Contracts preview before committing to travel.
2. Travel time sits beside each contract.

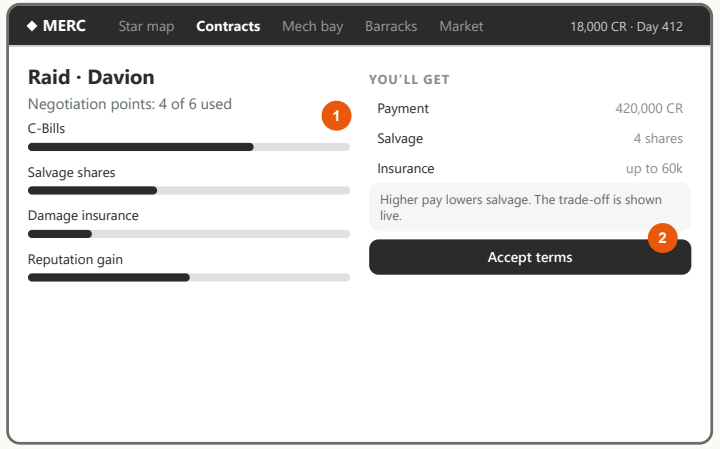

3 Confirm travel

1. Time and money cost shown before the jump.
2. Warns about side effects, like paused repairs.

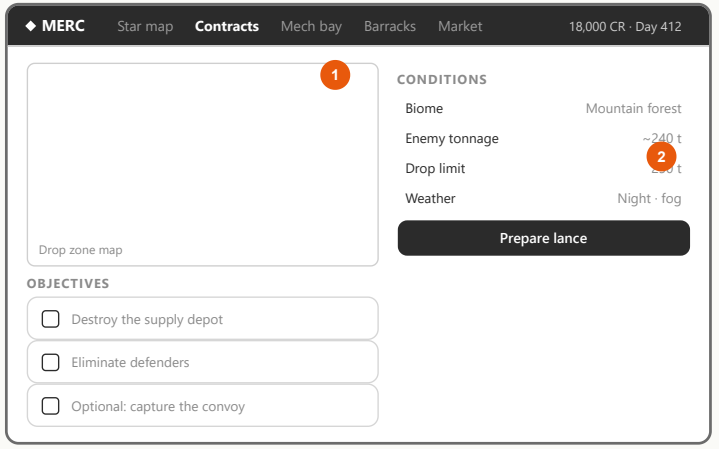

4 Contract list

1. Filter by what your current lance can handle.
2. Difficulty, time and pay in one row.

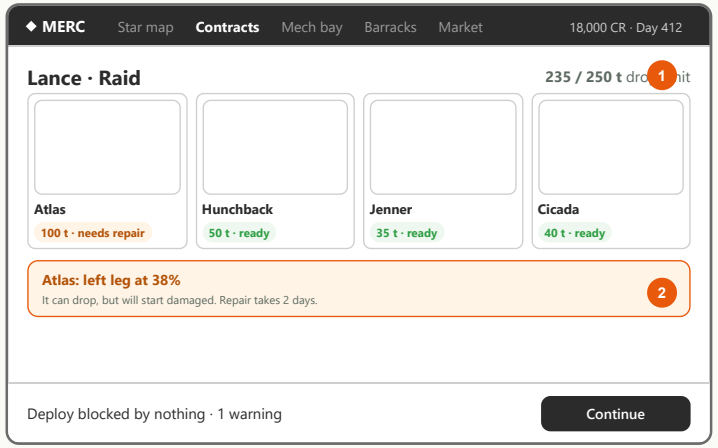

5 Negotiate the contract

1. Every slider is a visible trade-off.
2. The result updates as you negotiate.

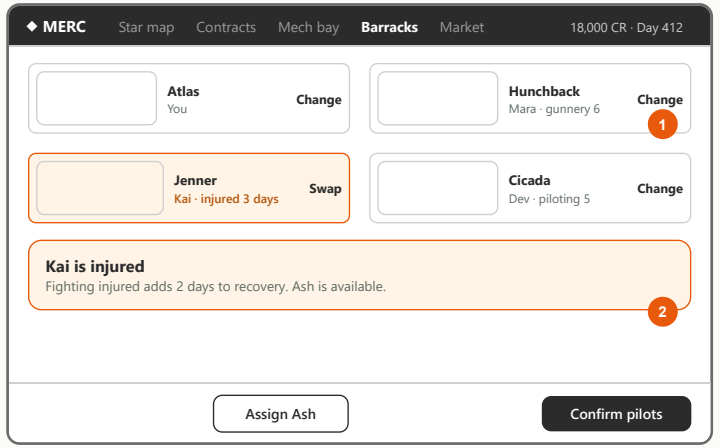

6 Mission briefing

1. Objectives and conditions on one screen.
2. Drop limit is visible before choosing mechs.

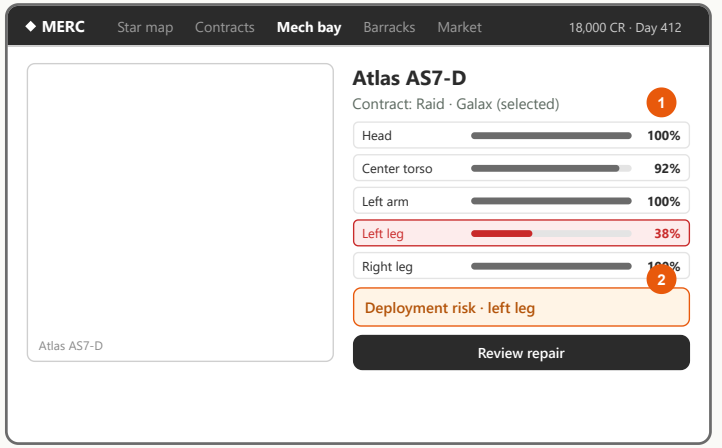

7 Select the lance

1. Tonnage against the limit, always visible.
2. Damage is a warning, not a hidden surprise.

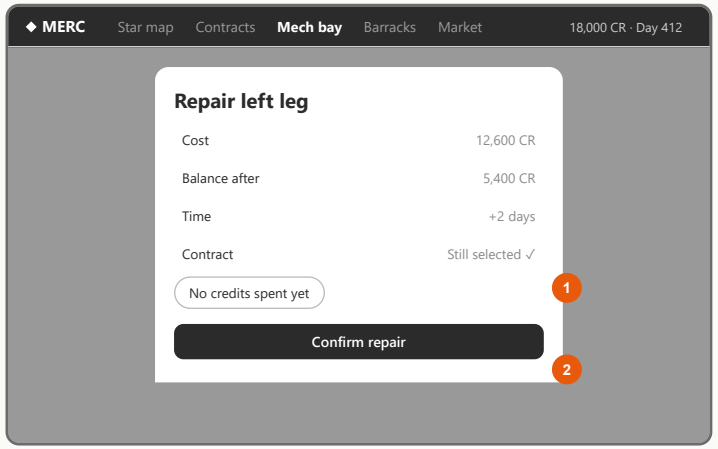

8 Assign pilots

1. Pilot condition shows where the choice is made.
2. A ready replacement is suggested.

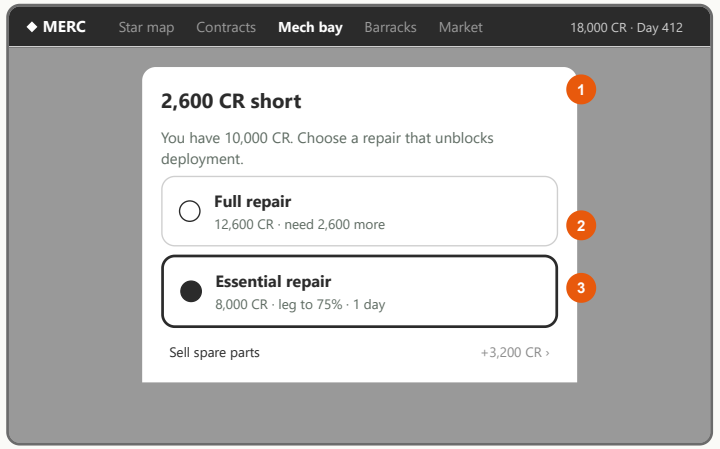

9 Mech bay

1. The selected contract travels with you.
2. Damage named in words and on the bar.

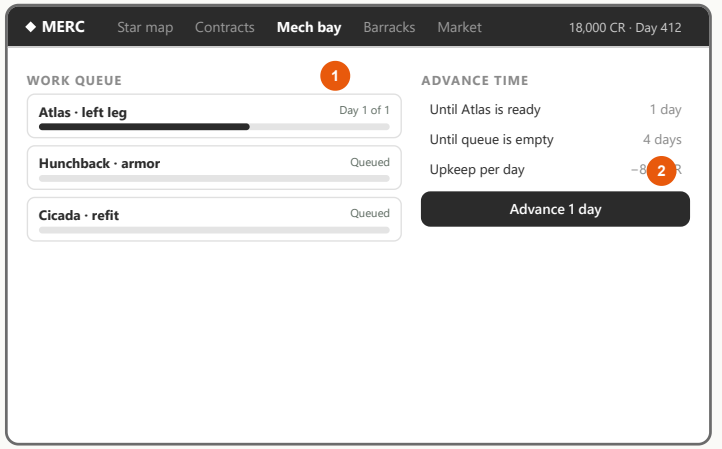

10 Review the repair

1. States that nothing has been spent yet.
2. Cancel keeps both mech and contract.

11 Not enough credits

1. The exact shortfall, not a generic error.
2. The cheapest fix that still unblocks you.
3. A way to raise money without leaving.

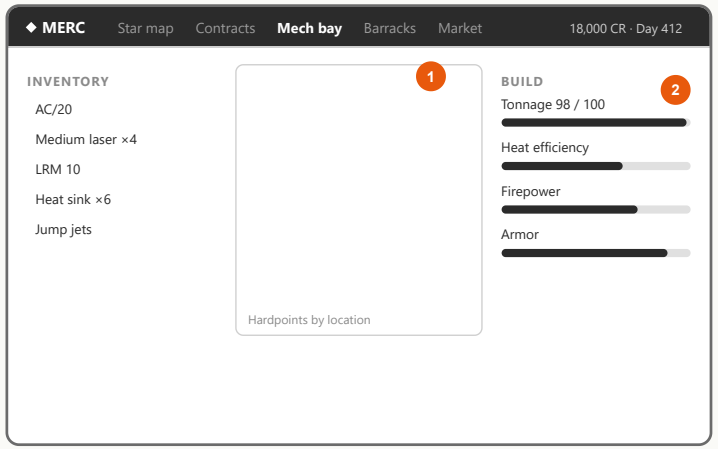

12 Repair queue and time

1. Queue order can be changed by priority.
2. Time costs money, so the cost is shown.

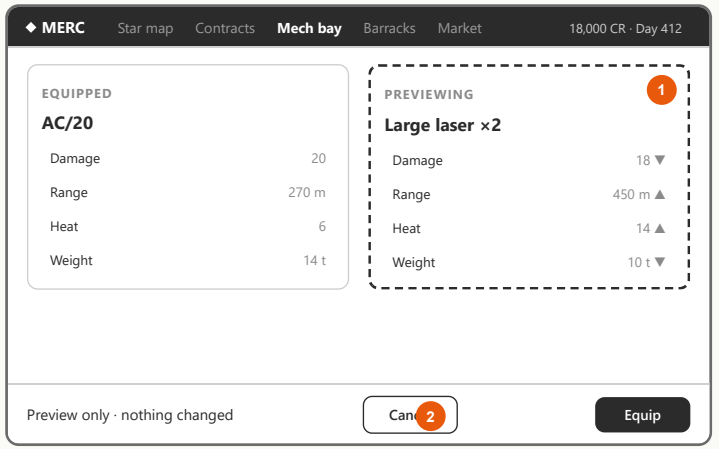

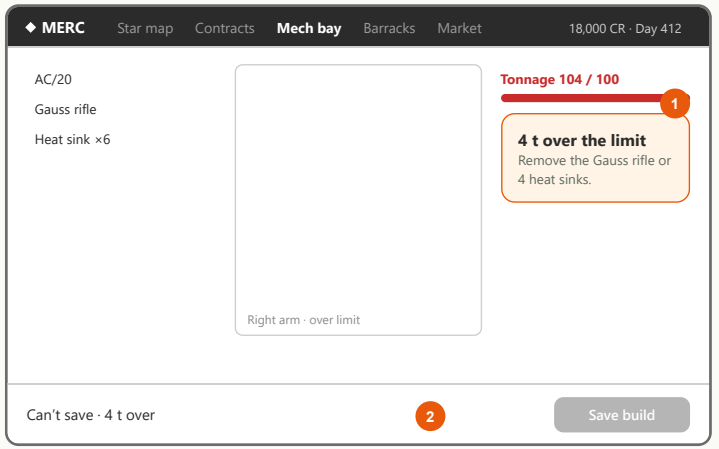

13 Mechlab loadout

1. Hardpoints are shown on the mech, by location.
2. Tonnage and heat update as you build.

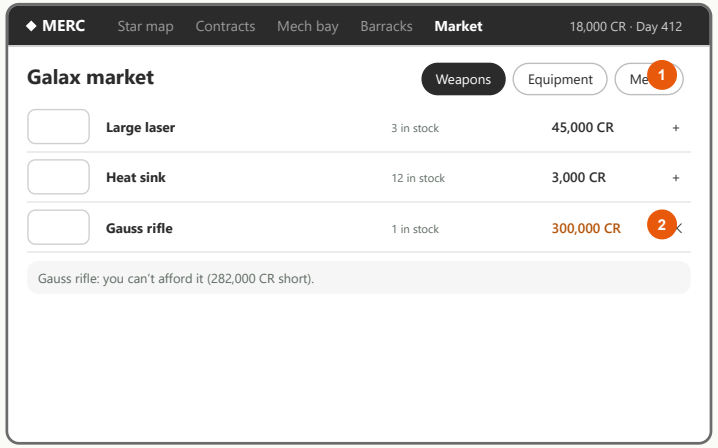

14 Compare a weapon

1. Arrows show better or worse, not colour alone.
2. Preview never changes the build.

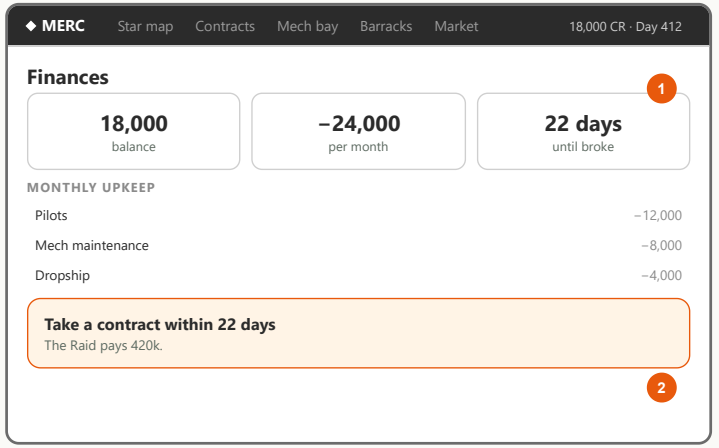

15 Invalid build

1. The rule, the amount and two fixes.
2. Saving is blocked, but the work is kept.

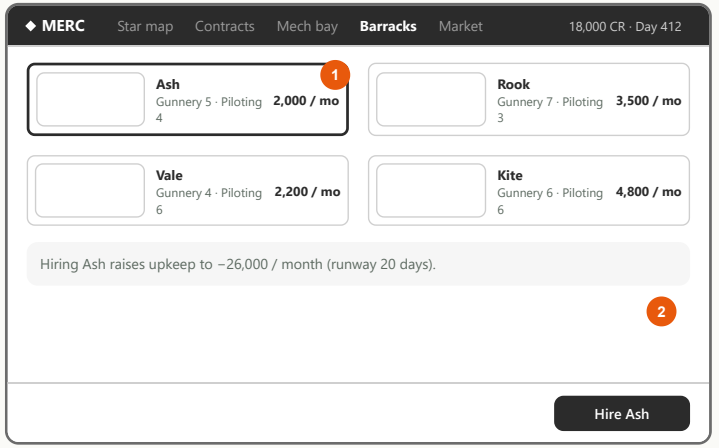

16 Market

1. Stock and price in every row.
2. Unaffordable items say by how much.

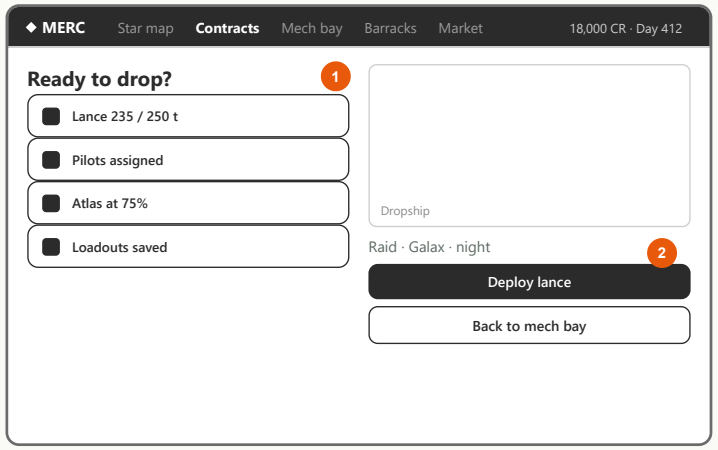

17 Finances

1. Runway in days, not just a balance.
2. Links the risk to an action.

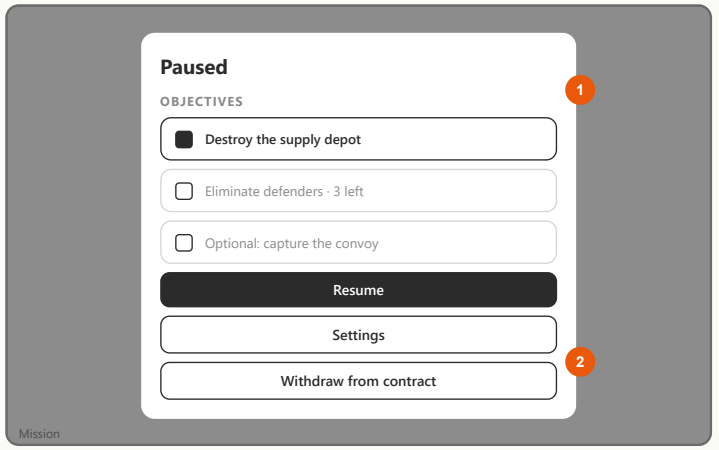

18 Hire a pilot

1. Skills and salary side by side.
2. Shows the effect on runway before hiring.

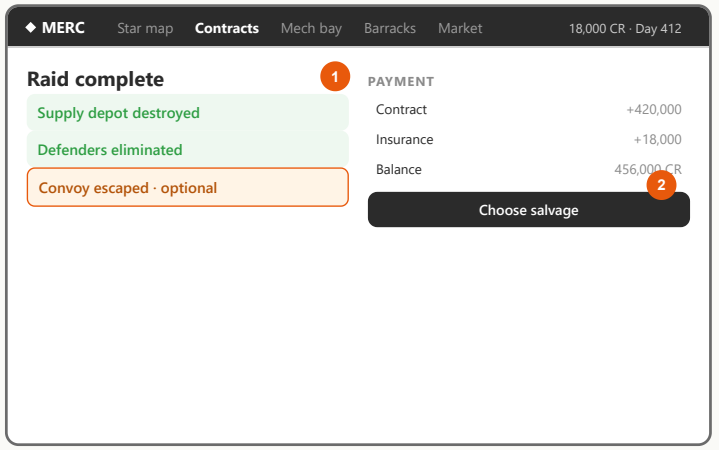

19 Deploy checklist

1. One last checklist, all in plain words.
2. A route back to fix anything.

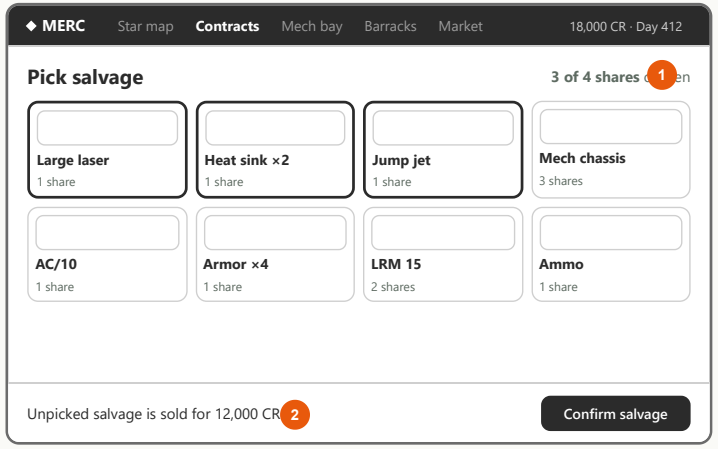

20 In-mission pause

1. Objectives are one press away mid-mission.
2. Withdrawing is possible but never the first option.

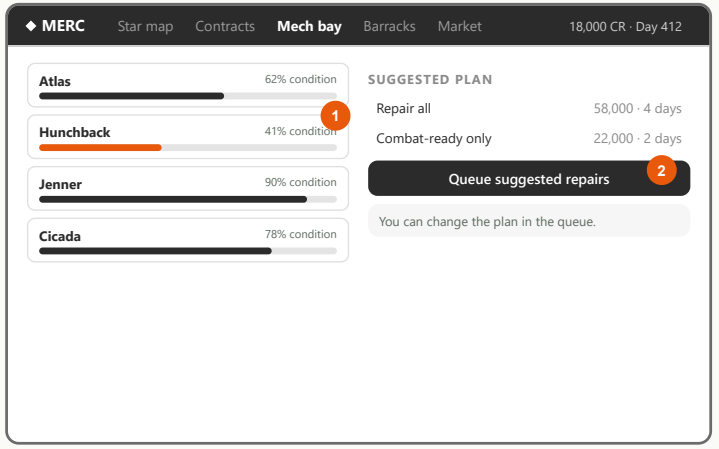

21 Mission debrief

1. Every objective is listed, met or missed.
2. Payment adds up to the new balance.

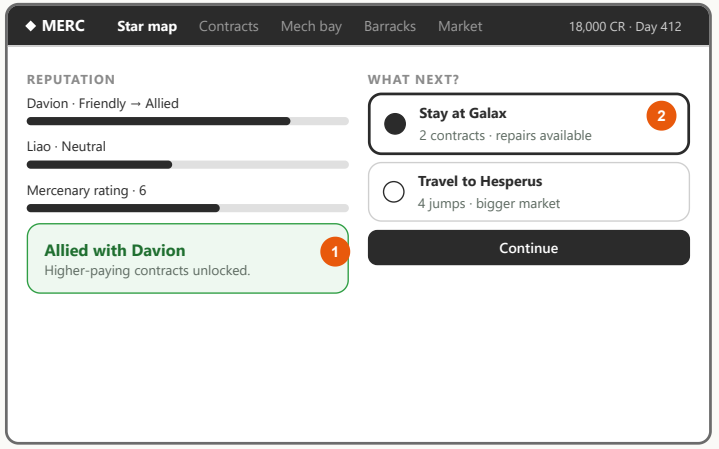

22 Salvage

1. Shares left are always counted.
2. Explains what happens to the rest.

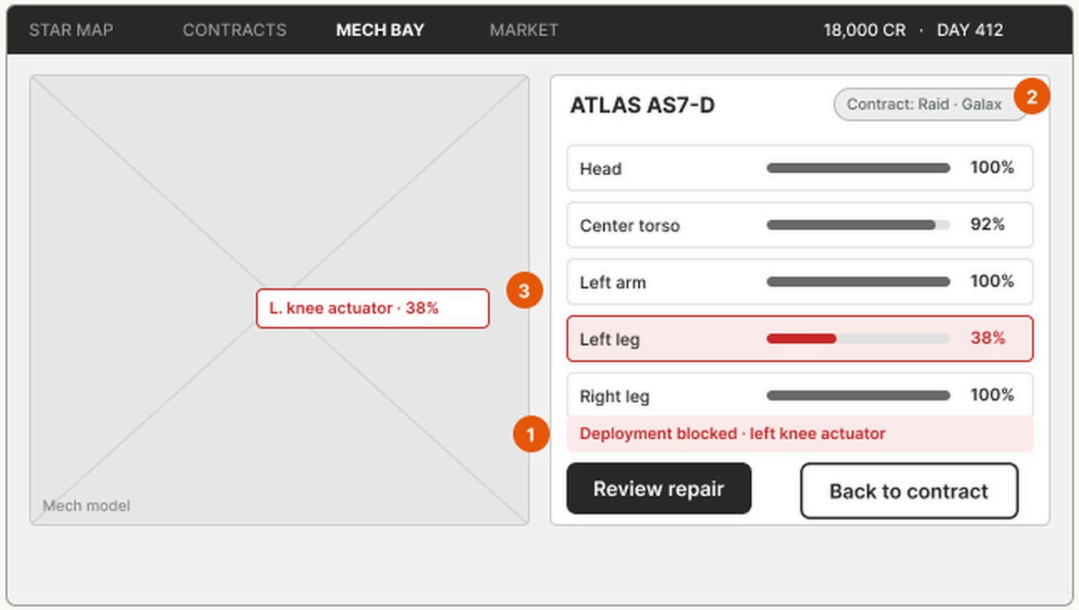

23 Damage report

1. Condition of the whole lance at once.
2. Two plans with cost and time.

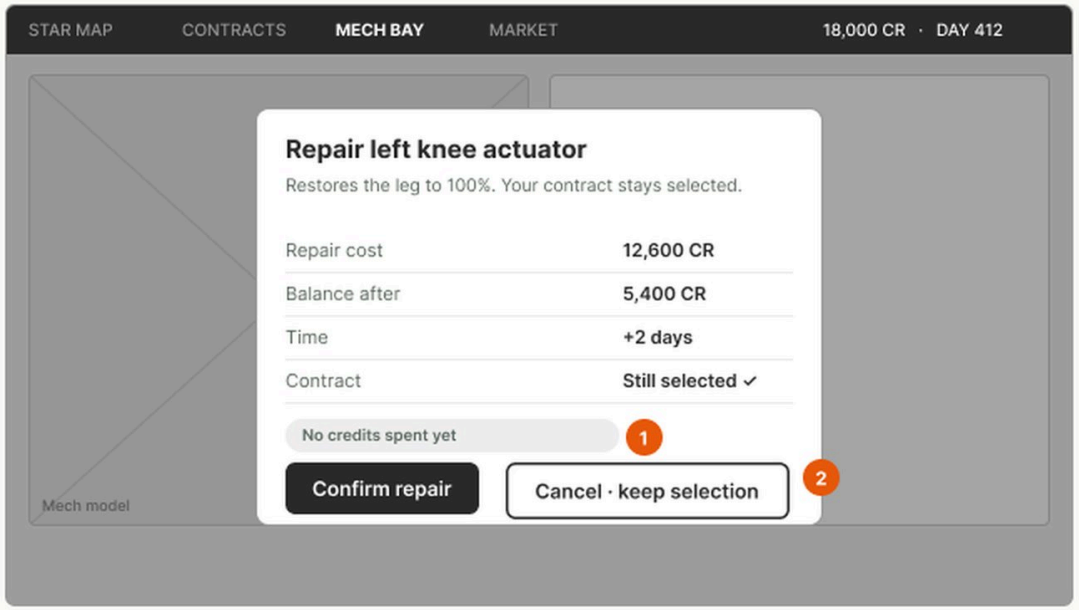

24 Reputation and next step

1. Reputation changes say what they unlock.
2. The next decision is offered, not hunted for.

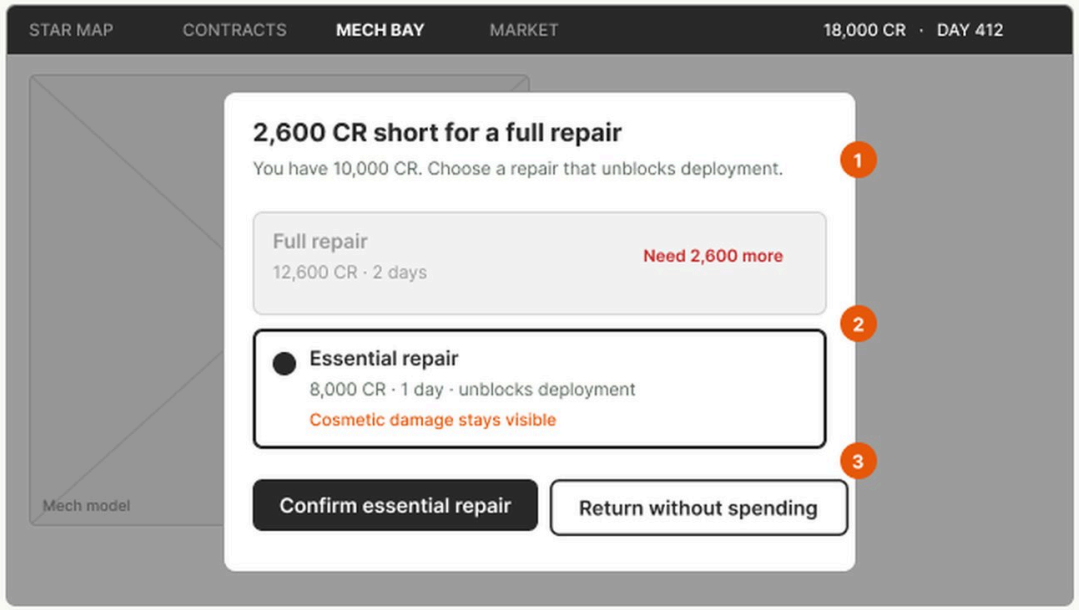

1 Inspect the mech

1. The blocker is named in words, not only shown in red.
2. The chosen contract travels with the player into the bay.
3. Damage is labelled on the mech and in the list.

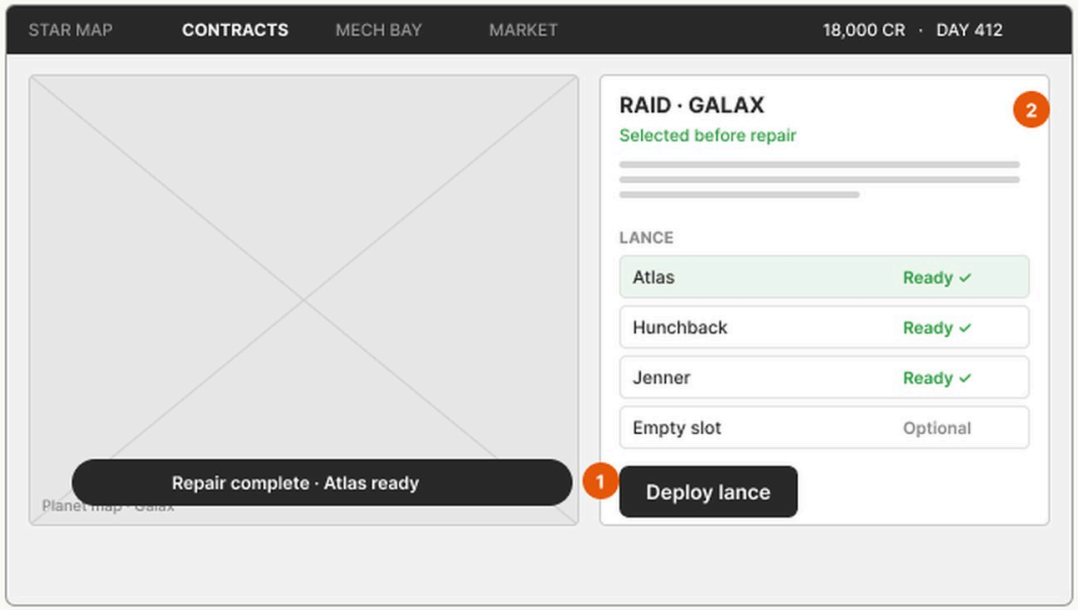

2 Review the cost

1. Says plainly that nothing has been spent yet.
2. Cancel keeps the mech and contract selection.

3 Recover from a shortfall

1. States the exact shortfall instead of a generic error.
2. Offers the cheapest fix that still unblocks deployment.
3. Leaving costs nothing.

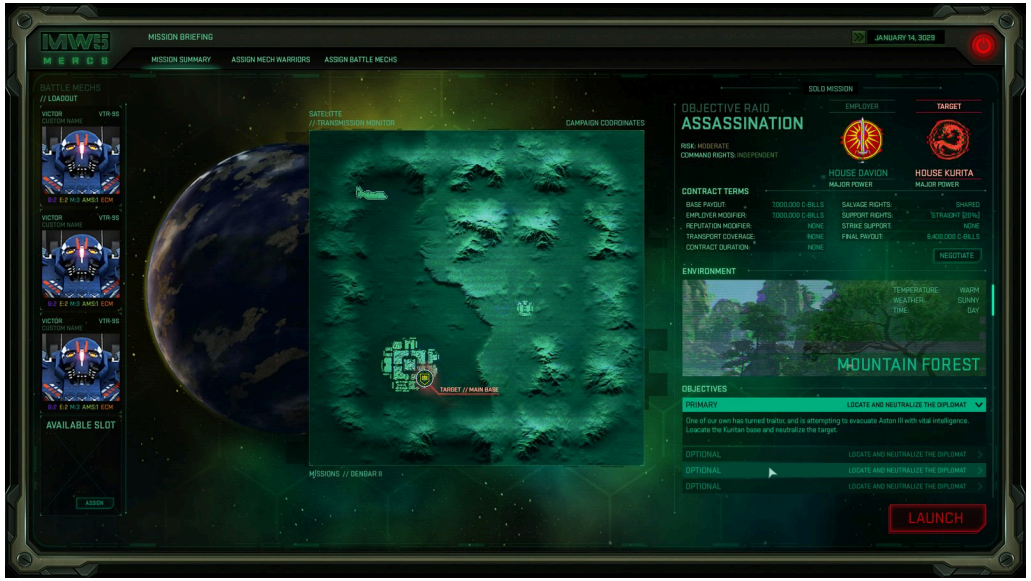

4 Back to the contract

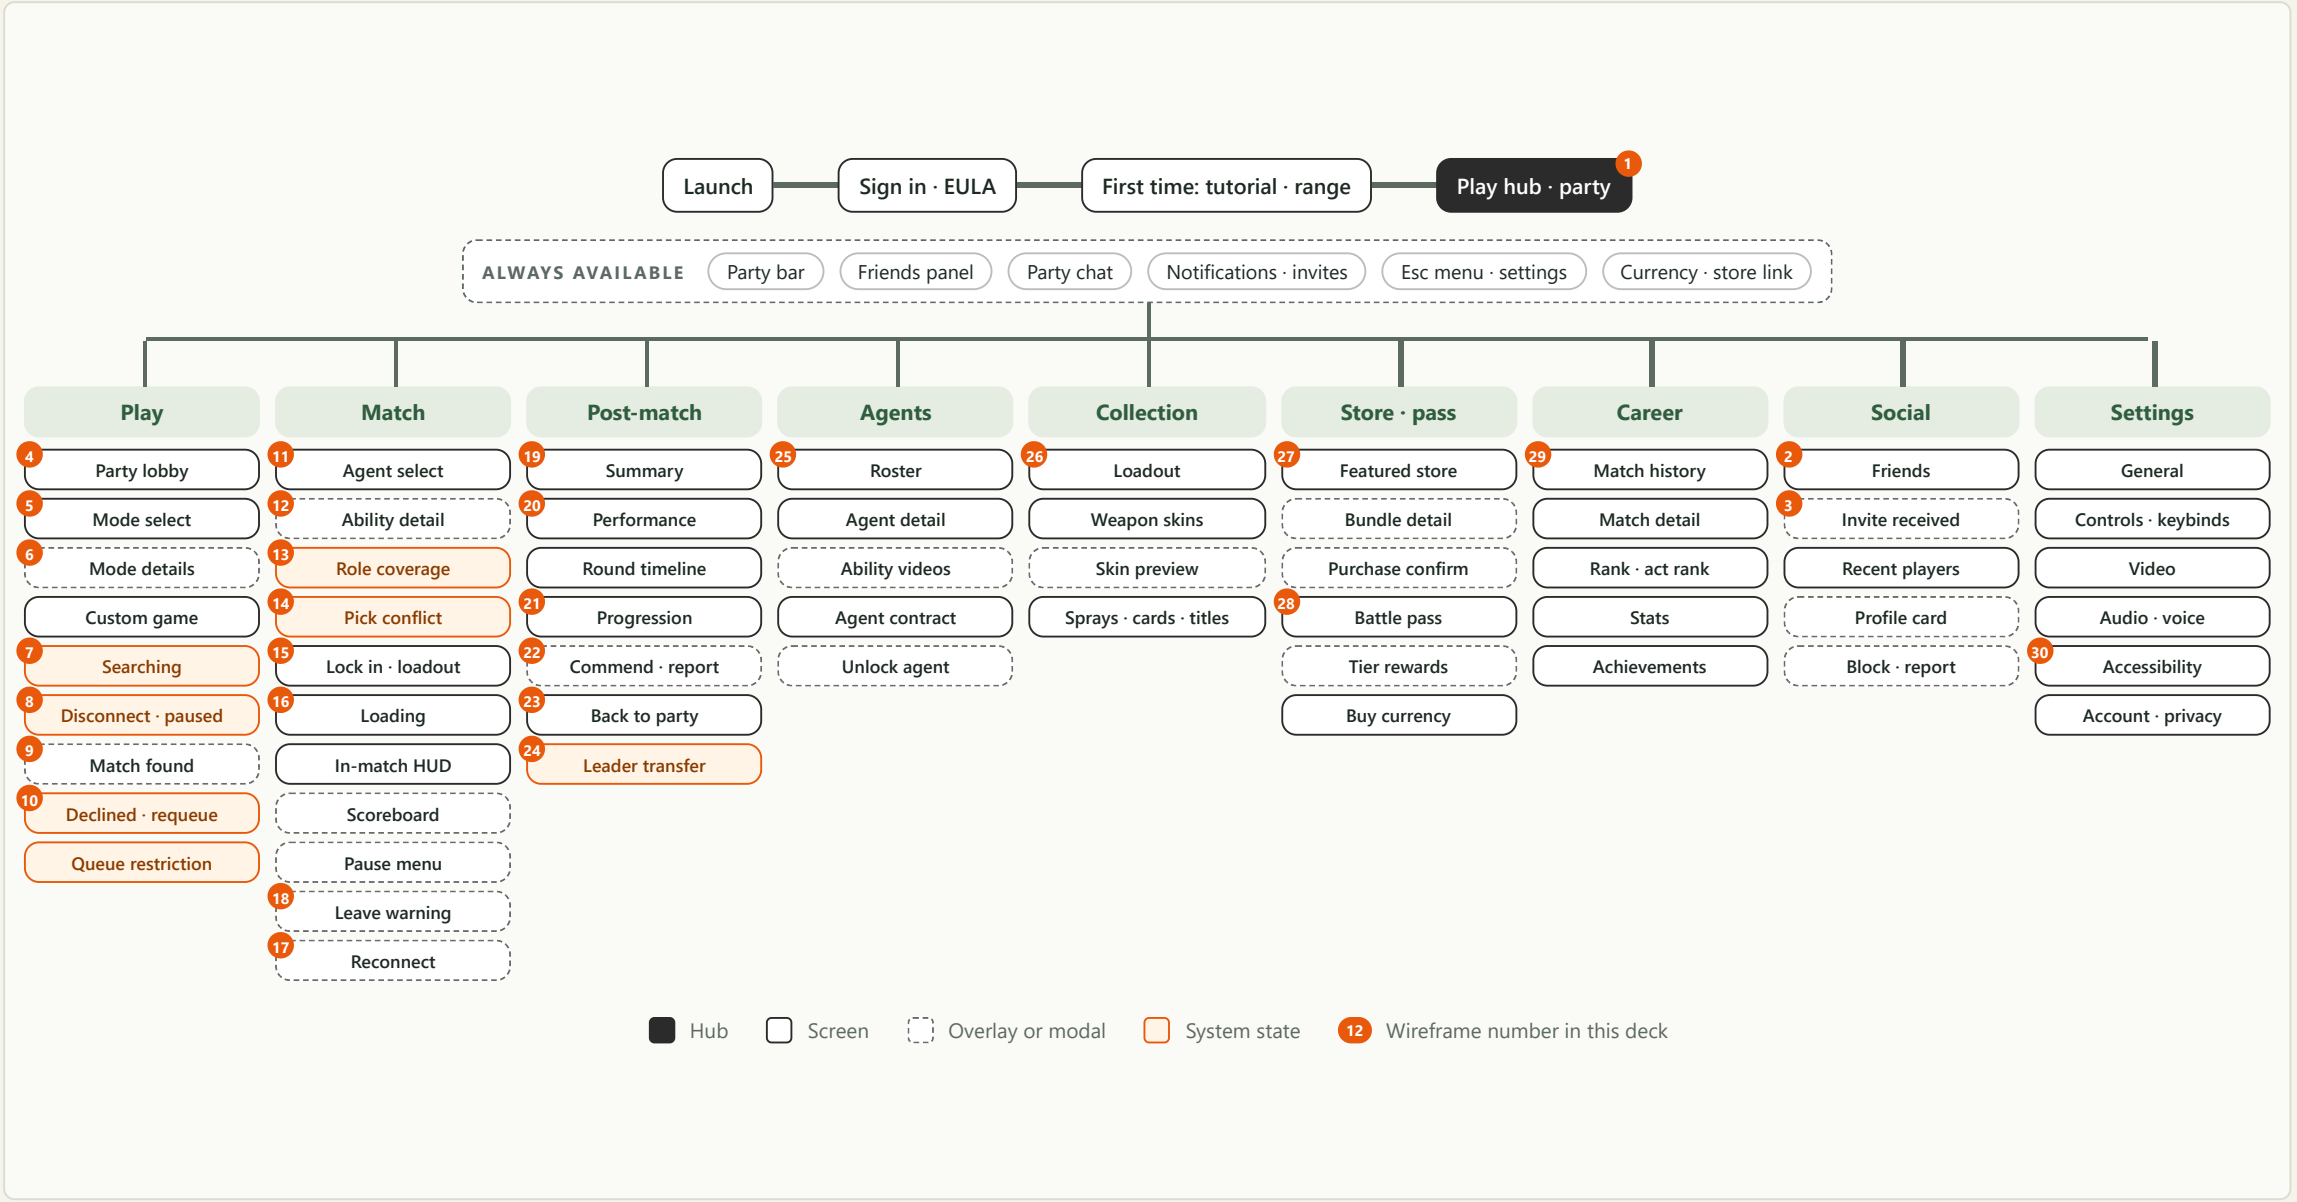

1. Success is announced, then gets out of the way.
2. The player lands back on the contract they picked.

MULTIPLAYER · PARTY-TO-MATCH FLOW

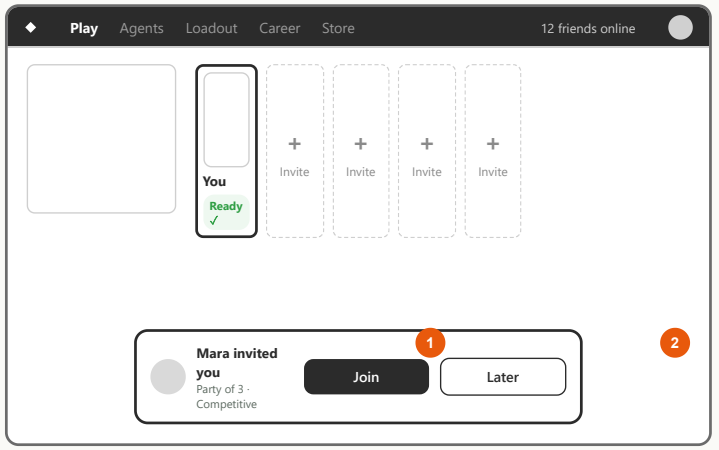

1 Play hub

1. The party sits at the centre of the screen.
2. One primary action: Play.

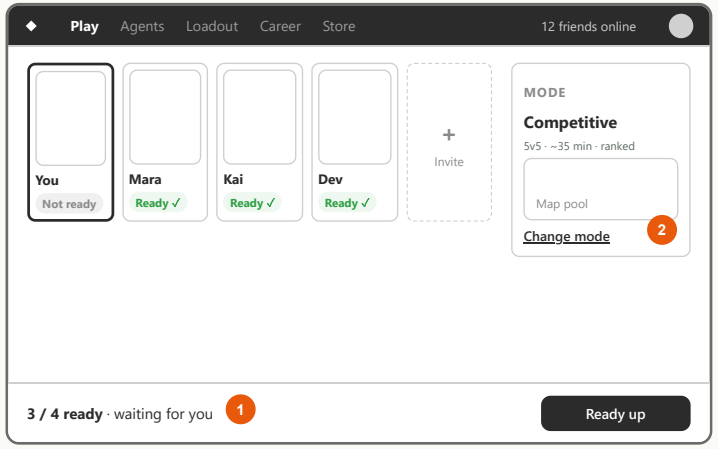

2 Invite friends

1. Status says who can join now.
2. Recent teammates are one tap away.

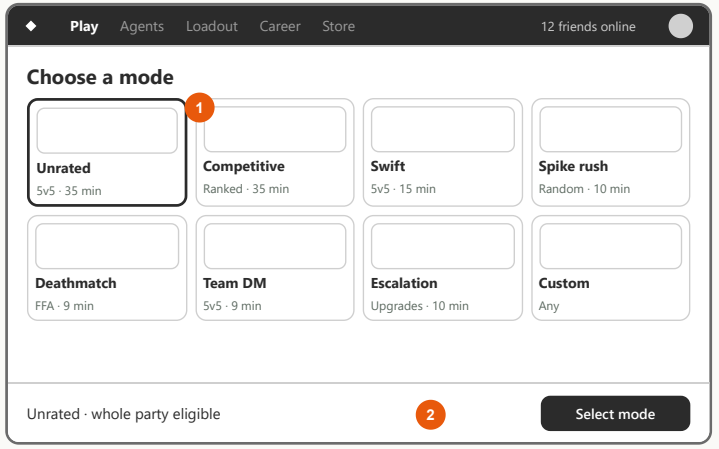

3 Invite received

1. Shows the party and mode before joining.
2. Later keeps the invite in the friends list.

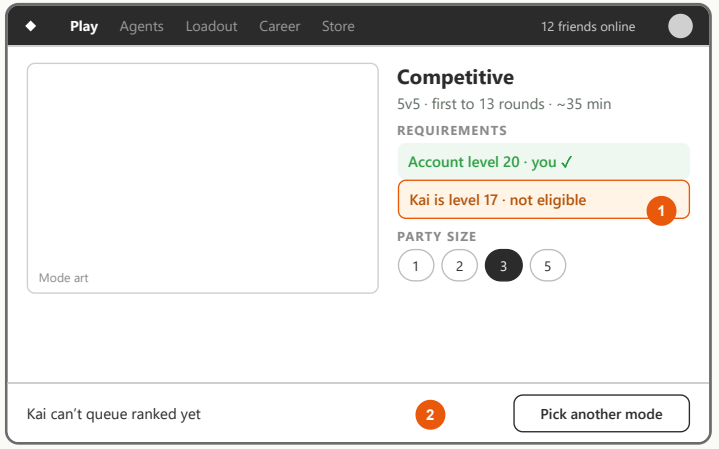

4 Party lobby

1. Readiness is a count in words.
2. Changing the mode resets everyone's ready state.

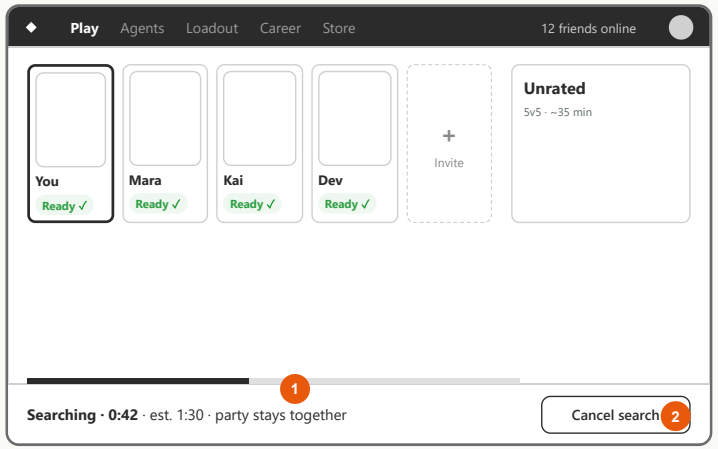

5 Mode select

1. Every mode uses the same card, so they compare.
2. Eligibility is checked for the whole party.

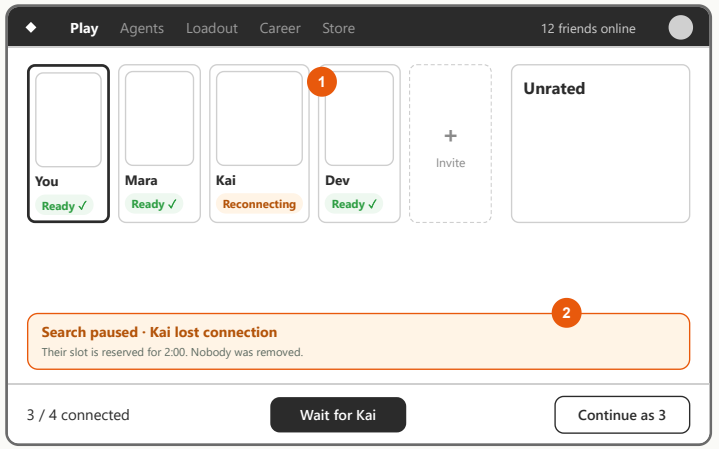

6 Mode details

1. Names who is blocked and why.
2. Offers a way forward, not just a disabled button.

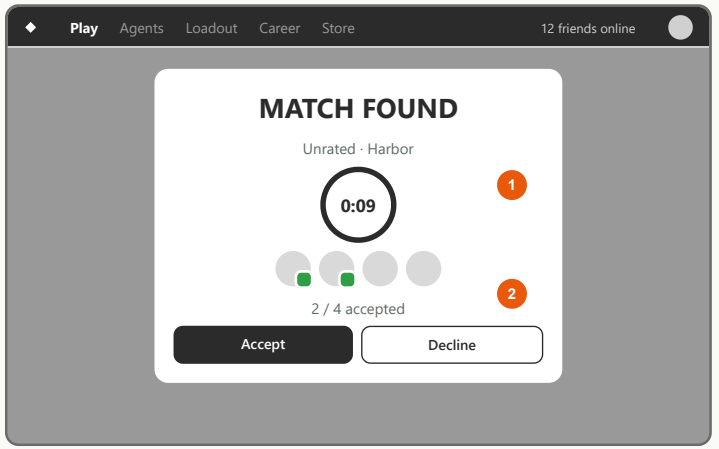

7 Searching

1. Elapsed and estimated time, not a spinner.
2. Cancel returns the whole party to the lobby.

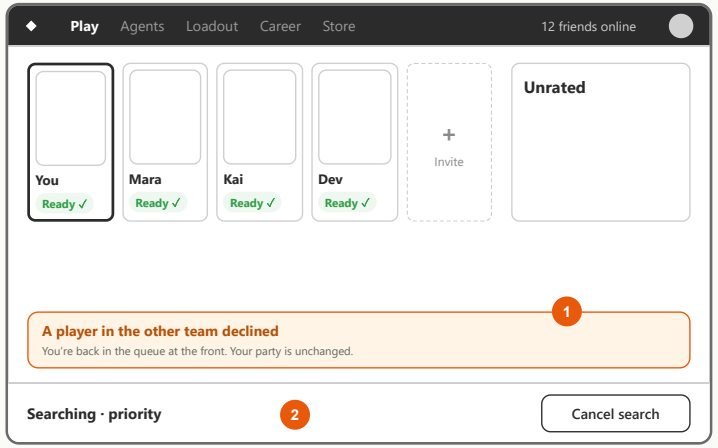

8 Teammate disconnects

1. The dropped player keeps a reserved slot.
2. Says what happened and that nobody was kicked.

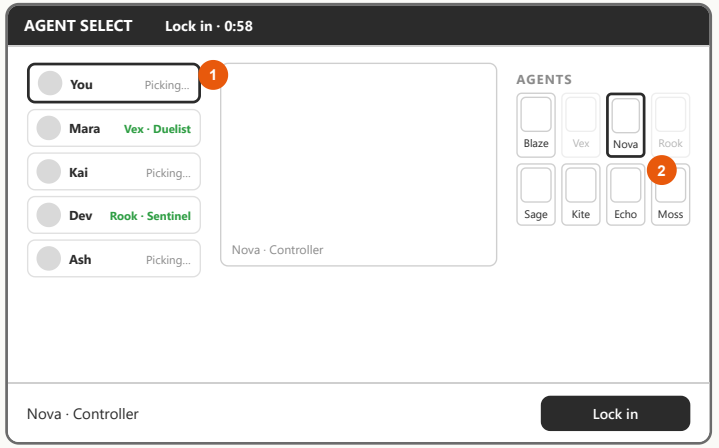

9 Match found

1. A visible countdown; no auto-accept.
2. Everyone sees who has accepted.

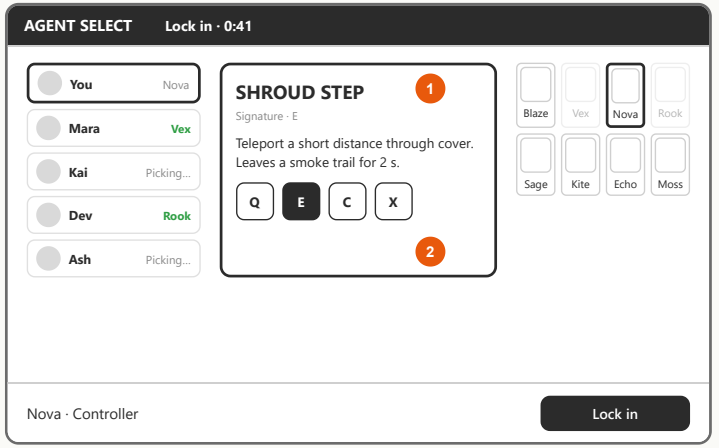

10 Someone declines

1. Explains whose decline it was, without naming.
2. Priority requeue: nobody starts over.

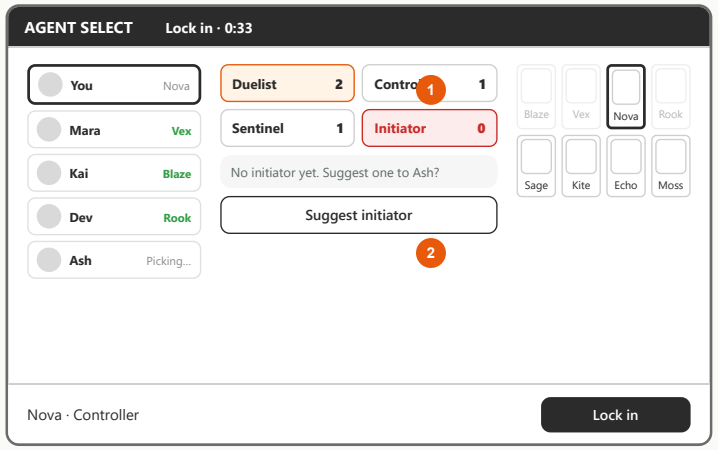

11 Agent select

1. Teammates' picks and roles are always visible.
2. Taken agents are greyed out, not hidden.

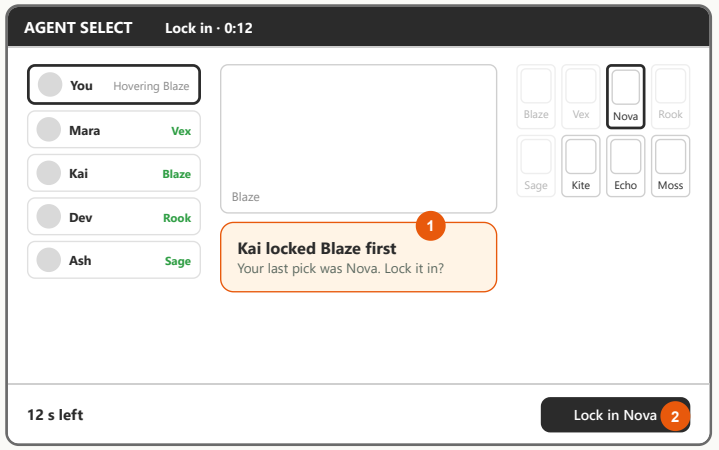

12 Ability detail

1. Detail opens in place; the timer keeps running.
2. Each ability shows its key and what it does.

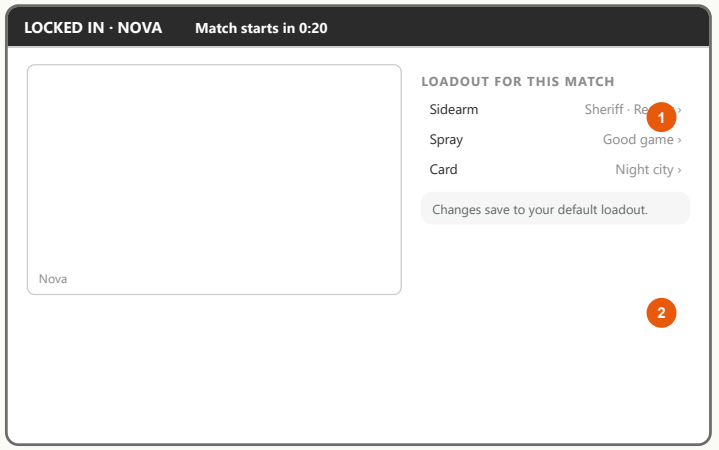

13 Role coverage hint

1. Team composition shown as counts, not rules.
2. A suggestion, never a forced pick.

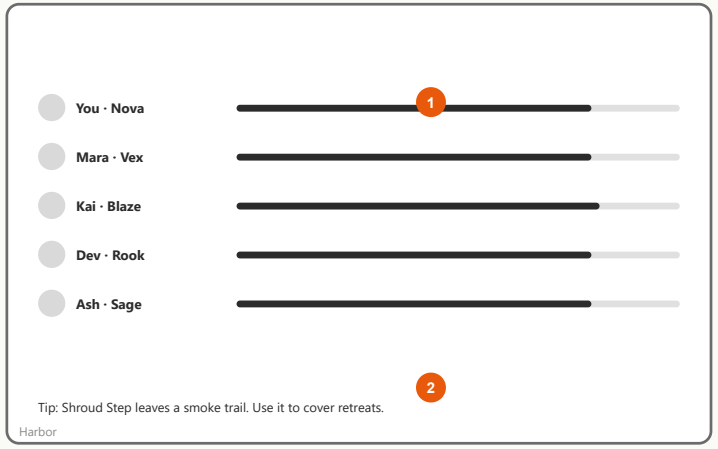

14 Pick conflict

1. Explains the conflict at the moment it happens.
2. Offers the last valid pick under time pressure.

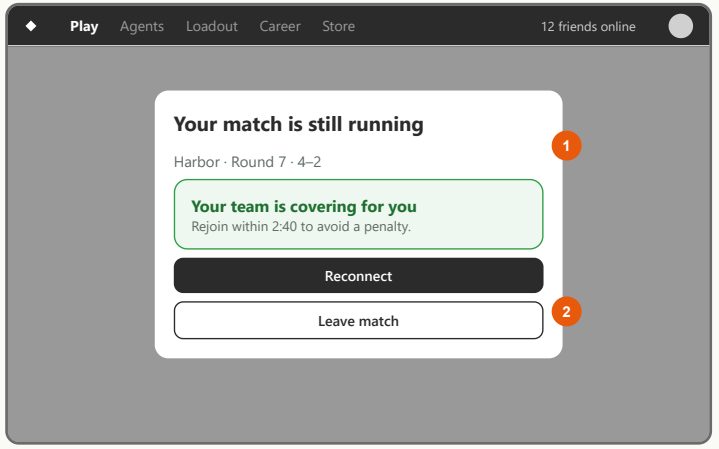

15 Lock in and loadout

1. The wait becomes useful: tweak the loadout.
2. Says where changes are saved.

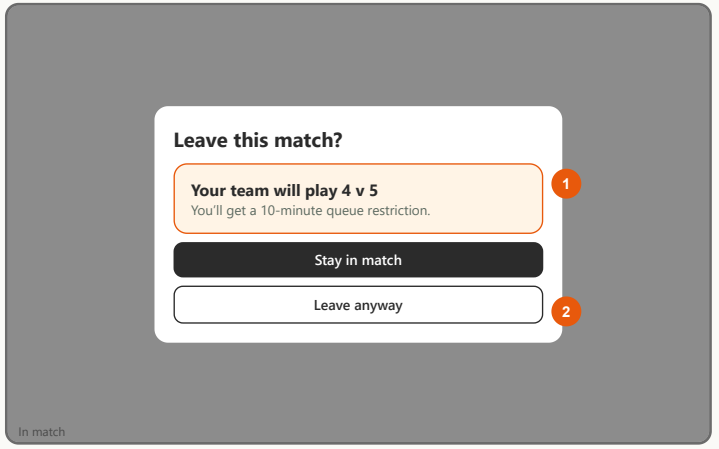

16 Loading screen

1. Everyone's loading progress is visible.
2. Tips relate to the agent you picked.

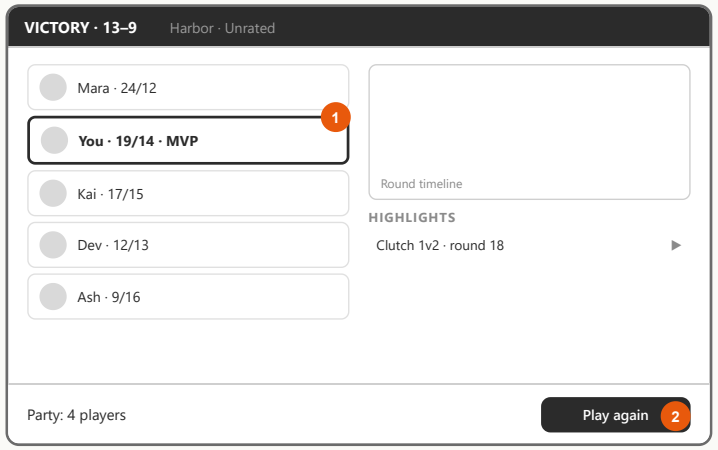

17 Reconnect after a crash

1. The game remembers the match after a crash.
2. Time left and the penalty are explicit.

18 Leave match warning

1. Consequences for the team come first.
2. The safe choice is the primary button.

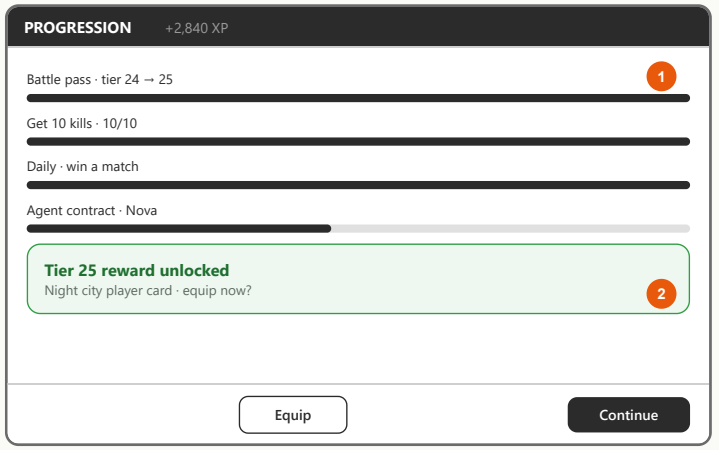

19 Match summary

1. Your row is highlighted in the scoreboard.
2. Play again keeps the party.

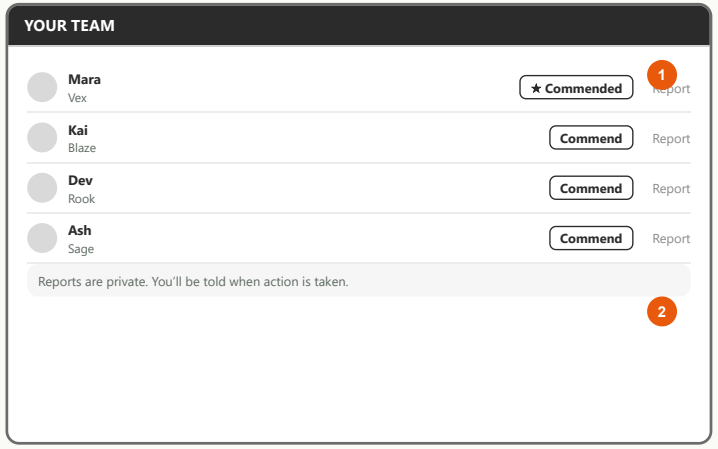

20 Your performance

1. A few numbers that matter, not a stat dump.
2. One coaching tip from your own data.

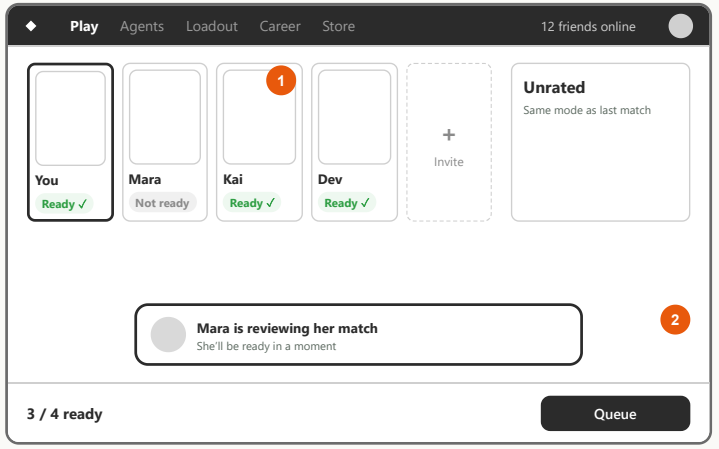

21 Progression earned

1. Each goal shows what this match added.
2. Rewards can be equipped immediately.

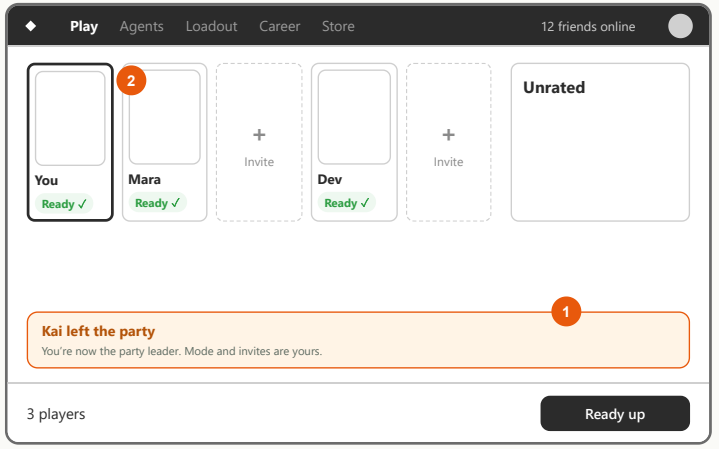

22 Commend or report

1. Positive action is the easy one.
2. Reporting is private, with follow-up.

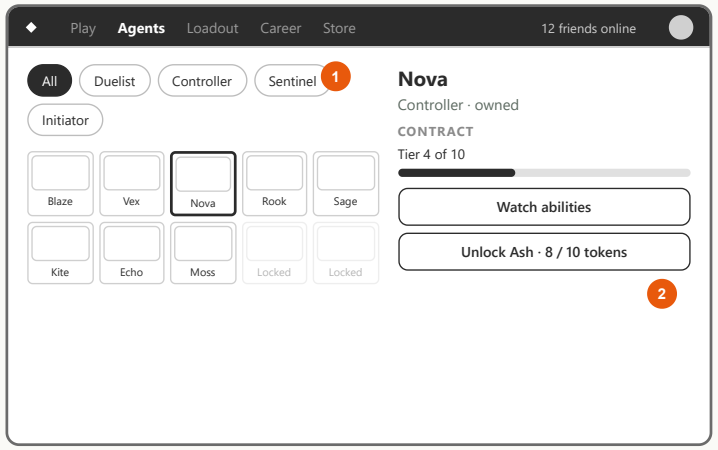

23 Back in the party

1. The party and mode carry over.
2. Says why someone isn't ready yet.

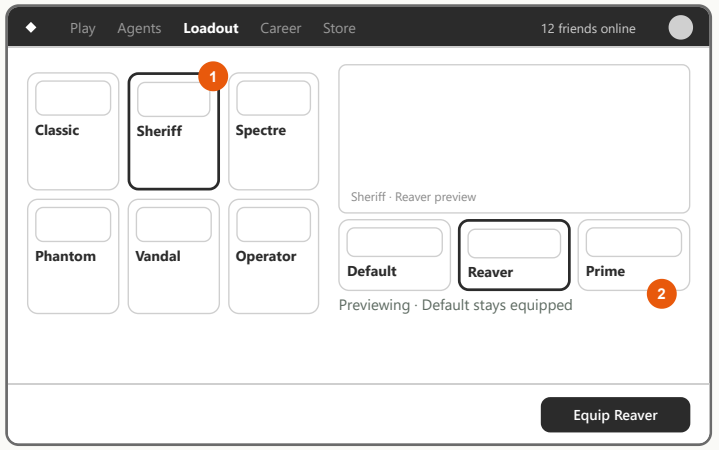

24 Party leader leaves

1. Leadership passes automatically, and says so.
2. The party never disbands silently.

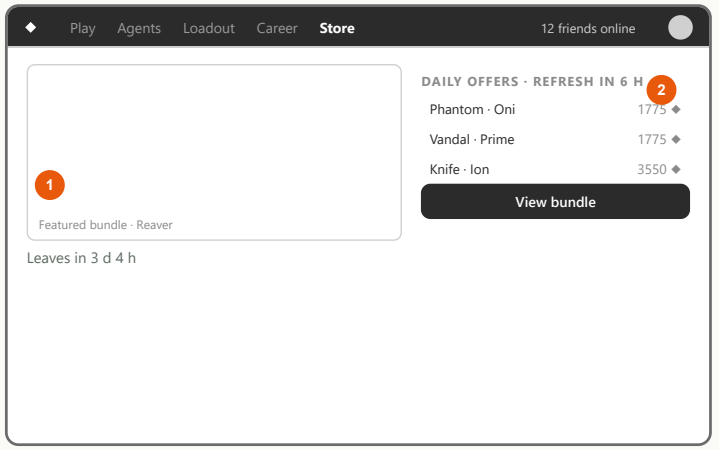

25 Agent roster

1. Filter by role; locked agents stay visible.
2. Unlock progress is shown on the unlock action.

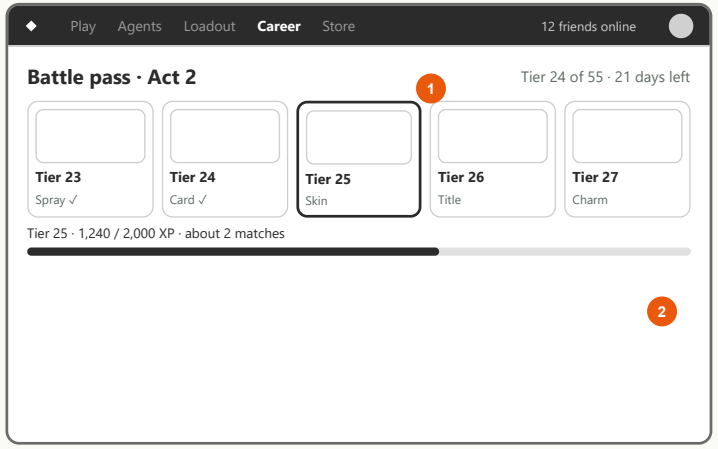

26 Collection and skins

1. Weapons first, then the skins for the one selected.
2. Preview never changes what is equipped.

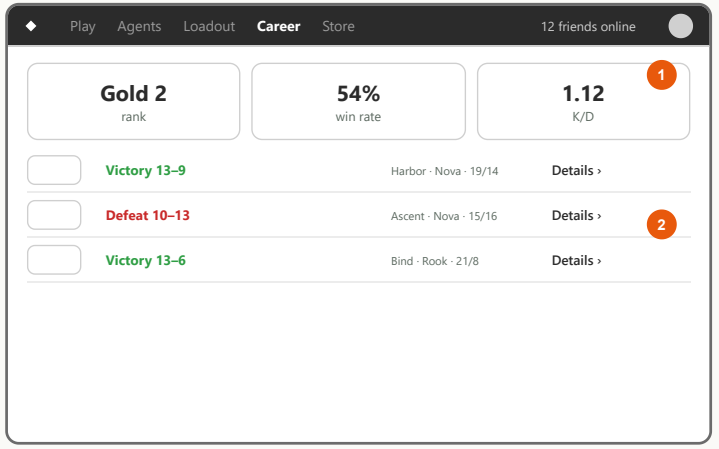

27 Store

1. Time limits are stated, never implied.
2. Prices use the same currency icon everywhere.

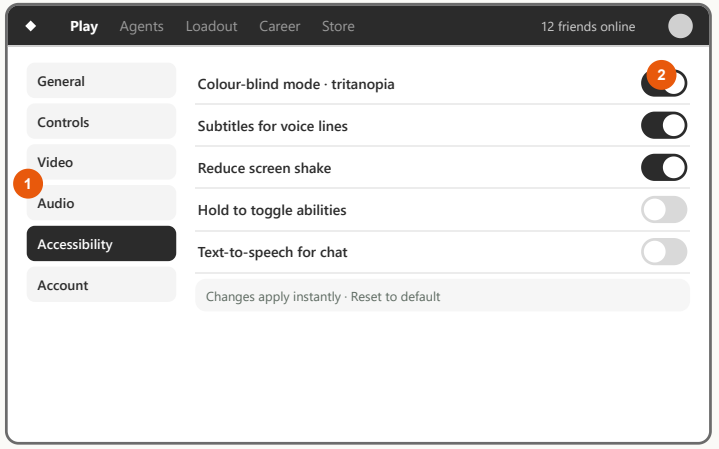

28 Battle pass

1. Next reward is framed and highlighted.
2. XP is translated into matches left.

29 Match history

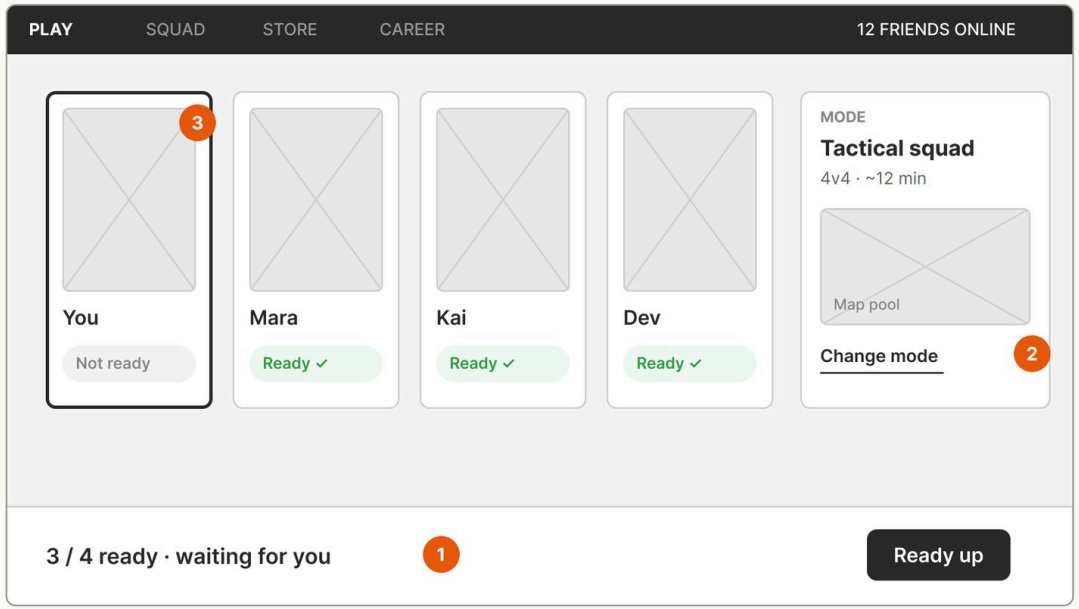

1. Rank and form before the list.
2. Every match opens to its full detail.

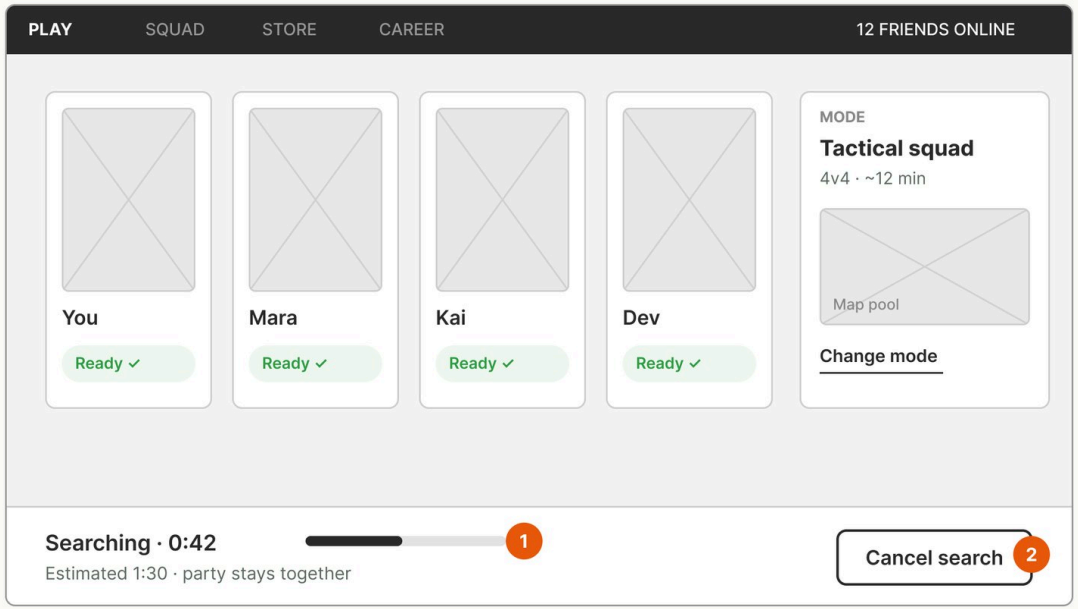

30 Settings · accessibility

1. Accessibility is a top-level tab, not buried.
2. Every option applies immediately.

MULTIPLAYER · SQUAD READINESS FLOW · SCREENS 1–2

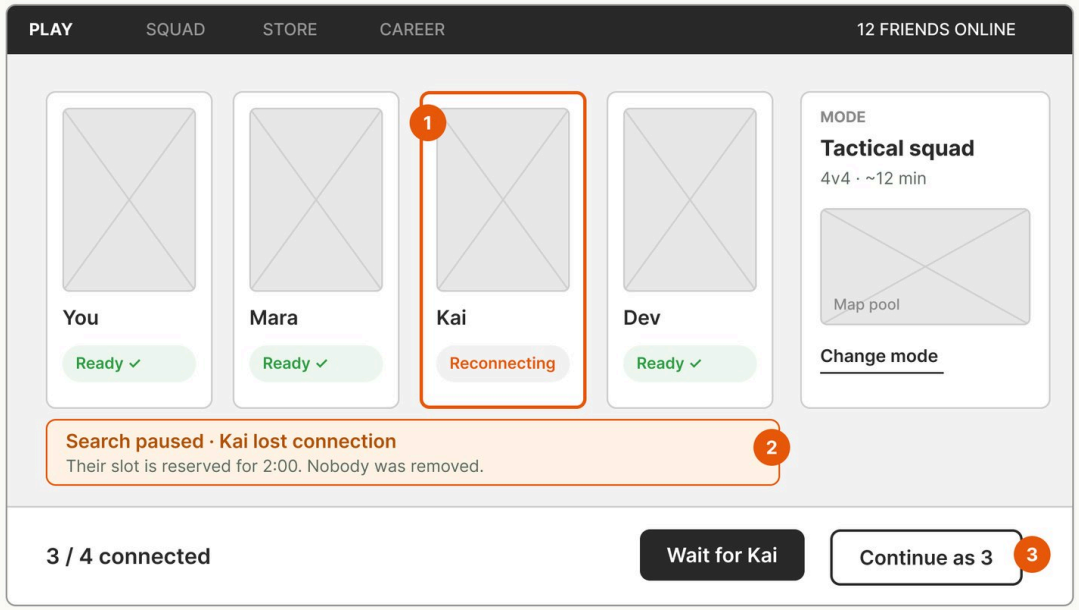

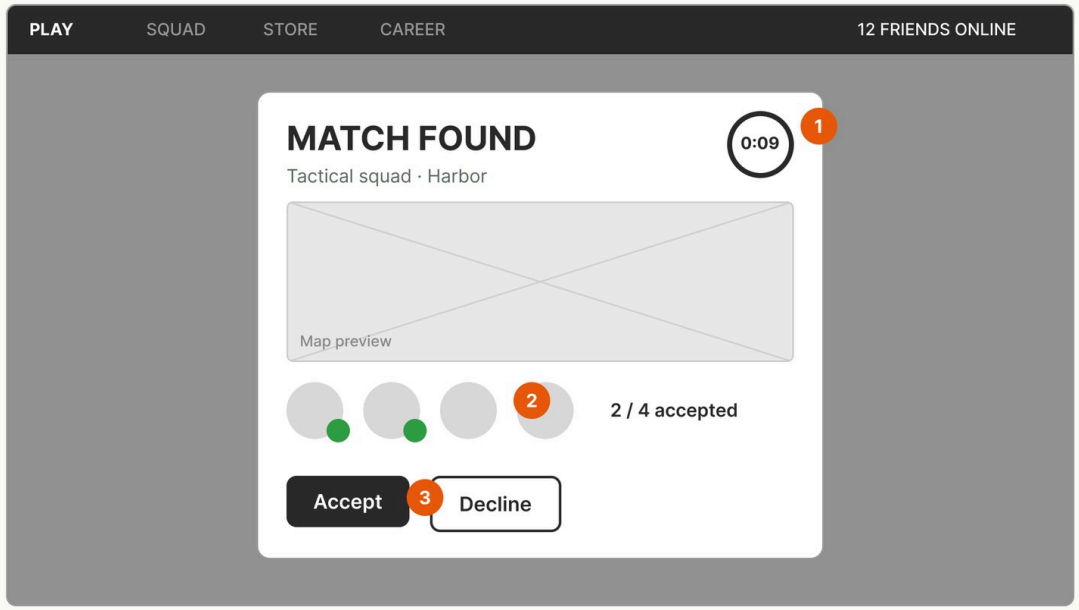

1 Ready up

1. Readiness is a count in words, not just green icons.
2. Changing mode resets everyone's ready state.
3. Your own slot is outlined so you find yourself fast.

2 Search together

1. Progress and an estimate replace an endless spinner.
2. Cancel returns the whole squad to the lobby.

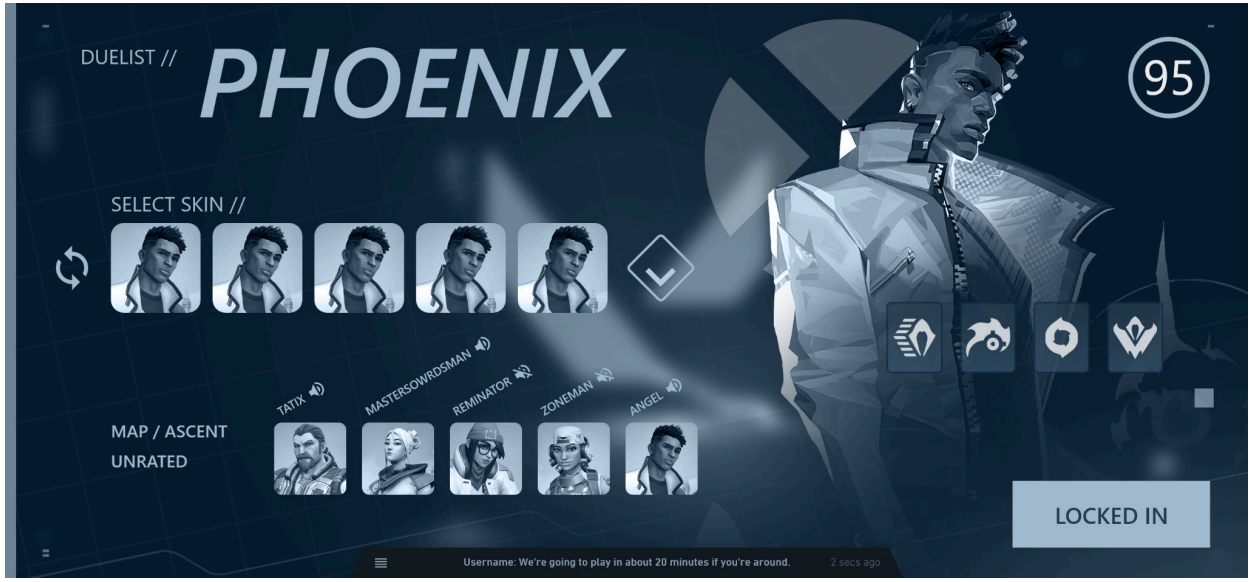

3 Recover a disconnect

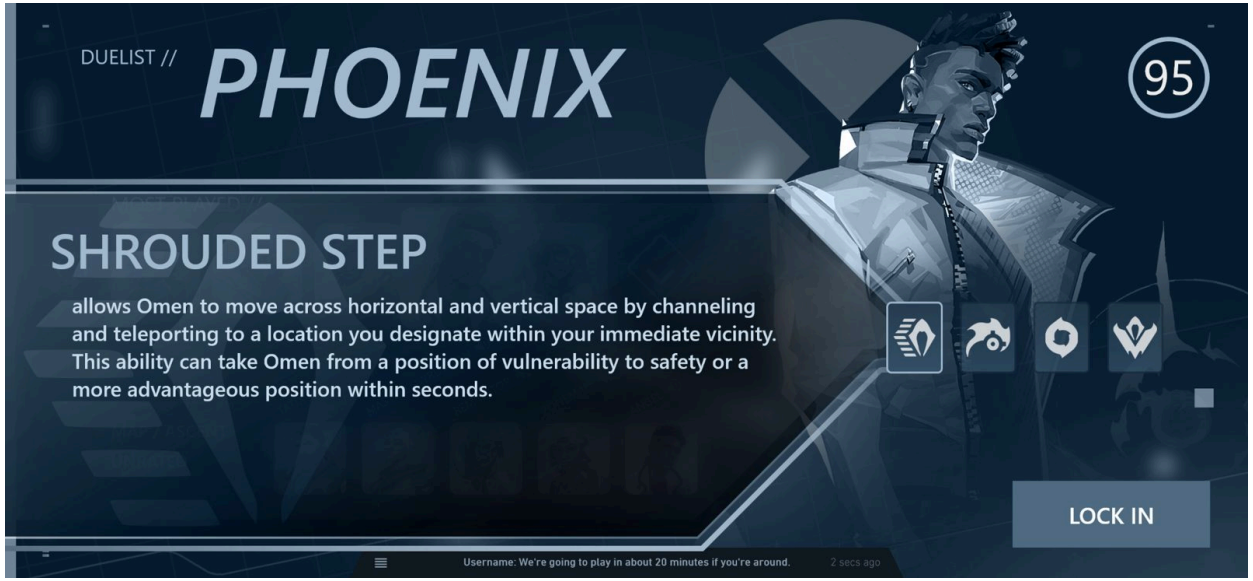

1. The dropped player keeps a reserved slot.
2. The banner says what happened and that nobody was kicked.
3. The squad chooses: wait, or go on and reconfirm.

4 Accept the match

1. A visible countdown; no auto-accept.
2. Everyone sees who has accepted.
3. Declining returns the party to the lobby together.

CYBER TUMBLE · SITEMAP

CYBER TUMBLE · PLAYER LEARNING FLOW

1 Welcome

1. One clear first action.
2. Returning players skip onboarding.

2 Mission map

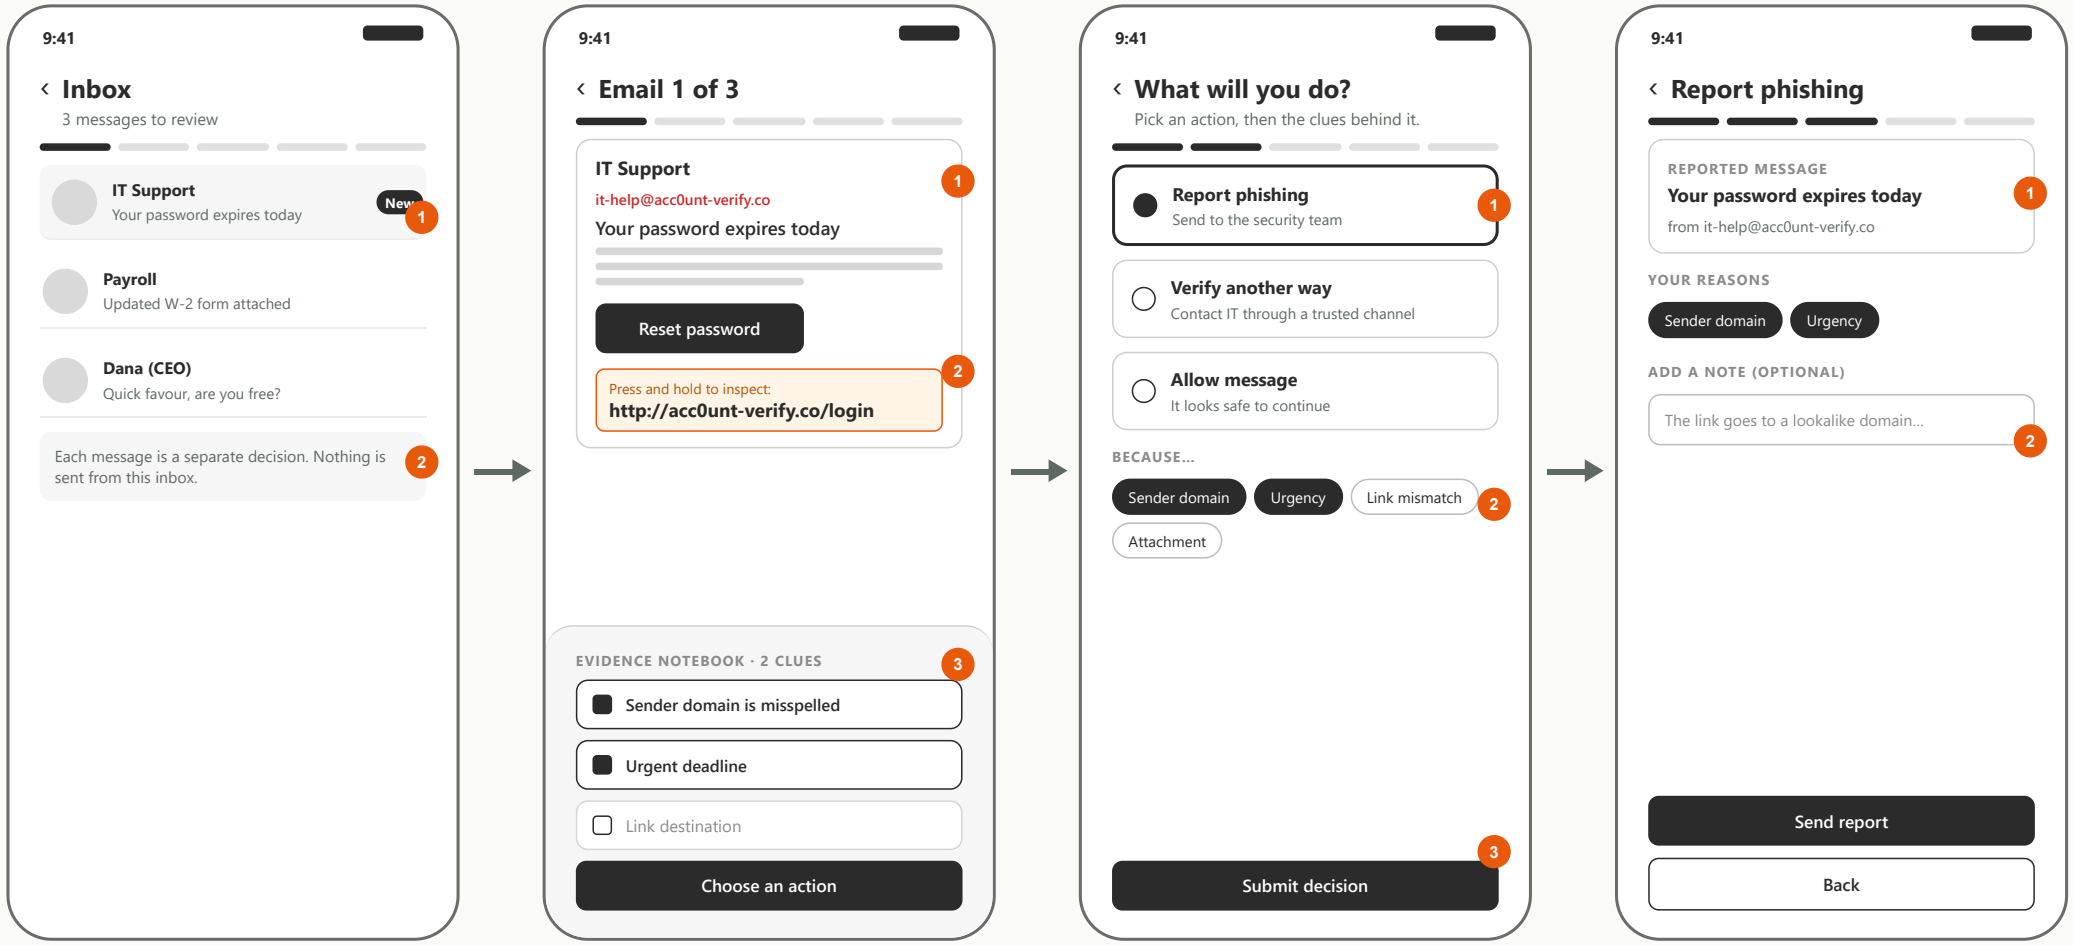

1. Completed, current and locked missions read at a glance.
2. The next mission is always one tap away.

3 Mission brief

1. Shows the whole mission before starting.
2. Time and difficulty set expectations.

4 Guided practice

1. Coach marks highlight one thing at a time.
2. Tips can be skipped and found again in Help.

5 Select a message

1. Messages look like a real inbox.
2. Players know this is a safe practice space.

6 Inspect sender and link

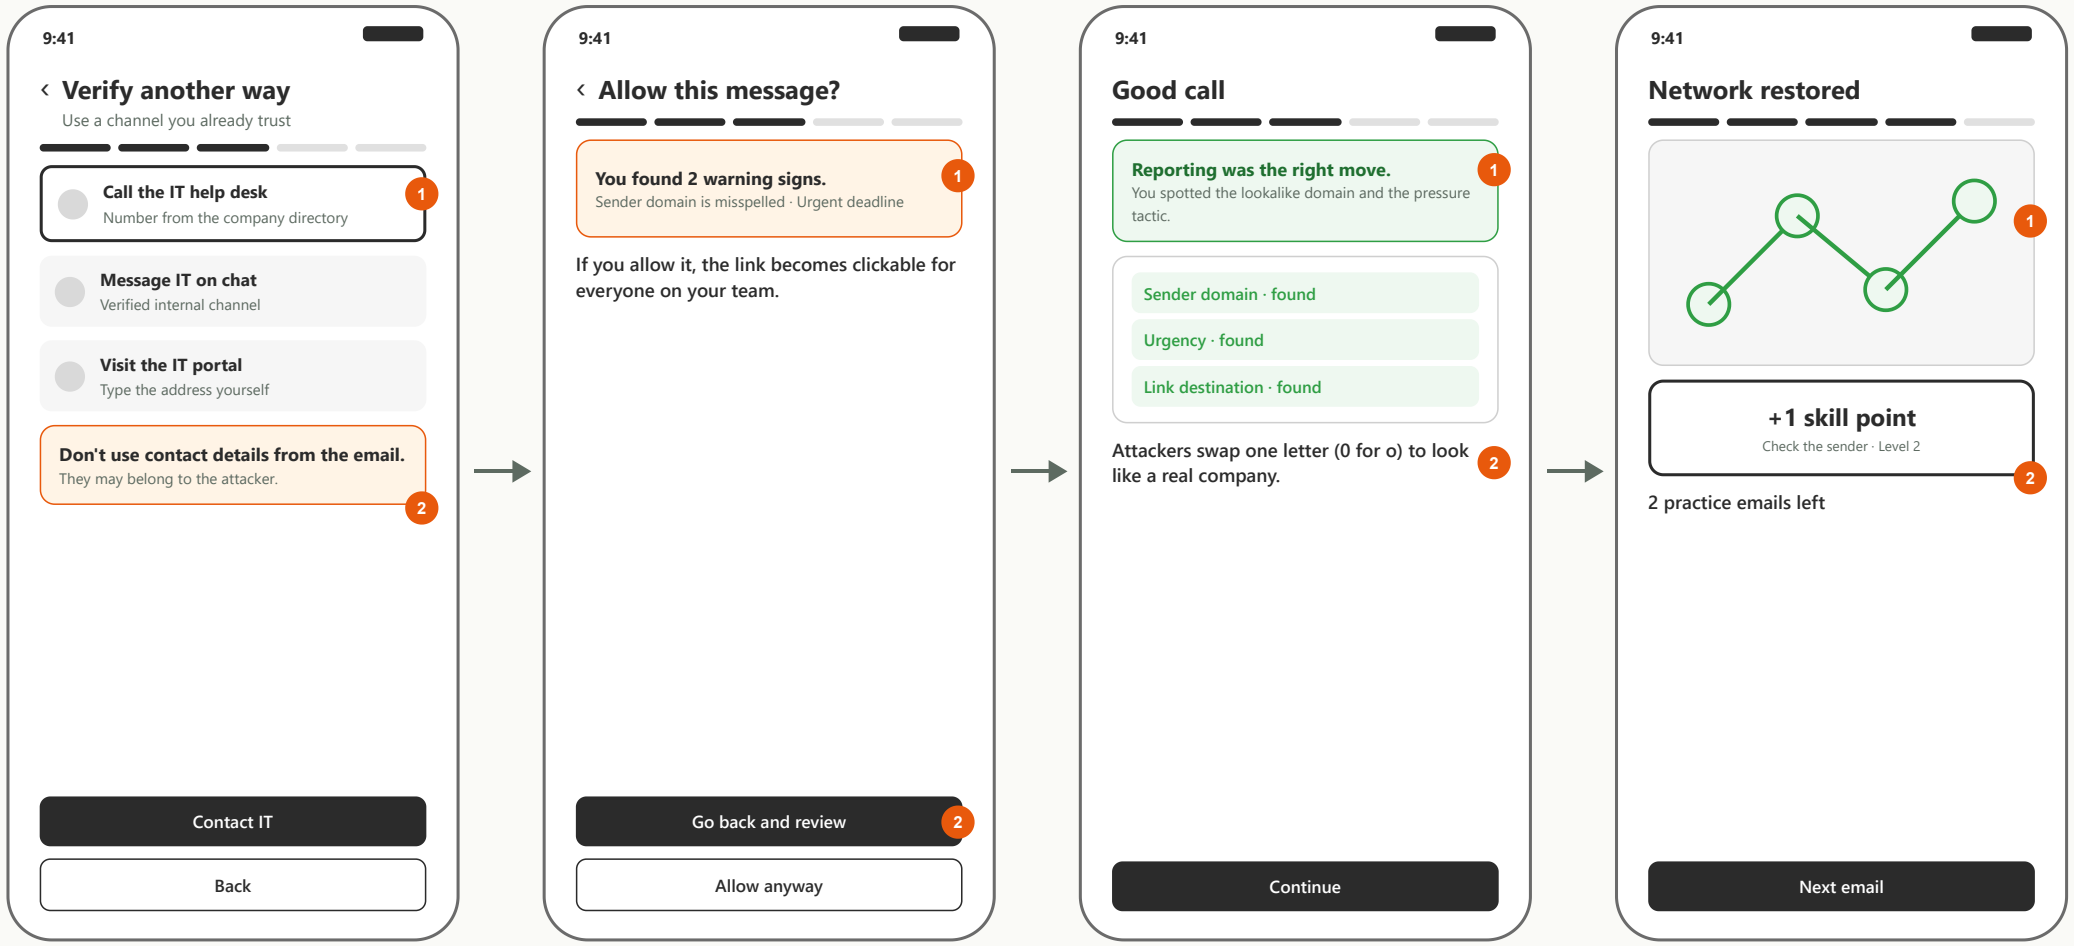

1. The real sender address is always visible.
2. Press and hold shows where a link goes.
3. Clues collect beside the email.

7 Choose an action

1. Three choices match real-world options.
2. Players justify the choice with clues.
3. Submit unlocks once a reason is picked.

8 Submit report

1. Mirrors a real report form, simplified.
2. A note is optional, never required.

9 Verify another way

1. Only trusted, known channels are offered.
2. Explains why the email's contact details are unsafe.

10 Allow message

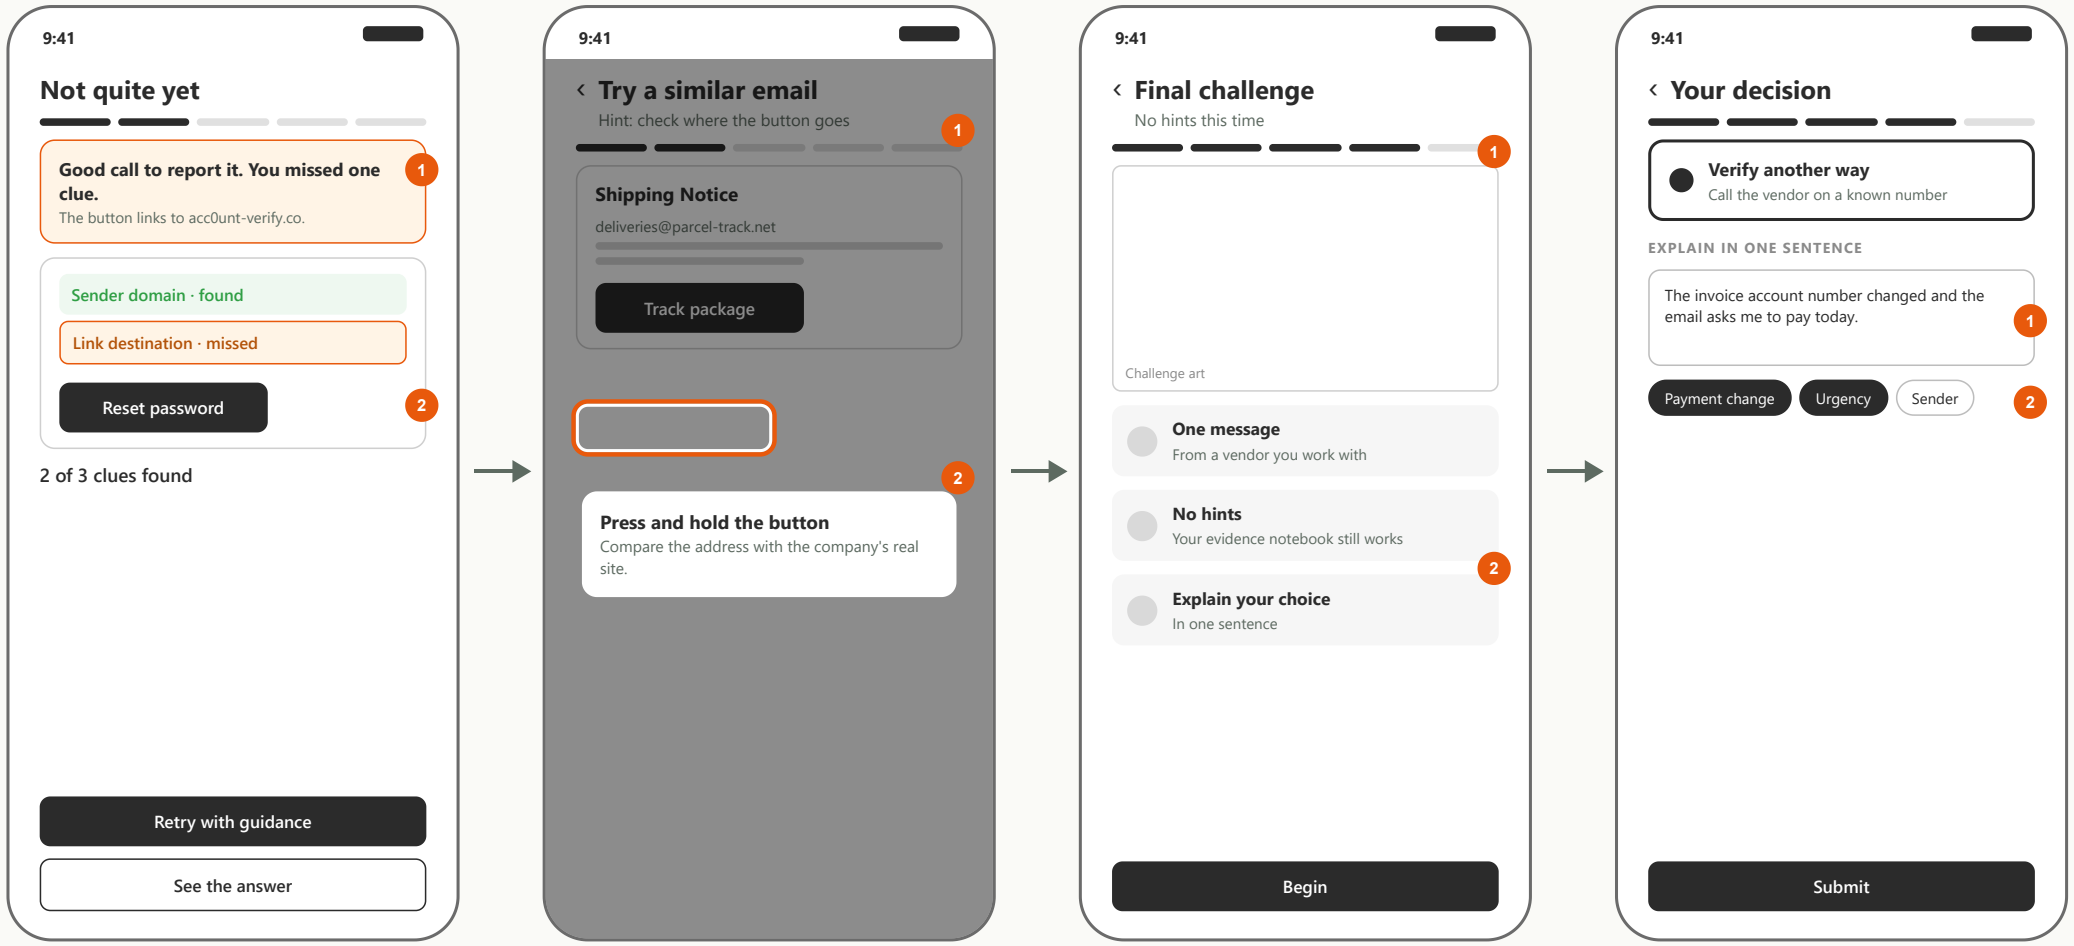

1. Reminds players of their own clues first.
2. The safe choice is the primary button.

11 Explain correct decision

1. Says why it was right, not just that it was.
2. One transferable lesson per message.

12 Restore network and reward

1. The game world shows the result of a good decision.
2. Rewards are skills, not just points.

13 Explain missed clues

1. Credit what was right before naming the miss.
2. The missed clue is highlighted in place.

14 Retry with guidance

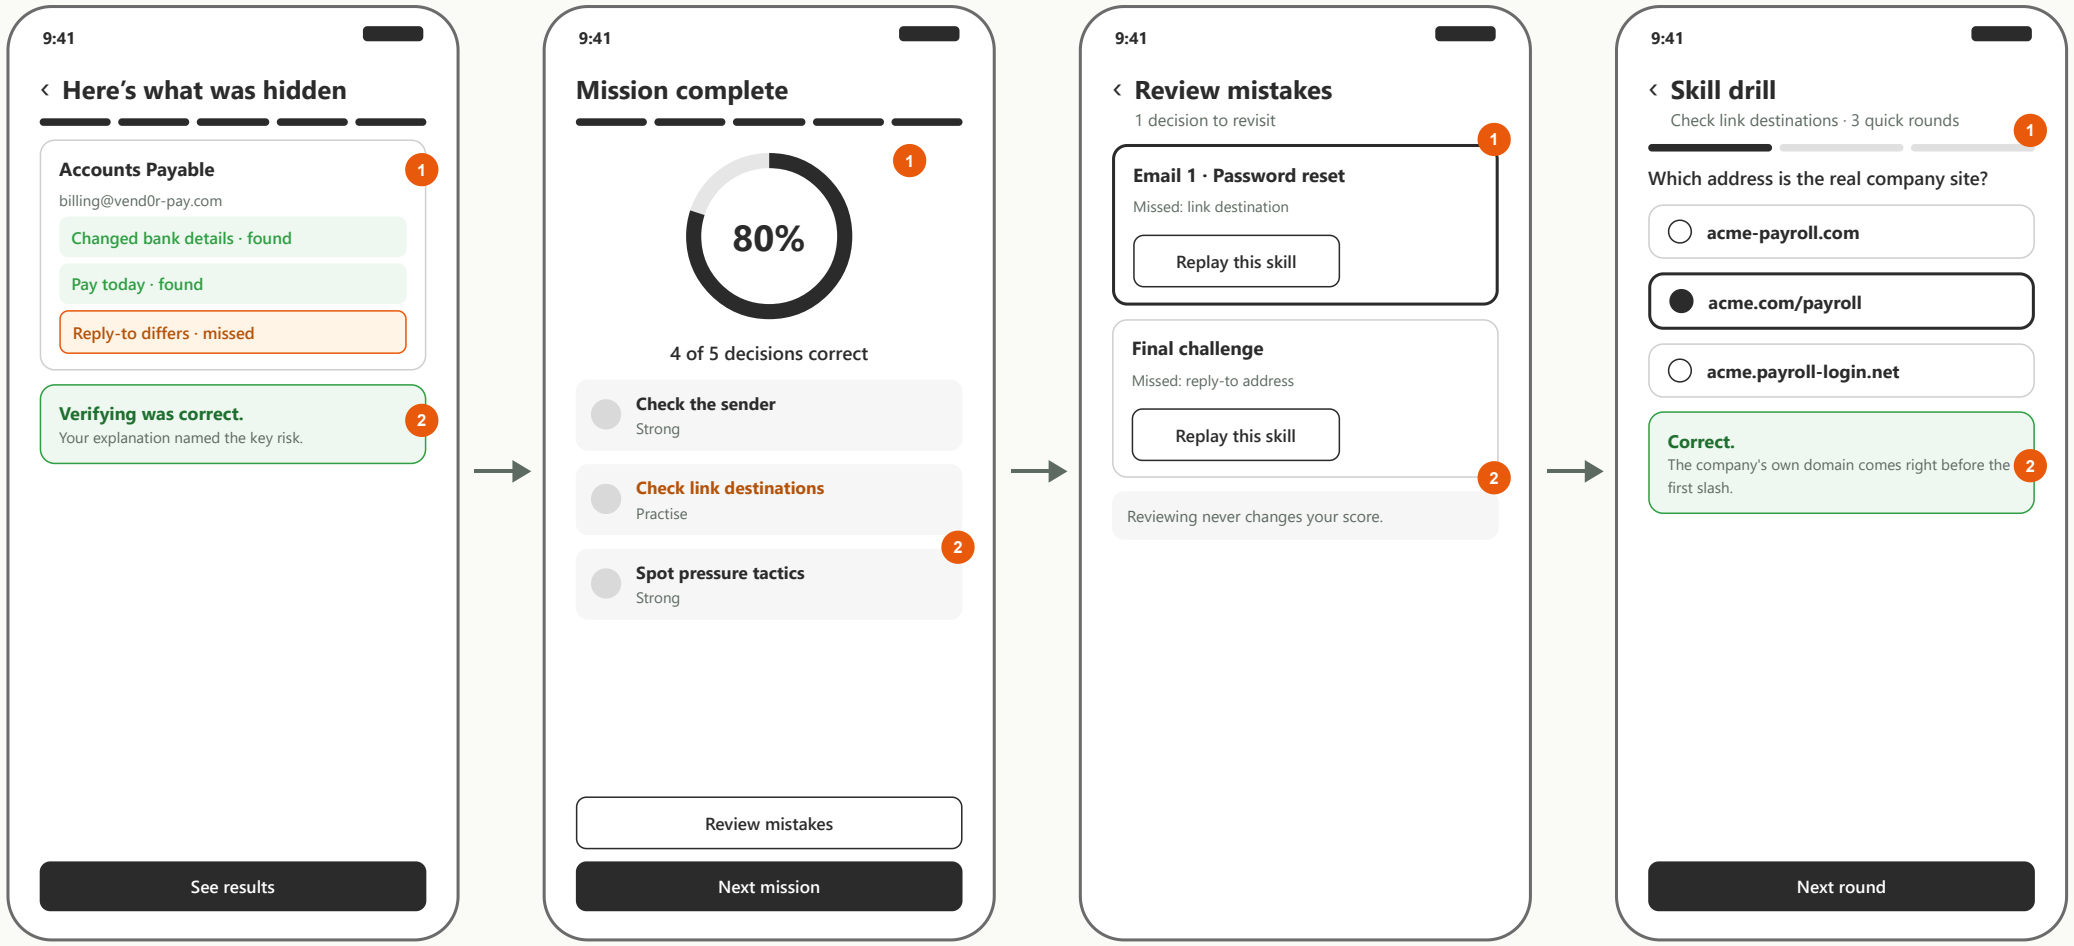

1. Retry uses a new email, not the same answer.
2. The hint targets the skill that was missed.

15 Final challenge

1. The change in rules is stated up front.
2. Tools stay; only hints are removed.

16 Choose action and explain

1. Players explain in their own words.
2. Clue chips help without giving the answer.

17 Reveal clues and feedback

1. Every clue is revealed, found or not.
2. Feedback grades the reasoning too.

18 Accuracy and learning recap

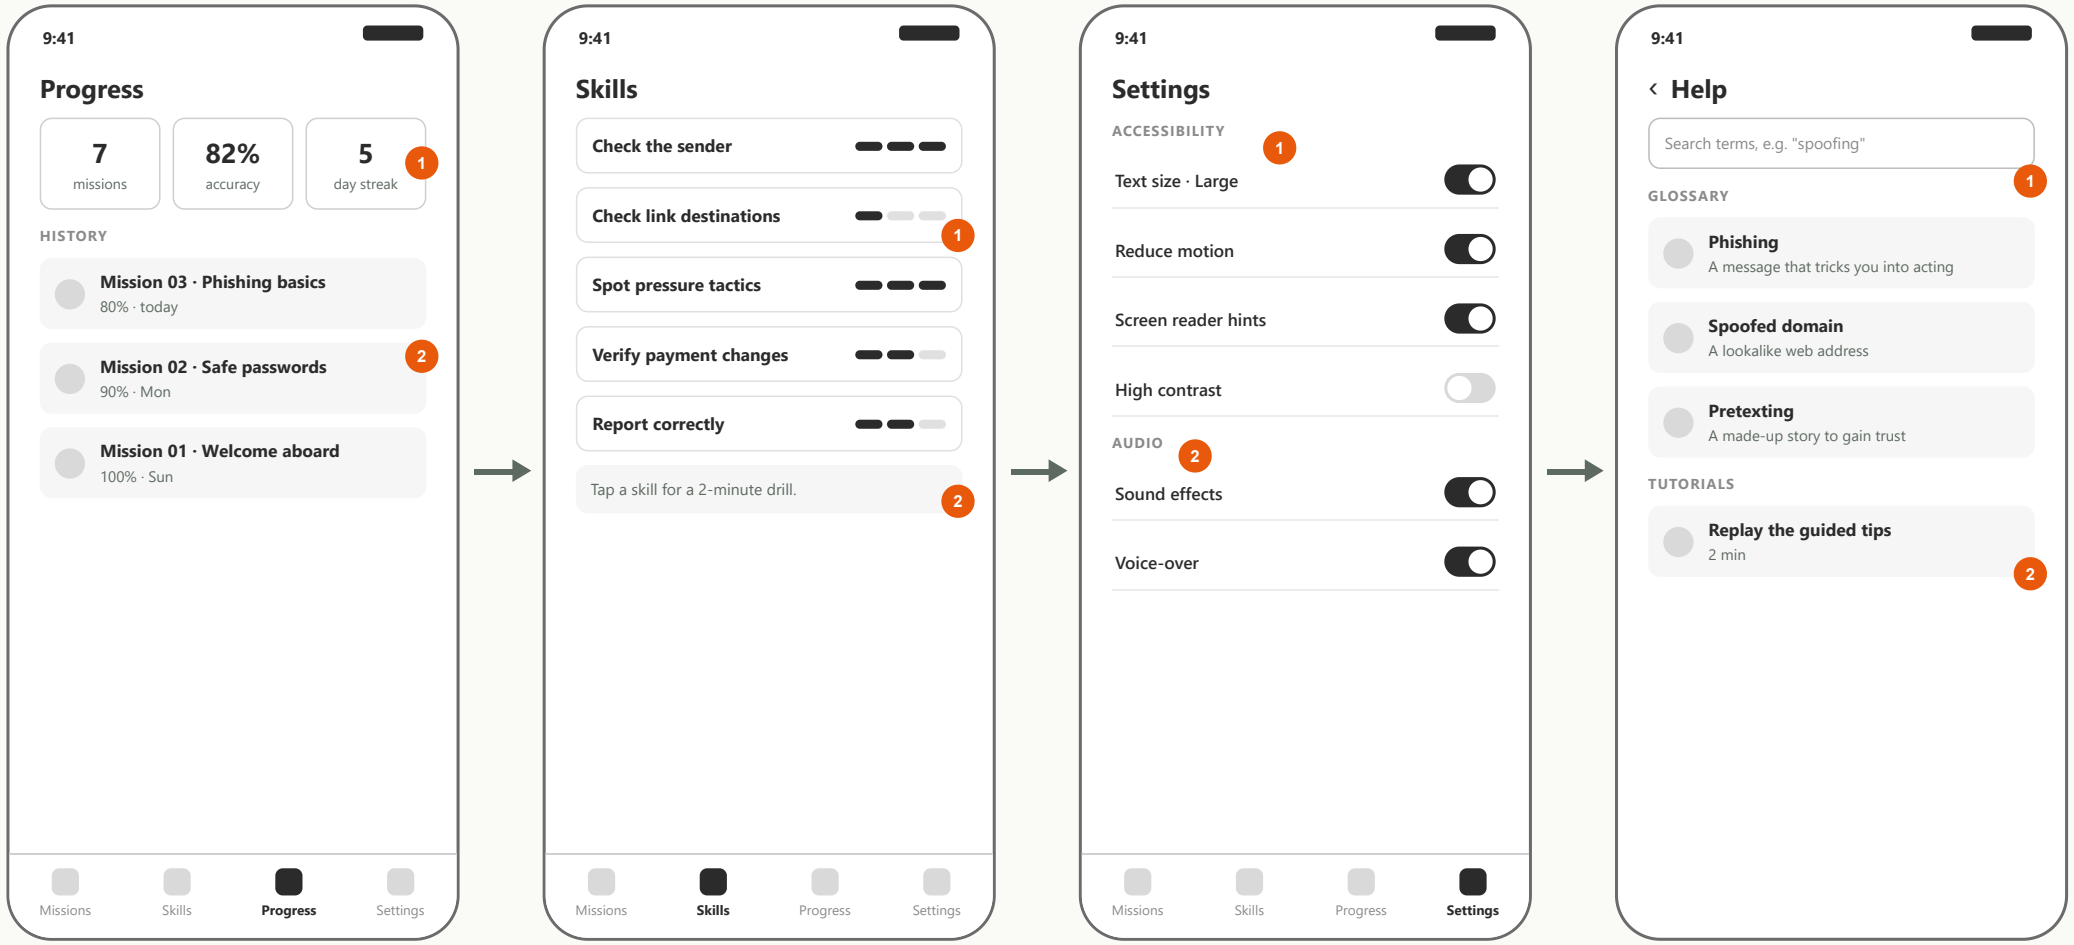

1. Accuracy shows what it is based on.
2. Skills say what to practise next.

19 Review mistakes

1. Mistakes are grouped by skill.
2. Reviewing is safe: no score change.

20 Replay missed skill

1. Short drills target one skill.
2. Each round teaches a rule, not just right or wrong.

21 Progress

1. Three numbers, no dashboard overload.
2. Every past mission can be replayed.

22 Skills

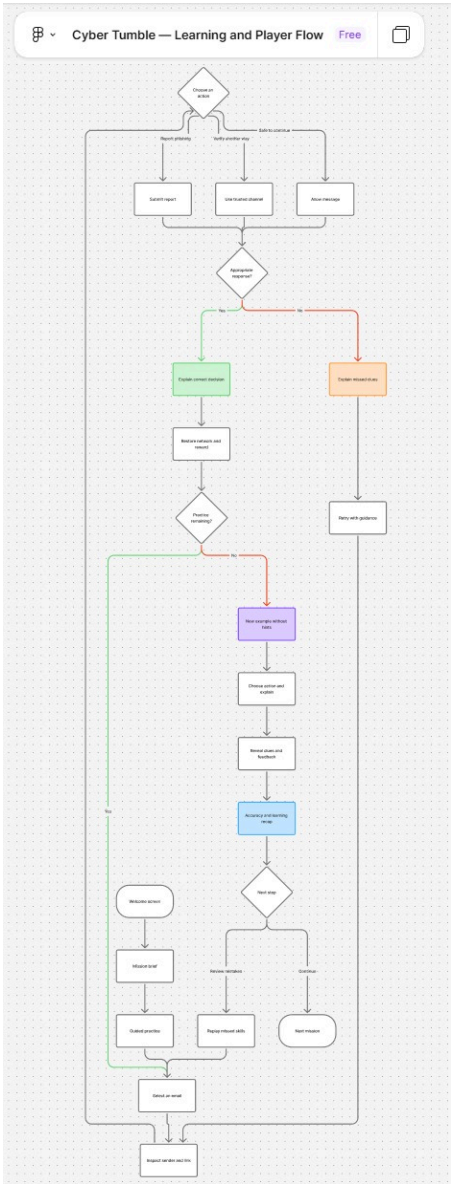

1. Skills grow from decisions, not time played.
2. The weakest skill links straight to a drill.

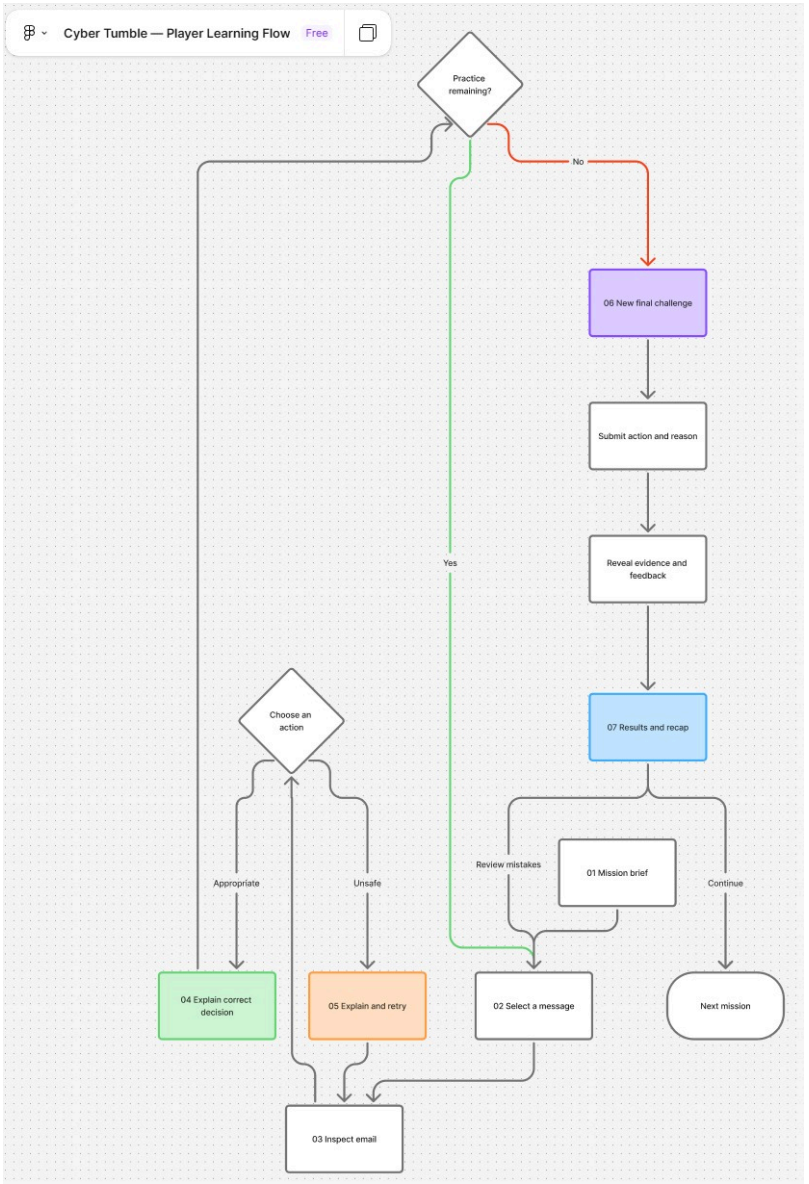

23 Settings and accessibility

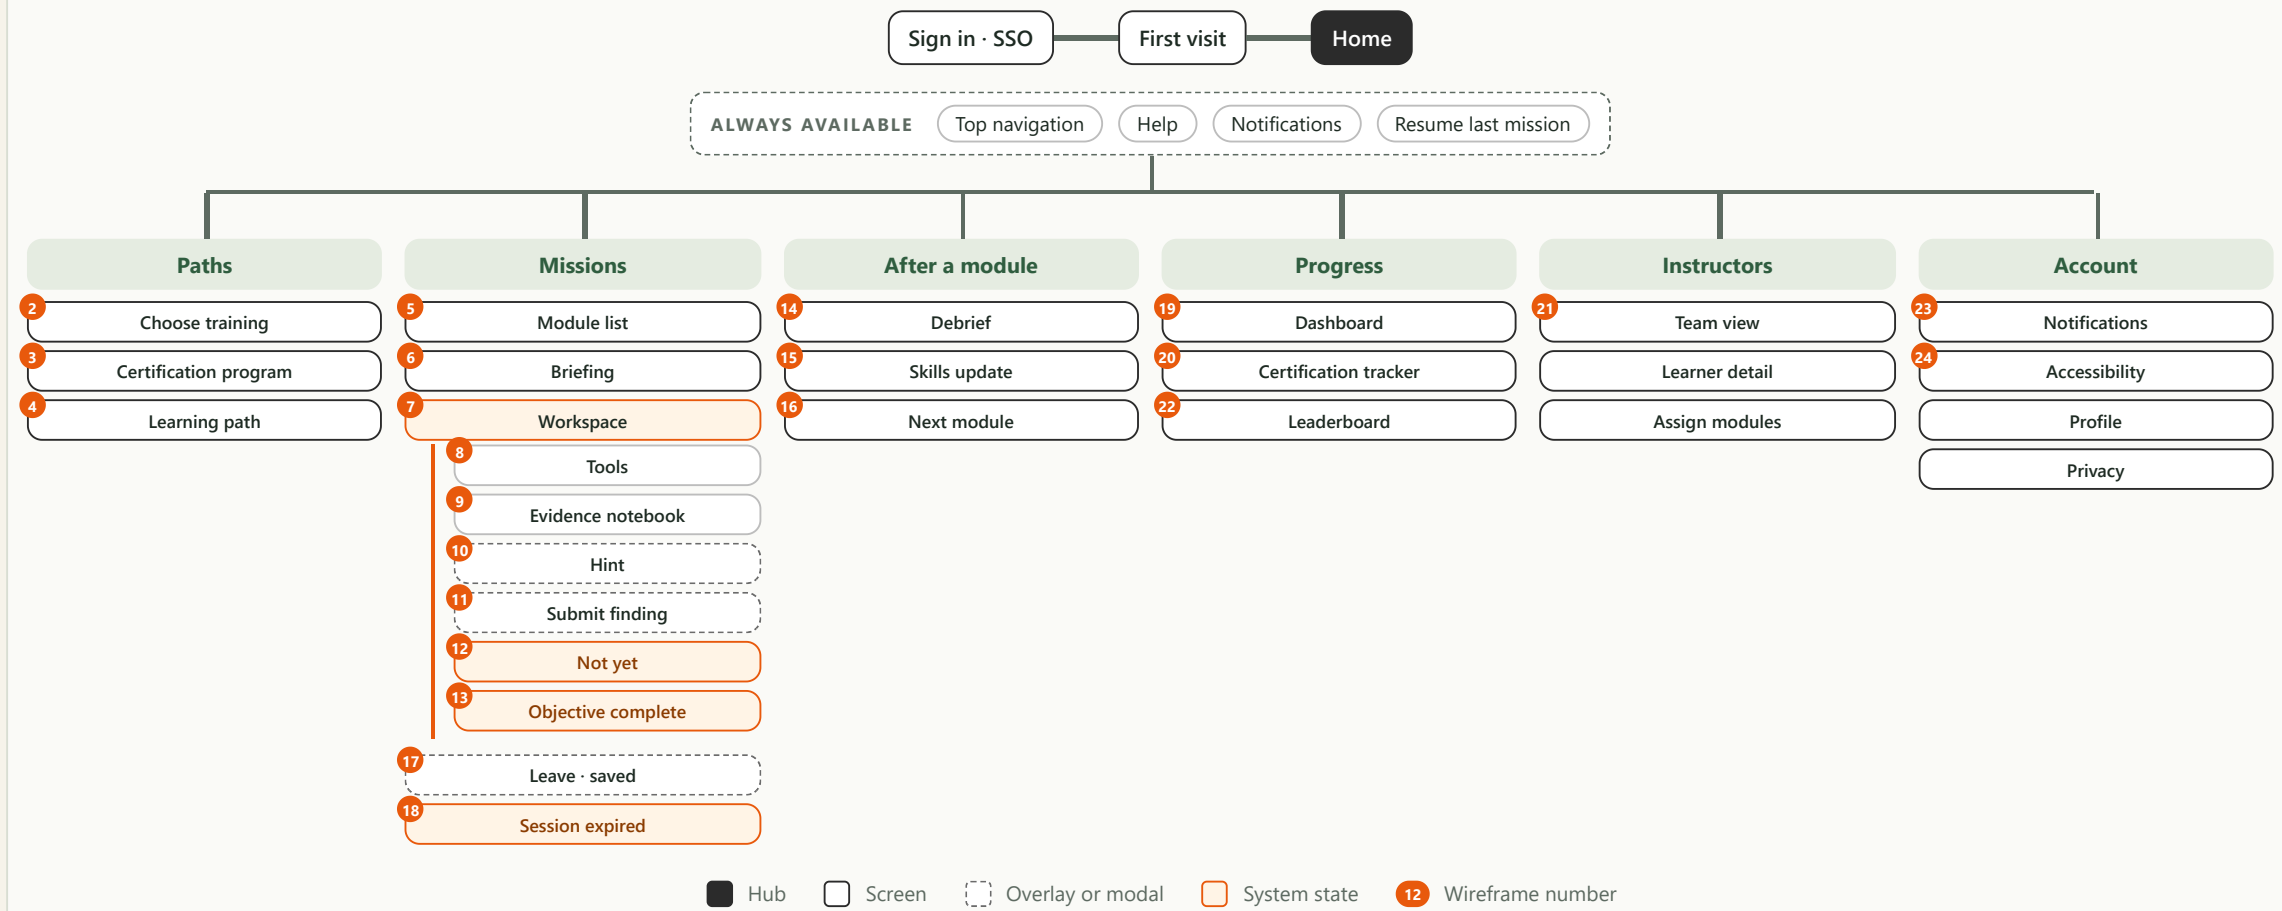

1. Accessibility comes first in the list.
2. Every setting applies instantly.

24 Help and glossary

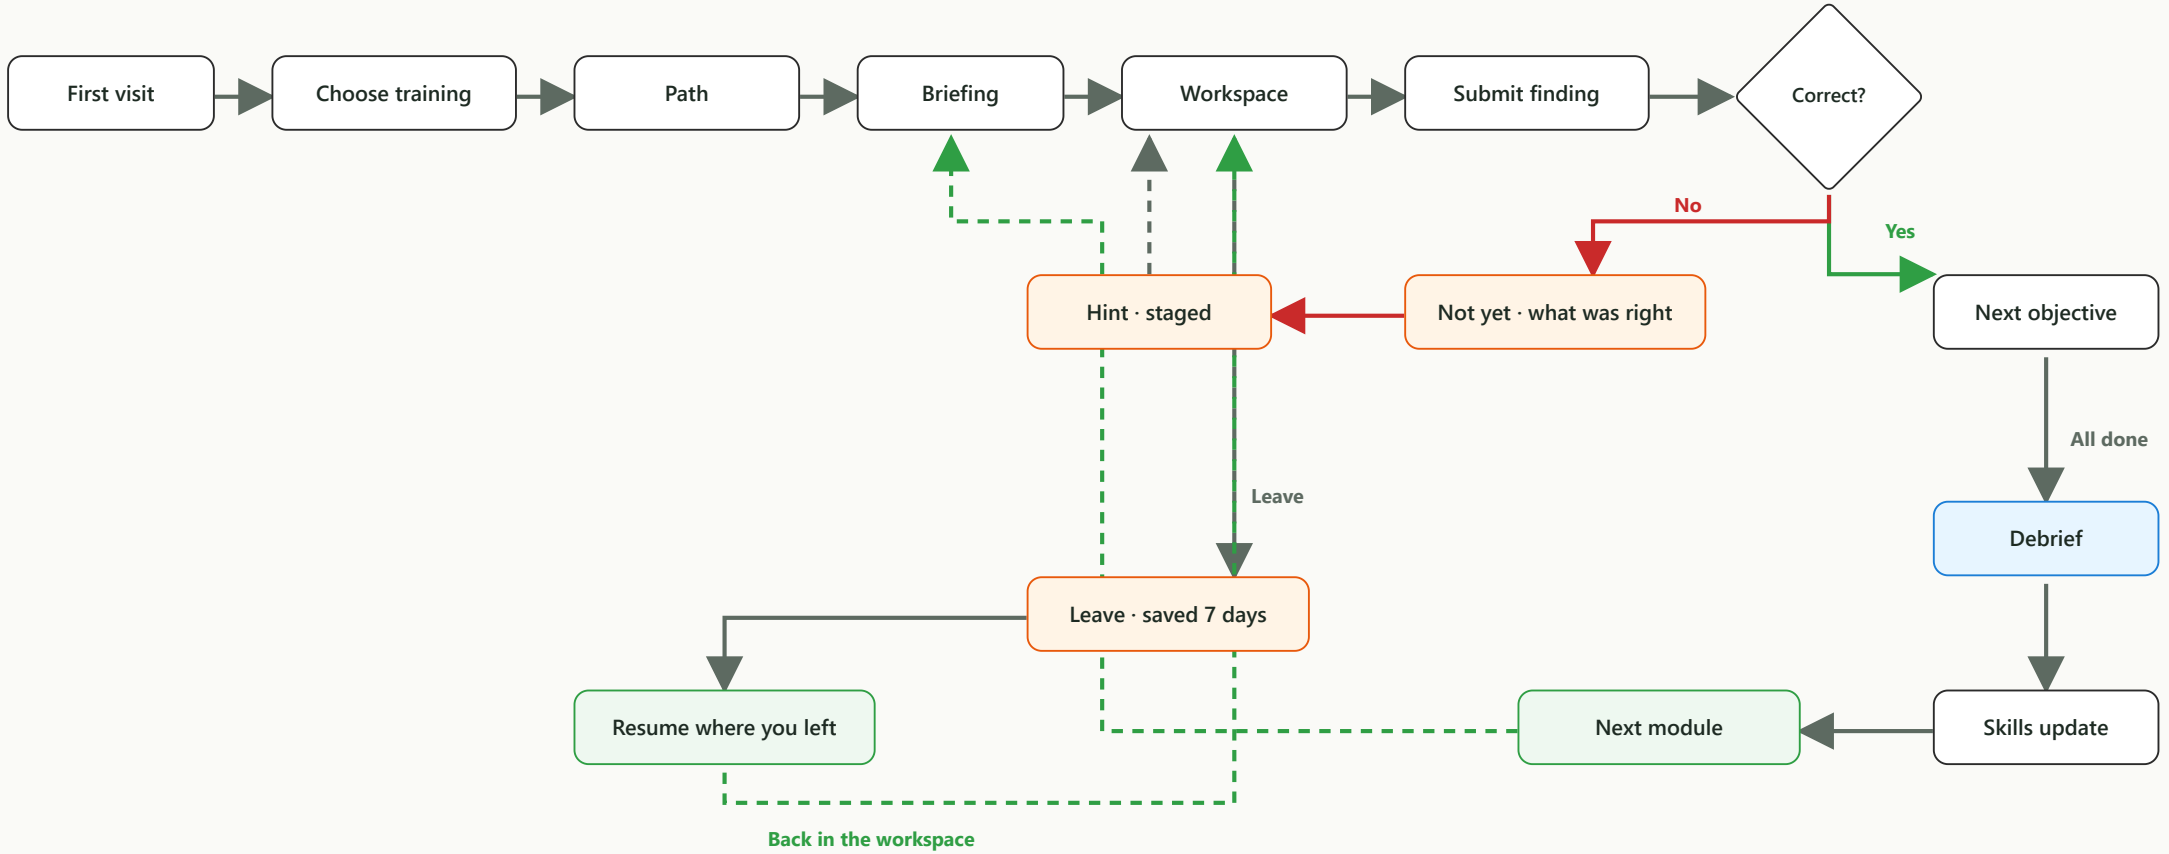

1. Plain-language definitions.
2. Onboarding tips can be replayed anytime.

PROJECT ARES · BRIEFING-TO-DEBRIEF FLOW

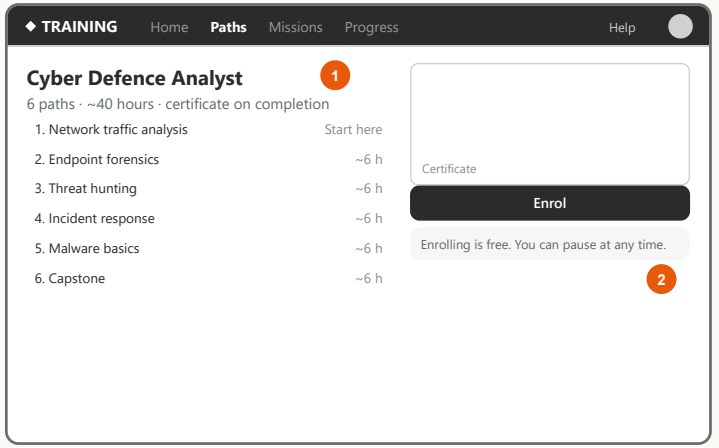

1 First visit

1. Three steps explain the whole product.
2. One primary action; scenery is optional.

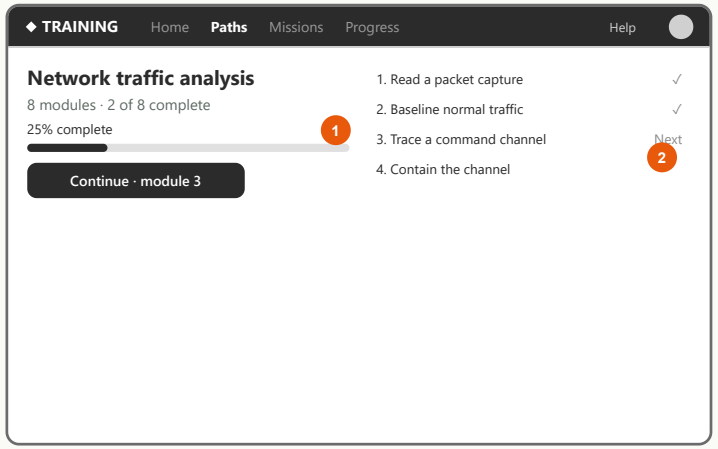

2 Choose training

1. Two choices, each with time and scope.
2. Both lead to a browse, not a commitment.

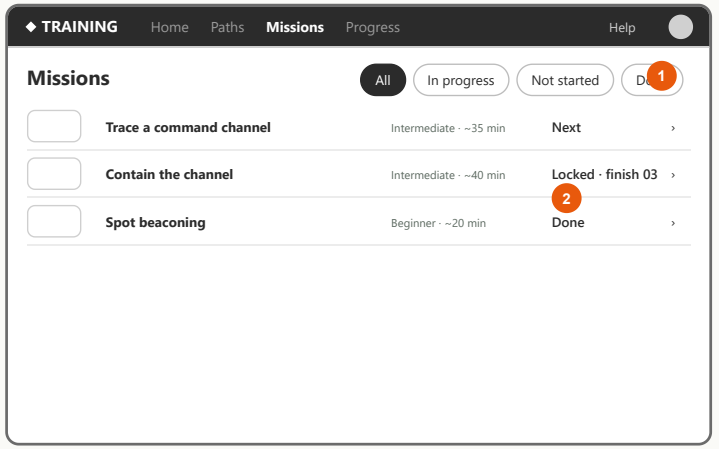

3 Certification program

1. The whole sequence is visible before enrolling.
2. Removes the fear of commitment.

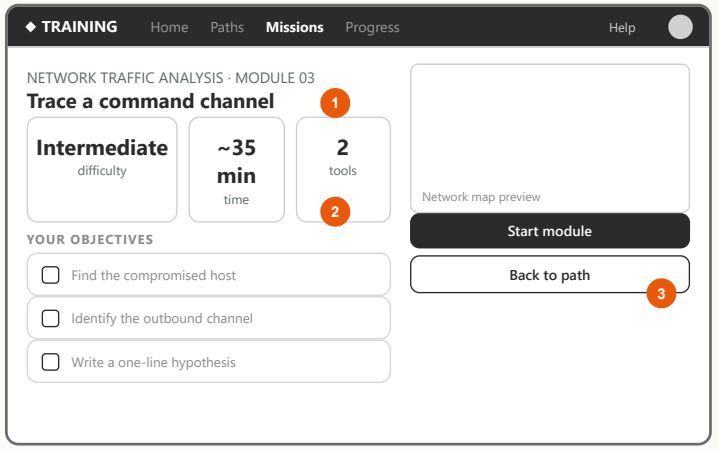

4 Learning path

1. Continue is the main action for returning learners.
2. Done, next and later at a glance.

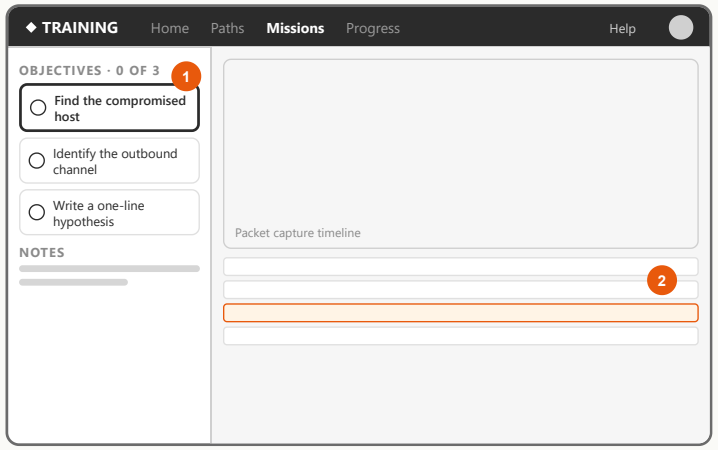

5 Module list

1. Filters by status.
2. Locked modules say what unlocks them.

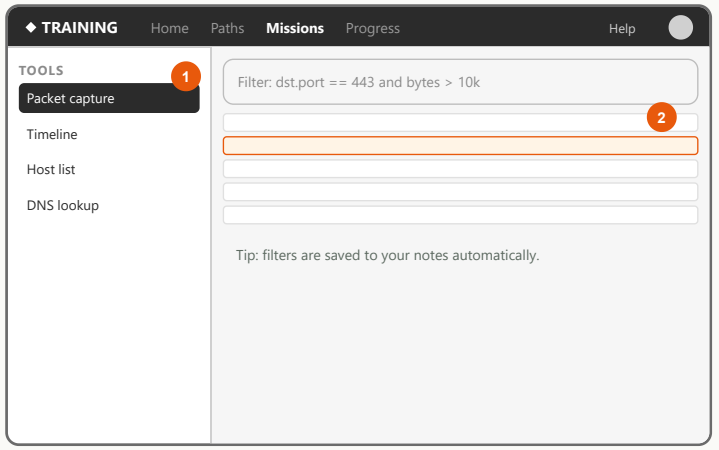

6 Briefing

1. Difficulty, time and tools before starting.
2. Objectives are known in advance.
3. Start is the only primary action.

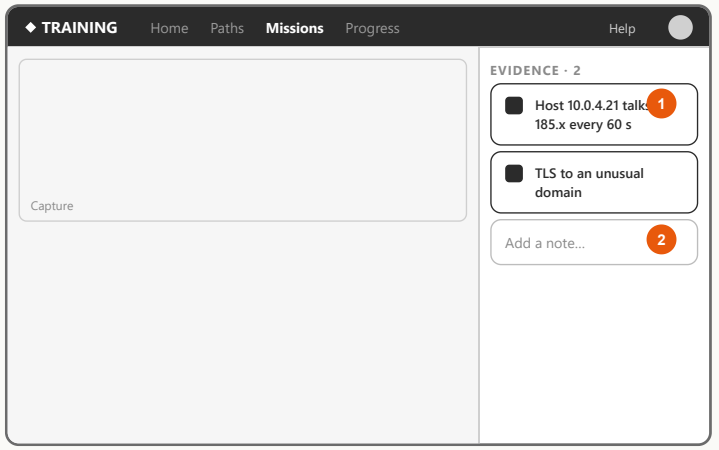

7 Mission workspace

1. Objectives stay visible the whole time.
2. The main tool fills the workspace.

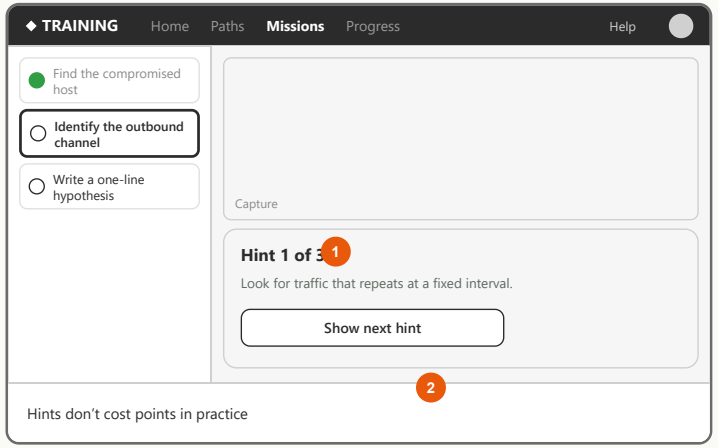

8 Tools

1. Tools switch in place; work is never lost.
2. Filters become evidence automatically.

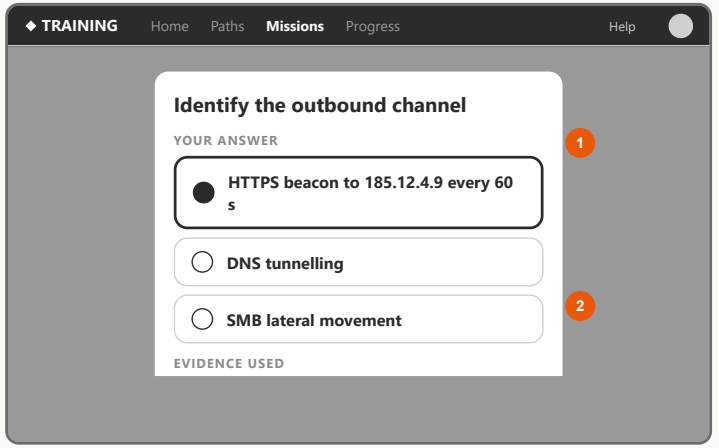

9 Evidence notebook

1. Findings collect beside the work.
2. Each note links back to its source row.

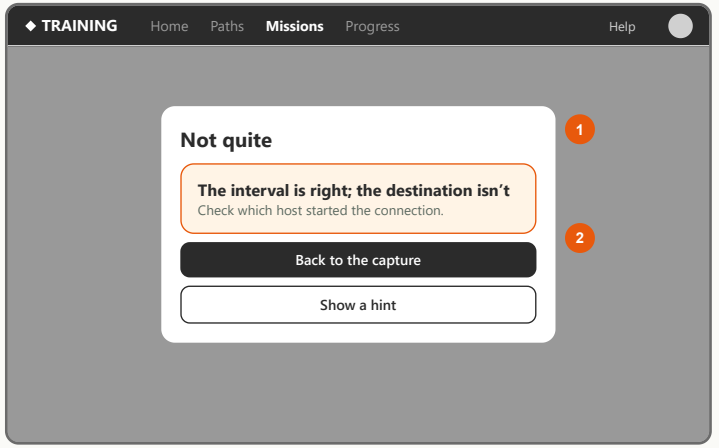

10 Hint

1. Hints are staged, from nudge to answer.
2. The cost (none) is stated.

11 Submit a finding

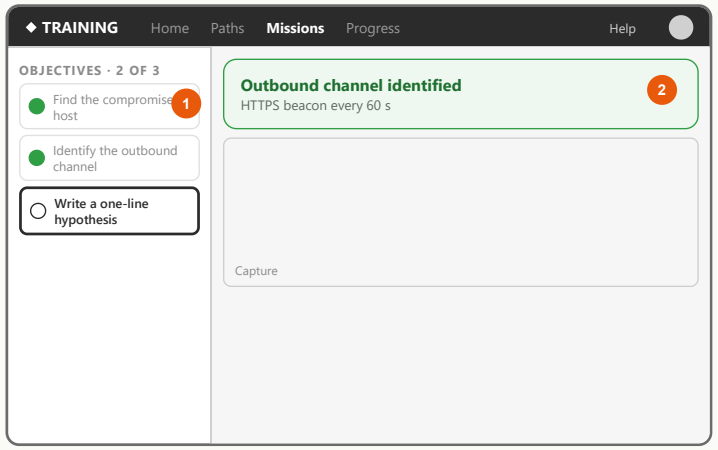

1. Answers are concrete, not trivia.
2. Evidence is attached to the answer.

12 Not yet

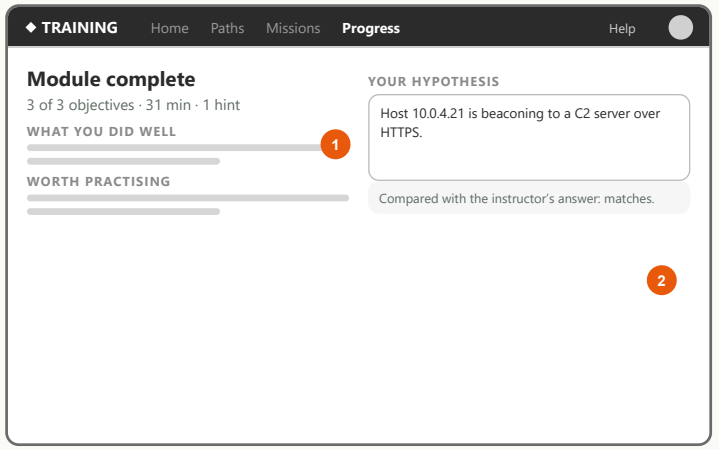

1. Says what was right before what wasn't.
2. Returns to the exact place in the work.

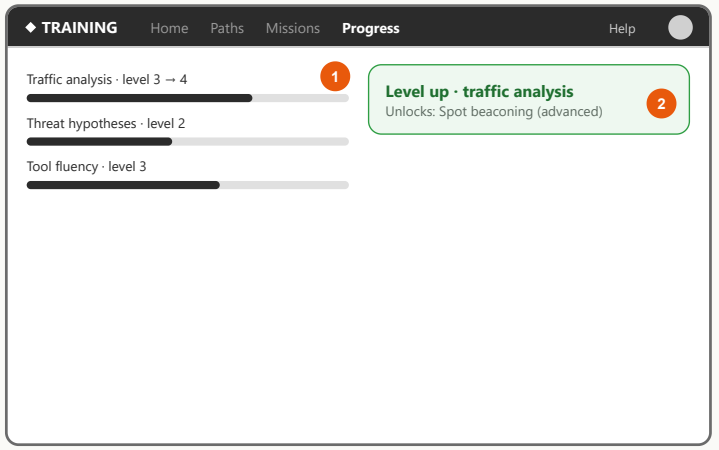

13 Objective complete

1. The list ticks off as you go.
2. Feedback is brief; the work continues.

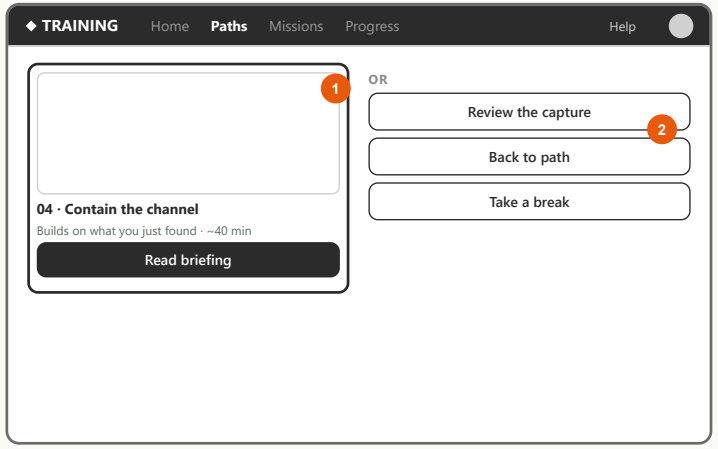

14 Debrief

1. Strengths and gaps, not just a score.
2. Your own hypothesis is reviewed.

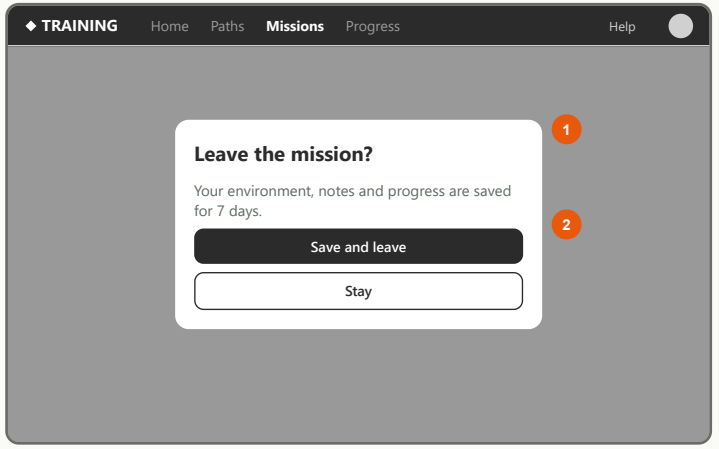

15 Skills update

1. Skills grow from what you did.
2. Level-ups say what they unlock.

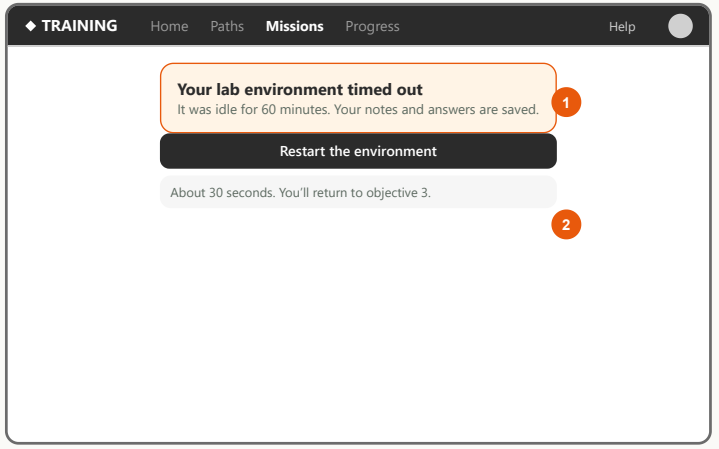

16 Next module

1. The next module is framed as a continuation.
2. Stopping is a normal choice.

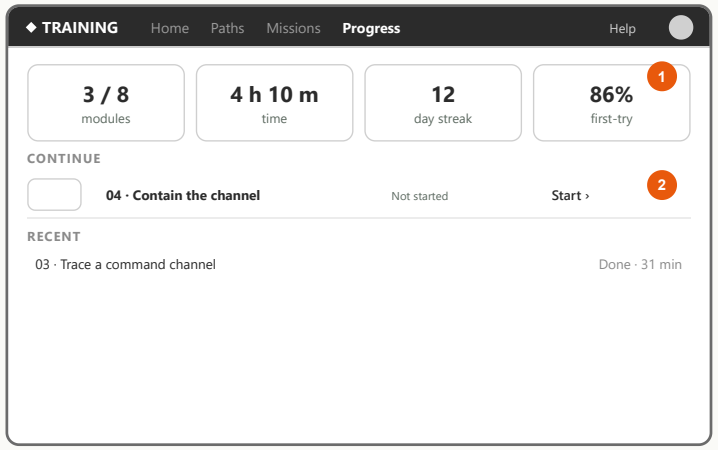

17 Leave mid-mission

1. Says what is kept and for how long.
2. Leaving is never destructive.

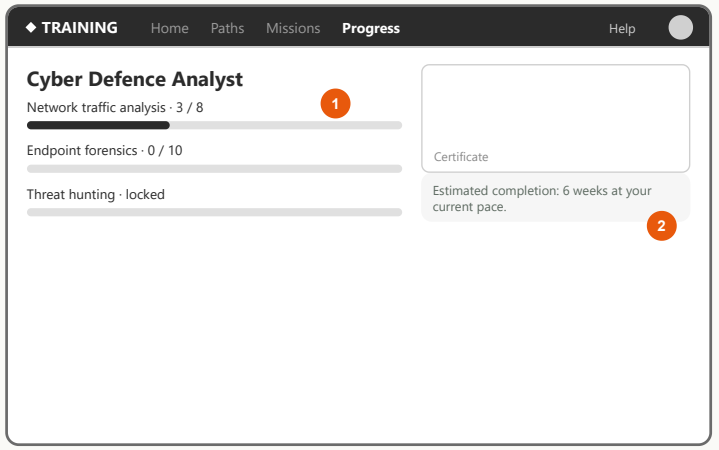

18 Session expired

1. Explains why it expired.
2. Says exactly where you'll resume.

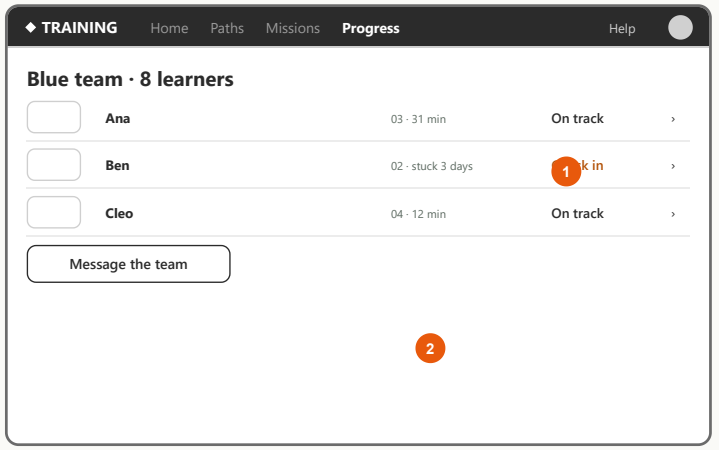

19 Progress dashboard

1. Four numbers, then what to do next.
2. Recent work below.

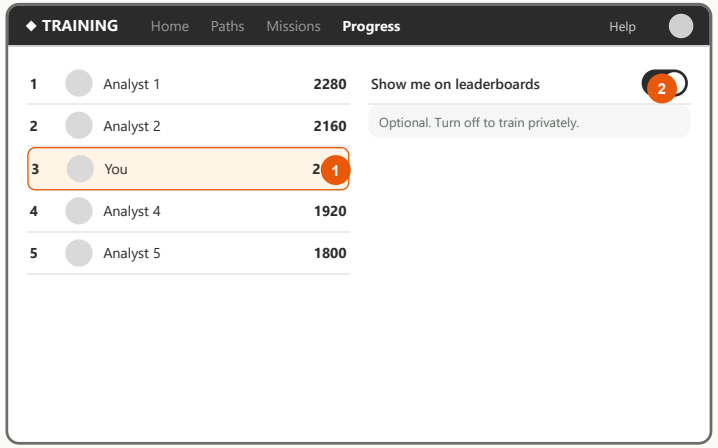

20 Certification tracker

1. Progress per path, toward one goal.
2. An honest estimate from real pace.

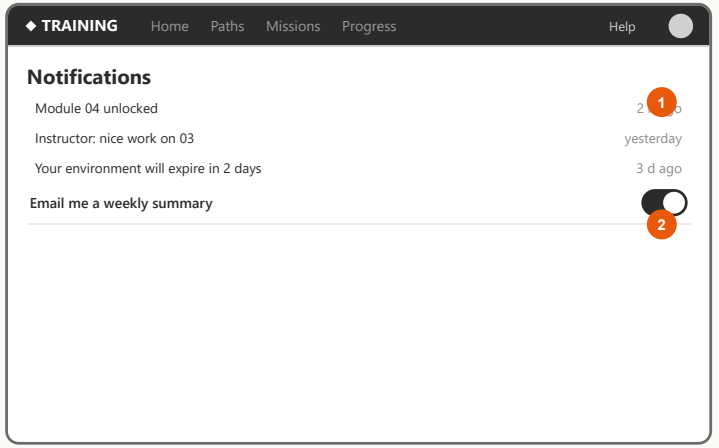

21 Instructor view

1. Who needs help is surfaced, not hunted for.
2. Instructors act from the same view.

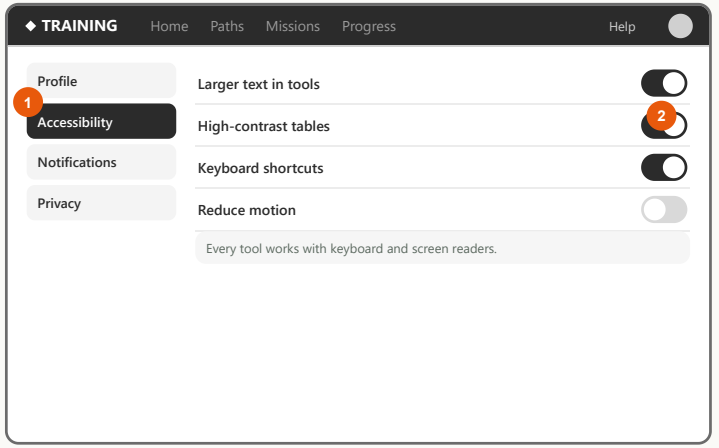

22 Leaderboard

1. Your row is highlighted.
2. Competition is opt-in.

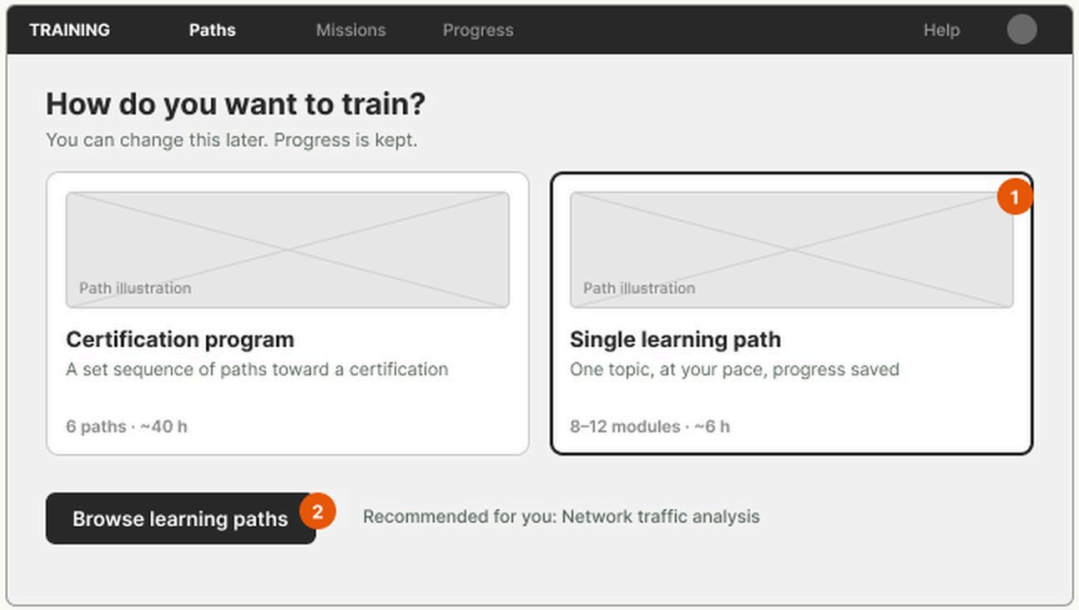

23 Notifications

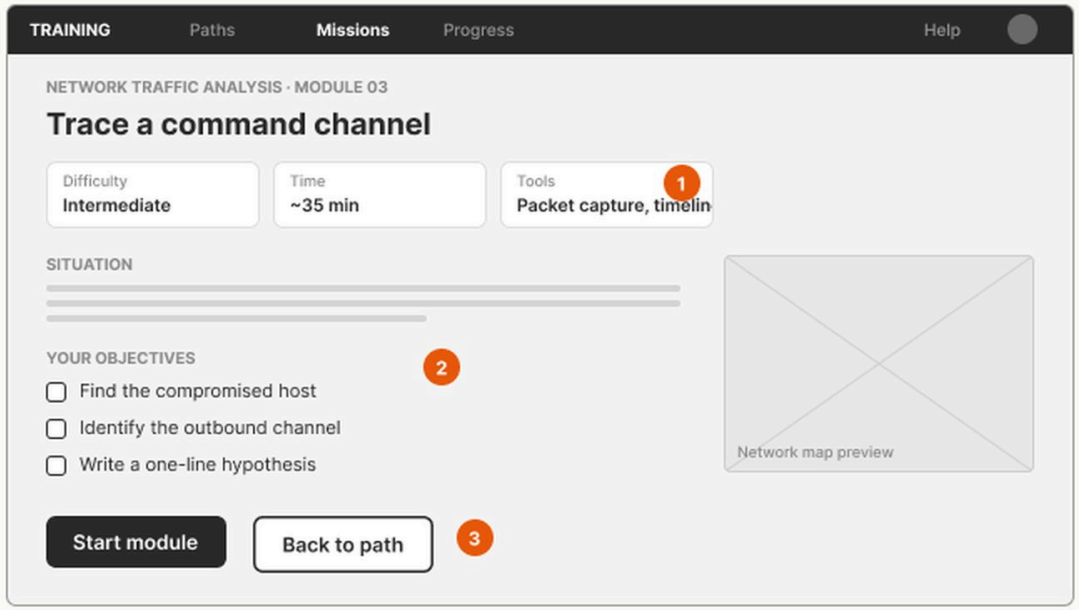

1. Only events that need attention.
2. A weekly summary replaces constant pings.

24 Settings · accessibility

1. Accessibility is its own tab.
2. Settings apply to the tools, not just menus.

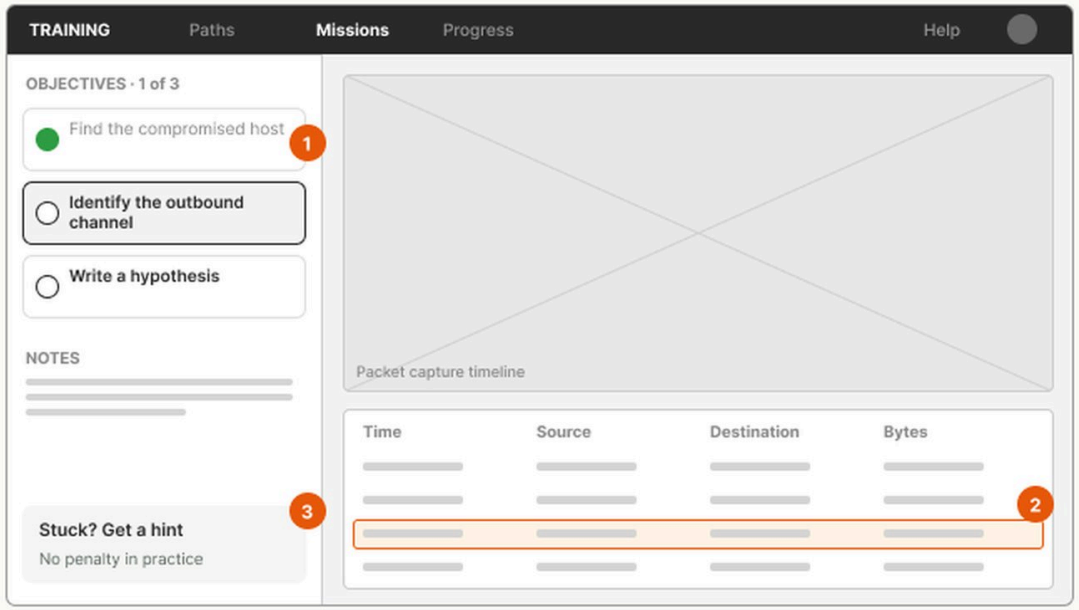

1 Choose how to train

1. Two clear choices with time and scope.
2. One primary action; the scenery is optional.

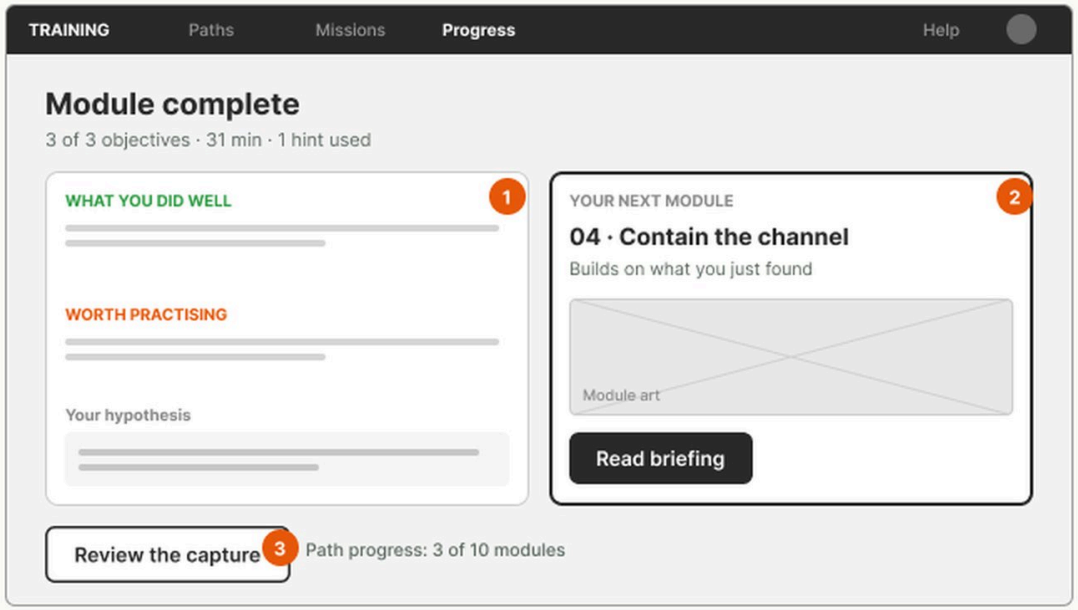

2 Read the briefing

1. Difficulty, time and tools before committing.
2. Objectives are listed before the mission starts.
3. Start is the only primary action.

3 Work the mission

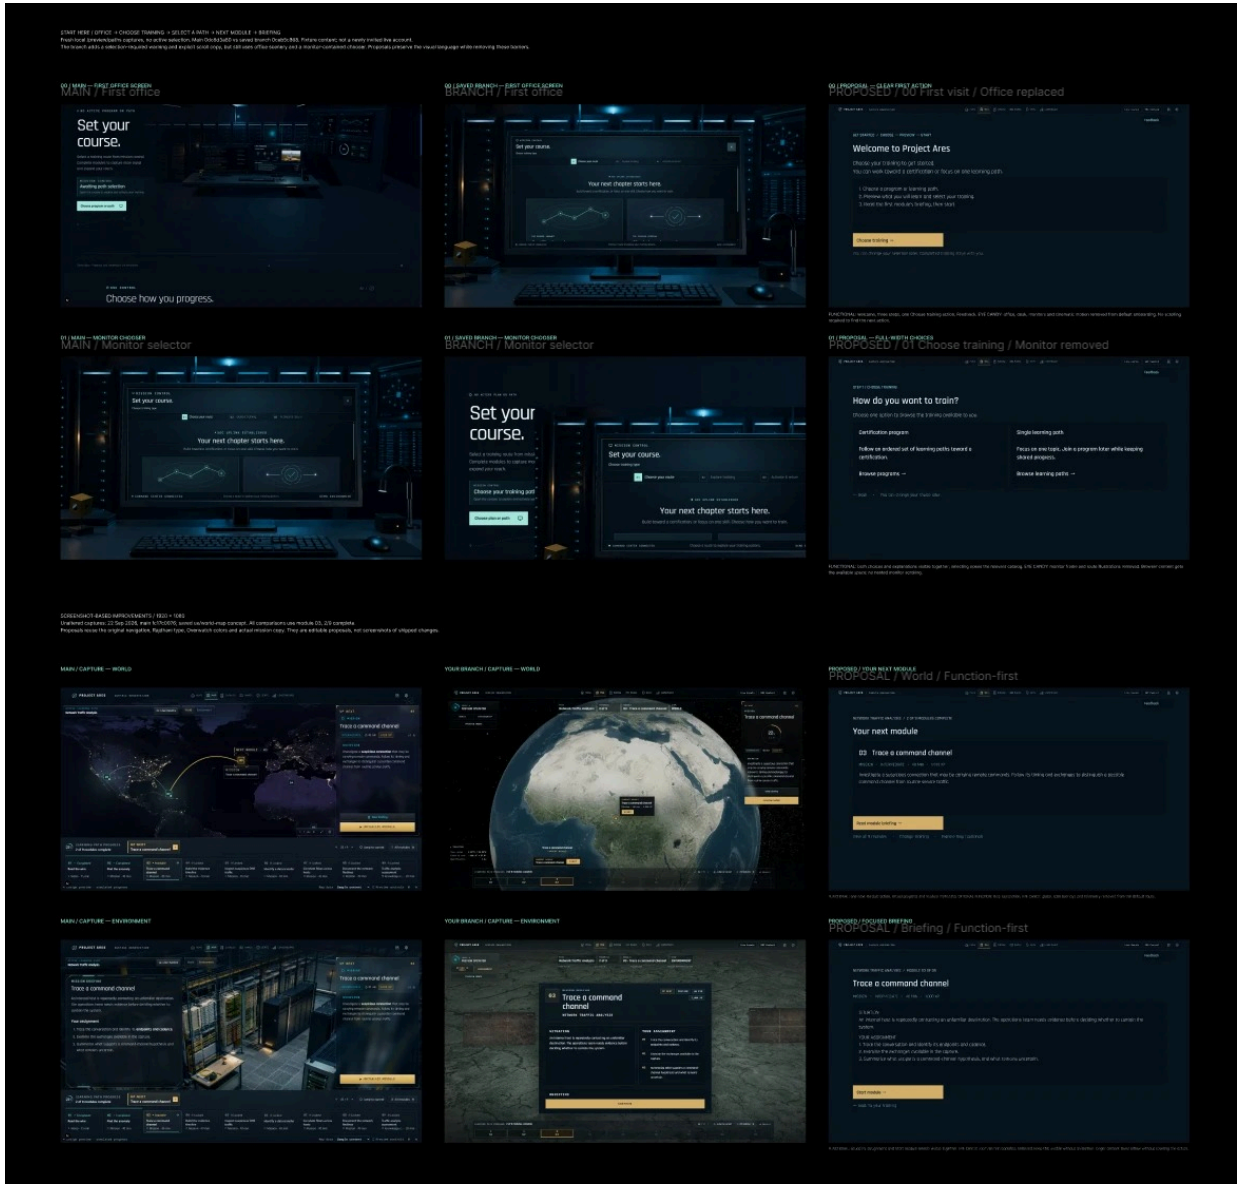

1. Objectives stay visible and tick off as you go.
2. The key evidence row is highlighted when found.
3. Hints are offered without a penalty in practice.

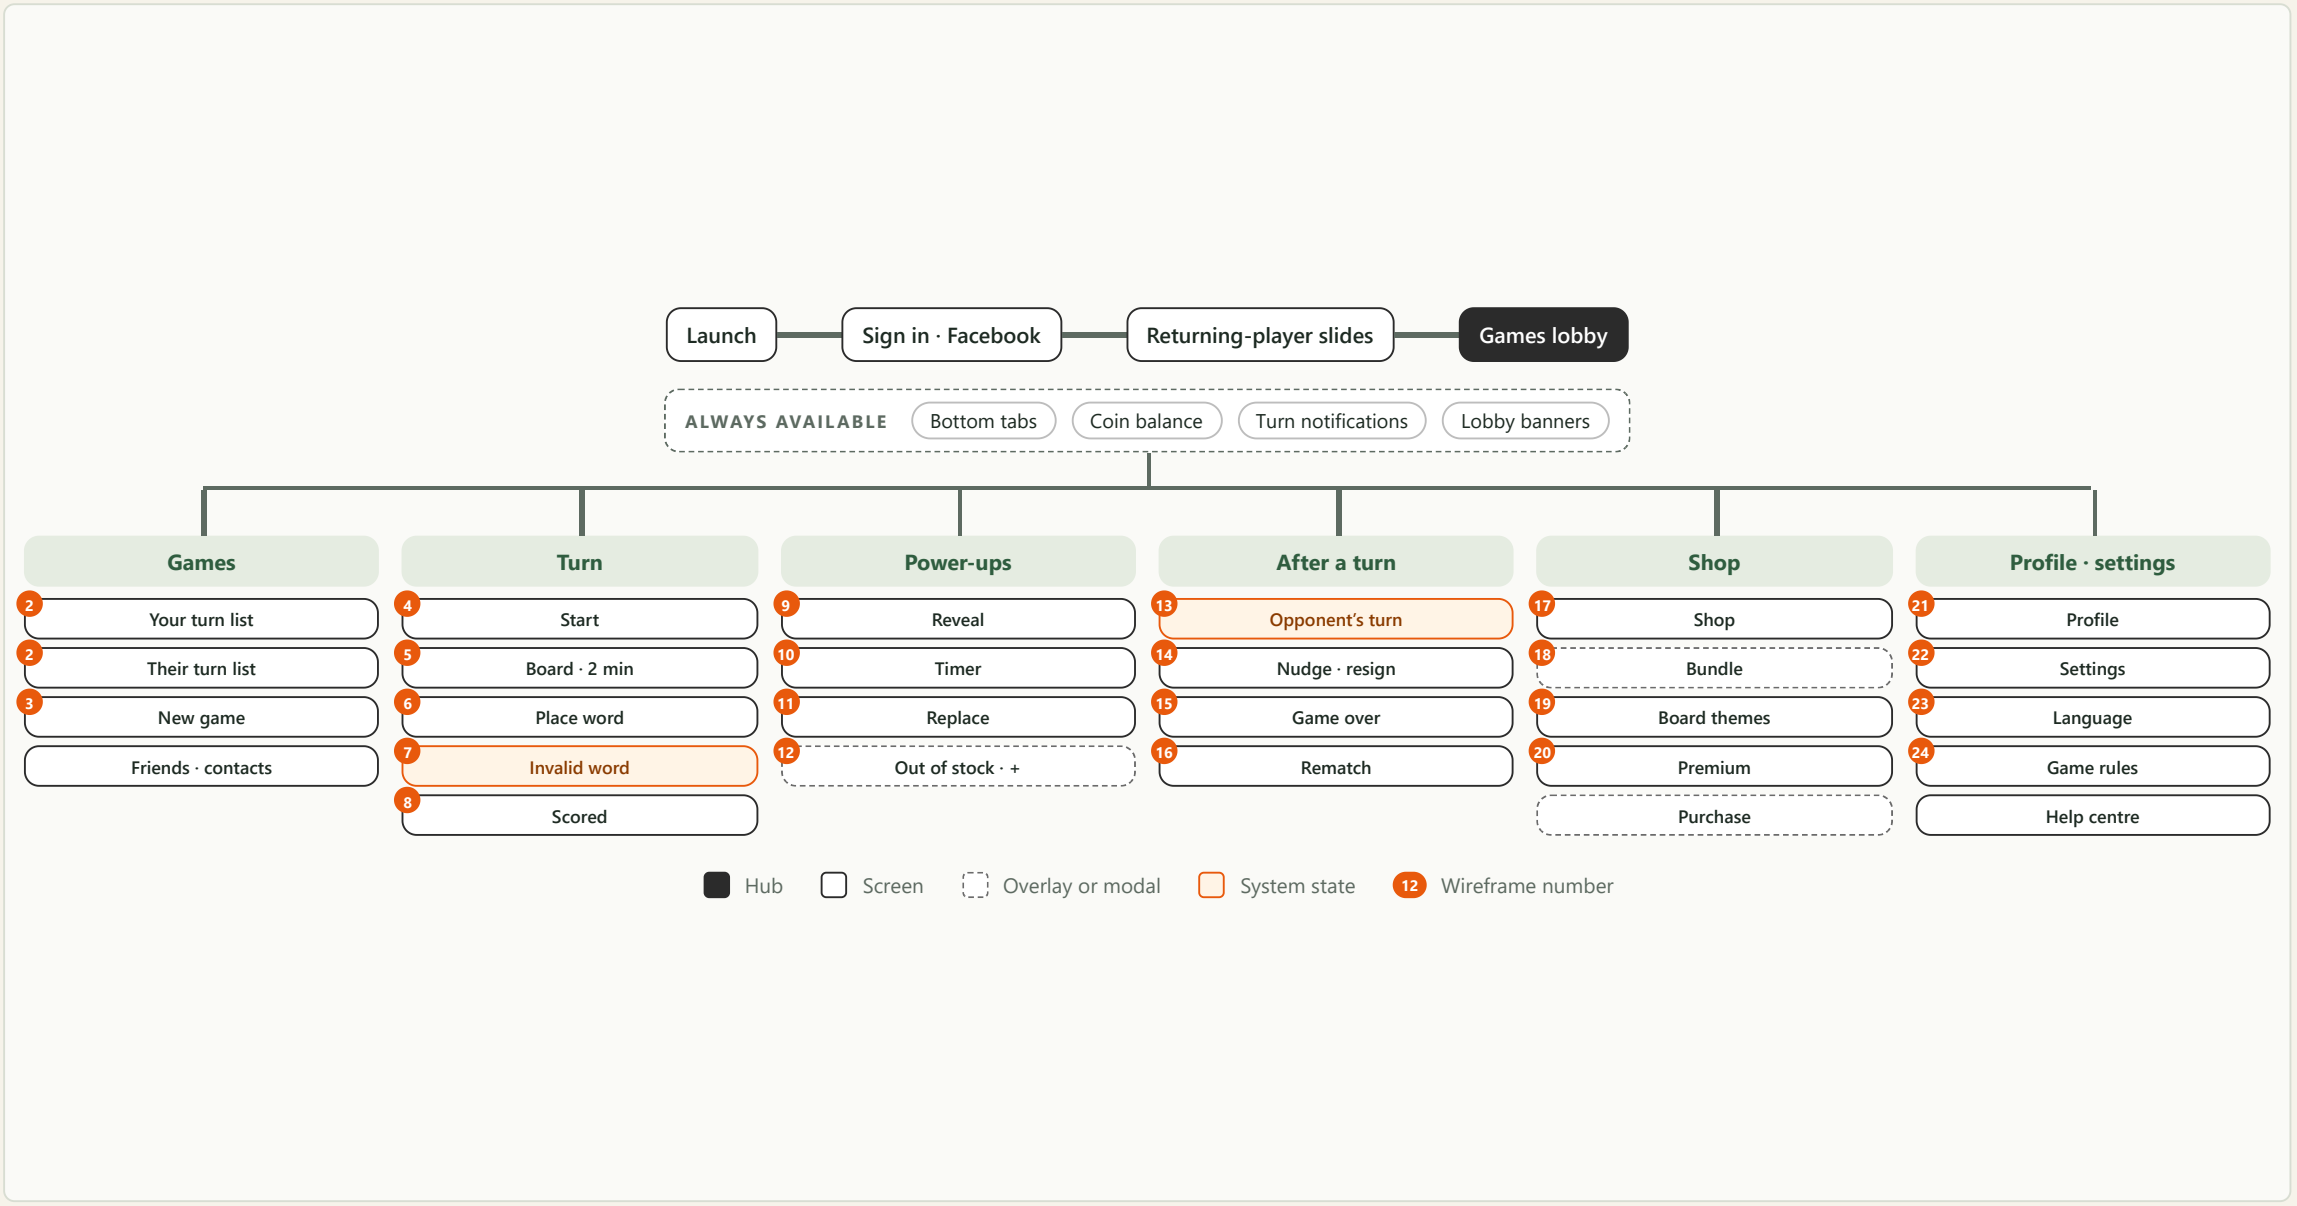

4 Debrief and next step

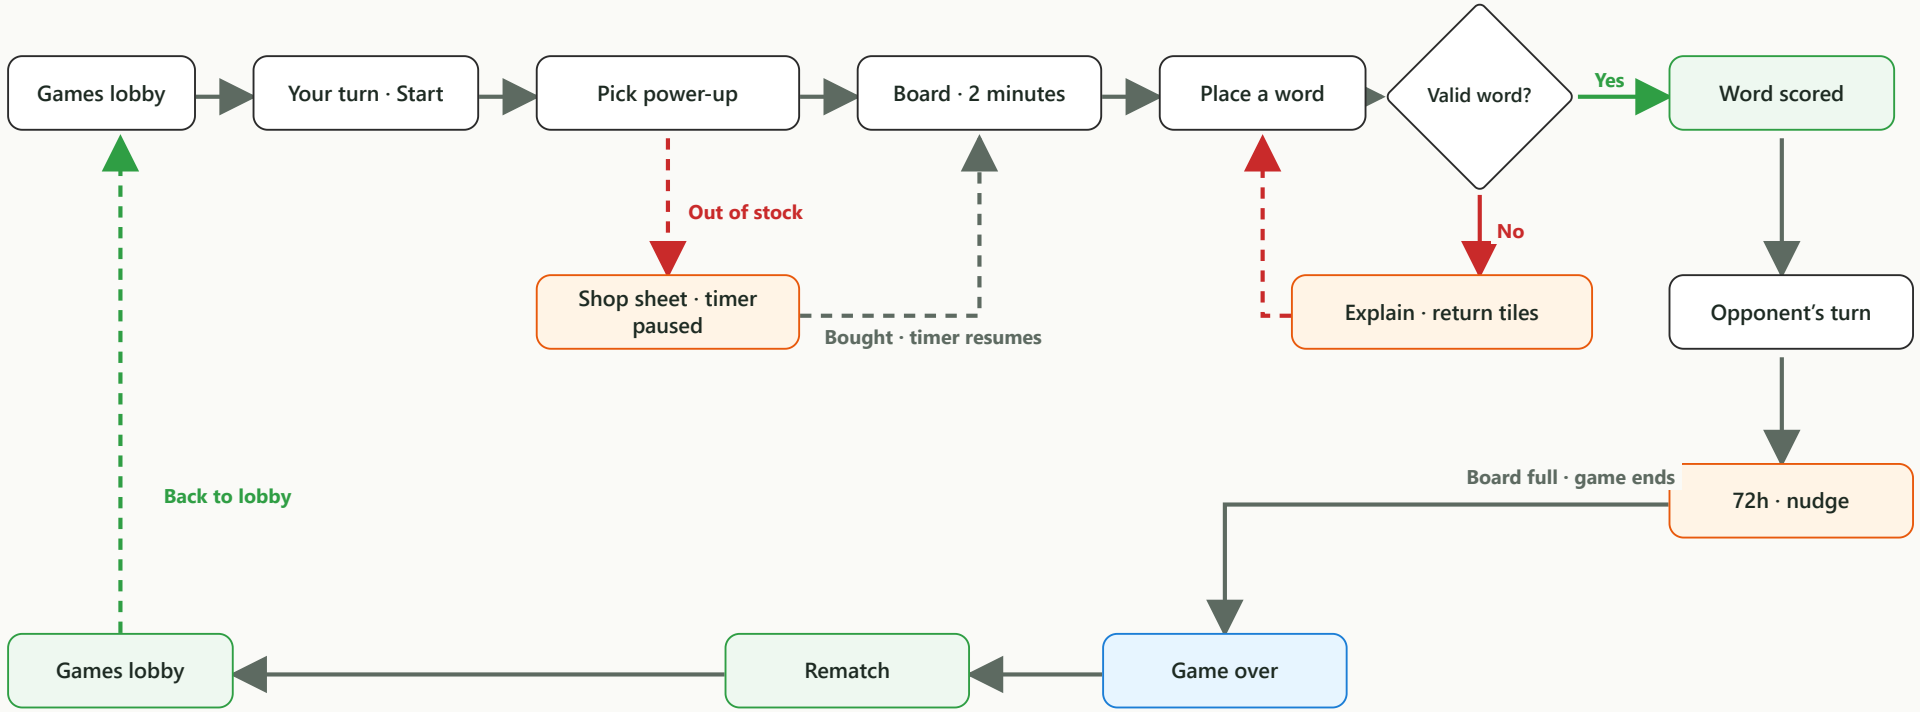

1. Strengths and gaps, not just a score.
2. The next module builds on this one.
3. Players can go back to the evidence.

KRYSS · ASYNCHRONOUS TURN FLOW

1 Returning player

1. Three short slides for returning players only.
2. Skip is always available.

2 Games lobby

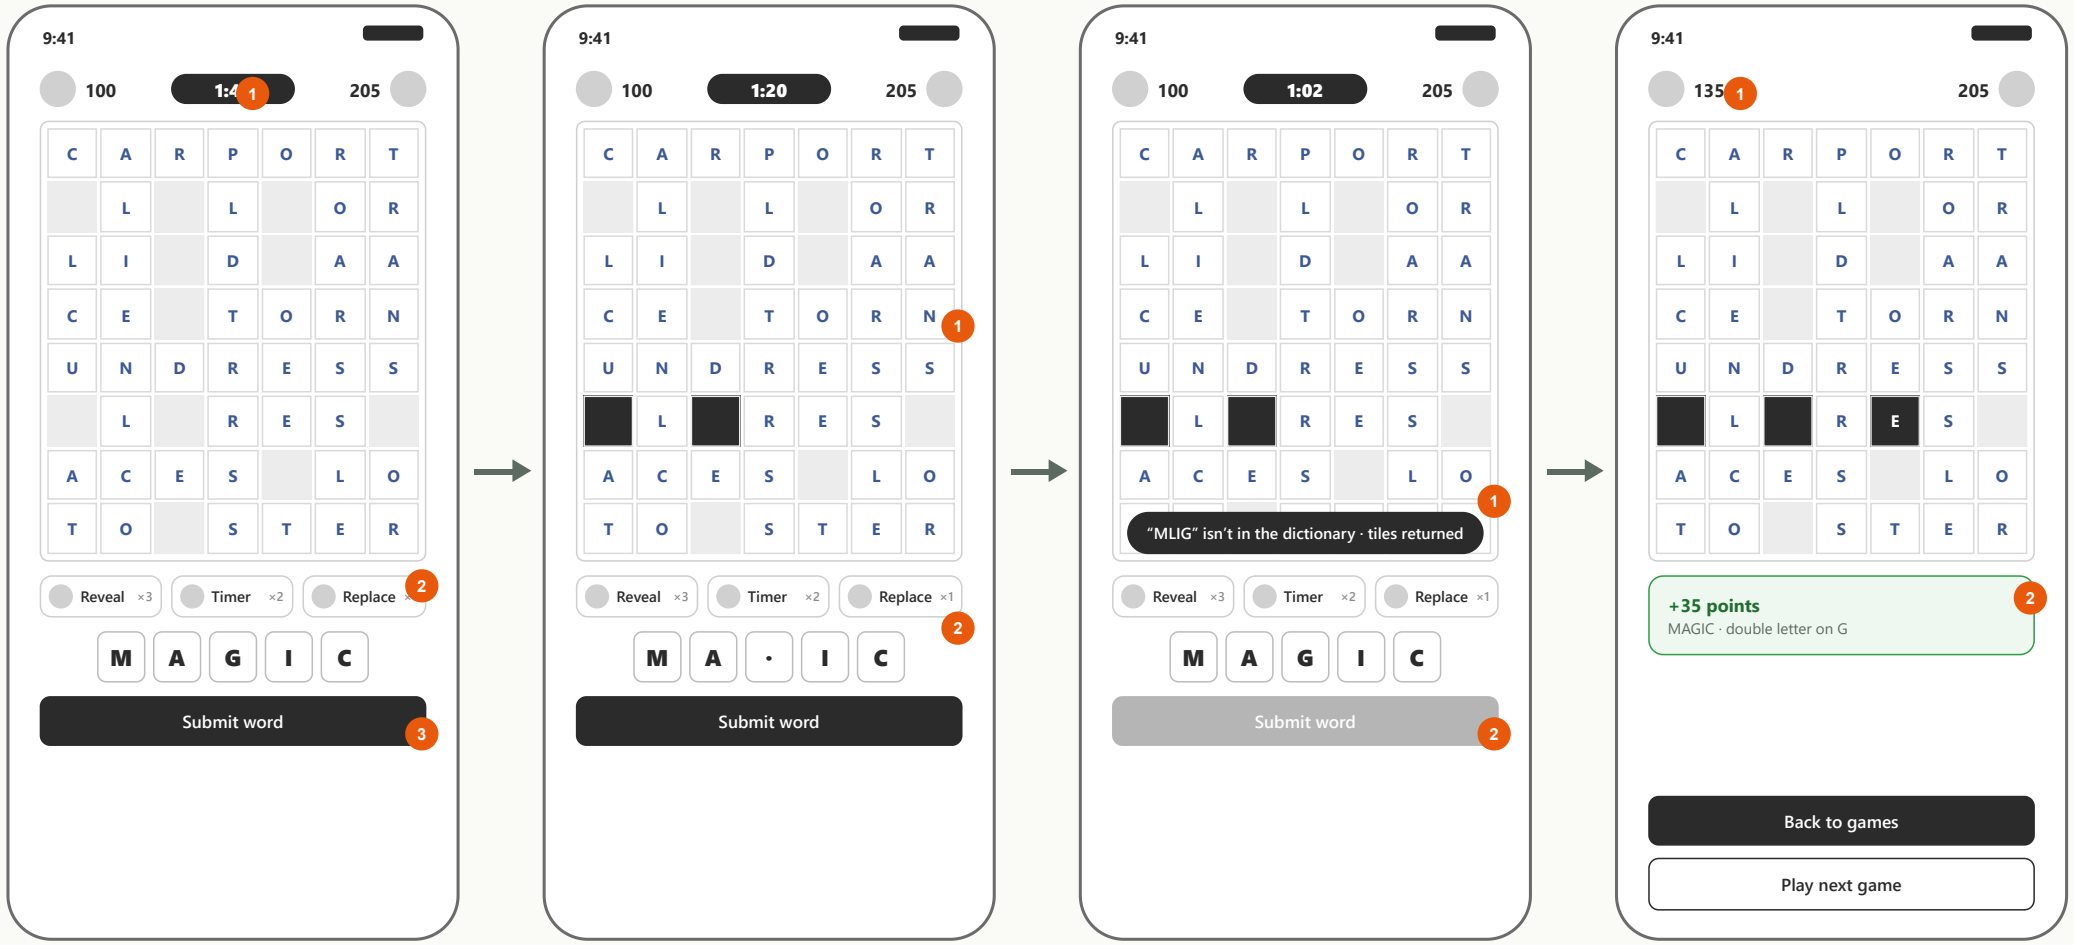

1. Your-turn games come first.
2. Waiting games show time left.

3 New game

1. Three ways to start, one per line.
2. Rematch is suggested from history.

4 Your turn

1. Start brings back a moment to decide.
2. Power-ups can be chosen before the timer runs.

5 Board · 2 minutes

1. The timer sits between both scores.
2. Power-ups are always visible.
3. Letters you hold sit above Submit.

6 Placing a word

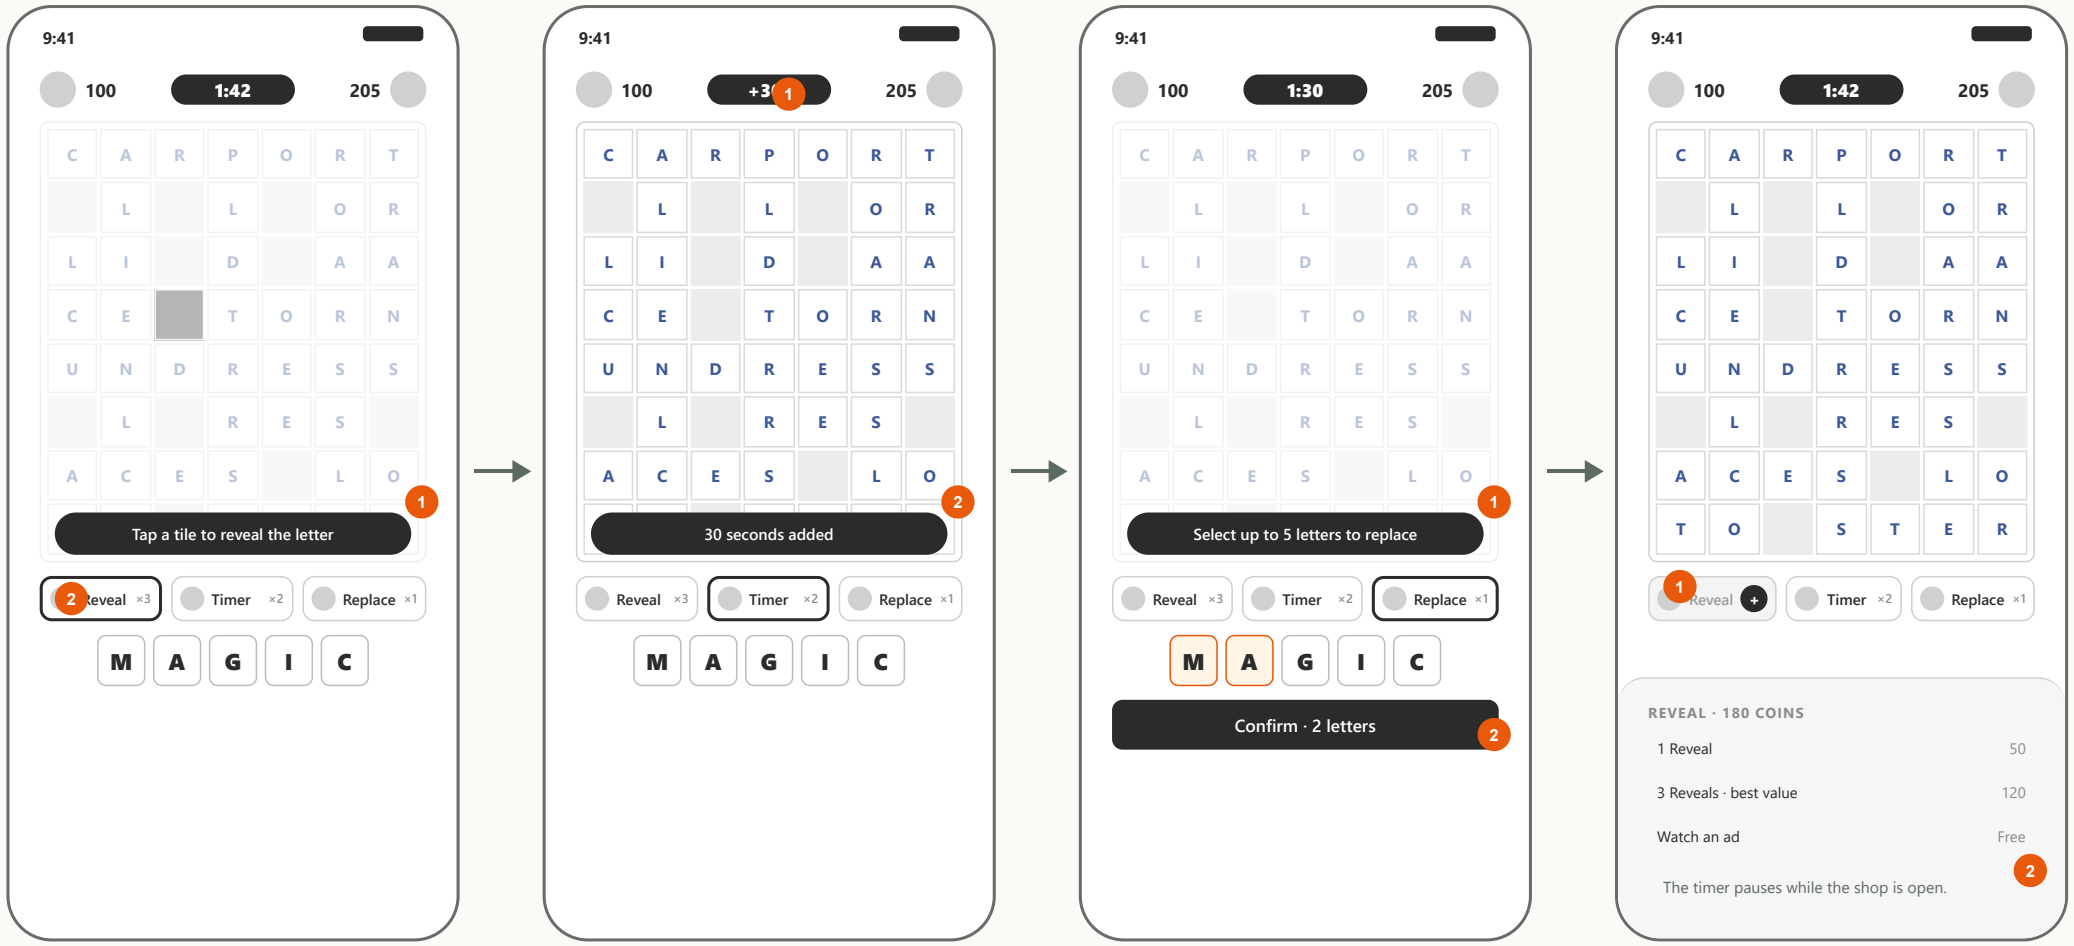

1. Placed tiles are highlighted.
2. Used letters leave a gap in the rack.

7 Not a word

1. Explains why, then returns the tiles.
2. Submit stays off until the word changes.

8 Word scored

1. Your score animates up in the header.
2. Says where the points came from.

9 Reveal

1. The instruction appears only during the action.
2. The active power-up is highlighted.

10 Timer

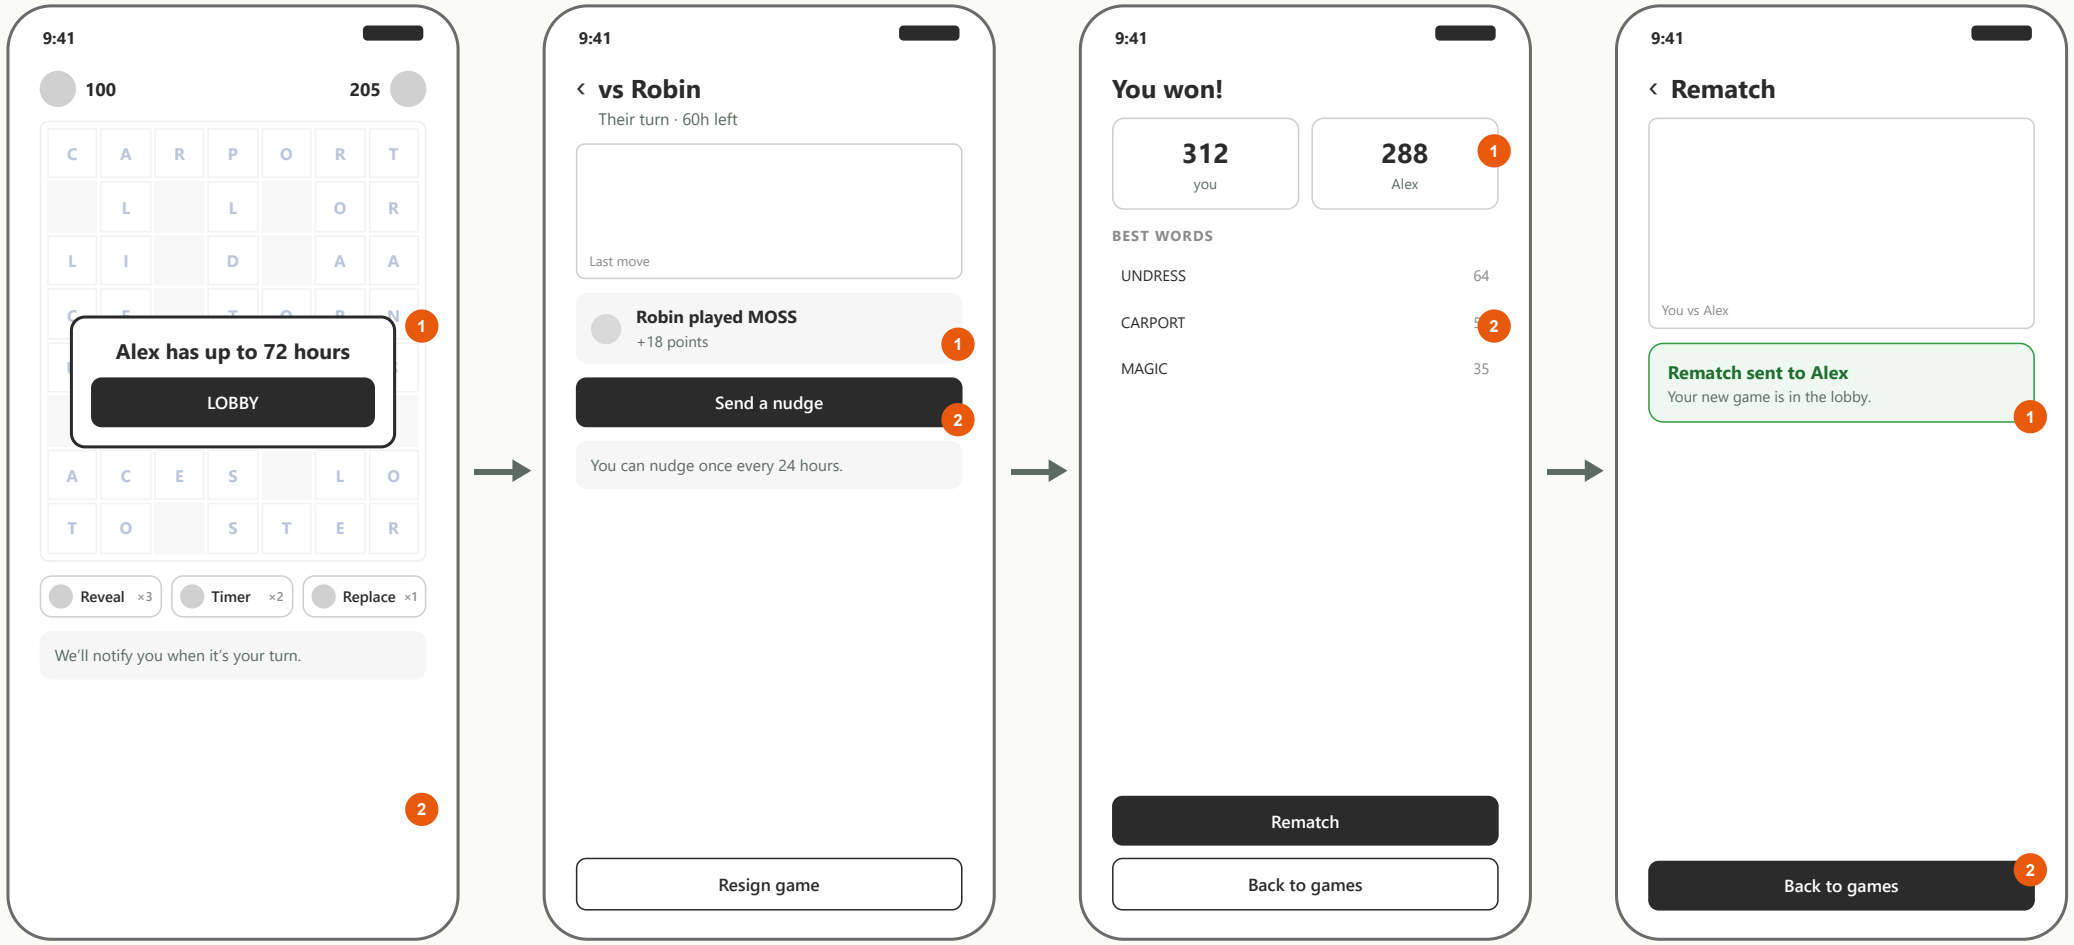

1. The timer itself animates the extra time.
2. No overlay blocks the board.

11 Replace

1. Choose first, then confirm.
2. The button counts the letters.

12 Out of a power-up

1. An empty power-up shows a +.
2. The turn timer pauses while buying.

13 Opponent's turn

1. Waiting is a stated state.
2. A notification promise replaces checking.

14 Nudge

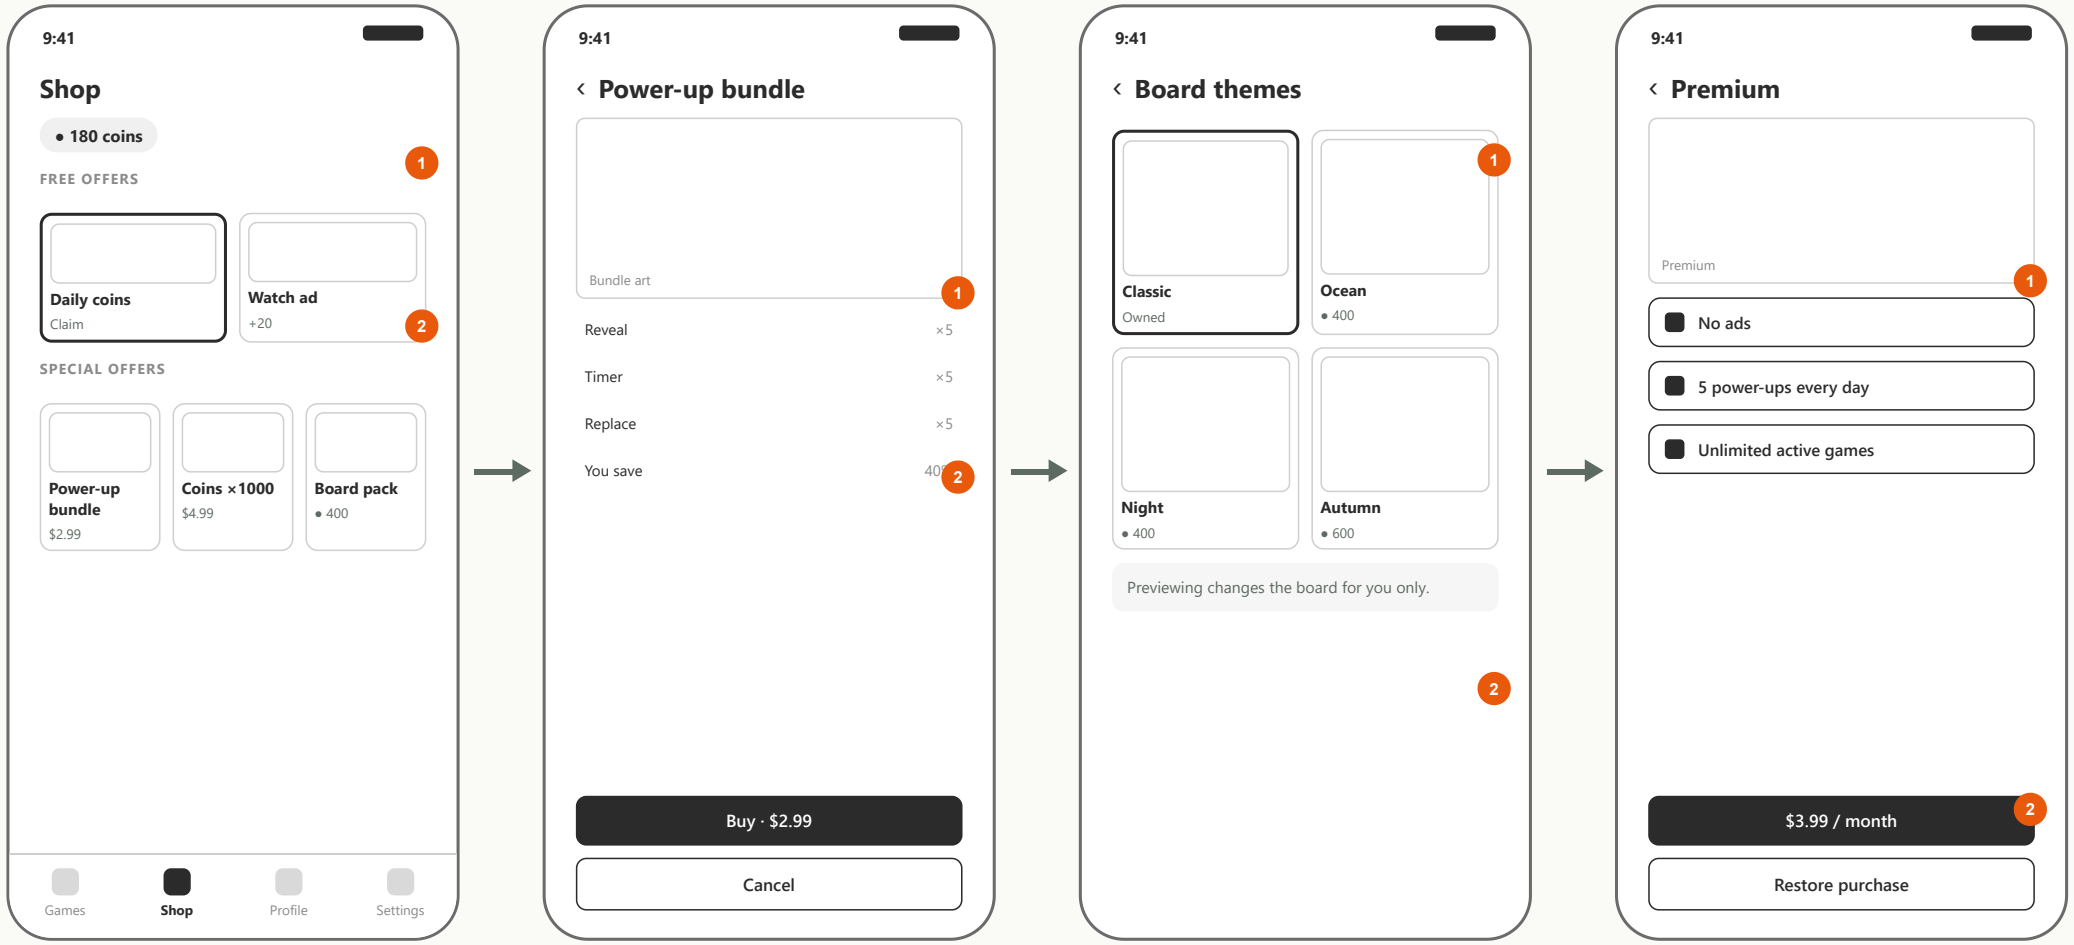

1. A polite nudge, rate-limited.
2. Resign is available but last.

15 Game over

1. Final scores side by side.
2. Best words make the result memorable.

16 Rematch sent

1. Confirms what happened.
2. Points to where the game now lives.

17 Shop

1. Balance at the top of the shop.
2. Free offers come before paid ones.

18 Bundle detail

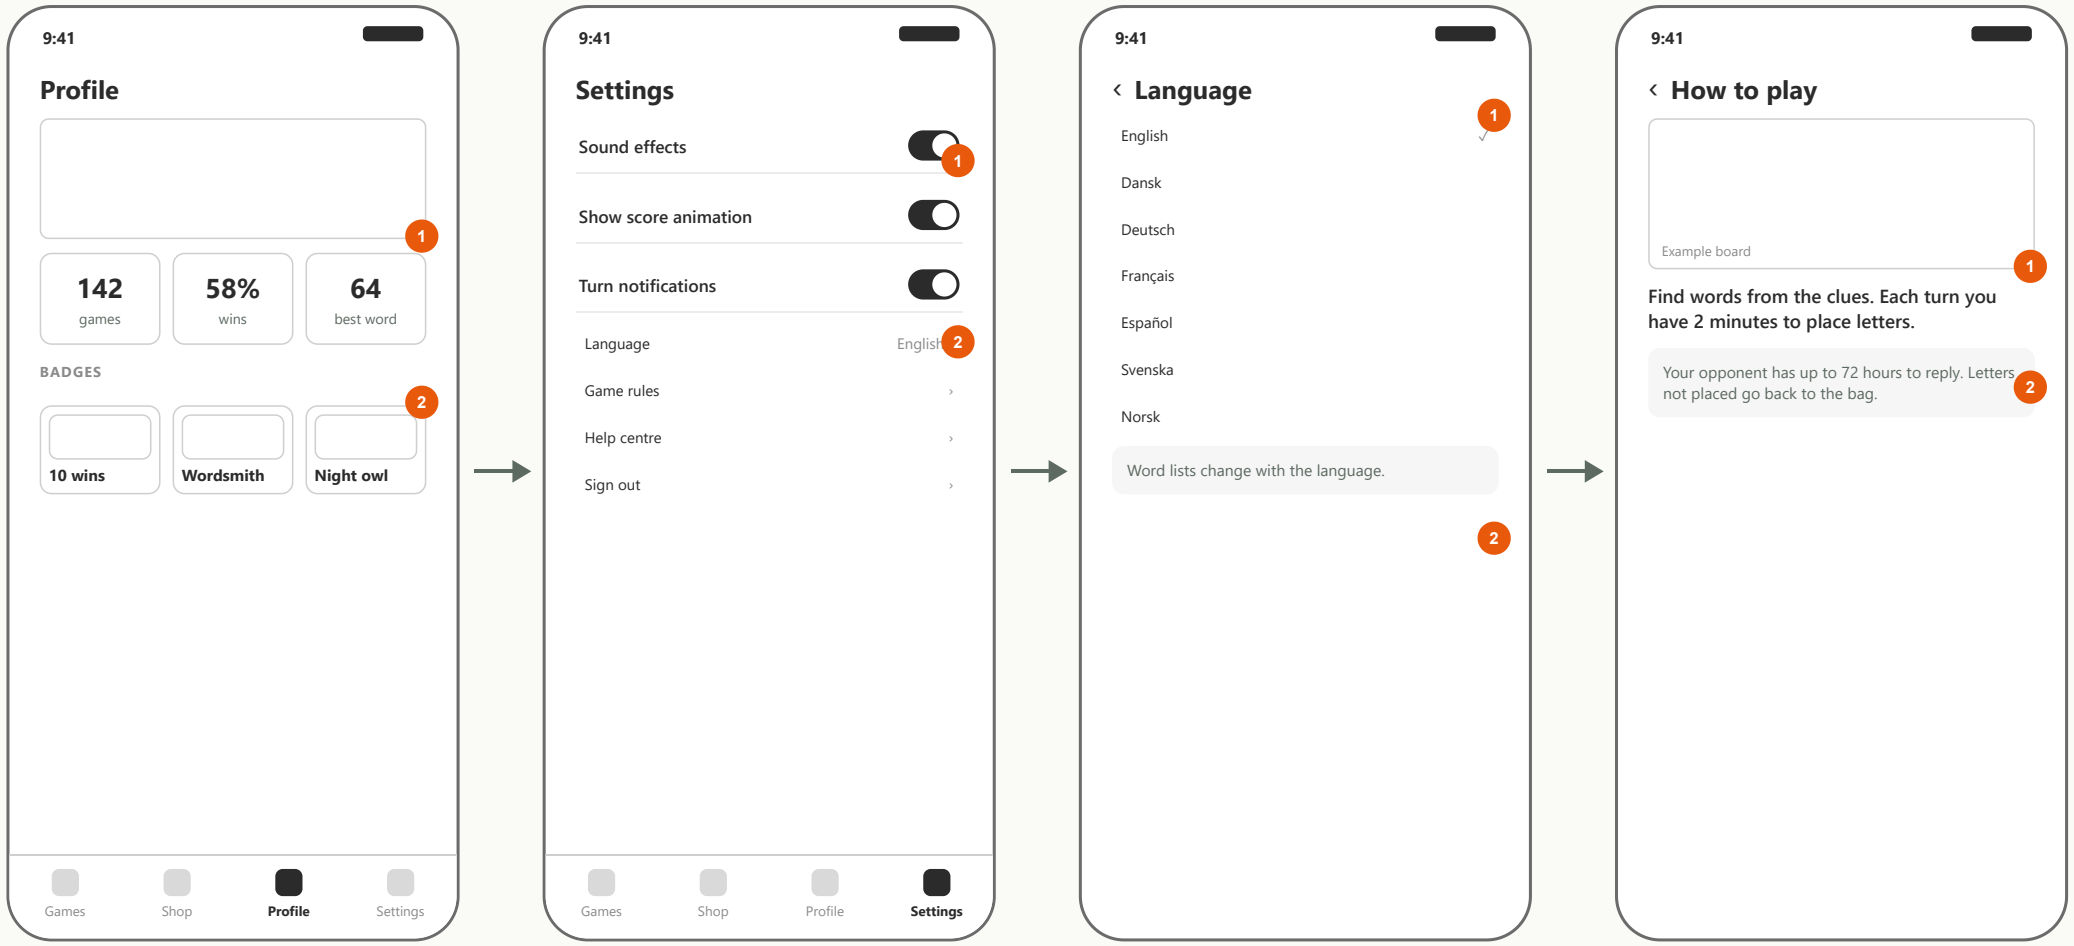

1. Contents itemised.
2. Savings are explicit.

19 Board themes

1. Owned and priced themes in one grid.
2. Explains who sees the theme.

20 Premium

1. Benefits as a checklist.
2. Restore purchase is always there.

21 Profile

1. Three stats that matter.
2. Badges reward play styles.

22 Settings

1. The reskin keeps every setting from the shipped app.
2. Rules and help are one tap away.

23 Language

1. The current language is ticked.
2. Warns that the dictionary changes too.

24 Game rules

1. An example board teaches faster than text.
2. Timing rules stated plainly.

Powerup 1 - REVEAL

Step 1

Step 2

Step 3

Step 4

Particle effects and animations happen for each state.
CTA PILL Appears and dissapears it doesn't need to be on screen the entire time.

Powerup 2 - TIMER

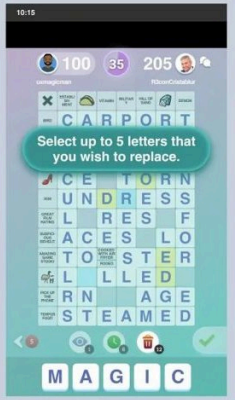

Timer is an animation state happening within unity. When the user taps on the timer it automatically triggers the animation with the 30 seconds appearing on the timer. We are looking at ways to make this fun and exciting using animations. In this case we wont have a visual blocker hiding the content.

Powerup 3 - REPLACE

1. Replace Letter Pieces

2. Replace Letter Pieces

3. Confirmed and letters replaced

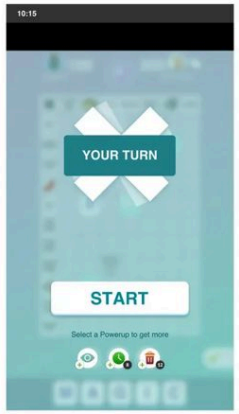

Animation and visual pass is being done in unity as we test what works and what doesn't work.

Scenario 1

We will continue using our old 'Your Turn' animation, with colour tweaks, as it better accomodates for translations.

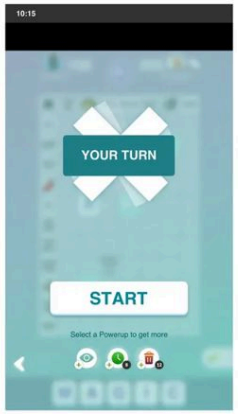

From 'Your Turn' in Lobby:

We are bringing back the START button to Scenario 1, since users now have purchasables to consider here.

Scenario 2

When it becomes your turn and you are looking at the board:

Highlighted powerups should be visible in ALL SCENARIOS - so more powerups are always purchaseable.

~~Here we have the powerups (that a user already has a number of) slightly faded to indicate that they are not usable when looking at this screen.~~ **TBD - Waiting on powerup icon pass**

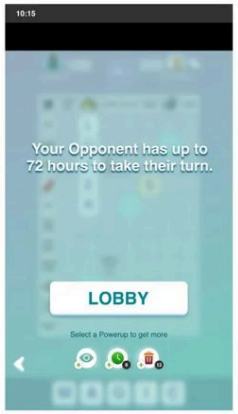

Scenario 3

After confirming your turn, you have 2 minutes that the board is visible. Once 2 minutes are up, clues + letters disappear, text overlays:

2 minutes pass

Scenario 4

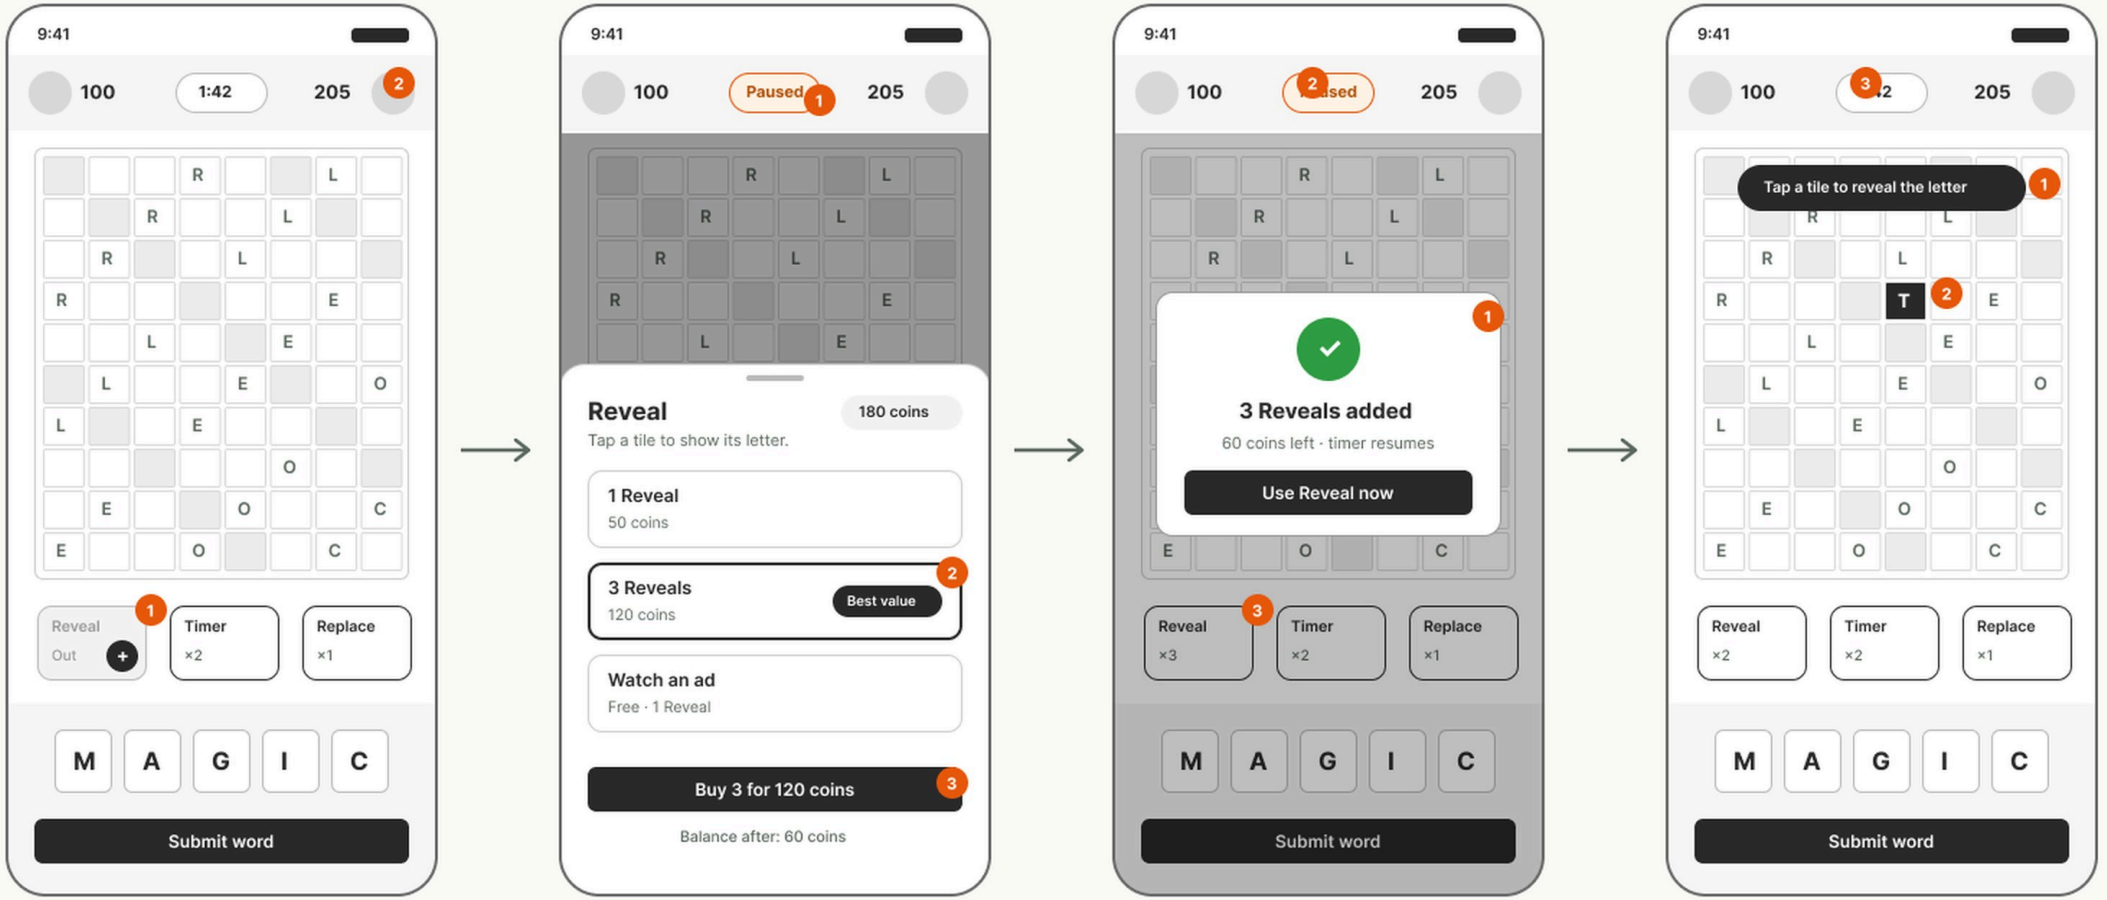

Scenario 5

Opponent's Turn

Notes:

- Highight around opp's picture and score. **Please add some kind of 'shine' animation to this so it stands out.**
- Green 'online' indicator
- Name field changes to "[opponent] taking their turn"
- Letter tray background disappears, instead overlay applies over both letters AND powerups.
- Back button glows for easier visibiltiy
- Powerups that you are OUT OF are visible (for purchase)
- Addition of a + icon in the bottom left of powerups to purchase more (go to powerup purchase flow)

1 Out of a power-up

1. An empty power-up shows a + instead of disappearing.
2. The turn timer is visible before buying.

2 Shop opens over the board

1. The timer pauses while the shop is open.
2. The best value is marked; a free option is offered.
3. The balance after buying is shown before tapping.

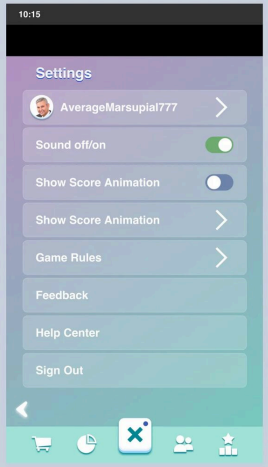

3 Purchase confirmed

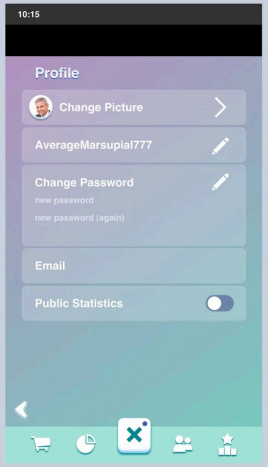

1. Clear confirmation of what was added and what is left.
2. The timer resumes only after the sheet closes.
3. The tray count updates immediately.

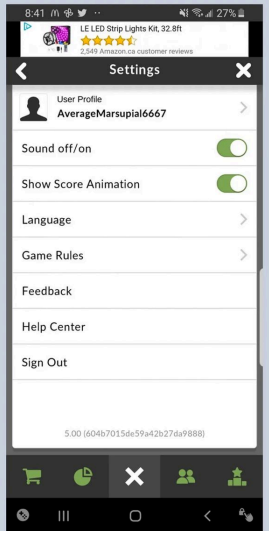

4 Back to the board, ready

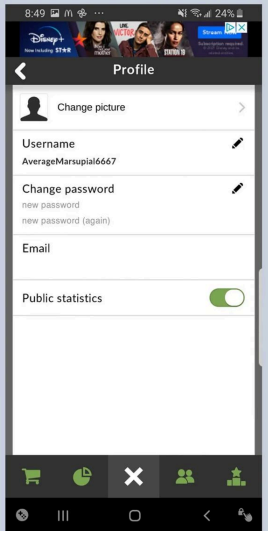

1. The instruction pill appears only while it is needed.
2. The revealed letter animates in place.
3. Time left is exactly what it was before buying.

Game Rules
What is this game about?
In Kryss you solve crossword puzzles with and against your friends.
You can play online with Facebook-friends, Kryss-friends or random opponents.
The game is turn-based and each turn starts with the players being assigned 5 random letters - until all letters are used. When it's your turn, you have 1 minute to place as many letters as possible on the game board.
Letters not placed correctly you will keep to the next round.

STARDUST CANVAS · SITEMAP

STARDUST CANVAS · PLAY-TO-PAINT FLOW

1 Welcome

1. Explains the loop in one line.
2. Returning players skip setup.

2 Pick your sign

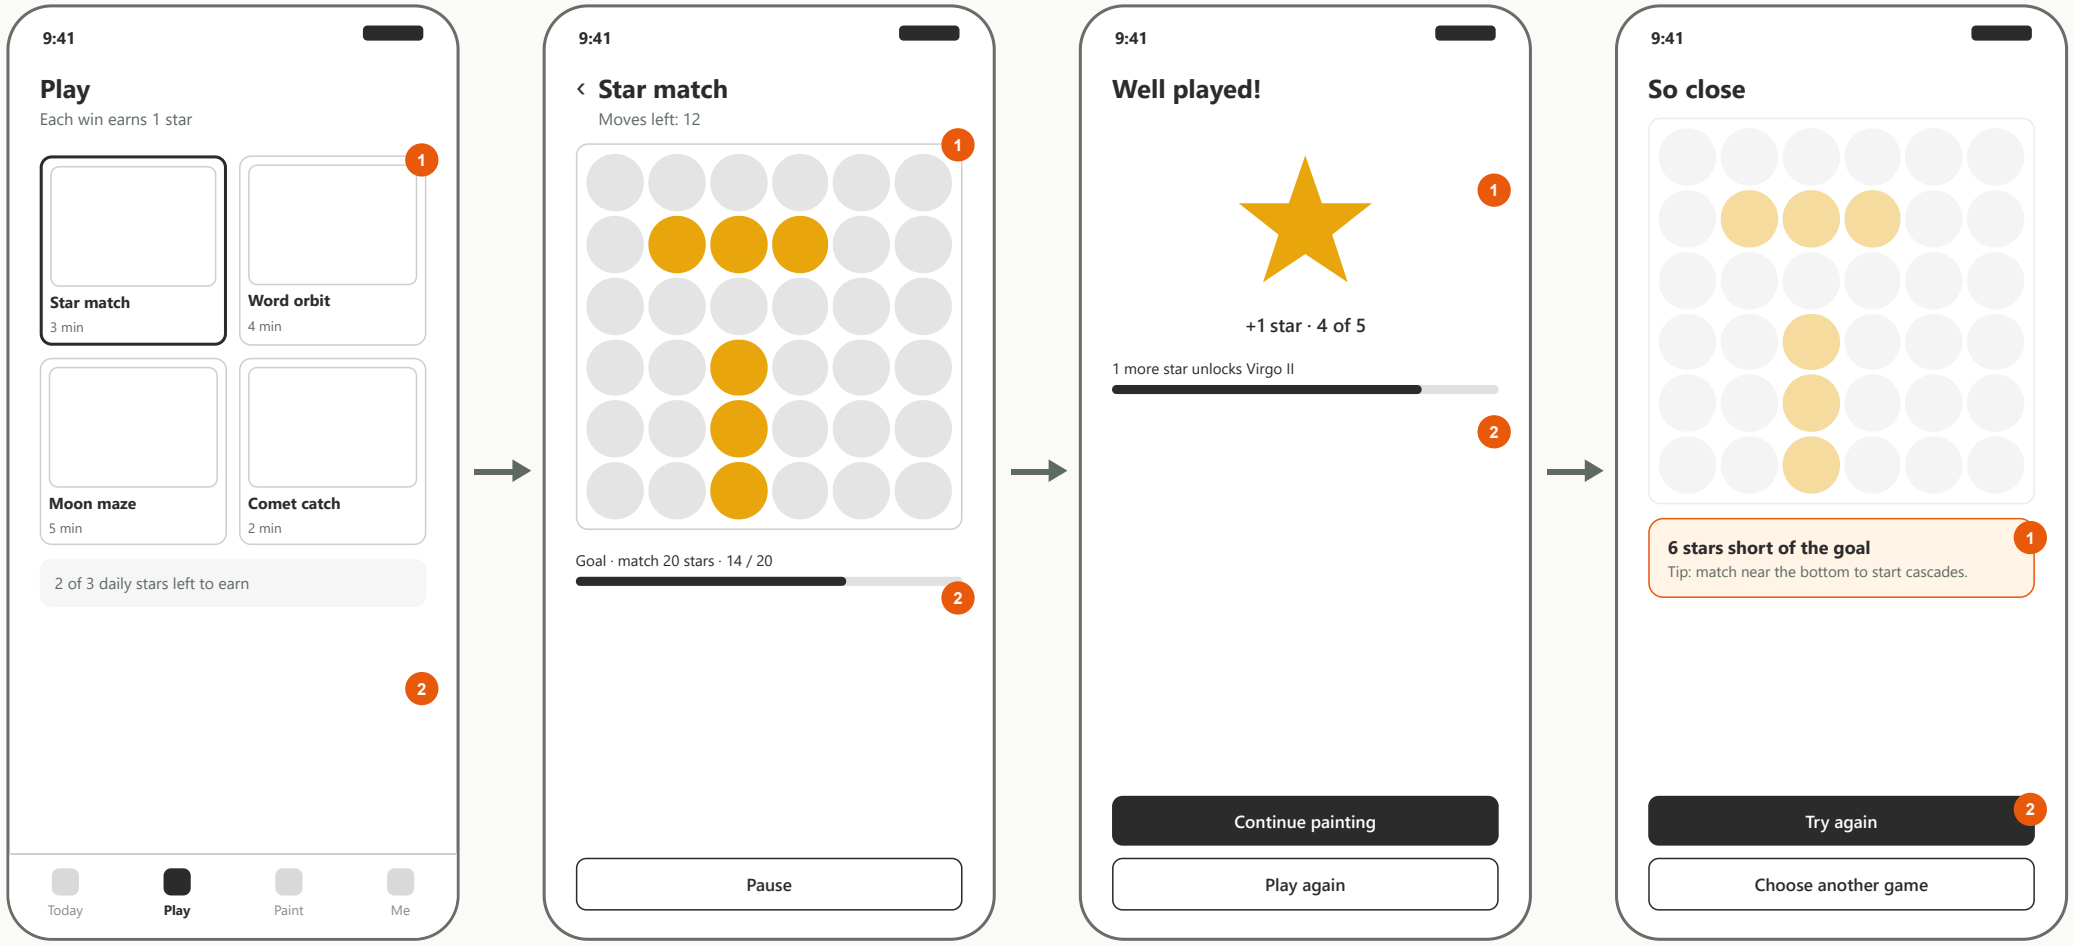

1. All twelve signs on one screen.
2. A birthday fallback for people who don't know.

3 Home

1. Today's horoscope leads.
2. Stars always point to what they unlock.
3. Unfinished paintings are one tap away.

4 Daily horoscope

1. Readable text first, art second.
2. Reading leads naturally into play.

5 Choose a game

1. Game length shown before starting.
2. Daily limit is visible, not a surprise.

6 Star match

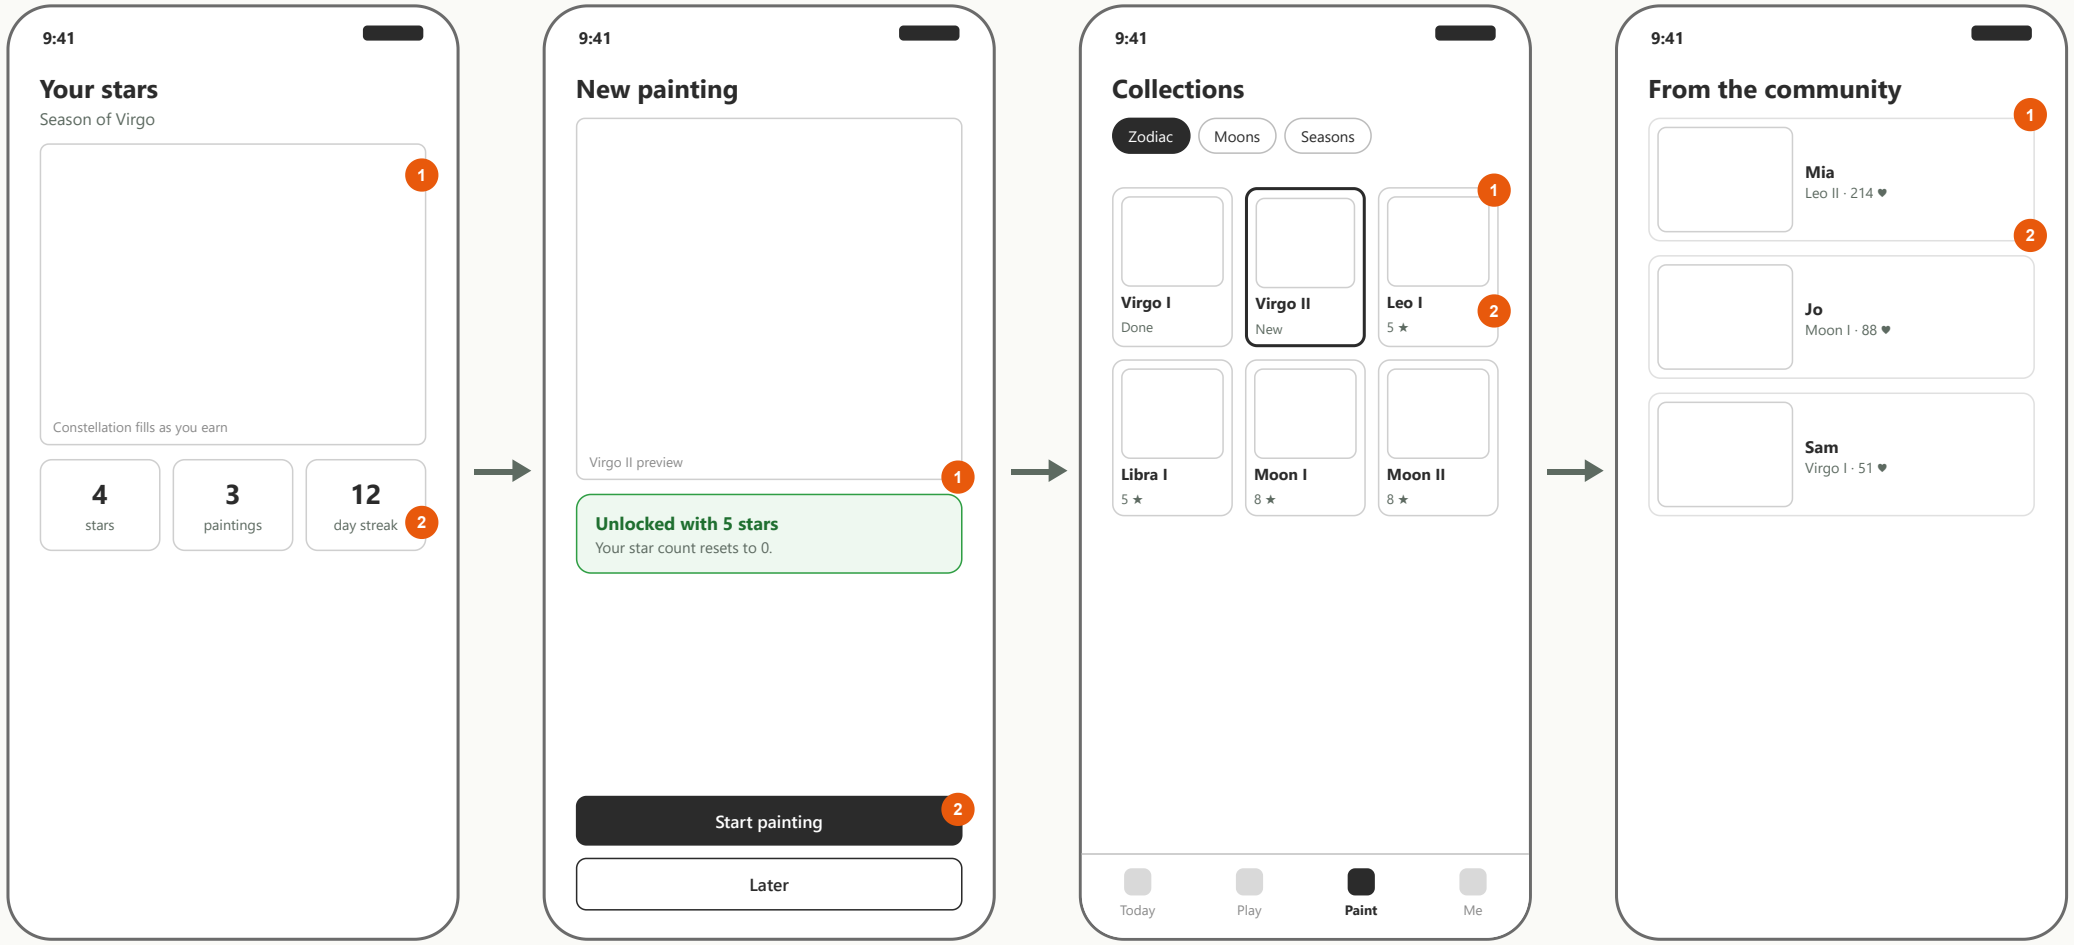

1. Moves left in the header.
2. Progress toward the goal under the board.

7 You earned a star

1. The reward is the hero of the screen.
2. Ties the star to the next painting.

8 Out of moves

1. Says how close you got, plus one tip.
2. Retry or switch, never a dead end.

9 Star collection

1. Stars form your sign's constellation.
2. Streaks shown, never threatened.

10 Painting unlocked

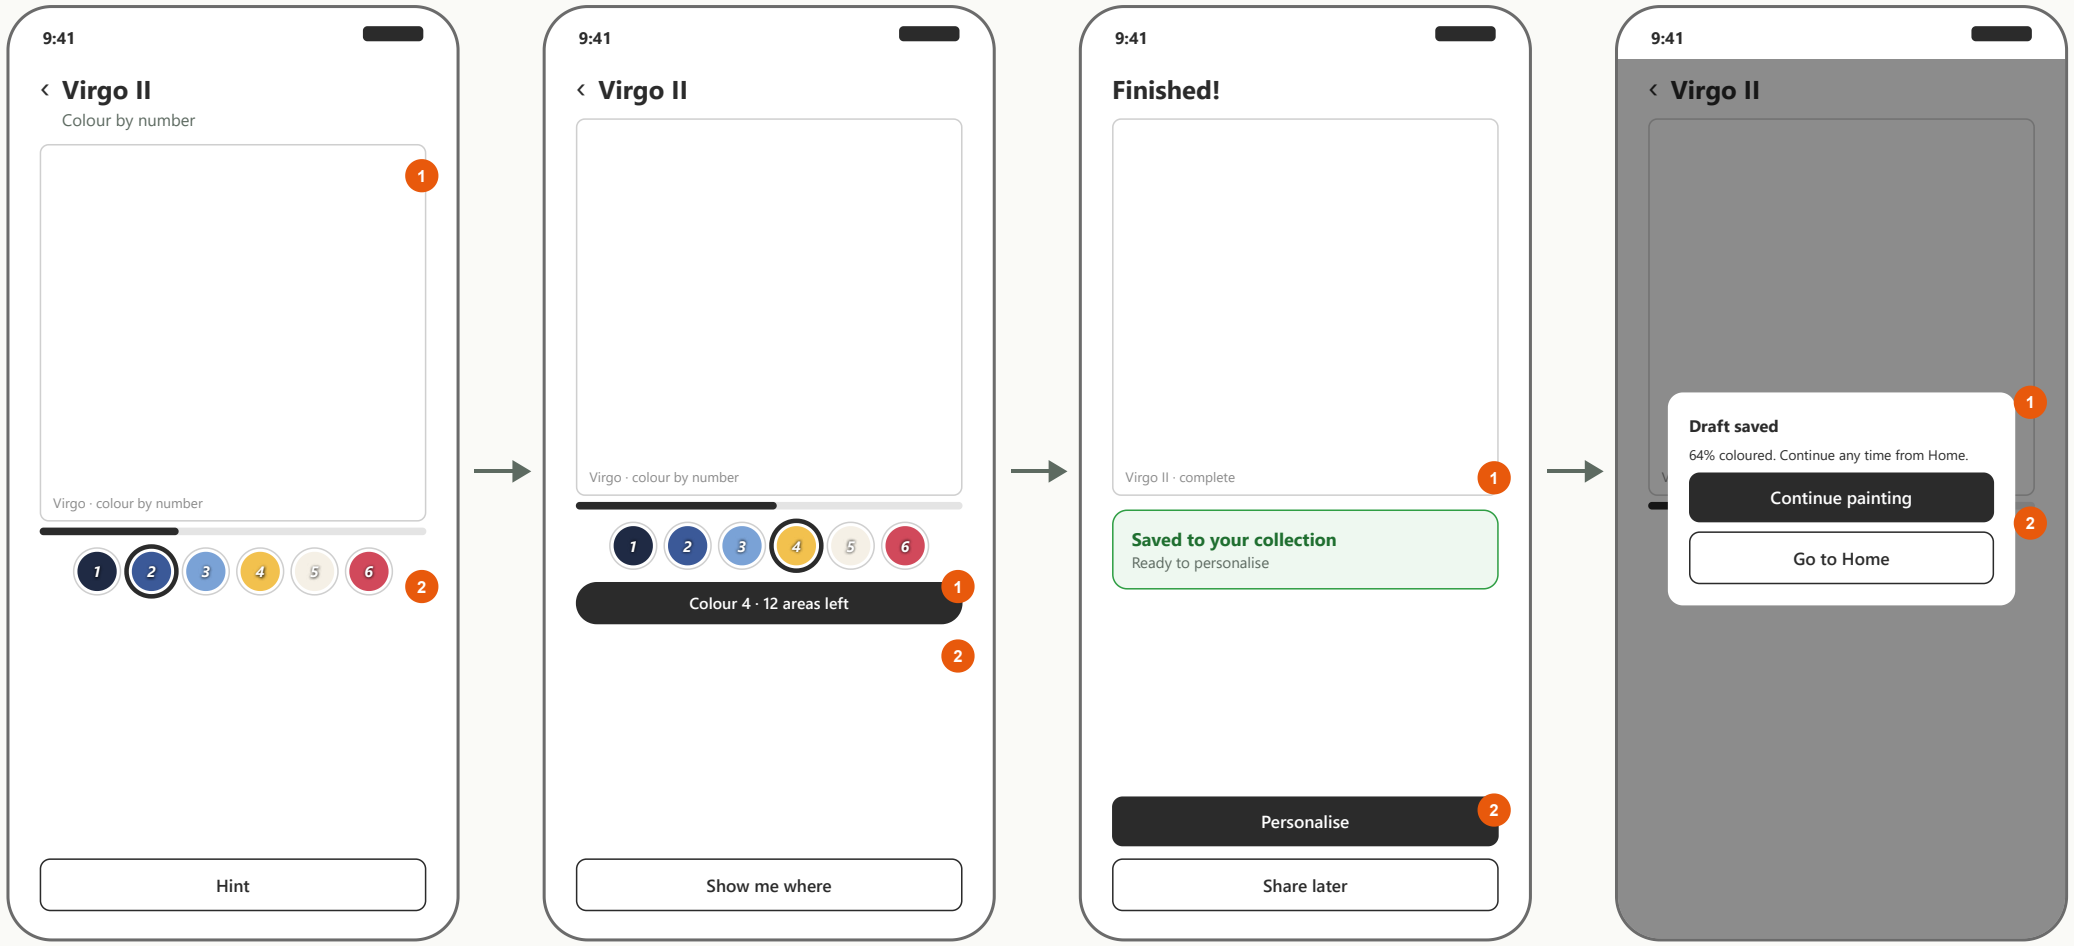

1. Says what the stars were spent on.
2. Later keeps it ready on Home.

11 Collections

1. Locked paintings show their star price.
2. New and done states are labelled.

12 News feed

1. Shared paintings inspire, no pressure.
2. Only things people chose to share.

13 Paint

1. Overall progress is a thin bar under the canvas.
2. Each colour number matches the canvas.

14 Palette and hints

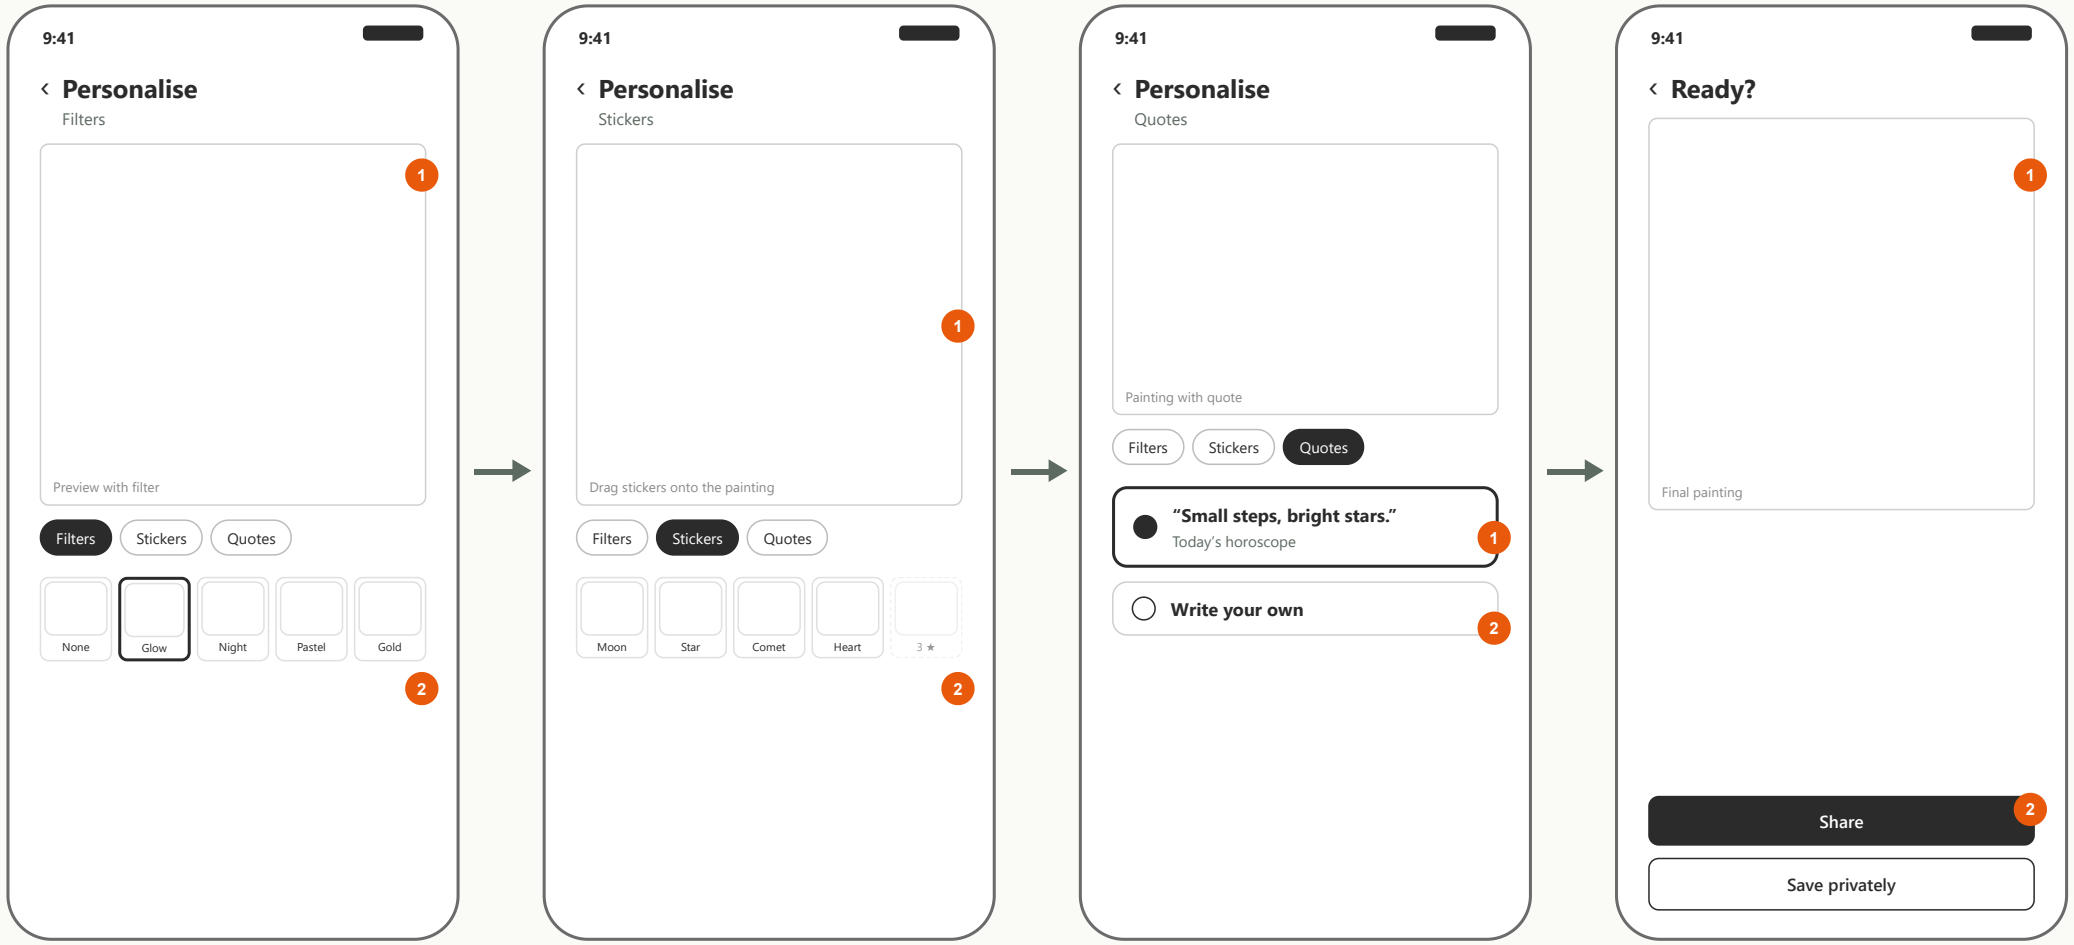

1. The selected colour shows areas left.
2. A hint shows where, not the answer.

15 Painting complete

1. Saved automatically on completion.
2. Personalising is optional.

16 Interrupted

1. Leaving or a phone call never loses work.
2. Home will show the draft first.

17 Filters

1. Live preview on the real painting.
2. One row of filters, one selected.

18 Stickers

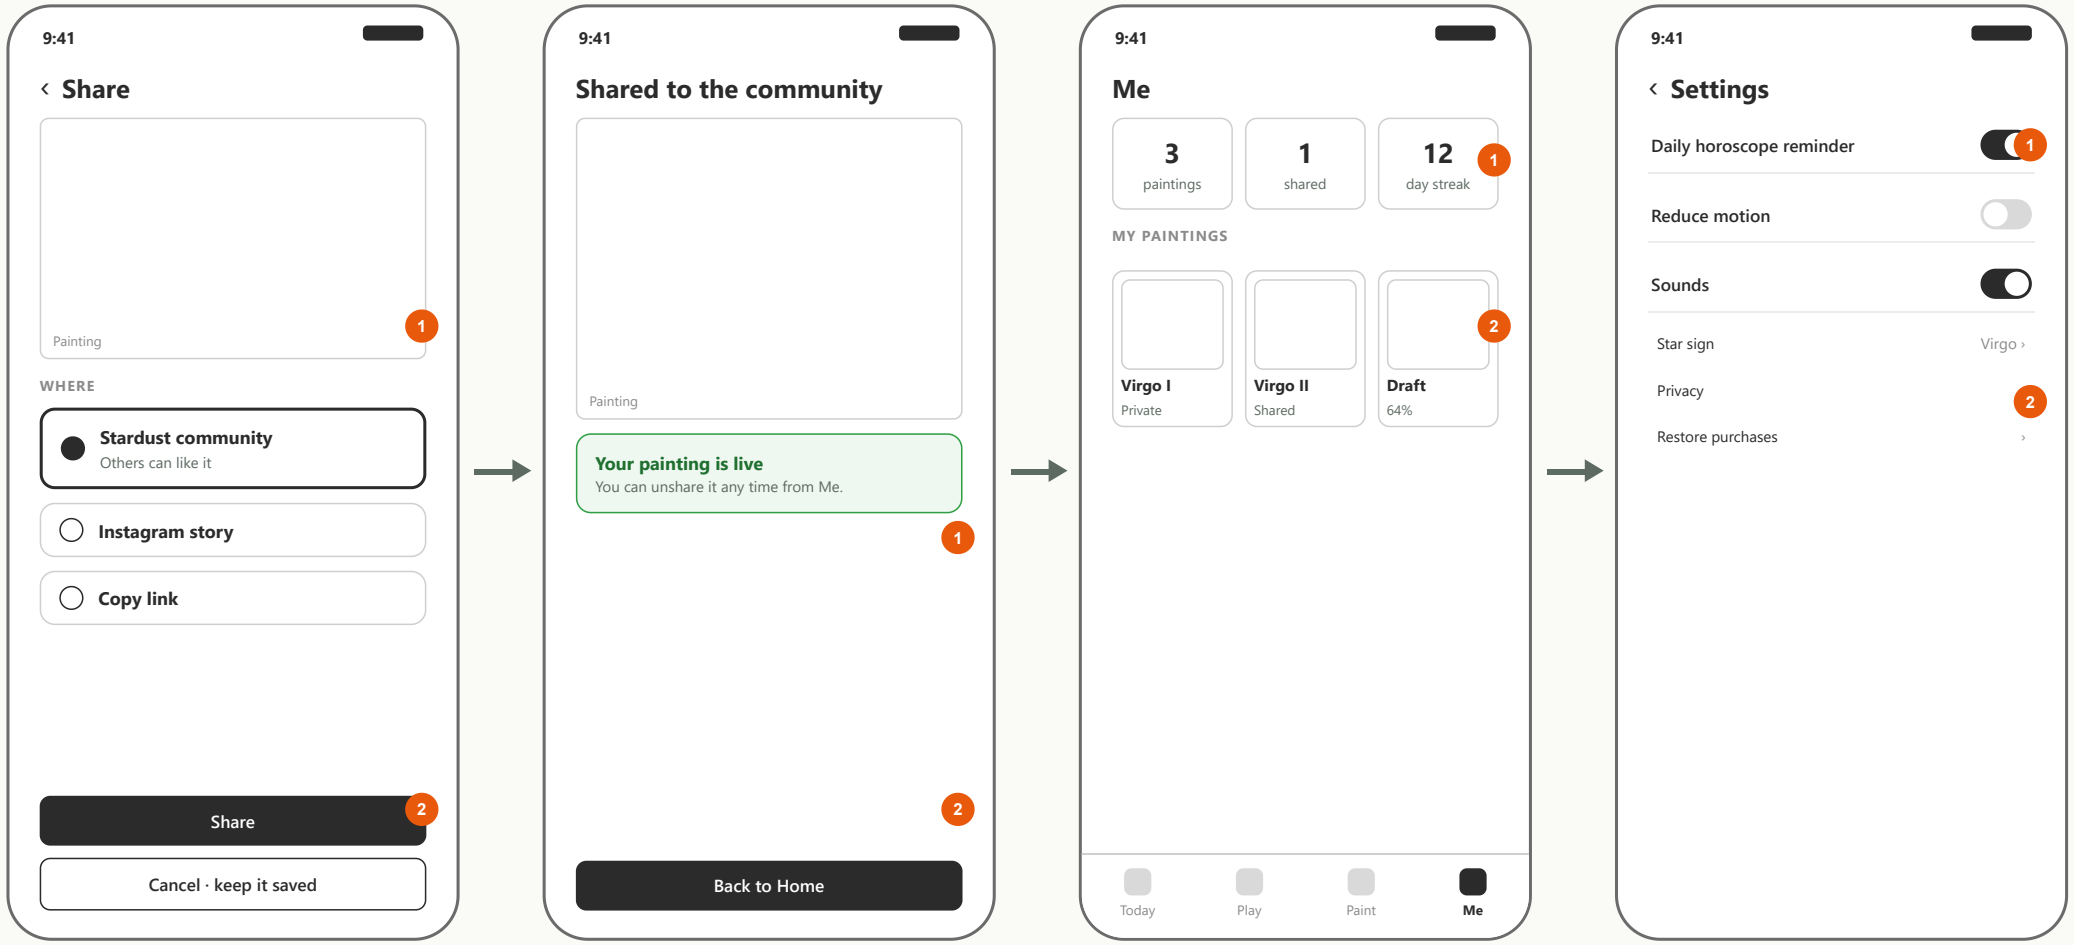

1. Drag, pinch to resize, tap to remove.
2. Locked stickers show their star cost.

19 Quotes

1. Suggests a line from today's horoscope.
2. People can write their own.

20 Review

1. One last full-size look.
2. Saving privately is an equal choice.

21 Share

1. Community sharing is opt-in.
2. Cancel confirms the painting is kept.

22 Shared

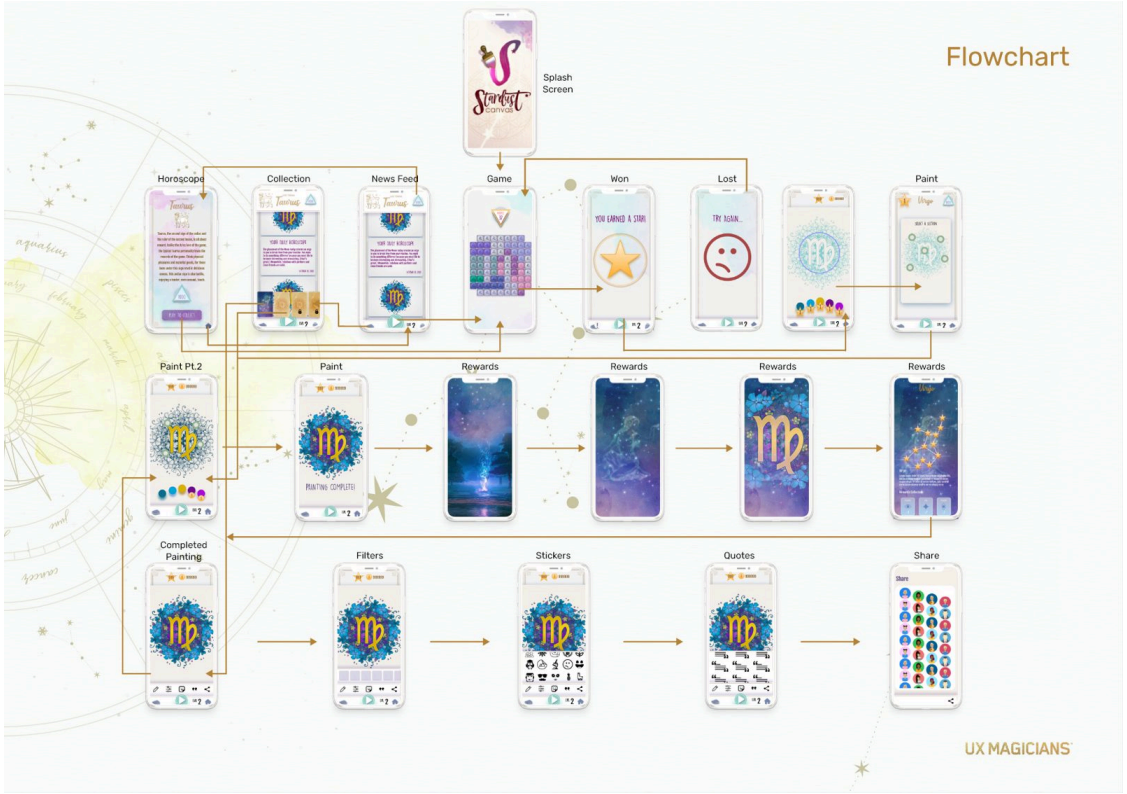

1. Confirms where it went.
2. Undo is promised, and easy to find.

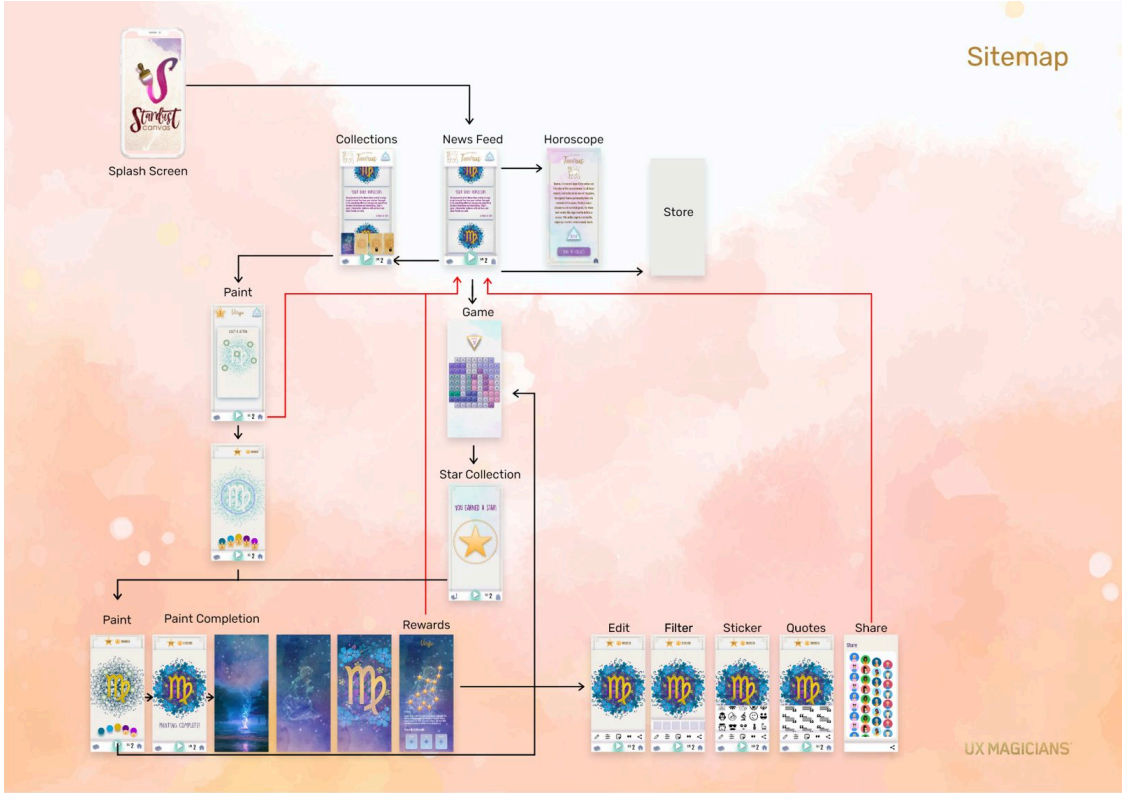

23 Me

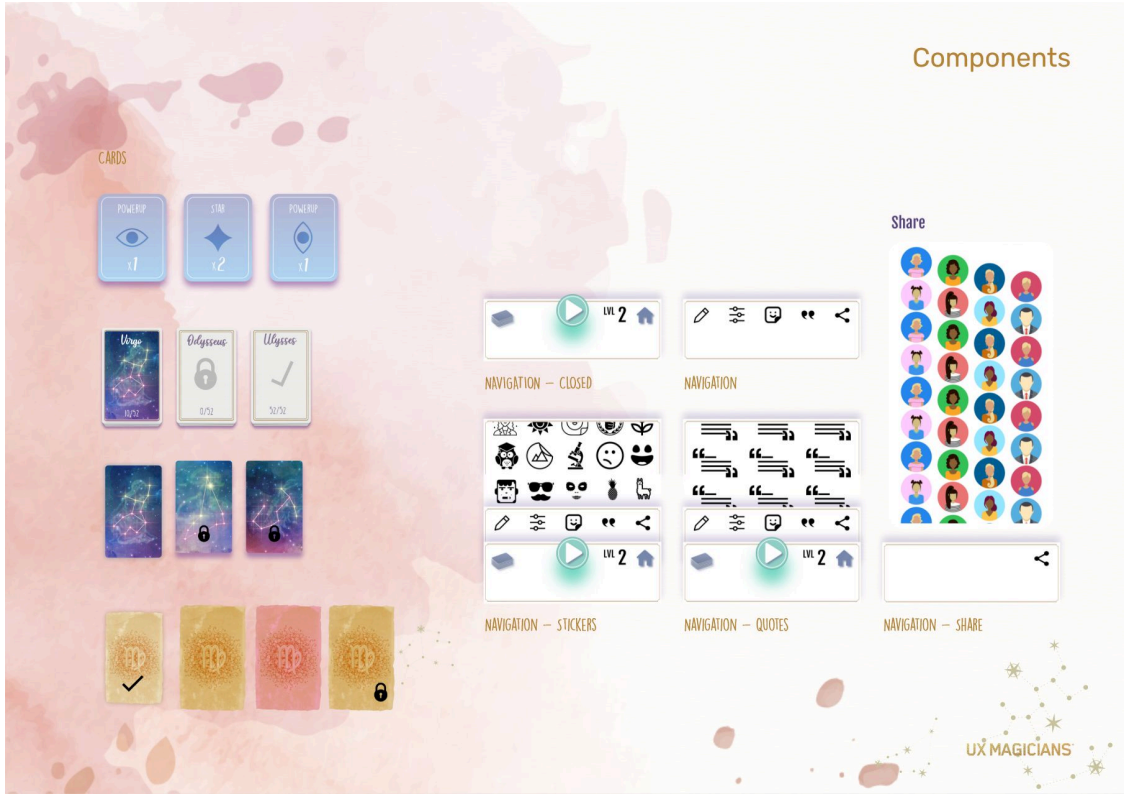

1. Every painting shows private or shared.
2. Drafts live with finished work.

24 Settings

1. One reminder, off by default after day 7.
2. Sign can be changed later.

2. The free gift is always first on the right.

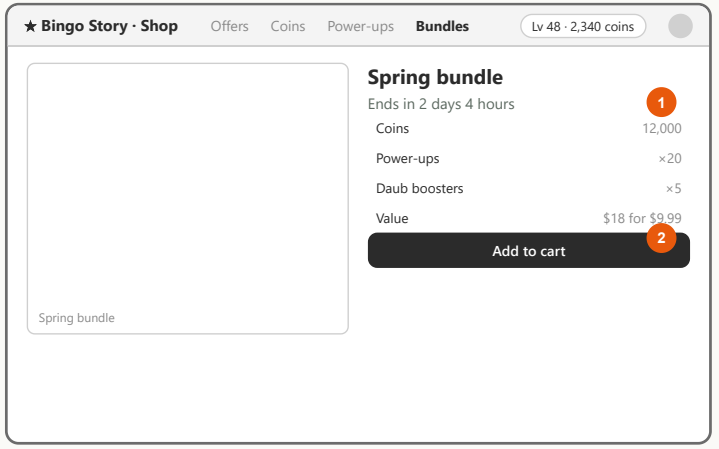

4 Daily gift claimed

1. Confirms the gift went to the game.
2. Returns to shopping in one tap.

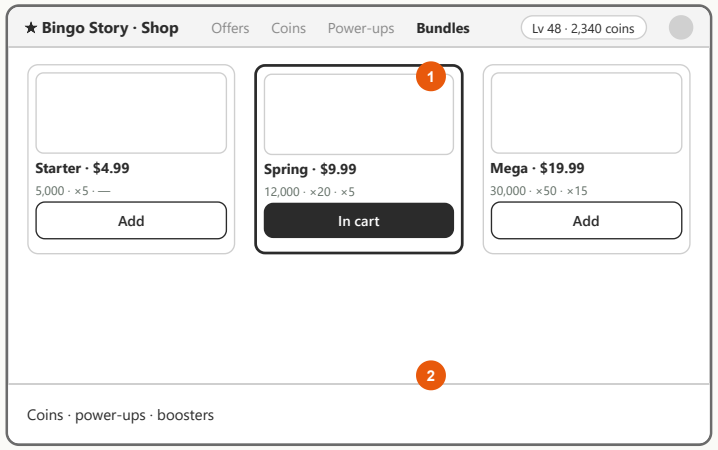

5 Coins

1. Sorting by value, not just price.
2. Bonus percentages make value comparable.

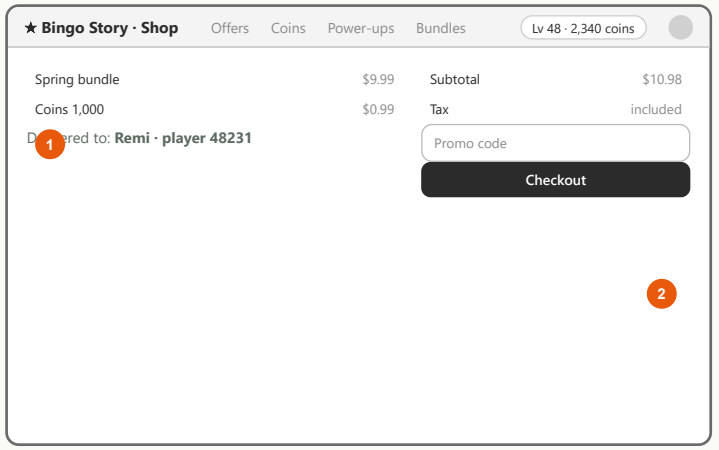

6 Offer detail

1. Contents itemised with a time limit.
2. Value claim is specific.

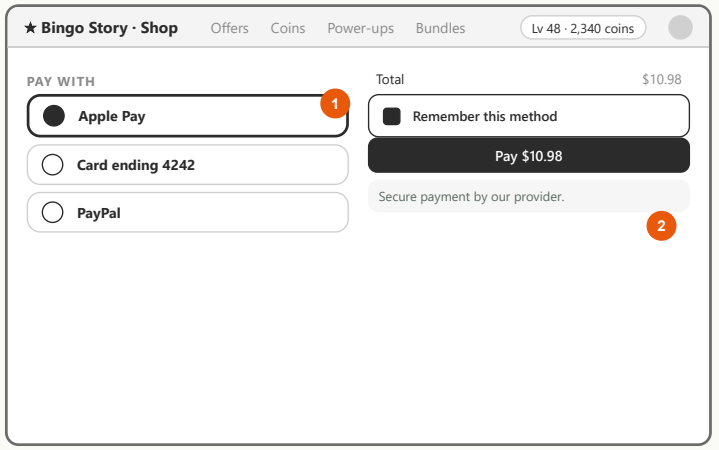

7 Compare bundles

1. Same rows for every bundle, so they compare.
2. The legend explains each column.

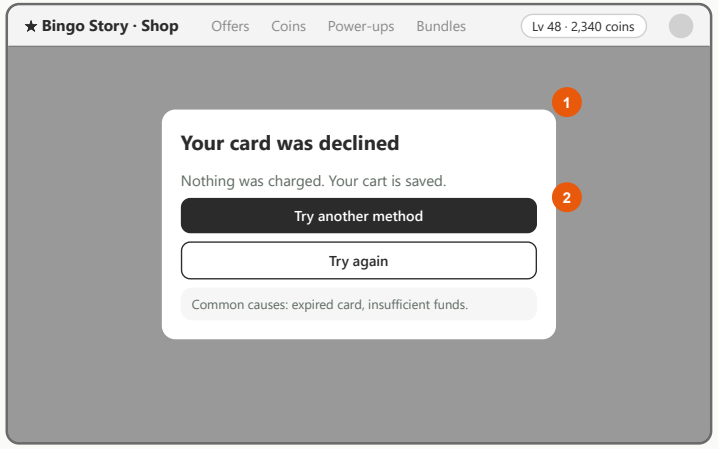

8 Cart

1. The delivery target is shown before paying.
2. Promo codes live in the cart.

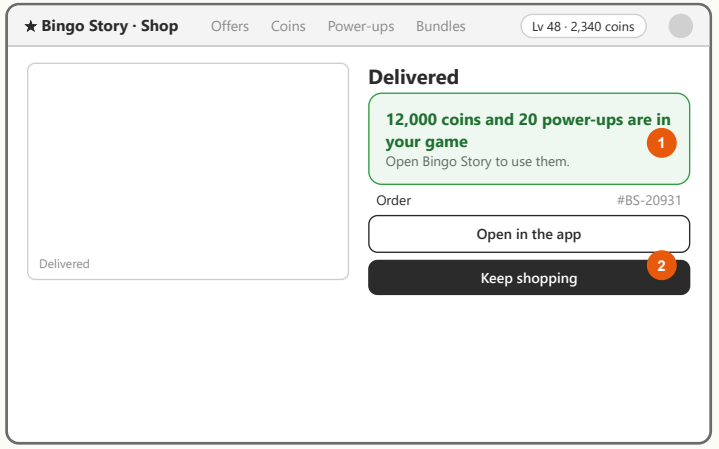

9 Payment

1. Saved methods first.
2. The button says the exact amount.

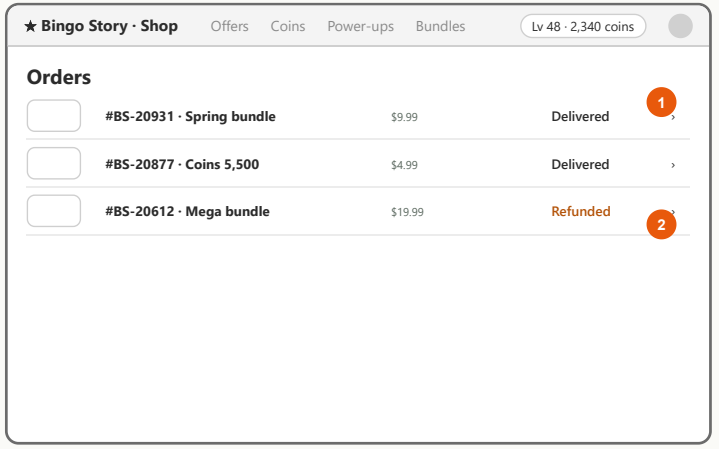

10 Payment failed

1. States that nothing was charged.
2. The cart is kept for the retry.

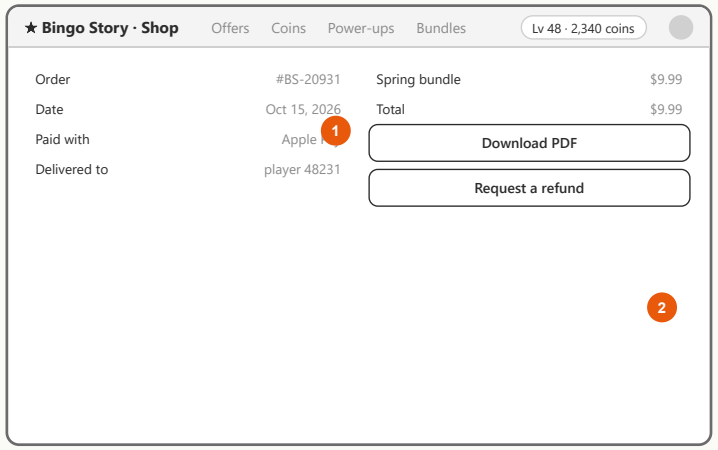

11 Delivered to the game

1. Confirms delivery, not just payment.
2. A deep link opens the game.

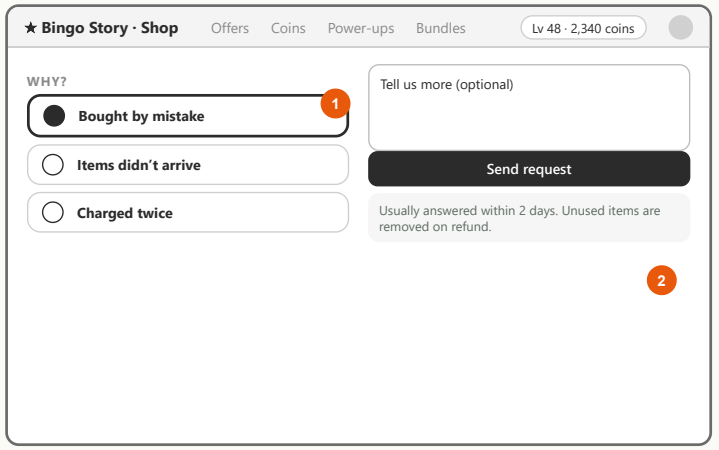

12 Order history

1. Status on every order.
2. Each order opens its receipt.

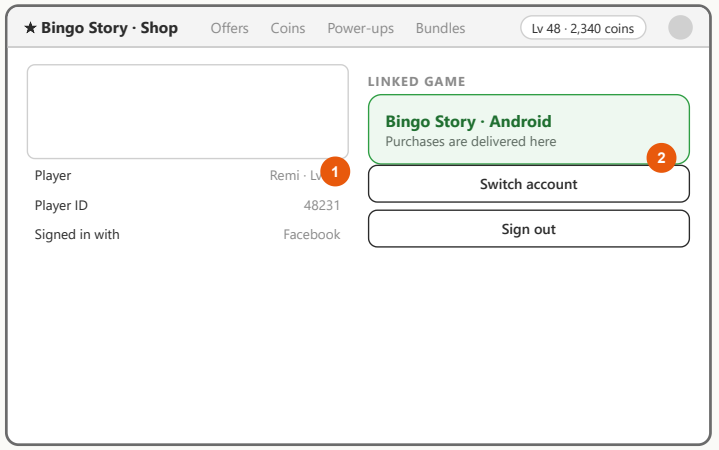

13 Receipt

1. Everything support would ask for.
2. Refund requests start from the receipt.

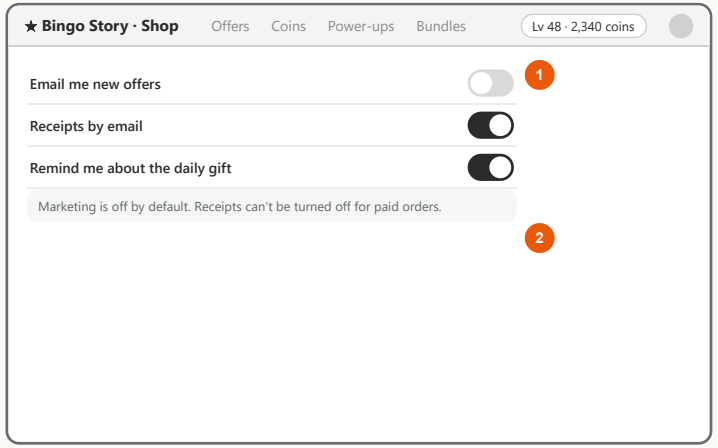

14 Refund request

1. Common reasons as one tap.
2. Sets expectations on time and outcome.

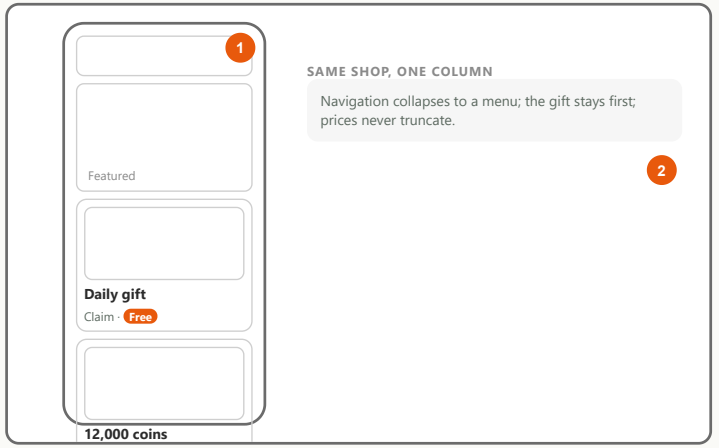

15 Account

1. The player ID is always findable.
2. Shows which device receives purchases.

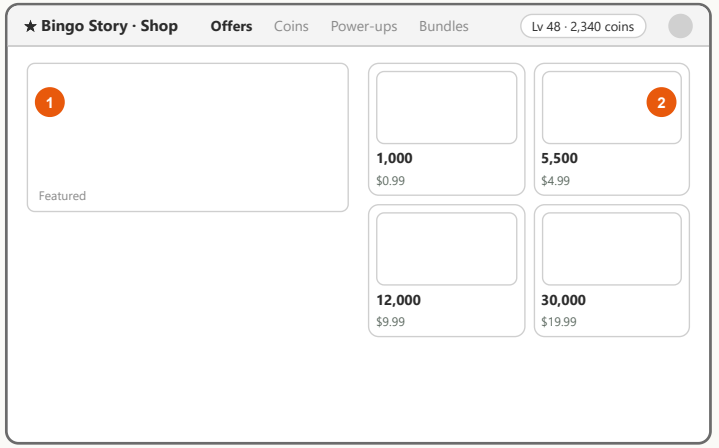

16 Notifications

1. Marketing is opt-in.
2. Explains the one setting that can't change.

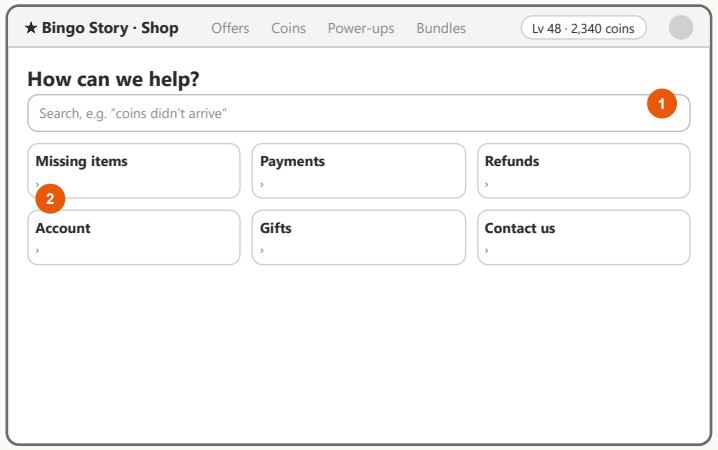

17 Shop on a phone

1. One column, same order of priorities.
2. Prices and buttons stay full size.

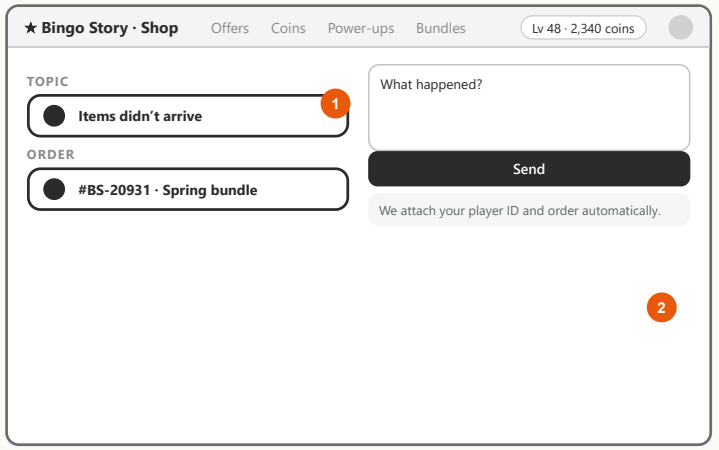

18 Shop on a tablet

1. Two columns at tablet width.
2. Touch targets sized for fingers.

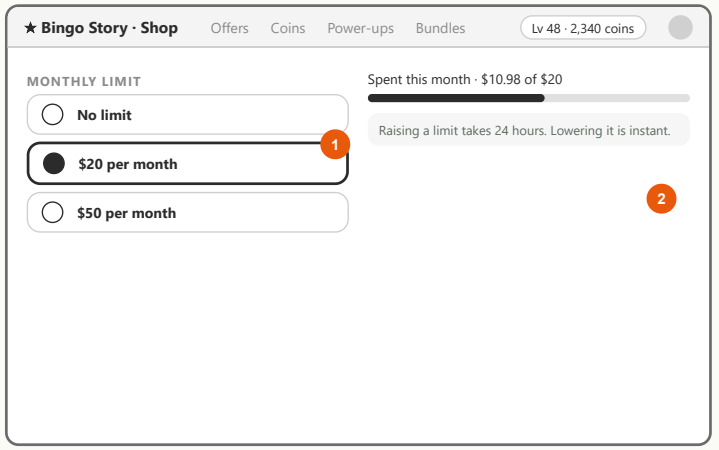

19 Help centre

1. Search in the customer's own words.
2. Top issues as one-tap topics.

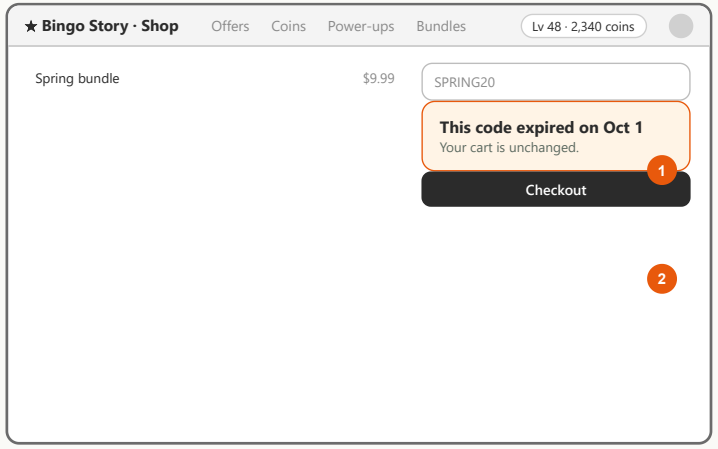

20 Contact support

1. The order is picked, not typed.
2. Player ID attached automatically.

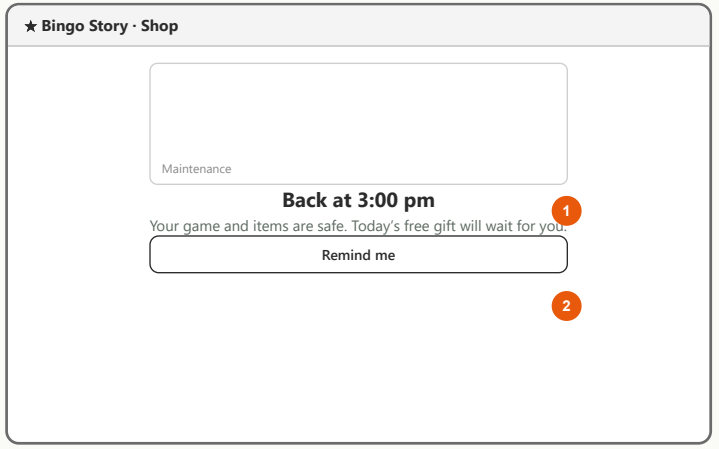

21 Spending limit

1. Players can set their own limit.
2. Raising is delayed; lowering is instant.

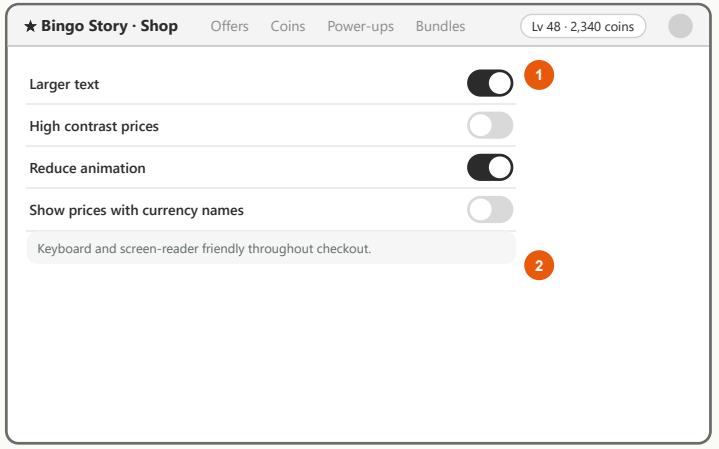

22 Promo code

1. Says why the code failed.
2. A failed code never empties the cart.

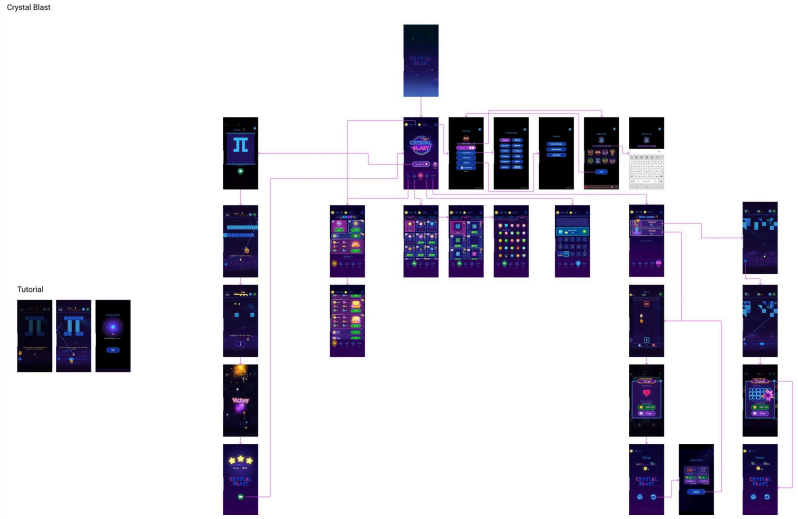

23 Shop maintenance

1. Gives a time, not "soon".
2. Reassures about items and the gift.

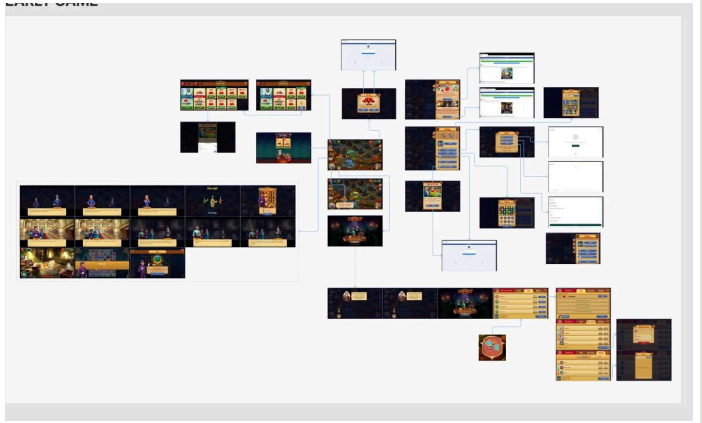

24 Accessibility

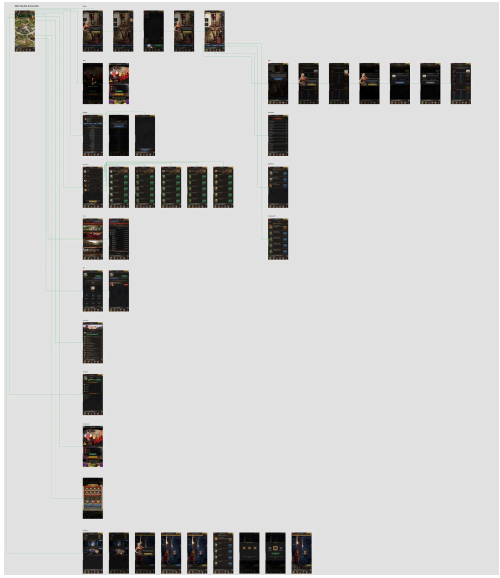

1. Readable prices are an accessibility setting.
2. Checkout works with keyboard and screen readers.
